Sri Ulfana Arif

PERSETUJUAN PEMBIMBING

Pembimbing penulis skripsi saudara Sri Ulfiana Arif, Nim: 40300114033, mahasiswa Jurusan Bahasa dan Sastra Inggris, Fakultas Adab dan Humaniora UIN Alauddin Makassar, setelah dengan seksama meneliti dan mengoreksi skripsi yang bersangkutan dengan judul, "A Semiotic Analysis Of Self-Presentation In Instagram Stories By 2015 English And Literature Students", memandang bahwa skripsi tersebut telah memenuhi syarat-syarat ilmiah dan dapat disetujui untuk diajukan kesidang munaqasyah.

Demikian persetujuan ini diberikan untuk proses selanjutnya.

ACKNOWLEDGEMENTS

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

All praises to Allah subhana wa ta'ala who has blessed, guided and given the health to the researcher writing this thesis. Then, the researcher would like to send Invocation and Peace to the Great Prophet Muhammad shallallahu alaihi wassalam peace be upon Him, who has guided the people from the darkness of civilization to the better life.

The researcher realizes that in writing and finishing this thesis, there are many people that have provided their suggestion, advice, help and motivation. Therefore, the researcher would like to express thanks and highest appreciation to the following:

1. The researcher beloved parents, Arif and Radiawati who have been giving their loves, cares, supports and prayers in every single time and eternal affections as the biggest influence in her success and happy life and also to her beloved brothers Arlan Ganda Subrata and Abdi Setia Wirawan for their support and love.
2. Prof. Dr. H. Musafir Pababbari, M.Si, as the rector of Alauddin State Islamic University of Makassar, who has given her a chance to study at the English and Literature department so that she could finish her study.
3. Dr. H. Barsihannor, M.Ag, as the Dean of Adab and Humanities Faculty, Kustiwan Syarief, S.Ag., M.A., Ph.D, as the head of the English and Literature

Department, and Syaruni Junaid, S.S., M.Pd, as the secretary of the English and Literature Department for their support, help and encouragement.

4. Special thanks to her dedicated supervisors, Kustiwan Syarief, S.Ag., M.A., Ph.D and Helmi Sykur, S.Pd.I., M.Pd who have helped, guided, and supported the researcher during the writing of her thesis.
5. The researcher's gratitude is also due to her examiners, Dr. Umar Thamrin, S.Ag., M.Hum., M.A and Muh. Taufik, S.S., M.Hum for their advice, criticism and suggestion.
6. The lecturers of Adab and Humanities Faculty, for their knowledge and enlightenment, also the staff of Adab and Humanities Faculty for their help and administrative support.
7. Deepest appreciation individually and collectively thanks to students of the English and Literature Department Academic Year 2014; AG 1 and 2, AG 3 and 4, AG 5 and 6 and AG 7 and 8, and especially to her friends in AG 1 and 2.
8. Special thanks to her best friends, Ardi, Iin, Erni, Diana, Tika, and Randi for the supports, cares, and motivated during the writing of this thesis. And also Mage and Pitti as a partner in waiting during the writing of this thesis.
9. All of the people around the researcher's life who could not mentioned one by one by the researcher, and who have given a big inspiration, motivation spirit and pray to her.

The researcher realizes that the writing of this thesis is far from a perfect.

Remaining errors are the researcher's own therefore constructive, criticism and

suggestions will be highly appreciated. May all of our efforts are blessed by Allah subhana wa ta'ala. Aamiin.

Tittle : Semiotic Analysis of Self-Presentation in Instagram Stories by 2015 English and Literature Students
Supervisor I : Kustiwan Syarief
Supervisor II : Helmi Syukur

This research was about the Semiotic Analysis of Self-Presentation in Instagram Stories by 2015 English and Literature Students which aimed to explore the types of sign that are expressed and to analyze the meaning of the three important elements of signs including icons, indexes, and symbols in the Instagram Stories. this research was descriptive qualitative method using a semiotic theory who advocated by Pierce as its theoretical framework. The data for this research were collected from Instagram Stories using note-taking as its main research instrument. This research was conducted in order to know the meaning of icon, index and symbol are expressed in Instagram stories and also provide reference for students majoring in English and Literature Department about semiotics, especially in the use of Piercean's semiotics theory, to analyze Instagram Stories. The results took, there are 9 visual signs consisting of 3 symbols, 3 icons, and 3 indices which then each sign is classified into 3 groups of sign there are symbol, icon, and index, object, and then from this division can be found meaning of the sign by using Pierce's semiotic theory. The researcher conclude that, the portrait that uploaded is an icon that's mean that the participants try to present themselves to the general public through their photo. The *mukenah* is a symbols of muslim people and the *eye bags* is an index of lack of sleep.

Keywords: *Instagram Stories, Icons, Indexes And Symbols, Pierce's Semiotic Theory, Descriptive-Qualitative Method.*

CHAPTER I

INTRODUCTION

A. Study Background

Instagram is a social media which could enables their users to uploading content such as pictures and videos. Instagram has more than 300 million active users for now (Jarvinen & Ohtonen Joinsen in Amancio, 2017: 7). Instagram which available for a smartphone-based platform like Android or iPhone, has a feature its called “Instagram Stories”.

Instagram stories is one of the social media where users can upload various photos and videos with a certain duration (Instagram Blog, 2017). Instagram stories is a social phenomenon to all people, for now, most teenagers who are active in social media have an Instagram account which they could use easily to create an Instagram Stories all the time. Instagram Stories present another way for users to post what they are doing and thinking in a consecutive timeline whatever and whenever they want.

Schlenker in Sarwono and Meinarno (2012) defines Self-Presentation as part of impression management which is an attempt to regulate the impression of others on capturing about us, whether consciously or unconsciously, so that impression management can predict a Self-Presentation that will appear in a social situation.

It can be concluded that Self-Presentation is an attempt to present themselves to the society that someone does to get the impression from others both consciously and unconsciously and that can be done by individuals, groups of individuals and organization. Instagram Stories are closely related to Self-Presentation because Self-presentation through Instagram Stories is seen as a form of testing one's identity. When interacting with other people, especially in cyberspace, an individual's attention is only focused on how people will judge their behavior. Self-presentation is done through Instagram Stories in the form of short videos and photos. In other words, individuals make Instagram Stories as a medium of Self-Presentation.

In Instagram Stories, someone uploaded their photos and videos to depict themselves. For example, when they are on vacation to some places they usually upload their vacation videos or photos to Instagram Stories, so their friend can see and know that they are on vacation. When someone uploaded their videos and others see it or left a comment in their video, is called the process of Self-Presentation, because they show themselves to the public to get an impression from others people. Pierce in Sobur (2009, 2016: 41) defines sign as something which stands to somebody for something in some respect or capacity. These signs may include sounds, words and everything that could give a guidance as a process of communication like a house, shirt and ever symbol with meaning, so all of the picture, sound, video, gesture, and anything performed and shown in the Instagram Stories definitely contain sign that needs to be interpreted. To interpret the sign we

can use the theory of semiotics to determine the meaning of the videos that has been uploaded to Instagram Stories by users.

