## ACKNOWLEDGEMENT

In the name of Allah, the Beneficent, the Merciful. All praises be to Allah, Lord of the world who has given the mercy and blessing upon the researcher in completing this Thesis. Peace and salutation be upon the prophet Muhammad SAW who brought us from the worse to the peace or from the bad condition to the better life.

Her greatest appreciation, honor and gratitude to her beloved parents (Drs. H. Muhammad Natsir, A.R and Hj. Nurmiala Tahir, B.A.E), for their valuable supports and moral encouragements in motivating the researcher to finish her study, and also her beloved brother and sisters (Dini, Aina, Irul) for their supports to the researcher in writing this Thesis.

The researcher also would like to express her deepest gratitude to:

1. Dr. H. Muhammad Amri, Lc,M.Ag., as the Dean of Tarbiyah and Teaching Science Faculty.
2. Dr. Kamsinah, M.Pd.I., as the Head of English Education Department.
3. Sitti Nurpahmi S.Pd., M.Pd., as the secretary of English Education Department.
4. Dr. Muhammad Yaumi, M.Hum., M.A. and Syaidah Syamsul, S.Pd.I, M.Ed.TESOL.Int as consultants for their advice, guidance, corrections, and suggestions for this Thesis.

5. All lecturers of English Education Department who have taught and educated the researcher during her study at UIN Alauddin Makassar.
6. Mr. Arham, as The Event Organizer of English Corner who has given a great chance to the researcher in conducting the research.
7. The host of English corner (Fadhillah Yafie), who gave her time so willingly to participate in her research.
8. Her best friends (Afifah, Mawar, Firman, Imma, Fhira, Mirel, Dhyla, Ridha, Dyan, Nisa, Ninik, Nita, Ulfi, Endang, Ulil, and Yusuf for their sincere friendship and assistance during the writing of this thesis.
9. Her beloved family of PBI 3,4 periode 2012 for sharing their knowledge, time, care, and supports.
10. Her beloved Tutors in Cambridge English College ( CEC) (Dr. Kamrida Habe S.pd.I., M.pd, Hardianto Habe S. Pd.I, Ahmed Sardi S.Pd.I, M.Pd, Madani La Bugi S.Pd, Ermawati S.Pd.I, Nahliah S.Pd.I
11. KKNPI Pattani Thailand, Special for ( Mirel, Anggun, Afdhal, Fajar, Riz, Tari, Ansar, ekha, ) for their support in finishing the researcher's study.
12. My Fiance ( Ahmad Patih Sudjai, S.Pd.) Thank you for all your support, and pray for my success.
13. All of the people around the researcher's life whom could not mention one by one by the researcher who has given a big inspiration, motivation, spirit and do'a for him.

May Allah bless them for all of what are they have done.

Finally the researcher felt it was really pleasure for him to receive critics and suggestions to make this thesis better. He also hopes that this “Thesis” would be beneficial, particularly for him and for those who are interested in it.

Hadaanallahu ilaa sabiilissalaam

Wassalam.

---

The purposes of this research was to analyze the oral discourse including speech act that spoken by the host of English corner TVRI program and to analyze the cohesion and the coherence in the scenario.

This research used descriptive qualitative. Qualitative research was the collection, analysis, and interpretation of comprehensive narrative and visual data in order to gain insight into a particular phenomenon of interest. The researcher used this research to analyze and describe the fields and situation and everything that happened. The researcher described the speech act, cohesion and coherence. The researcher recorded the program as document review and made into the transcription to be analyzed.

The study was field research. In this study, the researcher was participating on English corner and observing the environment there. The researcher also was interacting with the host and the manager of English corner, Polinas Makassar, and the host to make friendship. The researcher also found new environment, new experience. The researcher used field research to answer the oral analysis, to learn the new environment, and to describe the scenario.

The method of data analysis was qualitative. There were three activities in analyzing data, namely data reduction, data display, and conclusion drawing/verification. Reducting data meant summarizing data, choosing the main points, focusing on the important things. Displaying data was presenting data into the pattern. Conclusion drawing was describing all of the data that has been analyzed.

The research result indicated by finding and classifying the types of speech act, the cohesion and the coherence in the scenario that the researcher found in the scenario. This research recommended to know and to understand about oral discourse specially to analyze the speech act, cohesion and coherence in the scenario.

## CHAPTER I

### INTRODUCTION

#### *A. Background*

Discourse Analysis is a general term for a number of approaches to analyze written, vocal, or sign language use, or any significant semiotic event. The objects of discourse analysis are discourse, writing, conversation, communicative event are variously defined in terms of coherent sequences of sentences, propositions, and speech. Contrary to much of traditional linguistics, discourse analysts not only study language use 'beyond the sentence boundary', but also prefer to analyze 'naturally occurring' language use, and not invented example. Text linguistic is a closely related field. The essential difference between discourse analysis and text linguistics is that discourse analysis aims at revealing socio-psychological characteristics of a person/persons rather than text structure. "Discourse has been taken up in a variety of social science disciplines, including: linguistics, education, sociology, anthropology, social work, cognitive psychology, social psychology, areas studies, cultural studies, international relations, human geography, communication studies, and translation studies".<sup>1</sup>

A discourse is a behavioral unit which has a status in linguistics; it is a set of utterances which constitute any recognizable speech events such as a

---

<sup>1</sup>*Discourse Analysis, Wikipedia the free Encyclopedia.*  
<http://en.wikipedia.org/wiki/Discourseanalysis.html> ( June, 3<sup>rd</sup> 2015)

conversation, a joke, a sermon, an interview, etc. A classification of discourse function, with particular reference to type of subject-matter, the situation, and behavior of the speaker, is often carried out in sociolinguistic studies, e.g. distinguishing dialogues vs. monologues, or more specifically, oratory, ritual, insults.

Discourse analysis is not only about method; it is also a perspective on the nature of language and its relationship to the central issues of the social sciences<sup>2</sup> Typical of discourse analysis is an explicit, systematic account of structures, strategies or processes of text or talk in terms of theoretical notions developed in any branch of the field.

A speech act in linguistics and the philosophy of language is an utterance that has performative function in language and communication. According to Kent Bach, "almost any speech act is really the performance of several acts at once, distinguished by different aspects of the speaker's intention: there is the act of saying something, what one does in saying it, such as requesting or promising, and how one is trying to affect one's audience." The contemporary use of the term goes back to J.L. Austin 's development of performative utterances and his theory of locutionary, illocutionary, and perlocutionary acts. Speech acts are commonly taken to include such acts as promising, ordering, greeting, warning, inviting and congratulating.

---

<sup>2</sup> Linda Wood and Rolf Kroger, *Doing Discourse Analysis*.  
<http://www.doingdiscourseanalysis.//books.google.com.sg/books?isbn=1452263523.html> (June, 3<sup>rd</sup> 2015)

A speech act in linguistics and the philosophy of language is an utterance that has performative function in language and communication. According to Kent Bach, "almost any speech act is really the performance of several acts at once, distinguished by different aspects of the speaker's intention: there is the act of saying something, what one does in saying it, such as requesting or promising, and how one is trying to affect one's audience." The contemporary use of the term goes back to J.L. Austin 's development of performative utterances and his theory of locutionary, illocutionary, and perlocutionary acts. Speech acts are commonly taken to include such acts as promising, ordering, greeting, warning, inviting and congratulating.

Speech acts can be analysed on three levels:

1. A locutionary act: the performance of an utterance: the actual utterance and its ostensible meaning, comprising phonetic, phatic and rhetic acts corresponding to the verbal, syntactic and semantic aspects of any meaningful utterance;
2. An illocutionary act: the pragmatic 'illocutionary force' of the utterance, thus its intended significance as a socially valid verbal action (see below);
3. And in certain cases a further perlocutionary act: its actual effect, such as persuading, convincing, scaring, enlightening, inspiring, or otherwise getting someone to do or realize something, whether intended or not.<sup>3</sup>

---

<sup>3</sup> Speech Act, Wikipedia, the free encyclopedia,  
[https://en.wikipedia.org/wiki/Speech\\_act.html](https://en.wikipedia.org/wiki/Speech_act.html)(June,3rd 2015).

In order to generalize this sketch of an indirect request, Searle proposes a program for the analysis of indirect speech act performances, whatever they are.

He makes the following suggestion:

Step 1: Understand the facts of the conversation.

Step 2: Assume cooperation and relevance on behalf of the participants.

Step 3: Establish factual background information pertinent to the conversation.

Step 4: Make assumptions about the conversation based on steps 1–3.

Step 5: If steps 1–4 do not yield a consequential meaning, then infer that there are two illocutionary forces at work.

Step 6: Assume the hearer has the ability to perform the act the speaker suggests.

The act that the speaker is asking be performed must be something that would make sense for one to ask. For example, the hearer might have the ability to pass the salt when asked to do so by a speaker who is at the same table, but not have the ability to pass the salt to a speaker who is asking the hearer to pass the salt during a telephone conversation.

Step 7: Make inferences from steps 1–6 regarding possible primary illocutions.

Step 8: Use background information to establish the primary illocution (Searle 184).

With this process, Searle concludes that he has found a method that will satisfactorily reconstruct what happens when an indirect speech act is performed.

