ACKNOWLEDGEMENTS

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Alhamdulillah rabbil 'alamin, the researcher would like to express her confession and gratitude to the most perfection, Allah swt for the guidance, blessing and mercy in completing her thesis. *Shalawat* and *salam* are always be delivered to the big prophet Muhammad saw his family and followers till the end of the time.

There were some problems faced by the researcher in accomplishing this research. Those problems could not be solved without any helps, motivations, criticisms and guidance from many people. It would be an honor to express her big thanks to Dr. Hj. Nuri Emmiyati, M.Pd as the researcher's first supervisor all at once as vice dean of Adab and Humanities Faculty and to Muhammad Taufik, S.S., M.Hum as her second supervisor who have made so much times guided, gave correction and advice her during completing this thesis. Her big thanks is also addressed to her examiners, Serliah Nur. S.Pd. M.Hum., M. Ed. And Nahdhiyah. S.S., M.Pd. for all their advices, criticisms, suggestions in proposal seminar to make this thesis better. The researcher's gratitude also goes to the Dean of Adab and Humanity Faculty, Dr. H. Barsihannor, M.Ag, to the head and secretary of English and Literature Department, H. Muh. Nur Akbar Rasyid, M.Pd., M.Ed., Ph.D and Syahrani Junaid, S.S., M.Pd.

Special thanks always addressed to the researcher's beloved mother, Hatifa and her beloved father, Anwar for all their prayers, supports and eternally affection as the biggest influence in her success and happy life. Thanks to her lovely brother, Wahyu Anugrah Ilahi for the warm hug and colorful life. And thanks to my big family for the prayer and support.

Thanks to the dental nurses of Purnama dental clinic for the kindness and warmth in becoming subject of this research. Her great thanks to Marwah wahyuni, S.Hum who helped me from the early until the end of the process in getting my title, she always help me unconditionally, without her I'm nothing, thanks to Rechy Agustiasari who helped me in printing process because it's always made free for me and thanks for her support, and thanks to Hasriadi Sahara for supporting and accompanying me to do everything, he is always angry to me when I give up in doing my thesis, he is my best supporter. And then all researchers' friends in English and Literature Department of 2012.

Last but not least, in the deepest heart, the researcher realizes that her thesis is imperfect and still need suggestions and criticism. Despite of its imperfection, she hopes that this thesis will be useful for the students, the lecturers and the readers in general who need it. May Allah swt always bless us in every single thing we do.

Title : *Jargon Used by Dental Nurse in Purnama Dental Clinic
(Sociolinguistic Approach)*
Supervisor I : Hj. Nuri Emmiyati
Supervisor II : Muhammad Taufik

This research discussed about Jargon which was used by Dental Nurse in Purnama Dental Clinic. This research aimed to identify and describe about the forms of Jargon which focused on Halligan theory about Jargon forms that were divided into four forms, they are; *acronym, abbreviation, word, and phrase*. The data were analyzed using descriptive qualitative method. The researcher then used observation sheet and interview sheet as the instrument to find out the valid data. The findings showed that dental nurse in Purnama dental clinic used 37 jargons when they provided dental treatment. Thus, acronym was 1 datum, abbreviation was 3 data, word was 22 data, and phrase was 13 data. The researcher concluded that word places were the most frequently appeared because some jargons were constituted from word. Therefore, the use of word in communication was more effective in their daily activity in providing dental treatment.

Keywords: *Language Variation, Jargon, Dental Nurse*

CHAPTER I

INTRODUCTION

This Chapter Starts With The Background Of The Study “*Jargon Used by Dental Nurse in Purnama Dental Clinic(Sociolinguistics Approach)*. Then it presents problem statement, objective of the research, significances of the research, and scope of the research.

A. Background

Communication is the any means by which two or more individuals exchange information. People interact and communicate each other with language. Language is one of important things that humans have in their life. In general terms language is a tool that used to communicate each other which is used in a particular community. Wardhaugh (2002: 3) says “a language is a system of arbitrary verbal symbol which is used by the members of a speech community as a mean of communication to interact and express their ideas, feelings and thoughts.” So it simply says that language is essentially a set of items (sounds, grammars, and meaning of words) that is used to communicate each other in order to understand what the other people’s ideas, feelings, and thoughts. Language is learned and explained in linguistics. In linguistics field, it is divided into several branches; one of them is sociolinguistics.