Chandler (2007: 2) defines semiotic as sign which take the form of words, images, sounds, gestures, and objects. According to Eco (1986: 7), semiotic is concerned with everything that can be taken a sign. It means, every existing thing in our life is looked look a sign, that is something that we should give meaning to them. Actually, there are two popular models of semiotics: the *dyadic* model by Ferdinand de Saussure and the *triadic* model by Charles Sanders Pierce. Saussure's dyadic model of signs defines a sign as being composed of a signifier and signified and the relationship between the signifier and signified is called signification.

Based on Eco (1986: 7), the triadic model of semiotics by Pierce's consist of:

- a. The representamen: the form which the sign takes (not necessarily material, though usually interpreted as such) – called by some theorists the 'sign vehicle'.
- b. An interpretant: not an interpreter but rather the sense made of sign.
- c. An object: something beyond the sign to which it refers (a referent).

In Instagram Stories, people may generally make some signs and give them some descriptions, so that the sign could provides meaning. From the sign, people can understand what others mean, so this study analyzed with Pierce's theory of

semiotics. The researcher uses Charles Sanders Pierce theory to analyze the icon, index, and symbol that exist in the Instagram Stories by 2015 English and Literature department students to get the clear meaning of every icon, index and symbol that contain in their Instagram Stories. The reason why the researcher is interested to analyze the icon, index, and symbol in this study because Pierce's semiotic model is also more flexible to be used for research such as films, photos, videos and other literary works which unlike others that are more based on linguistic sciences.

There have been several studies that have discussed the phenomenon of Instagram and Self-Presentation such as Husna (2016) with the title "*Instagram and Self-Presentation*" research and get the result of research where there is a very close relationship between Instagram and Self-Presentation. Pangastuti (2015) in her journal studied the phenomenon of social media in relation to narcissism with the title "*Relationship of Narcissism with Self-Presentation on Social Networking Facebook*" research and found that there is a positive significant relationship between narcissism and self-presentation. Associated with the theory of semiotics, in other studies Hermawan (2010) also studied about the semiotics in poetry in his journal entitled "*A Semiotic on Kim Addonizio's Poems Based on C.S. Pierce's Theory*" with the result showing that each poem contains different ideas.

The researcher concludes that many previous studies have examined Instagram, Self-Presentation, relationship between Instagram and Self-Presentation, and adaptation of semiotics theory used to find the sign contained in poetry. In contrast to

these studies, the researcher combines these concepts and begin researching about Self-Presentation. The researcher continues to use social media. However, in this research it was decided that it will be focused on Instagram Stories. The researcher sees the Instagram stories as a social phenomenon that is currently being enjoyed widely by teenagers, so the researcher examine the Semiotic Analysis of Self-Presentation in Instagram Stories.

The subject of this research includes students of English and Literature Department, Faculty of Adab and Humanities, Alauddin State Islamic University of Makassar who has an active account and always use Instagram Stories. A study conducted by Markplus Insight with the title "*Netizen Survey 2013*" found that interesting findings of social media. There are 2.150 netizens surveyed, the application of Instagram became a popular application among teenagers. As many as 5,9% of respondents that have ages 15-22 year access Instagram which is a place to exchange images and can also upload the video. That's why the researcher choose 2015 English and Literature department students because it is including the category of teenagers who are currently active using Instagram, the students are also one of the many people who desperately need a Self-Presentation to know each other.

This research involves 2015 English and Literature Department students of the Adab and Humanities faculty at Alauddin State Islamic University of Makassar.

What the researcher doing about this Self-presentation research is strongly related to Al-Qur'an surah Al-Hujurat verse 13 that is :

يَا أَيُّهَا النَّاسُ إِنَّا خَلَقْنَاكُمْ مِنْ ذَكَرٍ وَأُنْثَىٰ وَجَعَلْنَاكُمْ شُعُوبًا وَقَبَائِلَ لِتَعَارَفُوا ۚ إِنَّ
عِنْدَ اللَّهِ أَتْقَىٰكُمْ ۚ إِنَّ اللَّهَ عَلِيمٌ خَبِيرٌ

Translation :

O mankind! We created you from a single (pair) of a male and female, and made you into nations and tribes, that ye may know each other (not that ye may despise (each other). Verily the most honored of you in the sight of Allah is (he who) the most righteous of you. And Allah has full knowledge and is well acquainted (with all things).

(Q.S. AL-HUJURAT: 13)

According to Quraish Shihab (2002: 262), the stronger the chance for introducing one part to the other, the more it gets a chance to have an advantage. Therefore, the verse above emphasizes the necessary of introducing to each other. The introduction is needed to obtain the lesson and experience from the other part in order to improve someone's obedient to Allah SWT whose impact will be reflected in peace and prosperity of life in the world and happiness in the afterlife. You will not get a lesson and share the benefit to each other, even get work together without knowing each other.

Based on the explanation, the researcher conducted research entitled “A Semiotic Analysis of Self-Presentation in Instagram Stories by 2015 English and Literature Students”.

B. Research Questions

After seen the background, the research question were formulated as follows:

1. What types of signs are represented in Instagram Stories by 2015 English and Literature students?
2. What are the meanings of the signs expressed in Instagram Stories by 2015 English and Literature students?

C. Objectives of The Research

Based on the formulation of the problem, the purpose of the research included the following:

1. To document the types of signs that are expressed in Instagram Stories posted by 2015 English and Literature Students.
2. To describe the meanings of the signs expressed in Instagram Stories by 2015 English and Literature Students.

D. Significance of The Research

The researcher expected to give a contribution, theoretically and practically for other researchers in the English and Literature Department.

Theoretically, this study expected to contribute to knowledge-building in the field of semiotics especially related to Self-Presentation.

Practically, this research is to apply the knowledge received by the researcher during her study at the English and Literature Department and to give input to anyone who is interested to study about Self-Presentation more deeply.

E. Scope of The Research

In this study, the researcher focused on Semiotics Analysis of Instagram Stories by 2015 English and Literature students. The researcher used Peirce's theory as discussed in Daniel Chandler (2007).

CHAPTER II

REVIEW OF RELATED LITERATURE

A. Previous Studies

Similar research had been conducted by a number of researches including:

Jamil (2016) analyzed “*Perahu Phinisi Sebagai Lambang Kabupaten Bulukumba (analisis semiotika pierce dalam lambang kabupaten bulukumba)*”. The researcher found that Phinisi as an icon of the city of Bulukumba has a meaning that Phinisi in masterpiece from shipbuilders in Bulukumba, and also as a world heritage in Bulukumba.