Direct Speech and Indirect Speech "While direct speech purports to give a verbatim rendition of the words that were spoken, indirect speech is more variable in claiming to represent a faithful report of the content or content and

form of the words that were spoken. It is important to note, however, that the question of whether and how faithful a given speech report actually is, is of a quite different order. Both direct and indirect speech are stylistic devices for conveying messages. The former is used as if the words being used were those of another, which are therefore pivoted to a deictic center different from the speech situation of the report<sup>4</sup>.

The researcher chooses discourse analysis because in English corner there are things that need to analyze such as its speech act, vocal, and cohesion and coherence. As we know the objects discourse are writing, conversation, communicative event are variously defined in terms of coherent sequences of sentences, propositions, and speech. So the only way to answers the needed analysis is discourse analysis.

Charles Peck classifies all discourse into: (1) narrative discourse, (2) expository discourse, (3) procedural discourse, (4) hortatory discourse, (5) dramatic discourse, and (6) epistolary discourse, (7) oral discourse.

Oral discourse is one of the easiest discourse to acquire. Oral discourse is quoted by conversation.

After reading the references, the researcher found that one of TVRI program namely English Corner was part of these analysis. English corner was famous program to learn English on television that held on 1<sup>st</sup> and 3<sup>rd</sup> of Sunday at 5.00 p. m which the speakers had to speak English while broadcasting. Some

---

<sup>4</sup> Speech Act, Wikipedia, the free encyclopedia,  
[https://en.wikipedia.org/wiki/Speech\\_act.html](https://en.wikipedia.org/wiki/Speech_act.html)(June,3rd 2015).

participants of this program were students of school like students of junior or senior high school or students of university. In this program there were dialogue, quiz, interview, and etc. The speakers of English corner had a good English and good delivering, but the researcher wanted here was to analyze its host whether the things that wants to analyze was such as her speech act, cohesion and coherence while delivering and while talking to another speaker.

### ***B. Problem Statement***

Based on the previous background, the researcher formulated research questions as follow;

- 1) How is the speech act of the oral discourse spoken by the host of English Corner?
- 2) How is cohesion and coherence of the oral discourse spoken by the host of English corner?

### ***C. Research Objective***

This research aimed to analyze the oral discourse that spoken by the host of English corner, and to analyze the cohesion and the coherence of the scenario of English corner. The part of oral discourse analysis that the researcher analyzed were speech act, cohesion and coherence to describe a series of events that are contingent one on another. The specific objectives of this research are:

- 1) To know the existence of the speech act of the oral discourse that is spoken by the host of English corner.
- 2) To describe the existence of speech act, and cohesion and coherence of the oral discourse that spoken by the host of English corner.

#### ***D. Research Significance***

There are two significances of this research, they are;

##### **1) Theoretical significance**

In general, the results of this research were expected to provide contribution to learn and to improve our knowledge about English. In particular, this research provided information about oral discourse analysis.

##### **2) Practical significance**

###### **a) Significance for the researcher**

By doing this research, the researcher hoped to know, and to get more information in analyzing the existence of speech act, cohesion and coherence in sentences. Besides, the researcher got new experience.

###### **b) Significance for the host**

The researcher hoped that after her analyzing and focusing on her speech, the host can improve the way she delivers the material while on air.

#### ***E. Research Scope***

To make the research clear, the researcher scoped her research. The researcher focused on analyzing the speech act, cohesion and coherence of the oral discourse while the host was speaking in delivering material. Besides observation, the researcher also joined as speaker in this program if necessary. In addition, this research has been conducted in TVRI Makassar.

#### ***F. Operational Definition of Term***

There are some essential points that should be defined briefly in order to give a clear understanding toward in the research, as the following:

Analysis is the abstract separation of a whole into its constituent parts in order to study the parts and their relations.

Oral is using speech rather than writing.

Discourse is an extended communication dealing with some particular topic.

Discourse analysis is a general term for a number of approaches to analyzing written, spoken, or signed language.

English corner is one of educational program of TVRI to increase and improve the students' speaking ability in many events like an interview, quiz, and sharing knowledge by using English.

Oral discourse analysis is a discourse that is an account of events usually that employs verbs of speech, motion, and action to describe a series of events that are contingent one on another.

## CHAPTER II

### REVIEW OF RELATED LITERATURE

#### *A. Previous Related Research Findings*

1. Louise Gonsalvez who did a research about using critical discourse analysis to address the Gaps, Exclusions and Oversight in Active Citizenship Education. She found that critical discourse analysis helped her to identify the problematic discourses that impede and/ or limit our understanding and implementation of active citizenship education. “Discourse analysis challenges us to move from seeing language as abstract to seeing our words as having meaning in a particular historical, social, and political condition”. McGregor, She used “documentary research method” to gather diverse materials for my qualitative research inquiry. “A document is something that we read and which relates to some aspect of the social world” and they are socially produced. Documentary method allows the researcher to examine, interpret, “elicit meaning [and] gain understanding” from textual materials.<sup>5</sup>
2. Keith Standiford Wheeler who did a research about Making the significant significant: A Discourse Analysis Examining the Teacher’s Role in Negotiating Meaning of Text with Culturally and Linguistically Diverse Students found that an utterance has meaning only if it

---

<sup>5</sup> Louise Gonsalvez, “Using Critical Discourse Analysis to Address the Gaps, Exclusions and Oversight in Active Citizenship Education, *Dissertation*(Canada; The Faculty of Graduate Studies, 2013)

communicates a *who* and a *what*. The *who* is the kind of person one is seeking to be and enact at the present time—a socially situated identity.

People build identities and activities by combining language, actions, interactions, ways of thinking, believing, valuing, and using various symbols, tools, and objects--what Gee terms Discourses--to enact a particular sort of socially recognizable identity.

The *what* is a socially situated activity that the utterance helps to constitute. People use different styles or varieties of language, what Gee terms - social languages, to enact and recognize different socially significant identities and different socially meaningful activities in different settings, as well as engage in other building tasks. To be a particular *who* doing a particular *what* requires that one act, value, interact, and use language in coordination with other people and various objects at appropriate locations and at appropriate times. Gee believes the key to Discourses is recognition. If you put language, action, interaction, values beliefs, symbols, objects, tools, and places together in such a way that others mentally recognize you as a particular identity engaged in a particular type of activity then you have successfully pulled-off a Discourse. Social languages constitute the language component of Discourses. Speakers (and writers) design their utterances to have patterns in them that allow listeners (or readers) to attribute situated identities and specific activities to them. These patterns are called - collocational patterns because various sorts of grammatical patterns co-

locate with each other. However, meaning is not simply a matter of decoding grammar. It is also a matter of understanding which of the inferences that one can draw from an utterance are relevant, a matter closely tied to context, point of view, and culture. In fact, the utterances of social languages have meaning only because they are embedded in specific social discussion.<sup>6</sup>

3. Dyah Anita D who did a research about The Speech Act and Communication Strategy in Children 3-5 Years Old: Speech Act According to Searle, speech act is the actions performed via utterances. Austin mentions the types of act which is performed in a conversation, they are: locutionary, illocutionary, and perlocutionary act. The following are their explanations: 1. Locutionary Act. A locutionary act is an act of how a person produces the utterance or to produce a meaningful linguistics expression. When the speaker uses his/her organ of speech to produce utterance, then, indirectly there is the locutionary act in his/her utterance. In the other words, locutionary act is the act of the speaker in using his/her organ of speech to produce utterances. For example, “I promise to give you some money”, the moment when the utterance is being said by the speaker by using the organ of speech is called locutionary act. 2. Illocutionary Act In every utterance, there must be a function in it. The function which is found in the utterances is called the

---

<sup>6</sup> Keith Standiford Wheeler, “A Discourse Analysis Examining the Teacher’s Role in Negotiating Meaning of Text with Culturally and Linguistically Diverse Students, *Dissertation*(Southern Illinois: Southern Illinois University Carbondale, 2010).

illocutionary act. For instance, “I promise to give you some money”, that utterance is not only a statement but it also binds the speaker to what s/he has just said. This is because that utterance intention is the fact that the speaker will do something in the future or we can say, the speaker promising something. Therefore, the illocutionary act of an utterance above is the act of promising.

3. Perlocutionary Act Perlocutionary act is the effect of the utterance which the speaker said to the hearer. The following is the example: 1) *promise to give you some money* The effect of the utterance above can be a happy one. This is a result of the fact that the hearer really needs some money. Yet, it can also give the opposite effect to the hearer. The hearer may feel angry because of that utterance. This is because the hearer is a very rich person who does not need any money from the speaker. The hearer will feel as if he is being mocked.

The illocutionary act in speech act itself has its classification. Both Austin and Searle give its classification. Basically, their classifications of illocutionary act in speech act are just the same. They are only different in the name. The following are the classifications by Searle

1. Declaration. This illocutionary act is the kind of illocutionary act which can change the world by the utterance that is produced. The word “change” here refers to any situation. It can be the change of the status of a 12 person. It can also be the ownership of something. The following is the example of declaration: *I declare you husband and wife* The utterance above changes both the two person’s status. The status of the man change

from someone who does not have any rights to the woman becomes someone who has rights to the woman. That is also happened to the woman, her status changes.

2. Representative (Assertive) Representative is the illocutionary act which states what the speaker believes to be the case or not and commits to the speaker truth. It shows the truth condition of the meaning of the utterance. The following is the example: *The sun rises in the East* That utterance shows the fact that the sun really rises in the East. This is a common fact that everyone knows.