Sociolinguistics is a study about relationship between language and society with the goal of better understanding of the language structure and how the function of language in communication. (Wardhaugh, 1986: 12). In addition, Trask (1999: 282) defines that Sociolinguistics as a branch of linguistics which

studies the relationship between language and society. From the two statements above, we know that there is relationship between language and society. Language is naturally formed when society begins to communicate. It is also can be said that language is vital tool to communicate each other. Hence that's why language is closely related to the society.

In sociolinguistics, we know the concept of jargon. Before discussing the jargon itself, we should understand the concept first. The basic concept that we should comprehend is how jargon happened in society. Society used jargon to create their own identity of their group itself. They use the same language and the same vocabularies in the same area or might be in the same profession in working area. It means that jargon aims to show what the groups of society are. Whether the group is the group of working area such as politicians, entertainers, nurse, or it can be the group in the classroom.

Jargon is certain language that is usually used by group of society. The language also usually only be understood by the group itself. According to Yule (1996: 245) defines that Jargon is one of the key features to register in a certain group, which can be defined as technical vocabularies associated with a special activity or group. Fromkin *et al* (2003: 470) emphasizes that Jargon is used by different professional and social groups in so extensive and so obscure in meaning. Jargon refers to the unique vocabulary used by particular groups of people to facilitate communication providing a means of bonding, and exclude outsiders. Therefore jargon may be used as a barrier to keep people who do not belong to community from understanding something. Jargon is also assumed as

language variety contain a set of unique vocabulary that used by people who have same interest, class (social status), or same position in certain area, for instance in working area.

In essence, all kinds and varieties of languages that exist in the entire universe are part of his power. Therefore, truly noble people who up hold the majesty of the verses of Allah SWT. In al-Qur'an Karim Surah Ar-Rum verse 22, Allah SWT says:

وَمِنْ آيَاتِهِ خَلْقُ السَّمَاوَاتِ وَالْأَرْضِ وَاخْتِلَافُ أَلْسِنَتِكُمْ وَأَلْوَانِكُمْ إِنَّ فِي ذَلِكَ لَآيَاتٍ لِّلْعَالَمِينَ

Translation:

“And among His Sign is the creation of the heavens and earth, and the variations in your languages and your colours: verily in that are Sign for those who know”

A natural things who is fear about the possible extinction of a language, it is given the existence of some cases of certain languages helps, or abandon edits user, furthermore there is no concern of community users. It means, the lose of the world's culture heritage is priceless. It can be said that the language and culture reflects the view of the world that is unique and reflects the way in which the speech community to solve the problem in facing of the world by formulating ways of thinking, philosophical system and understanding the world. Moreover, the extinction of a language means an entity that can't be replaced in science and understanding of human, the world view of the language has disappeared forever. That's why the jargon is researched as one of the language variety used by the community.

Based on a preliminary observation on the use of jargon in Dental Nurse at Purnama dental clinic, there are some problems emerge in the study of jargon. The first problem is the forms of jargon used in the Dental Nurse. In relation to the form, several forms are identified by Halligan (2004). Forms of jargon consist of acronym, abbreviation, word, and phrase. Acronym is initial letters that can be read as if a word. Abbreviation is initial letters that should be read separately. Word is the smallest of the linguistic units which can occur on its own in a speech or writing. The last, phrase is a group of words which form a grammatical unit. It does not contain a finite verb and does not have a subject-predicate structure.

In working area, there are so many professions that used jargon, for example; nurse, comedians, entertainer, etc. They have their own jargon and used it in their field in order to make their communication to be easier. It is assumed that jargon is used by many professions in different fields. One of the professions that use jargon is the profession of dental nurse. Dental nurse is health workers who deal with dental problems. Dental nurse have served patient in cleaning teeth such as, cleaning tartar, whiten teeth etc. dental nurse itself is a service related to such as a dental health and mouth. Purnama dental clinic is one of the working areas that has enjoyable place. Dental nurse used the jargon to make their communication easier in working area.

Based on the definition and explanation about the jargon above, the researcher chooses four dental nurse in Purnama dental clinic as the subject of study in jargon because the dental nurse used jargon in working area.