Nisa (2017) conducted research with the title “*Cattleya Orchid Signs In The Colombiana (2011) Film*”. The researcher found that Cattleya is Colombian and she is a woman who kills for living. She aims to become a killer as revenge for her parent’s death that is killed by Don Louis. During her revenge mission, she is a patient yet organized and dangerous killer.

Hermawan (2010) with the title of the research is *A Semiotic on Kim Addonizio’s Poems Based on C.S. Peirce’s Theory*. The result showed that each poem contains of different symbols with different meaning and function. And these differences had given different ideas.

Putri (2016) with the title of the research is *A Semiosis Process Analysis On KFC Advertisement Posters Using C.S. Pierce Theory*. The result showed that the process of semiosis will be known if representamen, object, and interpretant observe firstly based on the category of icon and symbol.

Eriana (2015) with the title of the research is “*Pierce’s Semiotics Analysis of icon and symbol on Perfume Advertisements*”. The result showed that each advertisement had different sign and also different meaning. These differences had given different interpretation.

Based on these previous studies, the researcher concluded that no one researcher used semiotic analysis of Self-Presentation in Instagram Stories as their research. Therefore the researcher decided to take the Semiotic Analysis Of Self-Presentation In Instagram Stories By English Literature Students 2015 and analyzing the icons, symbols, and indices inside Instagram Stories.

B. Theoretical Frameworks

In conducting a study about a Semiotic Analysis Of Self-Presentation In Instagram Stories By 2015 English and Literature Students, the researcher used the theory of semiotics by Peirce’s (1905) in Daniel Chandler (2007). In this part, the researcher explained the theoretical frameworks related to the research.

a. Self-Presentation and Instagram Stories

1) Self-Presentation

According to De Lameter dan Myers (2007) defines Self-Presentation as the effort that individuals do both consciously and unconsciously to control themselves according to the desired picture in social interaction. The form of Self-Presentation is naturally occurring or natural, but there are some artificial ones.

Every person has its own way to present itself to others. Self-Presentation refers to the impression of ourselves that we want to show to both private and public audiences. Boyer and friends (2006: 4) defines Self-Presentation or often called impression management as self-presenting act done by every individual to achieve an expected self-image. This Self-Presentation can be done by individuals, groups of individuals and organizations.

Schlenker in Sarwono and Meinarno (2012) defines Self-Presentation as part of impression management which is an attempt to regulate the impression others capture about us whether consciously or unconsciously. So that impression management can predict a Self-Presentation that will appear in a social situation.

Baumeister in Grietens (1999) divides the motives of Self-Presentation into two categories: to satisfy the *audience* and build themselves (*self-construction*). If the ultimate goal is to satisfy the *audience*, the individual hopes to receive back the goodness of the material or appreciation of the social by displaying the characteristics

of themselves that can make people will appreciate. If *self-construction* is the main target, Self-Presentation will be interpreted as the intent of self-fulfillment. Self-presentation is intended to establish, maintain and clean up an individual image in the minds of others. It becomes something to be considered on the individual's social identity.

2) Instagram Stories

Instagram was first launched in 2010 (McNely, 2012: 1-8). The application was a photo-sharing platform, where users would share their photos and videos in a timeline. Users can add captions, tag his/her friends, and put his/her location for example. The application is one of the most popular social media platforms today, with more than 400 million daily active users (Smith, 2017). It got even more popular after the acquisition of Instagram by Facebook in 2012 (Csathy, 2017). Instagram is an application that can be accessed through a website where users can see their feed, profile, and comments in their post or others' post. Today, the application is still offering its original basic purpose, but now the features the 'stories' functions is the top part of the feed. This is where users can access videos and photos that last for 24 hours and can add emoji, their location, temperature and time to the Stories.

Instagram Stories were launched in August 2016 (Instagram Blog, 2017). It allows users to post ephemeral photo and video content that disappear after 24 hours. The temporary nature of Instagram Stories encourages users to post content as it's

captured, rather than the traditionally polished content posted to profiles. This is great for “behind the scenes” content or event coverage. Similar to Snapchat, content from Instagram Stories should be vertical and full-screen. Elements of Instagram Stories are viewed in a slideshow format, so it’s helpful to create a storyboard or brainstorm the individual’s posts within stories before posting it. To keep viewers engaged, post a variety of content, from photos boomerangs and spruce it up using text and stickers. It’s best to post content in Stories within a small timeframe so viewers can consume in its entirety rather than in bits and pieces when content is posted throughout the day (Instagram Blog, 2017).

There are many features that contain in Instagram Stories, including:

1. Live, a broadcast live video to followers
2. Normal, taking photos or video and then record it for up to 15 seconds
3. Boomerang, recording a burst of photos that loop forward and backward, similar to a GIF.
4. Rewind, record video that will reverse
5. Hands-free, record a video without holding down the record button.

A study conducted by Solomon McCown found that in Instagram Stories have 300 million daily activity users, 58% of unique visitors and 58% ages 18-22 who are active users and have Instagram account to make Instagram Stories every day.

Besides that, Instagram Stories allow users to share images and videos from the camera roll. If they have been taken within the last 24 hours including those you create in Instagram Stories and save to your device before sharing.

Finally, relation between link and tag, now verified users can link to specific pages natively in Instagram Stories instead of developing by a bit.ly and tracking there. All users can also tag your biggest fans and other influences (Instagram Blog, 2017).

b. Semiotics

Talking about semiotics, there are two dominant contemporary models of what constitutes a sign, those of the Swiss linguist Ferdinand de Saussure and the American philosopher Charles Sanders Peirce.

According to Daniel Chandler (2007: 33), Saussure defines sign as being composed of a 'signifier' (signifiant) and a 'signified' (signifie). Contemporary commentators tend to describe the signifier as the concept to which it refers. For Saussure, both the signifier (the sound pattern) and the signified (the concept) were purely 'psychological'. Pierce in Sobur (2009: 41) defines sign as something which stands to somebody for something in some respect or capacity.

Besides that, Barthes in Sobur (2003: 12) defines semiotic as science or sign analysis method.

Based on several definitions above, the researcher can conclude that semiotics is a study of sign and or a method to analyze a sign to get meaning for interpretation of sign.

C. Charles Sanders Peirce's Theory

Charles Sanders Peirce is an American Philosopher. He was born in Cambridge, Massachusetts on 10th September 1839, and died in Milford, Pennsylvania on April 19th, 1914 (aged 74). Peirce gives the definition of the semiotic as a sign of something and it is understood by someone or has meaning to someone.

Pierce in Sobur (2009, 2016: 41) defines sign as something which stands to somebody for something in some respect or capacity. These signs may include sounds, words, and everything that could give a guidance as a process of communication like a house, shirt and even symbol with meaning. Charles Sanders Pierce gives a definition of representamen as the sign itself, the object is the thing which is referred and the interpretant is the product from the connection between interpretant and object.