3. Expressive. Expressive is kind of illocutionary act which can show what the speaker feels. It expresses the psychological states. The example is shown by the following utterance: *I'm sorry to hear that.* The utterance above shows the empathy of the speaker to the hearer condition. The speaker tries to feel what the hearer feel. Therefore, the hearer will at least lose a bit of their tension.

4. Directive. Directive is a kind of illocutionary act which is used by the speaker to get someone else to do something. This kind of illocutionary act can make the hearer under an obligation. The example of directive illocutionary act: *Don't be too noisy!* That utterance contains a prohibition. It makes the hearer to be in silent. Maybe this is because the speaker feels annoyed with the crowded made by the hearer.

5. Commissive. Commissive illocutionary act is an act which makes the speaker to commit what s/he said. It is also a future action of the speaker. The example: *I promise to give you some money.* The utterance above is

the example of commissive illocutionary act. It shows a promise of the speaker. It also shows what the speaker has to do in the future.<sup>7</sup>

4. Cohesion is a semantic property of a text sticking together in some way; i.e., a cohesive text tends to link its sentences together semantically. This semantic aspect of cohesion has a relation with the reader who interprets the elements in a given co-text depending on the other element within the same co-text. Halliday and Hassan assert that: “Cohesion occurs where the interpretation of some element in the discourse is dependent on that of another. The one presupposes the other in the sense that it cannot be effectively decoded except by resources to it”.

In fact, the presupposition is an important aspect in cohesion because it extracts the unrelated sentences by the connected one. Thus relations in meaning of any sentence depending on the surrounding elements. In other words “cohesion refers to the range of possibilities that exist for linking something with what has gone before. Since this linking is achieved through relations in meaning”.

To illustrate, let us examine the following example: «Wash and core six cooking apples. Put them in a fire proof dish» the item “them” in the second sentence refers back to “six cooking apples” in the first sentence . In this, since we cannot understand the second sentence without referring to the first one which gives sign to what “them” stands for. That

---

<sup>7</sup> Dyan Anita D, “The Speech Act and Communication Strategy in Children of 3-5 Years Old”, Thesis(Faculty of Humanities Diponegoro University, 2009)

is to say, “them” is an item to which it facilitates the reader’s understanding of the relation between sentences in the text.

As in the case of the above example, cohesion is focused on the relation of the boundaries between sentences rather than within sentences. In other words, it is interested in the “intersentence” which ensure texture. Moreover, although cohesion exists within the limit of a single sentence, it is of less importance because the sentence is naturally cohesive due to its grammatical structure. «Cohesion ties between sentences stands out more clearly because they are the only source of texture, whereas within the sentence there are the structural relations as well». For instance, «If you happen to see the admiral don’t tell him his ship’s gone down» in this sentence, “His” and “Him” refer to “admiral” in the first half of the same sentence. Thus, the realization of cohesion within the sentence is governed by rules of pronominalisation; i.e., the use of a given pronoun to be referred to is determined by the sentence structure. For example a sentence such as “John took John’s hat off and hang John’s hat on a peg: cannot be accounted as a cohesive sentence unless we use some of the pronominal forms to be referred to the identity of the pronominal form. Then, let us consider that we are talking about the same “John” and the same “hat”. Meanwhile, we get sentence structured as

“John took his hat off and hang it on a peg” in which “his” referred to “John” and “it” referred to “hat”.<sup>8</sup>

## **B. *Some Pertinent Ideas***

1. English corner is a fun, free, informal weekly time of tutoring for international students who would like to improve their conversational English skills. It is open to any person who wants to attend.<sup>9</sup>
2. Developed in the 1970s defined that discourse analysis is concerned with "the use of language in a running discourse, continued over a number of sentences, and involving the interaction of speaker (or writer) and auditor (or reader) in a specific situational context, and within a framework of social and cultural conventions". Discourse analysis has been described as an interdisciplinary study of discourse *within* linguistics, though it has also been adopted (and adapted) by researchers in numerous other fields in the social sciences. Theoretical perspectives and approaches used in discourse analysis include the following: applied linguistics, conversation analysis, pragmatics, rhetoric, stylistics, and text linguistics among many others.<sup>10</sup>
3. Oral discourse displays a number of differences from written discourse which are accounted for mainly by its communication

---

<sup>10</sup> Abrams and Harpham, A Glossary of Literary Terms, 2005.

channel and by being an on-line communication, i.e. cognitive processes and discourse generation and reproduction are performed almost simultaneously. Alongside with that oral discourse possesses a number of ‘compensating’ tools such as gestures, intonation, discourse markers, hesitation markers, etc. We define hesitation markers as a set of tools with certain time duration that are used to solve oral discourse generation and reproduction problems and that can be both retrospective (e.g. correction of a produced discourse piece) and perspective.<sup>11</sup>

4. The term conversation is widely used, in a non-technical sense, and people seem capable of distinguishing it from other kinds of talk. They mean, broadly speaking, that the talk is less formal. Discourse analysts are rather vague about what they mean by ‘conversation’ too, and some seem to use the term to describe any kind of oral interaction.<sup>12</sup>
5. To understand language one must understand the speaker’s intention. Since language is intentional behavior, it should be treated like a form of action. Thus Searle refers to statements as speech acts. The speech act is the basic unit of language used to express meaning, an utterance

---

<sup>11</sup> Khur Shu Dyan – Scribd, <https://www.scribd.com/document/135975034/Khur-Shu-Dyan.html> (June,3rd 2015}

<sup>12</sup> Guy Cook, *Discourse*, (Cet I: Oxford; Oxford University Press, 1989), h. 51.

that expresses an intention. Normally, the speech act is a sentence, but it can be a word or phrase as long as it follows the rules necessary to accomplish the intention. When one speaks, one performs an act. Speech is not just used to designate something, it actually does something. Speech act stresses the intent of the act as a whole. Understanding the speaker's intention is essential to capture the meaning. Without the speaker's intention, it is impossible to understand the words as a speech act. There are four types of speech act: utterance acts, propositional acts (referring is a type of propositional act), illocutionary acts (promises, questions and commands) and perlocutionary acts. A perlocutionary act can be used to elicit some behavioral response from the listener. Searle believes that speakers perform acts by observing two types of rules: constitutive rules or definition rules (create or define new forms of behavior) and regulative or behavior rules (these rules govern types of behavior that already exist)<sup>13</sup>.

## CHAPTER III

### RESEARCH METHOD

#### *A. Research Design*

This research used descriptive qualitative research. Qualitative research is the collection, analysis, and interpretation of comprehensive narrative and visual data in order to gain insight into a particular phenomenon of interest. The purposes of qualitative research are broad in scope and center around promoting a deep and holistic or complex understanding of a particular phenomenon, such as an environment, a process, or even a belief. Descriptive qualitative meant the researcher just needed to collect the data and described what happens in the field. The data which has been collected has been classified based on the kinds, characteristics, or the condition.<sup>14</sup> Whereas<sup>15</sup> defined that qualitative research is descriptive which is the data collected in the form of words of pictures rather than number. Qualitative research was the one way that the researcher used to get the data validly.

These two characteristic of qualitative research, the simultaneous study of many aspect of a phenomenon and the attempt to study things as they exist naturally, help in part to explain the recent growing enthusiasm for qualitative research in education.

---

<sup>14</sup>Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktik* (Cet. XV; Jakarta; Rineka Cipta, 2013), h. 29.

<sup>15</sup>Sugiyono, *Metode Penelitian Kuantitatif Kualitatif dan R&D*,( Bandung; Alfabeta; 2012) h.35

## ***B. Research Subject***

This researcher used this research to analyze and to describe the fields and situation and everything that happens there, because only qualitative research could answer all the research questions.

The research subject was subject from which the data was obtained. The research subject was the host who presented and talked when the event was being holding.<sup>16</sup>

## ***C. Research Instrument***

In obtaining data, the researcher used three types of instrument, namely observation studio, interview and document review.

### **1. Observation Studio**

Observation Studio is the act of observing, the act of making and recording a measurement. In observation, qualitative research provided data by simply watching the participants, without altering or manipulating it. The researcher observed whole the part of the studio. Observation studio aimed to know the environment while broadcasting. In this case, the researcher focused on observing the event, like the host, the audiences, the material, or the process during on air, etc. For getting the actually data, the researcher was a part of English corner.

---

<sup>16</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktik* (Cet. XV; Jakarta; Rineka Cipta, 2013), h. 188

## **2. Interview**

Interview is a purposeful interaction in which one person was trying to obtain information from another. Interview permitted the researcher to obtain important data they acquired from observation alone, although pairing observation and interview provided a valuable way to gather complementary data. Interviewer explored and probed participants' responses to gather more in-depth data about their experiences and feelings. The researcher used this kind of interview as her instrument. The kind of interview that the researcher used was semi structured interview. This type of interview is included in-depth interviews, which. The purpose of this type of interview is to find problems more openly invited to an interview in which the parties requested opinions, and ideas - ideas. In conducting interviews, researchers needed to listen carefully and took a note of what was stated by informants. The researcher kindly invited the informant out of on air or broadcasting for getting the validly data. The researcher also met her at her home if necessary. These were the things that the researcher had to prepare in her interview, they were;

- The researcher prepared the oral question.
- The researcher interviewed the host.
- The researcher collected and selected the data to make conclusion of the result.