Purnama dental clinic itself is one of clinic in makassar located in Mallengkeri raya street, 145. Therefore, the researcher chose Purnama dental clinic which is located in Mallengkeri raya street, 145, Makassar, South Sulawesi, as the subject to be analyzed. The reason why the researcher chose branch of Purnama dental clinic which is located in Mallengkeri raya145 is that the dental nurse most often use the jargon when they talk. Dental nurse always uses jargon when they have conversation or when they communicate among each other. Thus, it makes the researcher curious in conducting this research in order to reveal the occurring case. There are several reasons why the researcher is interested in analyzing jargon used by dental nurse in Purnama dental clinic. First, nowadays there are many people who have a problem with their teeth and mouth in clinic, but sometimes they don't understand its various and unique language. This case makes the researcher interested in analyzing this phenomenon. Second, their various and unique language makes the researcher curious and interested in analyzing this jargon deeper especially concerning with the meaning.

In this study the researcher chose Purnama dental clinic as the subject of the study. The reason why the researcher does is because the dental nurse in Purnama dental clinic uses jargon in their interaction in the working area, especially when they were serving the patient. Therefore, it is expected that the researcher will get more data. Thus, she can provide a thorough explanation regarding the problems of the study being investigated.

By investigating the jargon used by dental nurse in Purnama dental clinic, the researcher expects the result of the study to give valuable contribution. First, to the researcher, this research is expected to increase the researcher's knowledge in sociolinguistics especially in part of jargon. Second, to the readers, the final findings can increase the reader's knowledge and give more information about jargon. Last, to the future researchers, this research is expected to be useful to give references to the future researcher in conducting a similar research about jargon.

This study is intended to analyze the jargon that used by dental nurse for the communication among each other. The researcher only focuses on the jargon used by several dental nurse in Purnama dental clinic when they communicate to each other. The researcher intends to find out what jargon that used by dental nurse in Purnama dental clinic are, what the forms of those jargon are. Finally the researcher entitles her study "Jargon used by dental nurse in "Purnama dental clinic" (sociolinguistic approach).

B. Problem Statement

What form of Jargon used by dental nurse in Purnama dental clinic?

C. Objective of the Research

To find out the form of jargon used by dental nurse in Purnama dental clinic.

D. Significance Of Study

This research is expected to be able to give better understanding also openpeople's perception about language variation especially jargon. Moreover,

this can lessen the distance between people who utter it and those who do not know it.

1. Students of English Literature Department

The research improves the competency of the students of English Literature Department on linguistic knowledge especially language varieties which appear in each society in nature. This understanding is intended to prepare the students in learning ESP (English for Specific Purpose) since ESP deals with a specific area of work or interest in various fields of society.

2. English Literature Department

The result of this study offers learning materials which can be used in teaching and learning process related to language variation in English Literature Department. It is very important for the Department to maintain the research in linguistic field since it can give the input for the department as the supplementary materials in ESP course.

3. Other Researchers

Since this study focuses on one analysis, .i.e. form of jargon dental nurse, it is expected to give references and stimulate other researchers to conduct a related research study under sociolinguistics perspective either dealing with the same field or other fields.

4. Scope of the reseacrh

This study observes jargon on Dental Nurse. The Researcher only focuses on the form in jargon of Dental nurse in Purnama Dental Clinic when they are communicating each other. Byusing the theory from Halligan (2004) that devide jargon in to four form, they are; acronym, abbreviation, word, and phrase.

CHAPTER II

REVIEW OF RELATED LITERATURE

In this chapter, the researcher explained about the review of related with some previous researchers and some pertinent ideas.

A. Previous Findings

There are three studies related to this research. The first was conducted by Laila Putri (2012) in her thesis "*An Analysis of Computer Jargon in Macbook Users' Guide*". This study analyzed the form, meaning, word relation, and function of jargon. There were 94 computer jargons found from MacBook operation. Based on structural formation, there are 24 words (26%) and 21 phrases (22%). Meanwhile, based on unpredictable formation, there are 5 clippings (5%), 4 blends (4%), 4 acronyms (4%), 36 abbreviations (39%). The meaning of jargon in this study was analyzed using intentionalist approach which every jargon has different meaning compared to the language used in other major. Furthermore, from the word relation point of view, this study found 48 jargons (51%) related with IT field and 46 jargons (49%) unrelated with IT. The last, this study classified the jargon from the function point of view into firstly providing speakers of specialized domain with clear, unambiguous terms to refer to their activities by 46 jargons (49%) and secondly providing speakers of sub group with a means of marking in group membership and excluding outsiders by 48 jargons (51%).