As a pragmatic philosopher and logician, Charles Sanders Pierce (1905) in his semiotics theory in Daniel Chandler (2007: 29 offered a triadic (three-part) model consisting of:

1. The Representamen: the form which the sign takes (not necessarily material, though usually interpreted as such) called by some theorists the 'sign-vehicle'.

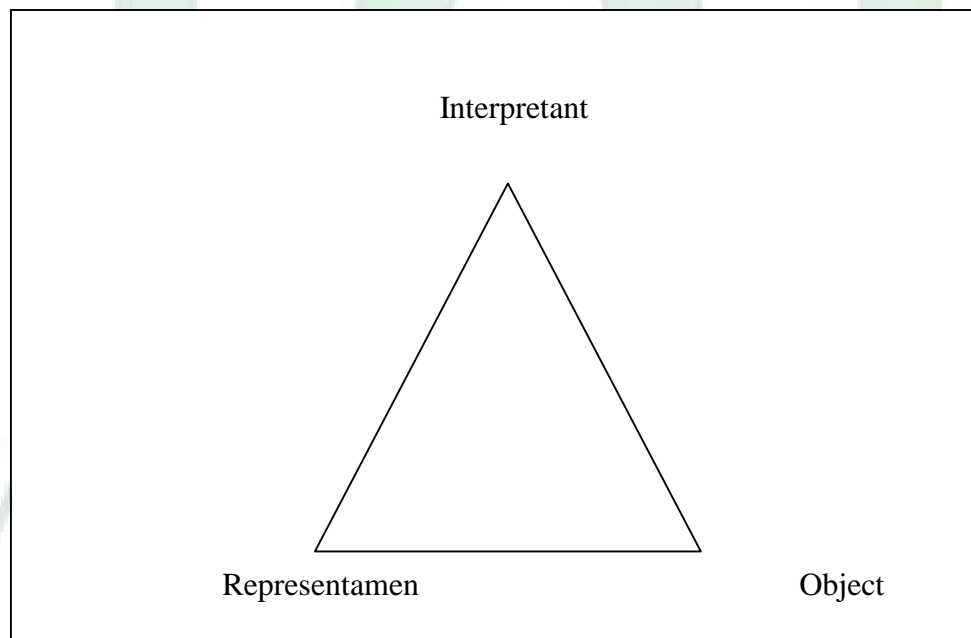

2. An Interpretant: not an interpreter but rather the sense made of the sign.
3. An Object: something beyond the sign to which it refers (a referent)

In Peirce's own words :

“A sign . . . [in the form of representament] is something which stands to somebody for something in some respect or capacity. It addresses somebody, that is, creates in the mind of that person an equivalent sign, or perhaps a more developed sign. That sign which it creates I call the interpretant of the first sign. The sign stands for something, its object, not in all respects, but in reference to a sort of idea, which I have sometimes called the ground of the representament.”

(Peirce 1931- 58, 2.228) in Daniel Chandler (2007).

There are best known as thricotomy of Pierce Theory. The thricotomy can be visualized in this triangle :

According to Pierce in Chandler (2007:36) states there are three modes arose within (and because of) Pierce's triadic model of sign:

1. Symbol/symbolic, a mode in which the signifier does not resemble the signified but is fundamentally arbitrary or purely conventional, so that this relationship must be agreed upon and learned. For example, language in general (plus specific languages, alphabetical letters, punctuation marks, words, phrases, and sentences), numbers, morse code, traffic lights, national flags.
2. Icon/iconic, a mode in which the signifier is perceived as resembling or imitating the signified. For example portrait, a cartoon, sound effect in radio drama, a dubbed film soundtrack.
3. Index/indexical, a mode in which the signifier is not arbitrary but is directly connected in some way (physically or causally) to the signified (regardless of intention. This link can be observed or inferred. For example, natural signs (smoke, thunder, footprint), medical symptoms (pain, a rash, pulse-rate), personal trademarks (handwriting, catch-phrases).

The difference between Saussure and Pierce's theory of semiotics is that Saussure's theory of semiotic is called dyadic model of sign and Pierce's theory is called triadic model of sign. They explain that dyadic and triadic model is based on their own background. Saussure who an expert in linguistics explain semiotics

according to his study, and Pierce also explain semiotics basic based on his study in philosophy.

CHAPTER III

METHODOLOGY OF THE RESEARCH

Methodology of the research presents the research method, design, and procedures to answer its research questions. The discussion includes the research design, research subjects, research instrument, data collection procedures, and techniques of data analysis.

A. Design of The Research

This research uses the qualitative-descriptive method. According to Creswell (2013: 4) qualitative method is method for exploring and understanding meanings by several individuals or groups of people who are deemed to be derived from social or humanitarian problems. So, this study uses a qualitative method to analyze and interpret the data about signs that were collecting from Instagram Stories with reference to Pierce's theory of semiotics as its theoretical frameworks.

The researcher also uses sampling technique which is purposive sampling that means the samples that the researcher tooks depending on some reasons. Some of the data that the researcher tooks in Instagram Stories have chosen because some consideration, such as; uploading an Instagram Stories every day, posting something to present themselves to the society through her/his Instagram Stories uploaded in

Instagram that containing about icon, index and symbol that needs to be interpretation.

B. Subjects Of The Research

In analyzing this research, the researcher collects the data from Instagram Stories posted by 2015 English and Literature Department students (male and female) of Adab and Humanities Faculty of Alauddin State Islamic University of Makassar.

Based on preliminary observation data, there are several students who are very active using their Instagram account and post in their Instagram Stories.

C. Data Collection Procedures

The data in this research are collected from the Instagram Stories uploaded by 2015 English and Literature Department students, by focusing on the part that contains icon, index, and symbol that will be collected in some steps below :

- a. The researcher followed and monitored the Instagram Stories carefully and repeatedly to find out the signs in Instagram Stories.
- b. Then, the researcher filled the note-taking sheets to mark the signs that exist in those Instagram Stories.
- c. The researcher also did some documentation by capturing relevant parts in those Instagram Stories.
- d. Then, the researcher conducted an interview for research subjects for data enrichment.

D. Data Analysis Procedures

In data analysis, the researcher analyzes the data through several steps below:

- a. The researcher classifies the types of signs in Instagram Stories by 2015 English and Literature Department students into several parts which are icon, symbol, and index.
- b. Finally, the researcher interprets the meanings of the signs expressed in Instagram Stories by 2015 English and Literature Students Department based on Pierce's theory of signs.

CHAPTER IV

RESULTS AND DISCUSSION

This chapter dealt with findings of the research and discussion of the results. The results were presented as data description that were taken from the Instagram Stories by 2015 English and Literature students, and the discussion of further arguments and interpretations of the results were given.