## **3. Document Review**

Videotape and audiotape provided qualitative research with another valuable, if not some data obtrusive, data source. The use of audiotape and

videotape also raised the serious issue of time allotment. Watching and listening then recording took an enormous amount of time. This was perhaps the number one challenge for researcher using these data sources. In document review the researcher also made a friendship with event organizer to get the data such the background of English corner, ask the recording, etc. The researcher also gave a paper to informant and asked her willingness to be interviewed and the researcher guaranteed the informant that their data was secured.

#### ***D. Data Collecting Procedure***

##### **1. Field Research**

The method of data collection is field research. In this method, the researcher was participating on English corner and observing the environment there. The researcher also was interacting with the host and the manager of English corner, Polinas Makassar, and the host to make friendship. The researcher also found new environment, new experience. The researcher used field research to answer the oral analysis, to learn the new environment, and to describe the scenario.<sup>17</sup>

##### **2. Fieldwork**

The researcher used certain ways in collecting data. The procedures in collecting data consist of;

---

<sup>17</sup>Natia Zuriah. *Field Research*, <http://natiazuriahms.blogspot.co.id/2014/10/field-research-penelitian-lapangan.html> (August22th 2016)

a) Observation

- The researcher came to TVRI as the audience and presented in broadcasting.
- The researcher did observation when the host on her broadcasting.
- The researcher made a friendship with the event organizer to make her feel easy in getting the needed data.
- The researcher did observation by noticing some items in observation attachment.
- The researcher selected the exactly data which has been collected.

b) Interview

- The researcher explained the procedures in interview that would be held.
- The researcher met the host to do interview in some place.
- The researcher used the question list in interviewing the host. But she could develop her question based on the host's answers.
- When the researcher was being interviewing the host, she also recorded the conversation between them and wrote some information that she got.

c) Document Review

- The researcher recorded the scenario and put in CD.
- The researcher wrote the scenario into narrative.

**E. *Major Principles Associated with Ethical Conduct***

In conducting research, there are some principles associated with ethical conduct that the researcher needed to obey, namely:

### 1. Do not Harm

The researcher must not involve the research participants in any situation in which they might be harmed. However, in this qualitative research that has been conducted, the researcher could be sure about her research that all was safe. If there will be something that happens, the researcher will be responsible for all the consequences without involving the participants.

### 2. Privacy and Anonymity

Keeping privacy and anonymity discussed clearly between the researcher and the research participants by face to face. However the general rule here is the researcher may not state in her research finding about what the participant do not want to. In addition, because this research is qualitative research, and the aim is to explain the answers of the research questions deeply, anonymity will not be the specific problem.

### 3. Confidentiality

The researcher treated the research by confidential manner, and it will be the researcher's responsibility.

### 4. Informed Consent

The research participants involved in the research can choose whether or not to participate. In this case, the researcher cannot force them to join the research. However, if the research will be done by group, each person will not have a chance to decide whether joining the research or not. It is because the decision will be stated by the superior or the leader of the group.

## 5. Rapport and Friendship

To get much information, the researcher should make rapport among the research participants. However, the researcher should be careful of making rapport. Being too close with the research participants can affect the research process. Therefore, the researcher can make rapport among them, but the researcher cannot make friendship because it will involve the researcher's emotion deeply.

## 6. Intrusiveness

Intrusiveness can mean that the researcher cannot disturb the research participants' time, disturbing their space, and disturbing their personal lives. In this case, the research participants are the students, so the researcher can make sure that the research will be conducted without disturbing them because the researcher will conduct the research based on the procedures that the researcher have understood.

## 7. Inappropriate Behavior

We probably all know about what is called inappropriate behavior. Not only the researcher, but also the research participants must avoid inappropriate behavior in conducting research because all we have to have is respect one another.

## ***F. Data Analysis Technique***

The researcher used qualitative in analyzing the data. The data source of qualitative research was spoken or written word that was observed by the researcher, and the things that were observed should be noticed well so that the

researcher found the implicit meaning from the files or things. So the researcher used the words (picture if necessary) in describing the result of the research.<sup>18</sup>

There were three steps in analyzing data generally, namely preparation, tabulation, and applying data which were appropriate with the research approach. Here was the researcher outline the explanation. Preparation meant checking the data that had been got like recordings or pictures. Tabulation meant analyzing data to make the conclusion. It involved the way how to change or to choose in analyzing the data. The last was applying data which was appropriate with the research approach<sup>19</sup>. Because this research was descriptive, so the researcher only needed to know the result of the research, namely interview and observation, and describes the atmosphere of English corner.

The researcher used Miles & Huberman Model in analyzing data. Miles & Huberman stated that there were three activities in analyzing data, namely data reduction, data display, and conclusion drawing/ verification.<sup>20</sup>

---

<sup>18</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktik* (Cet. XV; Jakarta; Rineka Cipta, 2013), h. 22

<sup>19</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktik* (Cet. XV; Jakarta; Rineka Cipta, 2013), h. 276

<sup>20</sup> Sugiyono, *Metode Penelitian Kuantitatif Kualitatif dan R&D*, (Bandung; Alfabeta; 2012) h. 246

( Sugiyono, 2012)

The first step was *data reduction*. Reducing data meant summarizing data, choosing the main points, focusing on the important things, and looking for the patterns. The data that the researcher collected in the field was in the complex and many forms. Therefore, the researcher had to concise the data which she needed to bring to the next step in analyzing data and throw out the data that was not needed. In this case, the needed data was the data with finding values that helped the researcher in making conclusion based on the research method that she used.

The second one was *data display*. Displaying data was presenting data into the pattern. In qualitative research, the data could be displayed by using a brief description, chart, the relationship among the categories, and so on. However Miles and Huberman emphasized that the way in displaying data that was frequently used was narrative text. In addition, beside using narrative text, the researcher should use graph, matrix, or network.

The third one was conclusion drawing/ verification. Conclusion drawing was describing all of the data that has been analyzed. The conclusion was a new finding that could be a hypothesis, even a theory if it is supported by some data widely.<sup>21</sup>

<sup>21</sup> Sugiyono, *Metode Penelitian Kuantitatif Kualitatif dan R&D*, (Bandung; Alfabeta; 2012) h.247

**CHAPTER IV**  
**FINDINGS AND DISCUSSION**

**A. Findings**

As the researcher explained in the previous chapter, there were three kinds of instruments that the researcher used in collecting data, namely observation, document review, and interview. Whereas, observation was used to gather more data in order to enrich the data collected interview and document review. Thus, the findings were classified into three main categories, namely; (1) Research Findings through Observation, (2) Research Findings through Document Review, (3) Research Findings through Interview.

**1. Research Findings through Observation Studio**

Table 1. Data Display of Observation Studio<sup>22</sup>

No.	Objects of Observation	Researcher's Interpretation
1.	Room setting	“Room used by her was the general room for the other broadcasting. So everybody could see the program after getting permission from the event organizer.

---

<sup>22</sup> (OS, English Corner, February 15<sup>th</sup>, 2016).

2.	Opening and Closing process	“The program opened by some show from the singer or band to entertain the participants there.
3.	The Procedure	The participant paid attention of the speakers well. It was proved by the participants’ question in the middle of program when the host allowed them to ask. In question section, the host accepted some question from people who were calling to program number phone.
4.	Environmental Broadcasting	“The cameramen directed his camera to everybody who attended the program and closed up the participant’s face when he/she was asking the question.
		“The speakers were active to respond the participants or callers questions.
6.	The host attitude	The host was as stakeholder, she re-explained and answered the questions well.

## 2. Research Findings through Document Review

Document review that the researcher meant here was the recorded data when the host was broadcasting. Here was the researcher speech act, cohesion and coherence describing below

The researcher explained based on the data that she got in the following.

In scenario 04:48 the host said “ nice song, it is very relaxing in this hot Monday today”. From the utterance above, there was locutionary “ nice song”. It meant the host told all the audiences that the song that had been sung was good to hear. And illocutionary “it is very relaxing in this hot Monday. In this utterance, the host stressed that the song could relax all the audiences when they have heard that song in that hectic day. From this utterance, has no perlocutionary. The kind of utterance was expressive because it showed what the host and the other participants feel.

In scenario 05:44 the host said “we have something to discuss about”. From the utterance, there was locutioary “we have something”. It meant the host wanted to tell the audiences and inform them the thing that she prepared to show them which she has planned. And illocutionary “ something to discuss about”. From the utterance, it implied that the host wanted the audiences to listen to the speakers while they were discussing and asking some questions after they were finishing their discussion. And perlocutionary “we have something to discuss about”. After hearing this utterance, the speakers were discussing one to another including with the host.

The kind of utterance was directive because the host had the speakers to do something.

In scenario 05:50 the host said “do you have any goal in your life?”. From the utterance, there was locutionary “do you have any goal?”. It meant the host wanted to know what the first speaker purpose of her life was. And illocutionary “ do you have any goal?” the host wanted to tell the purpose of her life and to think what her goal life. And perlocutionay “ do you have any goal?”. After hearing this utterance, the speaker answered and explained what the purpose of life. The kind of utterance was directive because the host wanted to know the answers and wanted to give some suggestions to the speaker.

In scenario 05:55 the host said “why do you choose that to become your goals? And what are you going to do when you already achieved your goals?”. From the utterance, there was locutionary “why do you choose become your goal? What would the speakers do when they achieved them?”. It meant the host wanted to know the speakers reason and action of their goal in their future. And illocutionary “what are you going to do when you already achieved them?. It implied that the host asked the speaker what the speaker would do in the future when the speaker reached the goals to the other people. And perlocutionary “why do you choose that to become your goals?”. After hearing this utterance, the speakers explained what they were going to do and how to become useful to the people. The kind of utterance was

directive because the host had her to answer and had her to do something when she achieved her goals.