The second was conducted by Aditya Eko Sigit Wicaksono (2010) in his thesis "*An Analysis of Military Jargon in a Video Game: Call of Duty 4 Modern*

Warfare". This study analyzed the form, function, and meaning of jargon. There are 107 jargons found in this study. The result of form classifications shows that 55 jargons belong to word, 25 phrase, 21 abbreviation, and 6 acronym. The jargons function to serve as a technical or specialist language for precise and economical communication (62.62%), to promote in-group solidarity (35.51%), and to exclude out-groupers (1.87%). Meanwhile, the meaning of the jargons was identified by the context in which they are used.

The third is Susi Rahmi, (2006) in her thesis "*NatureLovers Community Jargon Unand*". Susi concluded there are 39 jargons and classified into four, namely mountaineering (mountain climbing), caving (caving), climbing (rock climbing), and rafting (water sports).

The similarity among those previous studies with this study is the study analyzed about jargon. If Laila Putri analyzed *jargon of computer in Macbook Users' Guide*. Aditya Eko Sigit Wicaksono analyzed jargon of *Military in a Video Game: Call of Duty 4 Modern Warfare*. And then the last study by Susi Rahmi that analyzed jargon of *Unand NatureLovers Community*. The difference is about subject of the study, the researcher's observed the *jargon used by dental nurse in Purnama dental clinic* which is located in jalan Mallengkeri Raya, Makassar

A. Pertinent Ideas

1. Language Variations

Language variation are the object of sociolinguistics which are the result of the relationship between language and social factors, such age, sex, education, social status, social occasion, professional occupation, and other factors (Barber and Stainton, 2010: 478). The principal types of language variation manifested in pronunciation (accent), grammar and vocabulary are the regional variation (regional dialects) and the social variation (social dialects, sociolects, also 'genderlect', jargon, slang, argot).

Bright in Coulmas (2007: 53) states two fundamentals facts of language variation. First, that it is always changing in all areas of structures (phonology, grammar, discourse, style, semantics, and vocabulary). It occurs for instance in the case that American English pronounces whine [hwain] merges with wine [wain]. Second, language variation changes in different ways at diverse place and times. It occurs for instance in the case that Speakers of English nowadays say and write ice cream instead of iced cream. It unconsciously in 1900 was considered as a vulgar error.

Malmkjær and Anderson (1995: 558) state that lots of sociolinguistic studies are concerned with the way in which language varies according to the social context. It also discusses where it is used and according to the social group to which a user belongs. It aims to explain this variation and to show how it reflects social structure influenced by some factors such as the user's region,

class, ethnic group, age, and gender. The areas of this variation are formulated by Belletti (2007: 9) who distinguishes them into two points of view, i.e. language comparison and language acquisition. She adds that acquisition might create a strange area where language variation can manifest itself. In case of manifesting language variation, acquisition can give alternatives of variation that are also exploited by different languages.

Similarly, Marshall (2004: 5-6) states that language variation provides an explanation of how communication takes place. Language variation is not arbitrary, but rather strictly controlled, often by extra-linguistic factors, and the specification of these factors may help us account for change. The language variations which occur are age, sex, social class, and attitude. In line with Marshall, Eckert and Rickford (2001: 185) mention that class or sex or age correlates as supposed determinants of language variations. They affect the use of language, such as in sex, males tend to use –logic and strict to the point-statements instead of females.

Some language variations emerge as the result of age, sex, social class, and attitude influence, i.e. jargon, register, argot, slang, and style. Each is often overlapped among others. They are often equalized although they are different in nature. Yule (2006: 211) proposes jargon as specialized vocabulary used by those inside established social groups while slang is more typically used among those who are outside established higher-status groups.

The term argot also appears in the discussion of jargon. According to Allan and Burridge (2006: 69-70), the relevant sense of argot completely overlaps with the definitions of jargon. Hornby (1998) defines argot as a set of words and phrases used by a particular group and not easily understood by others. The characteristic of argot that distinguishes it from jargon and slang is the purposes of secrecy. Thieves might use the word package instead of stolen goods in order to avoid their intention and to any information leaking to those who do not belong to their group.