A. Results

In this part of the research, the researcher presents the result of the semiotic analysis of self-presentation in Instagram stories by 2015 English and Literature students. After monitor Instagram Stories, the researcher has found the data which will be discuss and analyze further. The data that the researcher found in the Instagram stories consists of several types of sign including icon, index, and symbols. The researcher collected the data to keep track of the data that were found used note-taking sheet.

In this research, the data are the Instagram Stories that were uploaded by 2015 English and Literature students already analyzed using Pierce's theory about semiotics called the triadic model of sign including representament, object and interpretant components.

1. Icon

According to Pierce in Chandler (2007: 36) defines icon as mode in which the signifier is perceived as resembling or imitating the signified. For example, portrait, a

cartoon, sound effect in radio drama and a dubbed film soundtrack. After monitoring Instagram Stories by 2015 English and Literature students, the researcher found some icons that are contained in Instagram Stories that were uploaded by 2015 English and Literature students. The details of the data can be shown in the following table:

No.	Instagram Stories	Instagram Account	Description of icon and the caption
1.		@Syarfaeniyachsan	<p>In this Instagram Stories, the potrait of @syarfaeniyachsna is the icon of Syarfaeni itself because it shows the resembling or imitating from Syarfaeni.</p> <p>Based on the condition between picture and the caption in this Instagram stories, Syarfaeni expressed her happiness to the social media especially in Instagram story that she successes lose 2 kg for her weight. It can be seen in her caption in her photo “I lose 2kg, yeaaaayy!!!”.</p>

2.	 <p>HP hilang jdi klo butuh di dm d sni saja kna kartu dan wa tdk aktif</p>	@nurfaikawahid	<p>Icon in this Instagram stories is the sad feeling of Nurfaika because it's the real feel of those sad emoticon. She expressed her sadness through a sad emoticon.</p> <p>Based on the condition between sad emoticon and the caption in this sign, Nurfaika feel sad because, she lose her phone.</p>
3.		@delfiana_nursal	<p>The next icon is the potrait of delfiana nursal. This photo shows of delfiana nursal itself. Based on the definition, Vera (2014: 24-26) icon is the sign which denotes and have the character of the object. In this sign, the photo of Delfiana became the icon of Delfiana Nursal itself, because it has the same character which the object that it refers.</p> <p>In this picture,. Based on the</p>

			<p>condition between picture and the caption, Delfiana looked happy with her ripe smile and she write some caption says that <i>“eat what you love and love what you eat and then you gonna be like me”</i> it means that, if someone want to happy like Delfiana’s smile or someone want to always happy like Delfiana, the just eat what they love and love what they eat.</p>
4.		@nabillahdahlan	<p>Icon that exists in the Instagram Stories is an icon which is the phone that was held by Nabillah. The researcher found that Phone held by Nabillah is the representament that stands for its object, the logo of the phone. Then, the object produces the interpretant that is Nabillah’s phone is an apple phone.</p> <p>From the explanation about icon,</p>

			<p>icon is a sign which refers to the object that it denotes merely by virtue of characters of its own and which it possesses, just the same, whether any such object actually exist or not. in this sign, the visual phone in the Instagram Stories is the icon of Apple company, because it shows the physical phone with an Apple logo behind the phone.</p>
--	--	--	---

The complete icon can be seen in Appendix.

2. Index

The next sign that the researcher is going to discuss in the following sections is index. It has been explained by Pierce in Chandler (2007: 36) that, index/indexical is a mode in which the signifier is not arbitrary but is directly connected in some way (physically or causally) to the signified (regardless of intention). This link can be observed or inferred. For example, smoke is an index of fire. For the index analysis, the researcher purposively took three indexes. These sign were taken depending on some reasons. Some of them where chosen because the context of situation or the hidden meaning within the sign. The researcher explained the index as follows:

No.	Instagram Stories	Instagram Account	Description of Indexes and the caption
1.		@evhi_ntsya	<p>In this first index, there is a sign on the Instagram Stories by @evi_ntsya. It shows an eye bags in Evi's eye. Based on the definition of an index is a mode in which the signifier is not arbitrary but is directly connected in some way (physicall or causally) to the signified (regardless of intention). Then the researcher interpret this index that eye bags under the Evi's eye, caused by lack of sleep. It means that there something that makes Evi have an eye bags under her eye. The common thing that causes the eye bags under Evi's eye come out</p>

			because Evi have not sleep well enough.
2.		@musfiratul_huda	<p>The second index that the researcher analyzed is Instagram stories by @musfiratul_huda. In her Instagram stories she explained that she got Insomnia because she get an influenza. In the second index shows the sick emoticon that expressed her condition. Based on the definition of an index is mode in which the signifier is not arbitrary but is directly connected in some way (physical or causally) to the signified (regardless of intention). So, the researcher can conclude this Instagram stories contain an index, that</p>

			<p>sick emoticon really expressed Musfiratul's feeling.</p> <p>Based on the context of situation in this Instagram stories, there is causality connected in her instagram stories. She got Insomnia because she got an influenza. Insomnia is an index of Influenza.</p>
3.		@saiful_ismail48	<p>The third index that the researcher analyzed is in the Instagram Stories by @saiful_ismail48. In this Instagram stories, there are some coins and caption state that "survival's time". Based on the definition of index is a sign which refers to the object that it denotes by virtue of being really affected by that</p>

			<p>object, the researcher can conclude that, survival's time became an index of some coins. He try to survival with that some coins.</p>
4.		@nabillahdahlan	<p>The next index that the researcher analyzed is The Glum expression in Nabillah's face. Based on the definition of an index which is something which refers to the object that it denotes by virtue of being relly affected by that object. Then the interpretant in this index explained that Glum expression by Nabillah because there is something disturb her. The common thing that causes the Glum expression in Nabillah's face its because there is a big sound</p>

			from another place that disturb her and make her can not sleep.
--	--	--	---

3. Symbol

The next sign that the researcher is going to discuss in the following section is symbol. Pierce in Chandler (2007: 36) that, symbol is a mode in which the signifier does not resemble the signified but which fundamentally arbitrary or purely conventional. So that this relationship must be agreed upon and learned. Then, in this case, the researcher took only three symbols that represent all of the symbols that the researcher found in the Instagram stories. The symbols are explained clearly as follows:

No.	Instagram Stories	Instagram Account	Description of Symbol and the caption
1.		@tut205	The first symbol that exists in the Instagram stories is the stories by @tut205. In some religion, the culture when someone wants to pray might be different. For example in Islam, muslim people usually

		<p>wears mukenah when they want to take a pray. Then, in this Instagram stories, @tut205 wears mukenah and then take a picture. It is a general idea in community religion. That's culture has the same meaning with the definition of symbol by Pierce in Vera (2014: 24-26) explain that symbol usually association of general ideas, the general idea in the Instagram Stories is the Mukenah, then became the symbol of religion.</p>
--	--	---