In scenario 07:30 the host said “ do you have any favorite designer?”. From the utterance, there was locutionary “ do you have any favorite designer?”. It meant that the host wanted to know the idol of the speaker in design. And illocutionary, “do you have any favorite designer, the host wanted to know the reason that inspired her from her favorite designer in her goal. And perlocutionary “do you have any favorite designer?”. After hearing this utterance, the speaker told them and shared to them why the speaker chose her/ his as favorite designer. The kind of utterance was directive because the host had to the speaker to answer and to mention the favorite designer.

In scenario 08:17 the host said “any favorite musician?”. From the utterance, there was locutionary “ any favorite musician?”. It meant the host wanted to know whom did you like from the famous musician. And illocutionary “any favorite musician?” the host wanted to know more deeply about your passion. And perlocutionary “ any favorite musician?”. The speaker mentioned who the favorite was. The kind of utterance was directive because the host wanted the speaker to tell who the favorite was.

In scenario 08:24 the host said “the only one boy that I have today in in on the stage but not that you are”. From the utterance, there was locutionary “the only one boy”. It meant the host wanted to make that she had just one man of

participants. And there was illocutionary, “the only one boy that I have today on the stage”. From the utterance, it implied that the host mean was on the stage, including with the participants and also to keep calm the situation, to entertain the participants and to relax the situation also. In this utterance there was no perlocutionary found. The kind of utterance was expressive because the host expressed what she felt.

In scenario 09:40 the host said “ and if you want to join us letter, maybe we can open our interactive session later on by dialing the number”. From the utterance, there was locutionary “ by dialing the number”. It meant by calling the number. And illocutionary “if you want to join us letter, maybe we can open our interactive session later on by dialing the number”. It implied that everybody who was in the room or somebody was watching at home, and was able to call if they have something to ask. And perlocutionary “we can open the letter on by dialing the number”. After saying this utterance, somebody dialed the number. The kind of utterance was directive because the host had somebody to call.

In scenario 09:47 the host said “ before you call here, let me give a little bit interactive first with our four speakers here”. From the utterance, there was locutionary “ let me give a little bit interactive first with our four speakers here”. It meant the host wanted to start the conversation among the speakers and herself. And illocutionary “ before you call here, let me give a little bit interactive first with our four speakers here. It implied that the host did not want somebody cut their

speech while conversation and waiting till question section was opened. And perlocutinary “let me give a little bit interactive first with our four speakers”. After this utterance was said, they made a conversation and interactive till the time was up. The kind of utterance was directive because they did interactive.

In scenario 13:10 the host said “ good ambition”. From this utterance, there was locutionary “ good ambition”. It meant the speaker had good aspiration. And illocutionary “ good ambition”. It implied that the host praised the speaker dream. In this utterance, had no perlocutionary found. The kind of utterance was expressive because the host had good ambition when the host was saying it.

In scenario 13:41 the host said “ bj, any goal of life, want to get the most beautiful girl in the world? That is one of goal. Right?”. From this utterance there was locutionary “want to get the most beautiful girl”. It meant the host wanted to know what the speaker wished to have the most beautiful in his life. And illocutionary “ this is one of goal”. The host mentioned this utterance because some people in the world wished to have the most beautiful girl as a wife. And perlocutionary “ that is one of goals. Right?”. After hearing this utterance the speaker shaken his head and saying no because that no what he wished. The kind of utterance was directive because it seemed like the host suggested this to the speaker.

In scenario 14:17 the host said “ take the remote and ask the robot go and wash the dishes. From this utterance, there was locutionary “take the remote and ask the robot go”. It meant the host just got the remote and had the machine to do

something. And illocutionary “ask the robot to go and wash the dishes”. It implied that the host wished the machine could replace all the daily jobs at home and the host would not waste much time for doing the jobs. In this utterance had no perlocutionary because that just what host wished in the future. The kind of utterance was commissive because that what the host wished in the future.

In scenario 16:58 the host said “no, don’t worry, I am just kidding”. From this utterance, there was locutionary “don’t worry”. It meant the host said to speaker not to be anxious with what the host said. And illocutionary “no, don’t worry, I am just kidding. It implied that the host wished to the speaker not to be offended with the conversation and not to think deeply about it in your future. From this utterance, had no perlocutionary because after hearing this, there was no effect to each other. The kind of this utterance was expressive because the host expressed what she felt.

In scenario 17:06 the host said “do you expect this goal since you were child or just come out when you know Dian Pelangi and then I wanna be like her?”. From this utterance, there was locutionary “do you expect this goal since you were child”. It meant the host asked did the host dream this as her dream in her childhood. And illocutionary “do you expect this goal since you were child or just come out when you know Dian Pelangi and then wanna be like her. It implied that the host wanted to know that this goal had been planned or just came out nowadays or maybe Dian Pelangi inspired her. And perlocutionary “do you expect this goal”. After

hearing this, the speaker answered spontaneity and said no. The kind of this utterance was representative because the host wanted to make it sure with the answer.

In scenario 18:29 the host said “ in your opinion, what do you need to get your goal in the future?”. From this utterance, there was locutionary “what do you need to get your goal in the future. It meant the host wanted to know what the speaker would do the reach the goal. And illocutionary “what do you need to get your goal in the future”. It implied that the host that from the answer, it could inspire and motivate who heard that utterance. And perlocutionary “ what do you need to get your goal in the future”. After hearing this, the speaker mentioned and told us the steps that are needed to do. The kind of utterance was directive because the speaker’s answer seemed like suggestion.

In scenario 19:45 the host said “ you try to study hard from now”. From this utterance, there was locutionary “ you try to study hard from now”. It meant the speaker had to work harder since today. And illocutionary “ you try to study hard from now. It implied that the host suggested to the speaker to study harder if they really wanted to reach that dream. In this utterance, has no perlocutionary. The kind of this utterance was directive because the host suggested this to the speaker.

In scenario 20:32 the host said “ one day, if you already have a robot, please give me one”. From this utterance, there was locutionary “ please give me one”. It meant the host wished to have one of his robot handmade. And illocutionary “ one

day, if you already have a robot, please give me one. It implied that that the host wished someday after having this robot, it could ease her jobs at home. In this utterance, has no perlocutionary found because it was host wishes. The kind of this utterance was directive because it was host wants.

In scenario 26:50 the host said “ they are good, they are smart. From this utterance, there was locutionary “ they are good, they are smart”. It meant they were kind people and clever. And illocutionary “ they are good and they are smart”. It implied that the host praised this after showing their performance in that interactive. In this utterance, has no perlocutionary found. The kind of this utterance was expressive because the host expressed and praised the speakers.

In scenario 28:28 the host said “oh okay”. From this utterance, there was locutionary “oh, okay”. It meant oh cool, oh great. And illocutionary “ oh okay”. It implied that the host agreed what the principle of school explained. In this utterance, has no perlocutionary. The kind utterance was representative because it was the same with what the principle of the school said and the host experience.

In scenario 28:51 the host said “ and now I would like to give a chance for the one who has question, the audience. Yes please. From this utterance, there was locutionary “ I would like to give a chance for the one who has question. It meant the one who had question had an opportunity to ask the question. And illocutionary “and now I would like to give a chance for the one who has question, the audience, yes please. It implied that the host was opening the question section and the

audience was allowed to ask. And perlocutionary “ the audience. Yes please. After hearing this utterance, the audience raised the hand and held the microphone. The kind of utterance was directive because the host allowed the audience to ask.

In scenario 29:50 the host said “ because no guaranteed in this life, except you buy an electronic tools and then you have one year guaranteed. From this utterance, there was locutionary “ no guaranteed in this life”. It meant the speaker could not make sure. And illocutionary “ because no guaranteed in this life”. It implied that everybody just could plan, but could not decide what would be happening for tomorrow. In this utterance, has no perlocutionary. The kind of utterance was representative because everybody believe this and this is a faith in every religion.

19	28:28	✓	✓	-	Representative
20	28:51	✓	✓	✓	Directive
21	29:50	✓	✓	-	Representative

Here was the pronoun that the researcher explained based on the recording data in document review that had relation to cohesion and coherence below.

In scenario 06:50 “I join in many organizations at my school one of them is intra organization of student association, and also I am the leader of it”. From the

conversation between the host and the speaker, it found the word “it”. “it” referred to intra organization of student association.

In scenario 07:30 “do you have favorite designer? Dyan Pelangi is my favorite one. Okay . she is the one who inspires you to become designer”. From the conversation between the host and the speaker, it found the word “she”. “she” referred to Dyan Pelangi.

In scenario 08:24 “ the only one boy that I have today on the stage”. From the conversation between the host and the speaker, it found the word “one boy”. “one boy” referred to the fourth speaker.

In scenario 09:10 “and I would like to greet all the audiences in this studio today. Hello. All of them are from Mtsn. Model Makassar”. From the conversation between the host and audiences, it found the word “them”. “them” referred to all the teachers, the students and the staff of the school.