Another term of language variations is style. Holmes (2001: 245-46) describes that terms style as a language variation which reflects some changes in situational factors, such as address, setting, task or topic. Style is often analyzed along the scale of formality while register is associated with particular groups of people or sometimes situations of use.

In addition, Malmkjær and Anderson (1995: 490-497) define style as a consistent occurrence in the text of certain items and structures, or types of items and structures, among those offered by the language as a whole. This phenomenon can be seen when people can have APA style in research report writing which deal with five chapters: general presentation, tables and figures, footnotes and quotations, references, and APA intricacies. The term is derived from American Psychological Association.

In conclusion, language variations are forms of a language used by people of that language as there are various social interactions among region,

class, ethnic group, age, and gender. Language variations vary on some language aspects, i.e. pronunciation (accent), grammar, or word choice within a language.

2. Jargon

a. Definition

Allan and Burridge (2006: 56) define jargon as the language weird to particular context like a trade, profession or other group. It is the language used in a body of spoken or written texts, dealing with a circumscribed domain in which speakers share a common specialized vocabulary, habits of word usage, and forms of expression. Moreover, they state that jargons are used among people who have common workrelated or recreational interest. It binds not only professionals, but also members of any groups who use a particular jargon. There is a consequent feeling amongst in-groupers that they belong to an exclusive club.

In addition, Malmkjær and Anderson (1995: 115) state that jargon is used only in restricted contexts such as trade and recruitment of labour. Jargon is like minidialects, but used only for the activity for which they were created. They are not only sensitive to the requirements of the activity but also to the personal and social needs of the speakers.

Yule (2006: 211) says that jargon is a special technical vocabulary associated with a particular area of work or interest. In social terms, jargon helps to create and maintain connections among those who see themselves as 'insiders' in some way and to exclude 'outsiders'. It is often taken place inside a register.

Hornby (1995: 296) also states that jargon consists of technical words or expressions used by a particular profession or group of people and difficult for others to understand. The group here can be a professional or social group. Furthermore, Spolsky (1998: 33) defines jargon as speech used by marked group of people such as a trade or occupation. A specialized bond between members of in-group and enforce boundaries outside. If the people do not understand a certain jargon, it means that they do not belong to a certain group. Jargon can be useful for conveying meaning precisely and effectively for specific communities. However, it may also exclude and/or confuse those who are not “in-group”. Thus, speakers and writers need to be aware of their audiences when deciding to use jargon appropriately.

Moreover, Crystal (2003) defines jargon as the technical vocabulary or idiom of special activity or group. The reality is that everyone uses jargon; it is an essential part of the network or occupation and pursuits which make up a society. All jobs present an element of jargon, which workers learn as they develop their expertise. All hobbies require mastery of a jargon. All sports and games have their own jargon. Each society grouping has its jargon. The occupation of person causes his language to vary, particularly in the use he makes of technical terms. The phenomenon of using jargon therefore, turns out to be universal and valuable.

Richards and Schmidt (2002: 278) define jargon as spoken or written words and expressions used by a group of people who belong to a particular trade, profession, or any other group bound together by common attention, e.g. the jargon of law, medical jargon. A jargon has its own set of words and expressions,

which may be incomprehensible to an outsider. The term jargon is typically not used by the group but by those unfamiliar with that particular type of language.

Jargon is sometimes compared to slang because both have the same senses as kinds of shorthand of language. However, the line of demarcation between jargon and slang is open to dispute because slang is sometimes defined in such way to overlap almost completely with the definition of jargon (Allan and Burridge, 2006: 68).

Allan (2001: 172) proposes three criteria in identifying a jargon. First, it can be identified by its lexical markers such as specialized used vocabulary, idiom, and abbreviations. Second, a jargon can be identified by its syntactical markers, e.g. imperative and passive sentences. Third, a jargon is identified by its presentational markers in terms of prosodic (voice quality, amplitude, rhythm) and format in which the context is presented.

In conclusion, jargon is technical language of some fields such as a trade, profession, or similar group using unusual vocabulary, complex phrasing, and unclear meaning. It is an exclusive term in which mostly known by the insiders, i.e. users of the jargon instead of the outsiders, i.e. people who do not belong to be field.