2.		@musfiratul_huda	<p>The next symbol that exists in Instagram Stories by @musfiratul_huda. She shows 'finger heart' symbol. No one is sure it was started from when, but numerous people make the 'finger heart' to show their positive feeling, like love or happiness to the something they love. The trend never misses the K-pop stars. K-idols often show the finger heart to their fans. Finger heart is a gesture in which a person forms a hearts shape using their fingers. Finger hearts are usually more popular within the young generation. The sign has been popularized by musical artists. In South Korea it is a known</p>
----	---	------------------	---

			<p>symbol among K-pop stars and their fans and has popularly been performed using the tumb and symbol finger. The tumb and symbol finger gesture has become popular across Asia due to popularity of K-pop and Korean dramas. Finger heart are widely used everywhere in the world, and appear often in pictures taken by individuals and celebrities.</p>
3.		@muzrinirahman	<p>The next symbol is National Flag of Indonesia. For this third symbol, the researcher took that the national flag is a symbol of a country. Symbols could be a written text or visual image. Furthermore, in this sign, the</p>

			<p>symbol is a visual image which is a national flag. In this visual image, there is a flag with two equal horizontal bands, red (top) and white (bottom). The flag in this Instagram stories is symbol of a country and it is the Indonesia</p>
4.		@saiful_ismail	<p>The next symbol is Garuda's symbol on the money. The money used to pay something. Money usually made of paper and also coins. The money that exist in Instagram Stories by Saiful is only made of coins. The nominal of the money is 1000 rupiah's and there is of Garuda bird, bird in official seal of Republic of Indonesia</p>

			<p>. Based on Pierce in Vera (2014: 24-26) says that symbol is a sign which refers to the object that it denotes by virtue of law, usually an association of general ideas, which operates to cause the symbol to be interpreted as referring to that Object. Furthermore, the symbol of bird of Garuda only for Republic of Indonesia. That is the common rules of the bird of Garuda that agreed by the government. So, the money that exist in Instagram Stories indicate a bird of Garuda which is the symbol of a Republic of Indonesia, because it was denotes by the virtue of law.</p>
--	--	--	--

The complete symbol can be seen in appendix.

B. Discussion

In this part, the researcher discusses the results of the data found above, and relates them to the theoretical framework and the relevant previous studies. The discussion is intends to know what types of signs are represents in Instagram Stories that were uploaded by 2015 English and literature students, and what are the meanings of the signs expresses. In this part of discussion, the researcher analyzes the data using Pierce's theory about signs. Pierce in Sobur (2009, 2016:41) says that sign is something which stands to somebody for something in some respect or capacity. In this discussion, the researcher purposively took some signs of icons, indexes and symbols as a sample. The researcher thinks that these sample of data represent the whole data that the researcher presents earlier. The results are divides into three parts

Firstly, the researcher identifies an icon that consist of Instagram stories. Icon is something that represents something, or has the same characteristics with the object. The first icon that contain in Instagram Stories is in the stories by @*nurfaikawahid* . Sad emoticon as a representament, Nurafika as an object and relation between representament and object produce the interpretant in which, she is sad because she loses her phone.

Icon is a sign which refers to the object that it denotes by virtue of characters of its own, and which it possesses, just the same, whether any such object actually exist or not. Based on Danet, Ruedenberg-wright and Rosenbaum-Tamari (1997) state that emoticon is icon to express emotions or to mark someone's intentions as something that is not serious. Rezabek and Cochrane (1998) state that emoticon is visual cues that are formed from typography typical of symbols that when we read backwards can be represent feelings or emotions.

It is also the same with the previous finding on the earlier chapter. Nisa (2017) explains that she finds five signs that made from object from which is Cattleya Orchid. In her research, she uses the connotative and denotative meaning from Barthes in analyzing the signs. One of the sign that she find is the portrayal, she says that the connotative meaning of the portrayal is the Catleya's self-reflection

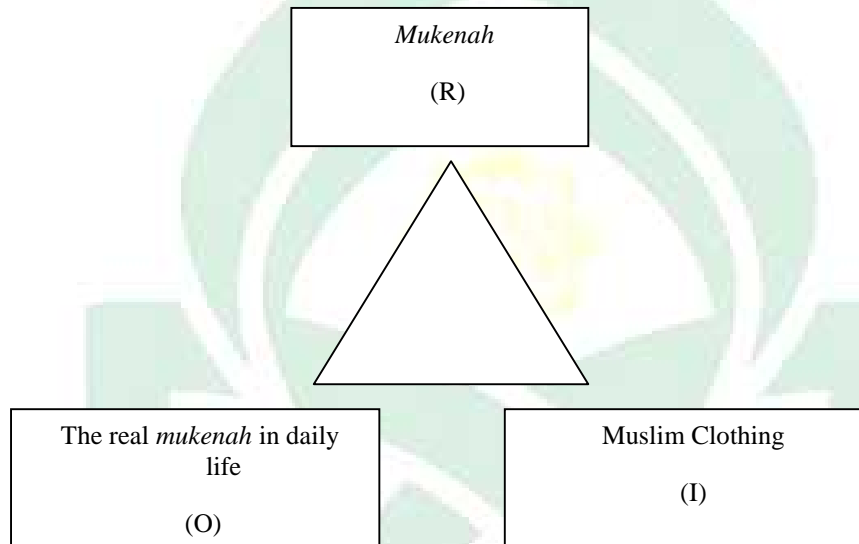

because the thing that depicted on the portrayal has the same characteristic as her name and herself. It has the same explanation about the icons above because they all also have the characteristics of their object. It is also the same with the previous finding in which Jamil (2016) finds that the phinisi becomes the icon of Bulukumba because it has the same characteristic with Bulukumba, for example, the seven sails in Pinisi ship has the meaning that there are seven districts in Bulukumba.

In her Instagram stories, @nurfaikawahid tries to give information to all her followers that she lost her phone, so if someone wants to contact her, they can send direct message to her Instagram account. We can see that she very sad to lose her phone by using sad emoticons to represent her feelings at that time. On social media, we do not meet people directly, so someone uses emoticons to describe their feelings indirectly, through the emoticons used we can tell someone's feeling.

The second sign that the researcher is going to discuss in the following section is symbol. Pierce's in Vera (2014: 24-26) says that symbol is a sign which refers to the object that denotes by virtue of law, usually an association of general ideas, which operates to cause the symbol to be interpreted as referring to that object.

The first symbol that exists in Instagram Stories by 2015 English and literature students is in the Instagram Stories by @tut2015. Here, *Mukenah* acts as a representament. Then, the real *Mukenah* in daily life as an Object and *Mukenah* is a

muslim clothing as an interpretant to describe that Instagram stories to get meaning more clearly from her Instagram Stories.