In scenario 09:25 “ and I would like to thank you for the principle of Mtsn. Model Makassar, Mr. Drs. H. Abd. Rafiq M.Pd, so you must be so proud today see the teachers and the students right here on English corner. And of course we are going to talk about goal of life. And if you want to join us later, maybe we can open our interactive session later on by dialing number. Before you call here, let me interactive first with four speakers”. From the conversation between the host and the audiences, it found the word “you”, “we”, “me”. “you” referred to the principle of Mtsn. Model Makassar. “we” referred to the host and the students who on the stage.

“you” referred to somebody who wanted to call for asking some questions. “we” referred to the host, and the speakers. “me” referred to the host.

In scenario 09:58 “ so we talk about goal of life, what do you think about goal of life?” who wants go first? Let me. I think goal of life something related to purpose of life, something that our dreams, or our ambitions, so I can say that goal of life is about what we want to be, what we want to do, what we want to fix, or what we want to make better then before”. From the conversation between the host and the first speaker, it found the word “we”, “you”, “me”, “I”, “our”. “we” referred to the host and the four speakers, “you”, “me” and “I” referred to the first speaker, “we” and “our” referred to people generally.

In scenario 10:43 “ by learn from what is the most you need in the past, and fix it in the future”. From the conversation between the host and the first speaker, it found word “you” and “it”. “you” referred to people generally. “it” referred to the most you need in the future.

In scenario 10:53 “how about yaya, any different opinion? What is goal of life in your point of view. To me goal of life is something that we want to catch or get in our life like dreams, wishes, and hopes. But if you cannot reach your goal life, don’t be like disappointed. Because just believe Allah always gives you the best way”. From the conversation between the host and the second speaker, it found word “your”, “me”, “we”, “our”, “your”, and “you”. “your” and “me” referred to the second speaker, and “we”, “our”, “your”, and “you” referred to people generally.

In scenario 11:24 “ do you have another opinion darling? Yes I have. Goal of life is something like dreams, wishes, and ambitions and what people want to reach it out. So goal of life is really important because all of your effort that you have done so far supports what you want, if out of there, there some people has no goal of life, their effort is for nothing”. From the conversation between the host and the third speaker, it found word “you”, “I”, “it”, “your”, “you”, “their”. “you” and “I” referred to third speaker. “it” referred to goal of life. “your”, “you”, and “their” referred to people generally.

In scenario 11:53 “ what do you think of goal of life? To me goal of life is something that everyone have to have. Goal of life something that you dream of, what you really want, so you have to work hard and do your best, and try to reach it”. From the conversation between the fourth speaker and the host, it found word “you”, “me”, “you”, and “it”. “you” and “me” referred to the fourth speaker. “you” referred to people generally. “it” referred to goal of life.

In scenario 12:26 “ and what is your goal of life tika? Actually my goal of life is become a minister of environment. Because I really love environment, specially in Indonesia. I want to always keep it clean. we can see people nowadays always careless to their environment, is like throw their rubbish everywhere and the drinking water, I am so worrying with limited drinking water”. From the conversation between the host and first speaker, it found word “your”, “my”, “I”,

“it”, “their”. “your” and “my” is the first speaker possessive. “I” referred to the first speaker. “it” referred to environment, and “their” referred to people generally.

In scenario 13:16 “what about yaya, what is your goal of life?. I want to be famous international designer, seem like my idol. So you want to invite all the people in the world with your passion”. From the conversation between the host and the second speaker, it found word “your”, “I”, “my”, and “your”. “your”, and “I” referred to the second speaker. “my” referred to the second speaker idol, Dyan Pelangi. “your” referred to the second speaker passion.

In scenario 13:30 “sasa, what is your goal in this life? My goal of life is want to be a doctor like my father. Aahh you want to be a docter like your father”. From the conversation between the host and the third speaker, it found word “your”, “my”, “my”, and “your”. “your” and “my” referred to the third speaker’s goal. “my” and “your” referred to the father of the third speaker.

In scenario 13:51 “my goal of life is because I am interested in technology, I really want to make a robot. What do you imagine this robot can do? It can, what human can do”. From the conversation between the host and the fourth speaker, it found “my”, “I”, and “it”. “my” referred to the fourth speaker goal, “I” referred to the fourth speaker, and “it” referred to robot.

In scenario 14:33 “every person has different goal in your life. That is your ambition for a long in your future”. From the conversation among the host and the

speakers, it found “your”, and “your”. “your” referred to person, and “your” referred to all the speakers..

Based on the previous research, cohesion referred to the degree to which sentences (or even different parts of one sentence) were connected so that the flow of ideas was easy to follow. To achieve good cohesion, you needed to know how to use cohesion devices which were certain words or phrases that served the purpose of connecting two statements, usually by referring back to what you had previously written or said<sup>2</sup>. It was the same case with what the researcher found here in conversation that was referring back to what they said in their conversation.

“So what we are going to talk about this week in English corner? Of course we always have something to discuss about. And this week we are going to talk about goal of life. What is the goal of our life? What is your goal? Do you have any goal in your life? And why do choose that to become your goals? And what are you going to do when you already achieved your goals? That is what we are going to discuss with four speakers from Mtsn Model Makassar, **and let me introduce you who are the speakers today. I have three girls and one boy. I have Tika, please introduce yourself**”.

---

<sup>2</sup> Besma Azzouz, “A Discourse Analysis of Grammatical Cohesion in Students’ Writing”, A Dissertation(Faculty of Letters and Languages, Mentouri University,2009).

From the conversation above, the sentences that the researcher bold in paragraph had no coherence because in the first paragraph till the middle of paragraph, the host talked about goal of life, but in the end of paragraph, the host did not talk it any more

### **3. Research Findings through Semi - Structured Interview**

After doing observation and document review, the researcher also asked four main questions in semi – structured interview. These were the four mainly question as bellow:

- a) Apakah kesulitan yang Anda hadapi saat berbicara?
- b) Apa yang menjadi penyebab dari kesulitan itu?
- c) Bagaimana cara Anda mengalihkan pembicaraan?
- d) Bagaimana persiapan Anda menghadapi speaker?

The result of this semi – structured interview as bellow:

- The researcher: “Apakah kesulitan yang Anda hadapi saat berbicara di ini apa ketika menjadi presenter English corner?”
- The host: “Kesulitan yang paling dihadapi ketika menjadi host English corner, yang pertama adalah ketika tiba-tiba kita blank mencari vocabulary yang tepat untuk menggambarkan situasi dan kondisi apa yang kita ingin ungkapkan. Itu yang pertama. Jadi kadang-kadang belum ketemu kata yang pas setidaknya saya menjelaskan secara umum dulu ini loh maksud kata yang mau saya cari itu sampai akhirnya tiba-tiba mungkin kata itu langsung

teringat sendiri apalagi didepan kamera ya walaupun sudah terbiasa tapi tetap juga ada nervousnya, dan itu kadang-kadang itu hambatan yang paling besar buat saya”.

- The researcher: “Nervous”.
- The host: “Nervous dan membuat vocabulary tiba-tiba hilang. Kadang-kadang lupa apa ya bahasa inggrisnya, apa ya. Kayak begitu”.
- The researcher: “Padahal kita tauji itu maksudnya?”.
- The host: “Saya ingat sebelumnya, tapi ketika disitu, ketika mau menjelaskan apa ya, apa ya”.
- The researcher: “Dan itu seringki kak kayak begitu? Kayak apa ya apa ya, sering?”.
- The host: “Nda juga. Saya mengalihkan itu dengan mencoba menjelaskan makna dari kata yang saya mau bilang”.
- The researcher: “Dan itu pengalihan scenarionya kak pa, berarti maksudnya hm kita usahakan supaya tidak kentara bahwa kita sedang tidak mengalihkan pembicaraan?”.
- The host: “ Iya, iya”.
- The researcher: “Owgh,caranya”?.
- The host: “Caranya dengan itu tadi, ketika misalnya saya mau ee katanya itu saya belum bisa ingat apa ya kata yang tepat untuk menggambarkan itu, akhirnya saya jelaskan. Saya jelaskan arti dari kata itu sendiri dengan

penjelasan yang panjang lebar. Dan kadang kalo narasumbernya ini, owgh maksudmu ini ya? Owgh ya itu, itu yang saya cari. Gitu”.

- The researcher: “Dan itu sering terjadi kak?.”
- The host: “Tidak juga. Jadi terkadang kita sering terbantu juga ketika narasumbernya sangat lancar berbahasa Inggris”.
- The researcher: “Hmm”.
- The researcher: “Terus apa kesulitan selanjutnya?”.
- The host: “Kesulitan berikutnya ketika harus mewancarai, ini kan acaranya English corner ya. Ketika harus mewawancarai tamu dengan bahasa Inggris yang sangat pas-pasan”.
- The researcher: “Berarti ini tamunya, speakernya terlalu pintar, atau?”.
- The host: “Kadang mungkin dia maksudnya begini, tapi lain lain cara bilangannya, akhirnya saya mengertinya lain juga”.
- The researcher: “Jadinya ambigu?”.
- The host: “Nda tonji, tapi bagaimana ya, hmm kadang-kadang saya senyum-senyum saja. Oh mungkin yang dia maksud begini, kadang saya tanya lain, dia jawab juga lain. Oh mungkin dia tidak mengerti maksud pertanyaan saya, jadi kadang saya ulangi lagi pertanyaannya dengan kalimat yang lain berharap dia mengerti”.
- The researcher: “Dan itu biasa sampe berapa kali kak kita ulang?”.
- The host: “Paling dua kali”.