There are some motivations of creating jargon. First, it is used to exclude the people or novices, there who do not belong to. If a person does not understand a jargon of group as it means as it mean he does not belong to that group. Jargon can give a person a sense of belonging to a specific group. Jargon is an effective

signal for identification. It is effective when it is used in the group where the jargon created or occurs. Another motivation of creating jargon is communicative efficiency. If something has to be frequently mentioned, it is more economical to have a single word to refer to it than a length phrase. We know that jargon uses items already existing in language and then extend their meaning and function. Jargon rarely uses completely new words or construction. Practically, the words are old but with new meaning and different meaning.

b. Forms of jargon

Formsof jargon is the physical appearance of a term or combined terms that results important technical meanings.Halligan (2004) elaborates four forms of jargon. They consist of acronym, abbreviation, word, and phrase. It is supported by Chaika's theory (1982) telling that jargon appears in two ways. Firstly, it is shaped in the form of new words. Secondly, it appears in the form of existed words as common people know.

1) Acronym

The first form of jargon is acronym. It is formed from the initial letters of a set of other word.Bauer (1988: 39) and Yule (2006: 57) state that acronyms are formed from the initial letters of the words in name, title or phrase. It can be pronounced as a single word, for example UNICEF that stands for United Nations Children's Fund, NATO for North Atlantic Treaty Organization, NASA for National Aeronautics and Space Administration, and UNESCO for United Nations Educational, Scientific and Cultural Organization. There are many acronyms that become everyday terms such as laser ('light amplification by

stimulated emission of radiation') and radar ('radio detecting and ranging'). Names for organizations are often intended to have their acronym represent an appropriate term, as in 'mothers against drunk driving' (MADD) and 'women against rape' (WAR). Some new acronyms come into general use so quickly that many speakers do not think of their component of meanings. Innovation such as PIN ('personal identification number') is regularly used with one of their elements. For example: **OHIS** (Oral Highgine Indeks Sinflaid).

2) Abbreviation

Talking about abbreviation, there are two theories that can be used as the basis for explaining it. The first theory is proposed by Leech in Culpeper et al. (2009: 109) who mentions that an abbreviation is formed by taking the initial letters which does not result in well-formed syllables. Thus, unlike an acronym, an abbreviation cannot be pronounced as if a word. The people should spell as what the initial letters are, such as USA which is pronounced /yu es ai/ instead of /yusa/. The second theory is proposed by Fromkin, et al. (1991: 84). They say that abbreviation is intended to simplify words or combined words by putting one or some syllables of the original word/ words. It can be formed by longer words or phrases such as phone for telephone, math for mathematics, board for blackboard, and fridge for refrigerator. By taking the only initial letters of each word that has already contained complete information such as BBC standing for British Broadcast Corporation, using abbreviation might increase more efficient communication, (Allan and Burrige, 2006: 89). For Example: **OD** (Oral Diagnostik).

3) Word

Leech in Culpeper et al. (2009: 109) mentions that a word is not merely defined as the smallest form that can occur by itself as an utterance as it can also be manipulated by syntax such as what occur in sentence structure of an active sentence and passive sentence. Meanwhile, Finegan (2004: 40) proposes four informations dealing with a word. First, people should be able to identify a word's sound and the sequencing. It is related with phonological information. Second, people should be able to identify a word's meaning which is related to semantic information. Third, people should be able to identify how related words such as the plural form of a noun or past tense of a verb are formed. It deals with morphological information. Fourth, people should be able to identify a word's category and how to use it in a larger composition, i.e. a sentence.

In relation to a word's class, word is divided into content word and function word (Fromkin, et al., 1991: 64). A content word is a word which determines thing, quality, state, or action. It has meaning when it is used alone. It consists of nouns, verbs, adjectives, and adverbs. On the other hand, a function word is a word which has little meaning on its own. It is used to show grammatical relationships in and between sentences. It consists of conjunctions, prepositions, articles, and pronoun. For example: *Behel* (Neat Dental Treatment).