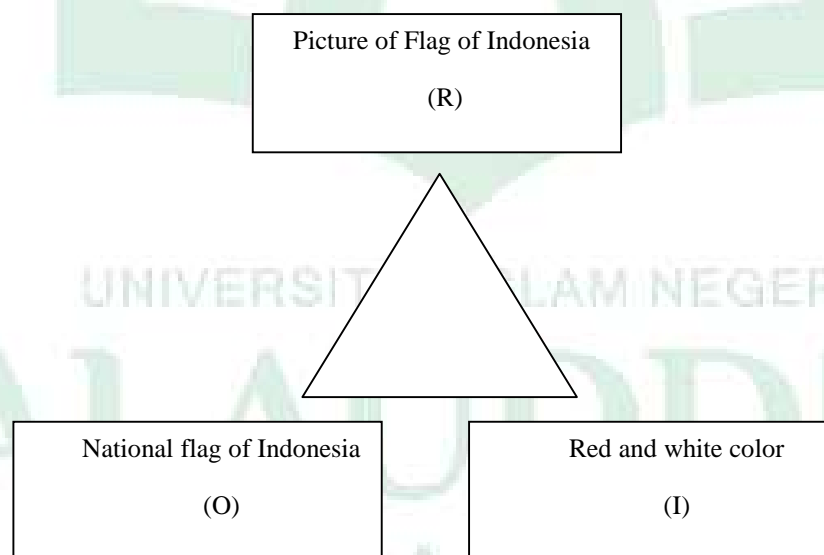

Mukenah is one of the equipment used by Muslim women when they want to pray. *Mukenah* is only used by Indonesian Muslim women. Pierce in Vera (2014: 24-26) explains that symbol usually association of general ideas, the general idea in the Instagram Stories is the *Mukenah*, then became the symbol of religion.

In addition, @tut205 adds a caption in her Instagram stories which states that, “do not do the same thing, what the differences between you and her/him? Trust me, we have God and our God is the best planer for us. Need our spirit and our pray, than believe Him...(Allah is the biggest One)”. As we know that humans are social beings who always interact with others and while interacting with others they do not rule out the possibility of a conflict (Nashori, 2008), but there are people who are able

to sincerely forgive, and forget the mistakes of others. Forgiveness is also the core of the teachings of all religions embraced by humanity in this world.

Related to Self-Presentation, in Instagram Stories by @tut205 she tries to tell each other that forgiveness is one way to free an individual from anger and the desire to take revenge by showing love and compassion to someone who has hurt you. She tries to tell good things to each other by her Instagram Stories.

The next symbol that exists in Instagram stories by 2015 English and Literature students is in Instagram Stories by @murzinirahman. Her Instagram Stories contains a national flag of Indonesia that picture as representament, national flag of Indonesia as an object and relation between Representament and Object its Interpretant , and the interpretant is red white color of that flag.

Independence Day of Indonesia is a day that marks when Indonesia declares her Independent from the Netherlands. This day is filled with festivities and celebrations.

Preparations for the Independence Day is begun way in advance day before festivities begin. There are decorations hung all throughout the city with the President's palace buildings decorated in red and white. Groups of people arrange for community service activities where residential areas are cleaned up. Neighborhood associations coordinate special activities for the children, and even request for sponsorship for prizes for the children. The people are required to hoist flags on their residence for a certain period of time. The president then addresses the nation on the eve of Independence Day. There are a lot of commemorations on local TV channels showing the struggle for independence.

During the Independence Day celebration, various activities are carried out as a form of appreciation for the independence day. As well as @echyrst_ she uploads a national flag of Indonesia picture that shows she really appreciates the Independence day.

The national flag of Indonesia itself is called 'Sang Saka Merah-Putih' (the sacred red and white), and it was unveiled on August 17, 1945. The design is derived from the banner of Majapahit Empire in East Java which rules in the region before the

arrival of the Dutch. The flag consists two equal horizontal stripes; the top red and the bottom white. The red represents courage and the white is purity.

It is supports by the study in which Alfian (2017) finds that the flag on the police uniform is a symbol of a country. Symbol could be a written text or visual image. In his studies, there is a flag with seven red lines and six white lines, and there is a blue box on the left top with some stars in the blue box. The flag in his studies is a symbol of a country of the United States of America.

The last signs that the researcher is going to discusses in the following section are indexes. It has been explains by Vera (2014: 24-26), that index is a sign which refers to the object that it denotes by virtue of being really affected by that object. The signs are taken depending on some reasons. Some of them are choosen because the context of situation or the hidden meaning within the sign. The researcher explains the index as follows:

The first index that the researcher analyzes is the eye bags in the @evhy_ntsya Instagram stories. Eye bags as a representament, Evi's eye bags as an object and the relation between representament and object is called Interpretant. Interpretant in her Instagram stories is eye bags under the eyes caused by lack of sleep.

In this index, it shows the eye bags under her eyes. Based on definition of an index which refers to the object that it denotes by virtue of being really affected by that object.

Eye bags is also known as "puffy eyes", or swelling around the eyes, is the appearance of swelling in the tissues around the [eyes](#), [orbits](#). Eye bags or eye puffines is caused by sleep deprivation, interrupted sleep cycles are common causes of eye bags. The eye bags that come out indicates sleep deprivation. @evhi_ntsya's eye bag becomes an index of her sleep deprivation.

The researcher also compared these indexes with the result of the second previous finding. In the previous finding in which Nisa (2017) finds a sign which is the drawing pattern that Cattleya always left on every victim's body every time she kills. She found that the drawing pattern connotes the warning for Don Louis who kills her parents' about Cattleya existence. It is the same result with this research

because Vera (2014: 24-26) explains, index is a sign which refers to the object that it denotes by virtue of being really affected by that object, which indicates the object.

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the results of the data analysis in the fourth chapter before, the researcher put forward some conclusion as follows:

The signs in some Instagram stories by 2015 English and Literature students can be analyzed by a semiotics approach. The researcher focused on the relationship between the representamen and its object and then how they produced the interpretant. In the findings section, the researcher only focused on the analysis of the signs as the objects, which include icons, indexes, and symbols.

After analyzing and finishing the results of the researcher and discussion, the researcher found that Instagram stories that were uploaded by 2015 English and Literature students showed several types of signs which consisted of icon, index and symbol.

In analyzing the meaning of each sign, the meaning was interpreted primarily from the relationship between the representamen and the object. The relationship between the representamen and its object, indeed, produced the interpretation, which interpreted the meaning of the sign.

The meaning of the icons that were expressed in Instagram stories by 2015 English And Literature Students were to show themselves to the society through their stories with uploading their portraits or emoticons to show their feelings. Beside that, in Instagram stories that were uploaded by 2015 English And Literature students, the researcher also found some indexes. Of the overall indexes, the researcher concluded that the participants in this study made a story about their daily lifes to show that there were several events that they have gone through and have causal relations which became the cause of its events. Besides icon and index, in Instagram stories the participants also expressed symbols that had meanings to show their identity. For example in *mukenah* symbol which is the important symbol of moeslim people.