- The researcher: “Dan ini tidak hampir disemua pertemuan?”.
- The host: “Tidak semua pertemuan cumin occasionally saja”.
- The researcher: “Terus hambatan selanjutnya apa lagi kak?”.
- The host: “Untuk English corner hambatannya apa ya, ituji sih yang paling ini, yang lain ndak”.
- The researcher: “oh jadi so far,apa namanya, ndak terlalu”.
- The host: “Semua hambatannya masih bisa diatasi kecuali maksudnya diluar hambatan tekhnis, soal tekhnisnya orang kantor ya lain”.
- The researcher: “Terus bagaimana itu persiapanta kak menyiapkan materi apa segala macam atau misalnya berapa menit kita persiapkan atau misalnya berjalan diatas panggung dengan sendirinya?”
- The host: “Biasanya kalo misalnya materinya cepat dikasi, biasanya kan English corner tayang setiap hari Senin, jadi kalo materinya sudah ada hari Jumat, saya bisa prepare Sabtu dan Minggu. Walaupun sudah ada temanya kan paling tidak saya bisa bikin point-pointnya. Oh ini mau dibawa kemana arah pembicaraannya. Seperti itu. Persiapan lainnya itu kalos soal temanya, pokoknya kalo ada sudah dikasi dari pengarah produser sudah kirimkan ini temanya dengan narasumber yang ini, oke paling tidak sudah bisa diinikan dengan browsing-browsing atau dengan pengetahuan-pengetahuan yang ada baca di koran atau apalah kalau pembacaraanya masalah yang lagi update pada saat itu. Tapi kalo biasanya kalo biasanya tamunya dari sekolah sendiri,

sekolah tertentu mau mengangkat nama sekolahnya, biasanya sebelum acara dimulai, kan mereka cepat dating, jadi biasanya ngobrol-ngobrol dulu sudah ada prestasi apa, sudah ada apa, bagaimana memperoleh itu semua. Jadi, dari situ dikembangkan apa-apa saja yang bisa saya tanyakan pada saat show berlangsung”.

- The researcher: “Pernah tidak kak misalnya mungkin pas diatas panggungpi baru mungkin kita tahu materinya. Pernah seperti itu kak?”.
- The host: “Oh ndak pernah. Paling tidak dua atau tiga jam sudah ada. Palin lambat sekali itu. Itupun tidak setiap pertemuan juga begitu, kadang-kadangji.
- The researcher: “Oke kak makasih”.
- The host: “Iya”.

## **B. Discussion**

This part presents the discussion of the research findings in light of relevant theories and previous studies.

### **1. Speech Act**

Austin mentioned the types of act which was performed in a conversation, they were: locutionary, illocutionary, and perlocutionary act. The following were their explanations: *Locutionary act* is an act of how a person produces the utterance or to produce a meaningful linguistics expression. *Illocutionary act* is the act of the speaker in using his/her organ of speech to produce utterances and has implitation,

to whom, where it has done. *Perlocutionary act* is the effect of the utterance which the speaker said to the hearer.

. Basically, their classifications of illocutionary act in speech there are five.

The following are the classifications by Searle.

- *Representatives* = speech acts that commit a speaker to the truth of the expressed proposition e.g. reciting a creed.
- *Directives* = speech acts that are to cause the hearer to take a particular action, e.g. requests, commands and advice
- *Commissives* = speech acts that commit a speaker to some future action, e.g. promises and oaths
- *Expressives* = speech acts that express the speaker's attitudes and emotions towards the proposition, e.g. congratulations, excuses and thanks
- *Declarations* = speech acts that change the reality in accord with the proposition of the declaration, e.g. baptisms, pronouncing someone guilty or pronouncing someone husband and wife.

After drawing the data in document review, not all the utterances consisted of three parts of speech act like locutionary, illocutionary, and perlocutionary. Sometimes the utterances did not contain perlocutionary because not all the utterances had somebody to do something or influenced somebody to act after hearing the utterance. Sometimes the host utterance only consisted of locutionary

and illocutionary. But we still could find perlocutionary in the other utterances of the host. The researcher classified the utterance based on the types of speech act.

From the table that drew before, we saw there were eleven utterances had no perlocutionary. And the most type of illocutionary that the researcher found twelve of directive, five of expressive, three of representative, and one of commissive. Most of utterances were directives because directive was used to have somebody to do, and to suggest. While expressive was used to express what the host was feeling, representative was used based on the truth or the faith, and commissive was used for the future.

Based on the previous research type of illocutionary act of, commissive, assertive, and expressive are already appeared in the speech of those children. However, those children who are different by their age have not used the illocutionary act of declaration yet and they use the directive more often.<sup>3</sup> It was the same what the researcher already found here. All the types of illocutionary appeared in the host speech, but the most found was directive.

## 2. Cohesion and Coherence

Cohesion and coherence were not too difficult to explain. Cohesion referred to connectivity in a text. The property of unity in a written text or a segment of

---

<sup>3</sup> Dyan Anita D, "The Speech Act and Communication Strategy in Children of 3-5 Years Old", Thesis(Faculty of Humanities Diponegoro University, 2009)

spoken discourse that stems from links among its surface elements, as when words in one sentence are repeated in another, and especially from the fact that some words or phrases. All referred to connectivity in a text mentioned and explained where the words referred to.

Cohesion is a semantic property of a text sticking together in some way; i.e., a cohesive text tends to link its sentences together semantically. This semantic aspect of cohesion has a relation with the reader who interprets the elements in a given co-text depending on the other element within the same co-text. Halliday and Hassan assert that: “Cohesion occurs where the interpretation of some element in the discourse is dependent on that of another. The one presupposes the other in the sense that it cannot be effectively decoded except by resources to it”.

In fact, the presupposition is an important aspect in cohesion because it extracts the unrelated sentences by the connected one. Thus relations in meaning of any sentence depending on the surrounding elements. In other words “cohesion refers to the range of possibilities that exist for linking something with what has gone before. Since this linking is achieved through relations in meaning”. It was the same what the researcher found and the previous research in conversation above<sup>4</sup>.

To know the paragraph was coherence or no, we needed to know the relation between grammatical paragraph and the meaning of paragraph related each other. So

---

<sup>4</sup> Besma Azzouz, “A Discourse Analysis of Grammatical Cohesion in Students’ Writing”, A Dissertation(Faculty of Letters and Languages, Mentouri University,2009).

from one sentence to another paragraph was the same meaning and discussion. The paragraph was not coherence if one of them were not connected one another.

Based on observation and analyzing document review, some the host utterances did not connect. In some scenario, the host talked two different topics in the same paragraph. But the host did not talk and speak out of topic that were given or presented while broadcasting. The host mastered the theme well and produced the sentence well because the host had chosen which words and vocabularies were appropriate with the condition. Even the host sometimes faltered in speaking or producing the word, but she knew how to solve it and how to speak well. In conclusion, what the host said and discussed at that time not all were coherence but still understandable by the audiences, the speakers, and the callers. That was the result that some the host had no good coherence in sentences when delivering and presenting the material on air.

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### *A. Conclusions*

Based on the findings and the discussion above, the researcher concluded the following things:

1. In preparing this program, the event organizer or all crews prepared everything by testing every tool thirty minutes till one hour before English corner was on air. When English corner was on air, it opened by little show such as singing a song to take the audiences interesting and to focus on English corner.
2. The researcher recorded the program, analyzed and put in on sentences in every scenario and explained in each of speech act and the type of speech act of the host saying while on air and then classified based on the types of illocutionary.
3. After finishing document review, the researcher doing an interview to clarify what the researcher got based on the recorded data to avoid misunderstanding in understanding and writing each scenario. So the researcher wrote it based on the host explanation and direction.

## **B. *Suggestions***

Based on the conclusions, the researcher suggested the following things:

1. For the event organizer to recheck every electrical tool because based on the host explanation, so far she had no serious trouble expect it was beyond the technician.
2. For the event organizer, to inform that to attend this event or to become the speaker, had no specific requirements.
3. The host to prepare well before starting on air, because sometimes the host forgot and how to solve misunderstood each other.
4. For the audiences, it would be better if they take a part here, like asking the question or giving comment or suggestion to the speaker, so they could improve their speaking on air.
5. For other researcher, the researcher suggested him/ her to do observation studio, or became speaker in English corner so it could be more friendly and more closer among the event organizer, the host, and the researcher.

## **Appendix 1. Sejarah Kerja Sama English Corner TVRI Makassar dengan Polinas**

Direktur Politeknik Informatika Nasional Makassar M.ABDUH IDRIS mengatakan pasca Launching Program-Peluncuran Program siaran perdana New English Corner di LPP TVRI Sul-Sel pada hari Senin 5 Februari 2015 bekerja sama dengan Politeknik Informatika Nasional Makassar program acara berbahasa Inggris yang dapat dijadikan sarana pembelajaran khususnya bagi mahasiswa Polinas makassar dan masyarakat pemirsa TVRI pada umumnya.