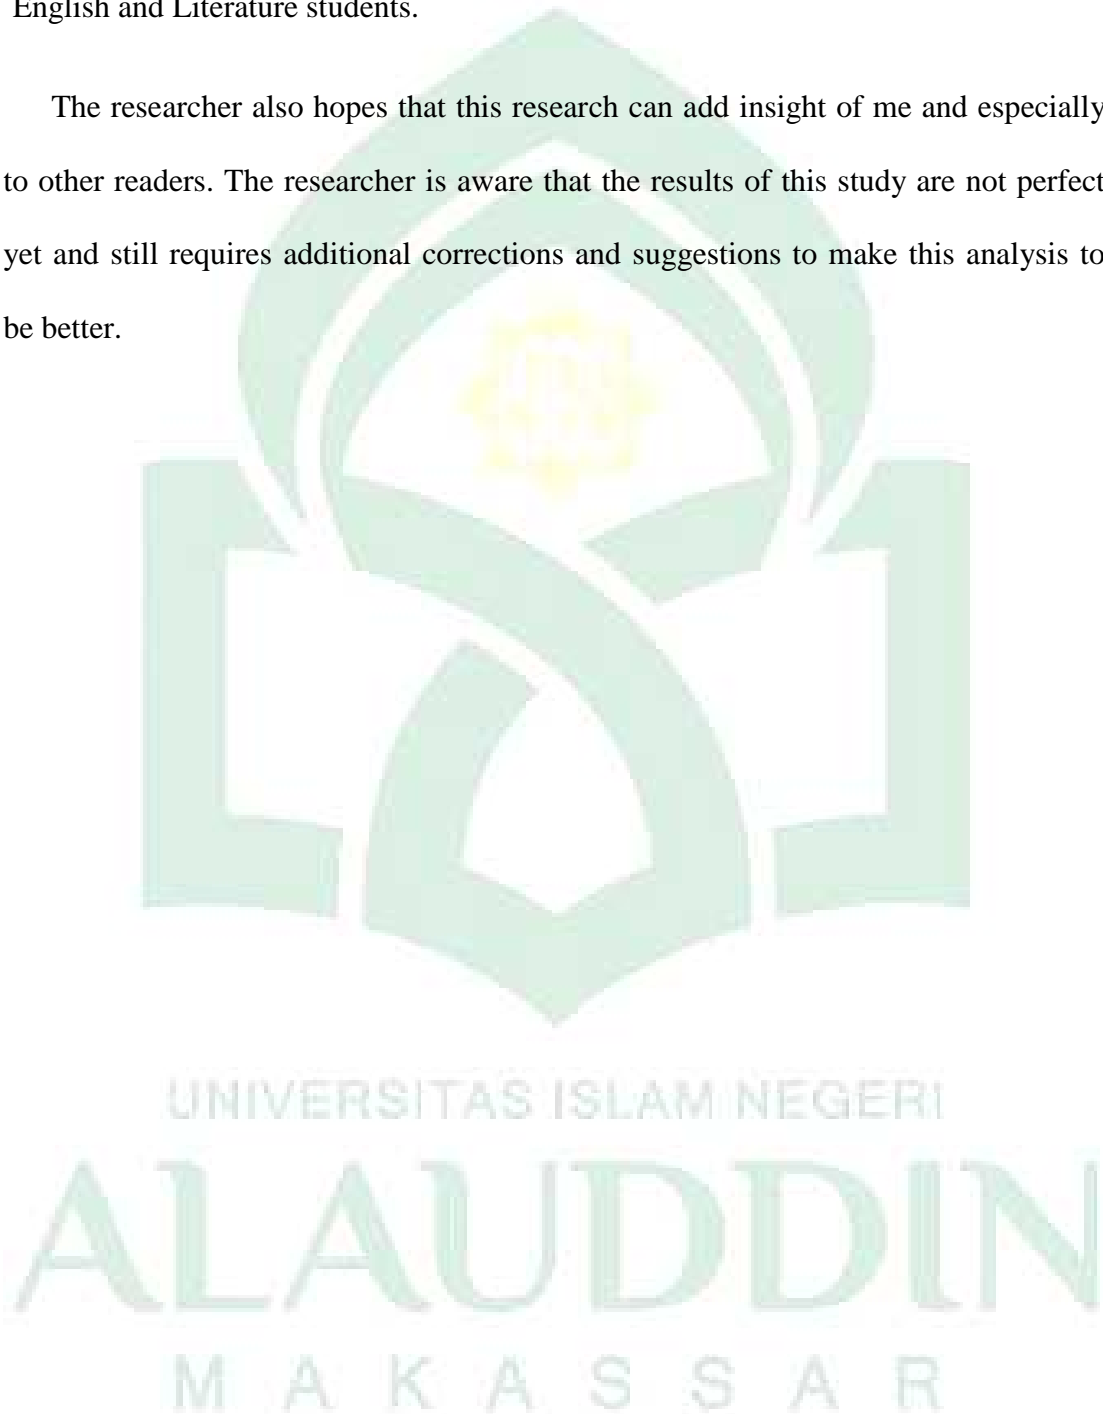

B. Suggestion

Based on the conclusion above, the researcher would like to suggest the readers or other researcher who are interested in analyzing signs in a Instagram Stories to learn about the meaning of semiotics by Pierce and other experts. The researcher also suggest studying the semiotic theory of Pierce deeply to get the clearest meaning of the signs are expressed in Instagram Stories especially related to Self-Presentation.

Besides that, the other researcher can also choose another aspect to analyze, such as advertisement or film. The researcher hopes that this thesis will be useful for the reader in order to improve or to analyze this field. The researcher also expect that

this thesis has some advantages and can be a reference for the reader especially for English and Literature students.

The researcher also hopes that this research can add insight of me and especially to other readers. The researcher is aware that the results of this study are not perfect yet and still requires additional corrections and suggestions to make this analysis to be better.

BIOGRAPHY

Sri Ulfiana Arif or usually called Vivi was born in Anrangae Soppeng, South Sulawesi on May 21th 1996. She has two brothers. She is the first child of Arif and Radiawati.

In 2002, she started her education in SDN 71 Maccini Soppeng Regency and graduated in 2008. In the same year she continued her study in SMPN 3 Liliriaja and graduated in 2011. Then, she continued her study in SMAN 1 Watansoppeng and graduated in 2014.

After finishing her study in senior high school, she directly continued her education in English and Literature Department at Alauddin State Islamic University of Makassar.

If you have any question about her thesis, you may contact her via email: sriulfiana05@gmail.com.