M.ABDUH IDRIS menyambut baik kepercayaan yang diberikan oleh Pimpinan LPP TVRI Sulsel kepada Polinas untuk mengelola suatu paket siaran berbahasa Inggris 4 kali setiap bulan, pada setiap hari Senin sore dengan lama durasi satu jam live program. Penayangan Siaran English Corner ini akan disiarkan setiap Pukul 17.00 - 18.00 WITA dengan penayangan siaran satu kali dalam satu minggu dimulai pada minggu pertama Senin 5 Januari 2015 yang lalu dengan Tema "Peluncuran Program New English Corner", sedangkan pada minggu kedua hari Senin tanggal 12 Januari 2015 kemarin telah dilaksanakan siaran langsung Debate Eksepsi dengan menampilkan utusan dari AESTA Universitas Islam Negeri Kampus Samata dengan UKM Bahasa UNISMUH Makassar, rencana program materi siaran pada hari Senin berikutnya masing masing akan dilaksanakan dengan memilih Topik Overseas Study dan TRIVIA Tingkat SMA/SMK Makassar.

Koordinator Pelaksana Siaran New English Corner TVRI- POLINAS Makassar AGUS RAHMAT NUGROHO dan ARHAM ALWIN RANI, mengatakan khusus untuk siaran Debat Eksepsi ditayangkan secara langsung memilih salah satu sistem dari Australian Parliamentary System, British atau United Nation System. Sedangkan untuk rencana siaran pada bulan berikutnya Februari 2015 akan diprogramkan mengenai Hot Issue dalam bentuk siaran Talk Show Interactive melibatkan orang-orang penting, Celebrity, Kalangan Pejabat Teras dan Mahasiswa Perguruan Tinggi Negeri maupun Swasta yang ada didaerah ini. Direktur Polinas M.ABDUH IDRIS berterima kasih dan menyambut dengan sangat antusias kepercayaan yang telah diberikan Kepala LPP TVRI Sulsel H.M.RUSLI SUMARA, dan beliau berharap kedepan program siaran Acara New English Corner ini akan berjalan jauh lebih baik dan sangat diminati oleh para pemirsa yang ada di Sulawesi Selatan.

## **Appendix II. Question of Interview**

- e) Apakah kesulitan yang Anda hadapi saat berbicara?
- f) Apa yang menjadi penyebab dari kesulitan itu?
- g) Bagaimana cara Anda mengalihkan pembicaraan?
- h) Bagaimana persiapan Anda menghadapi speaker?

The result of this semi – structured interview as bellow:

- The researcher: “Apakah kesulitan yang Anda hadapi saat berbicara di ini apa ketika menjadi presenter English corner?”
- The host: “Kesulitan yang paling dihadapi ketika menjadi host English corner, yang pertama adalah ketika tiba-tiba kita blank mencari vocabulary yang tepat untuk menggambarkan situasi dan kondisi apa yang kita ingin ungkapkan. Itu yang pertama. Jadi kadang-kadang belum ketemu kata yang pas setidaknya saya menjelaskan secara umum dulu ini loh maksud kata yang mau saya cari itu sampai akhirnya tiba-tiba mungkin kata itu langsung teringat sendiri apalagi didepan kamera ya walaupun sudah terbiasa tapi tetap juga ada nervousnya, dan itu kadang-kadang itu hambatan yang paling besar buat saya”.
- The researcher: “Nervous”.
- The host: “Nervous dan membuat vocabulary tiba-tiba hilang. Kadang-kadang lupa apa ya bahasa inggrisnya, apa ya. Kayak begitu”.

- The researcher: “Padahal kita tauji itu maksudnya?”.

- The host: “Saya ingat sebelumnya, tapi ketika disitu, ketika mau menjelaskan apa ya, apa ya”.
- The researcher: “Dan itu seringki kak kayak begitu? Kayak apa ya apa ya, sering?”.
- The host: “Nda juga. Saya mengalihkan itu dengan mencoba menjelaskan makna dari kata yang saya mau bilang”.
- The researcher: “Dan itu pengalihan scenenya kak pa, berarti maksudnya hm kita usahakan supaya tidak kentara bahwa kita sedang tidak mengalihkan pembicaraan?”.
- The host: “ Iya, iya”.
- The researcher: “Owgh,caranya”?.
- The host: “Caranya dengan itu tadi, ketika misalnya saya mau ee katanya itu saya belum bisa ingat apa ya kata yang tepat untuk menggambarkan itu, akhirnya saya jelaskan. Saya jelaskan arti dari kata itu sendiri dengan penjelasan yang panjang lebar. Dan kadang kalo narasumbernya ini, owgh maksudmu ini ya? Owgh ya itu, itu yang saya cari. Gitu”.
- The researcher: “Dan itu sering terjadi kak?.”
- The host: “Tidak juga. Jadi terkadang kita sering terbantu juga ketika narasumbernya sangat lancer berbahasa Inggris”.
- The researcher: “Hmm”.
- The researcher: “Terus apa kesulitan selanjutnya?”.

- The host: “Kesulitan berikutnya ketika harus mewawancarai, ini kan acaranya English corner ya. Ketika harus mewawancarai tamu dengan bahasa Inggris yang sangat pas-pasan”.
- The researcher: “Berarti ini tamunya, speakernya terlalu pintar, atau?”.
- The host: “Kadang mungkin dia maksudnya begini, tapi lain lain cara bilanginya, akhirnya saya mengertinya lain juga”.
- The researcher: “Jadinya ambigu?”.
- The host: “Nda tonji, tapi bagaimana ya, hmm kadang-kadang saya senyum-senyum saja. Oh mungkin yang dia maksud begini, kadang saya tanya lain, dia jawab juga lain. Oh mungkin dia tidak mengerti maksud pertanyaan saya, jadi kadang saya ulangi lagi pertanyaannya dengan kalimat yang lain berharap dia mengerti”.
- The researcher: “Dan itu biasa sampe berapa kali kak kita ulang?”.
- The host: “Paling dua kali”.
- The researcher: “Dan ini tidak hampir disemua pertemuan?”.
- The host: “Tidak semua pertemuan cumin occasionally saja”.
- The researcher: “Terus hambatan selanjutnya apa lagi kak?”.
- The host: “Untuk English corner hambatannya apa ya, ituji sih yang paling ini, yang lain ndak”.
- The researcher: “oh jadi so far,apa namanya, ndak terlalu”.

- The host: “Semua hambatannya masih bisa diatasi kecuali maksudnya diluar hambatan tekhnis, soal tekhnisnya orang kantor ya lain”.
- The researcher: “Terus bagaimana itu persiapanta kak menyiapkan materi apa segala macam atau misalnya berapa menit kita persiapkan atau misalnya berjalan diatas panggung dengan sendirinya?”
- The host: “Biasanya kalo misalnya materinya cepat dikasi, biasanya kan English corner tayang setiap hari Senin, jadi kalo materinya sudah ada hari Jumat, saya bisa prepare Sabtu dan Minggu. Walaupun sudah ada temanya kan paling tidak saya bisa bikin point-pointnya. Oh ini mau dibawa kemana arah pembicaraannya. Seperti itu. Persiapan lainnya itu kalos soal temanya, pokoknya kalo ada sudah dikasi dari pengarah produser sudah kirimkan ini temanya dengan narasumber yang ini, oke paling tidak sudah bisa diinikan dengan browsing-browsing atau dengan pengetahuan-pengetahuan yang ada baca di koran atau apalah kalau pembacaraanya masalah yang lagi update pada saat itu. Tapi kalo biasanya kalo biasanya tamunya dari sekolah sendiri, sekolah tertentu mau mengangkat nama sekolahnya, biasanya sebelum acara dimulai, kan mereka cepat dating, jadi biasanya ngobrol-ngobrol dulu sudah ada prestasi apa, sudah ada apa, bagaimana memperoleh itu semua. Jadi, dari situ dikembangkan apa-apa saja yang bisa saya tanyakan pada saat show berlangsung”.

- The researcher: “Pernah tidak kak misalnya mungkin pas diatas panggungpi baru mungkin kita tahu materinya. Pernah seperti itu kak?”.
- The host: “Oh ndak pernah. Paling tidak dua atau tiga jam sudah ada. Paling lambat sekali itu. Itupun tidak setiap pertemuan juga begitu, kadang-kadangji.
- The researcher: “Oke kak makasih”.
- The host: “Iya”.

### **Appendix III ( Informed Consent )**

#### **Perihal : Pemberian Informasi dan Persetujuan**

Dengan hormat,

Saya yang bernama Annisa Aulia adalah mahasiswi Jurusan Pendidikan Bahasa Inggris, Fakultas Tarbiyah dan Keguruan, UIN Alauddin Makassar. Penelitian ini dilakukan sebagai salah satu kegiatan dalam menyelesaikan pendidikan program S1 di UIN Alauddin Makassar.

Tujuan penelitian ini adalah untuk mengetahui seberapa jauh pembawa acara english corner menggunakan speech act, cohesion and coherence ketika berbicara. Untuk keperluan tersebut saya mohon kesediaan saudara/i untuk menjadi partisipan dalam penelitian ini dengan menjawab pertanyaan dalam forum diskusi kelompok dan wawancara dengan jujur dan apa adanya. Jika saudara bersedia, silahkan menandatangani persetujuan ini sebagai bukti kesukarelaan saudara.

Nama:

Umur:

Tanda Tangan:

Identitas pribadi sebagai partisipan akan dirahasiakan dan semua informasi yang diberikan hanya akan digunakan untuk penelitian ini. Saudara/i berhak untuk ikut atau tidak ikut berpartisipasi tanpa ada sanksi dan konsekuensi buruk dikemudian hari. Jika ada hal yang kurang dipahami, silahkan bertanya langsung kepada peneliti.

Atas perhatian dan kesediaan saudara menjadi partisipan dalam penelitian ini saya ucapkan terima kasih.

**Peneliti**