4) Phrase

According to Leech in Culpeper et al. (2009: 130-135), a phrase, i.e. a group of words which form a grammatical unit, has a main word that is called a

head. It is the only word that has to occur in the phrase. A phrase does not contain a finite-verb and does not have a subject-predicate structure. The modifier, putting before as well as after the head, is optional. For example: *High Speed* – Adjective Phrase and the head is *Speed*.

CHAPTER III

RESEARCH METHODOLOGY

This chapter includes some points concerning the method of the research. The researcher discuss method of the research, source of data, instrument of the research, procedure of collecting data, and technique of analyzing data.

A. Method of the research

In this research, the researcher used descriptive qualitative data because the type of that research in this study is textual analysis which intended to analyze jargon is that used by Dental nurse in Purnama dental clinic. According to Ary et al. (2002: 565) “qualitative research is the study or analysis phenomena from the perspective of the human participant in natural setting without proving the predetermining hypotheses”. Besides, Creswell (1997: 2) says “qualitative research is an inquiry process of understanding based on distinct methodological tradition of inquiry that explore social or human problem”.

Furthermore, Fraenkel (1993) says that qualitative research refers to research investigation of the quality of relationship, activities, situations, or material. It concludes that descriptive qualitative is to define and describe what the phenomena that is analyzed by researcher. From all of the statements above, the researcher concludes that this research is conducted to understand of the jargon that is used by Dental nurse in Purnama dental clinic.

B. Source of the Data

The data used in this study is the form of dental nurse jargon sources of data in this study are obtained from the dental nurse in Purnama dental clinic.

C. Instrument of the Research

In conducting this research, the researcher collected the data by using observation sheet and interview sheet as the instruments. Observation sheet was used for taking an important data that related to the jargon used by dental nurse in order to know the form of the jargon used by dental nurse in Purnama dental clinic.

D. Procedure of collecting data

In collecting the data, the researcher apply data saturation technique. The researcher stop collecting the first data if the point of view being investigated yields to repetitive result. To yield the second type of data, the researcher interviewed the dental nurse in regards to the jargon they use. According to Ary, Jacobs and Razavieh (2004: 430) "there are three ways in collecting qualitative data, there are observation, interviewing and document analysis". There were some processes which the researcher will do in accomplishing this study:

1. The researcher recorded some conversations which contained jargon by using DSLR camera and mobile phone. The identity of the informants was hidden because they do not want to be exposed in order to make the data get natural.

2. The researcher selected the data which contained the jargon most when the dental nurse talk to each other.
3. The researcher interviewed and observed the dental nurse who is qualified and knowledgeable about those jargon for three times in a month, the first interviewed and observation is 26th September 2016, the second time is 27th September 2016, and the third is 28th September. They are the active talked about the jargon that used by dental nurse in Purnama dental clinic as the informant to know and understanding about the meaning of the jargon used, and then the researcher wrote down the result in the form of notes.

E. Technique of analyzing data

Not all the dental nurse conversation was analyzed. The researcher focuses on analyzing the topic that mostly contains jargon when they communicate to each other. The reason why the researcher only focuses on the jargon delivered by dental nurse is that they had so many conversation in terms of discussion or spoken, so that is why the researcher chooses the topic that contain most jargon when they talked to each other.

After the data are collected, the next step is data analysis. Furthermore, the researcher analyzed the data based on procedure as follows:

1. List the jargon to answer the problem of the study, the researcher lists the jargons which were found in observation. Then the researcher included the meaning based on the interview of dental nurse.

2. After listing and including the meaning of jargon, the researcher analyzed the data. The researcher give denotation as lexical meaning and the meaning of jargon used by dental nurse in Purnama dental clinic. The meanings of jargon are formulated based on informant's explanation in the interview.
3. Drawing conclusion. The researcher explain the important finding and make conclusion from the data that has been analyzed. It was in terms of what the jargon that used by Dental nurse in Purnama dental clinic.

CHAPTER IV

FINDINGS AND DISCUSSION

This chapter is divided into two parts, they are findings and discussion. The findings consist of the jargon used by dental nurse in Purnama dental clinic and the form of jargon itself. Then the discussion is related to what have been found from the findings, theoretical framework, and the previous studies to answer the problem.

A. Findings

The data of this study were taken from the utterances used by dental nurse in Purnama dental clinic and the meaning of jargon used when they communicate to each other and the result of the interview concerning the jargon used by dental nurse. The observation has been done for 3 times and consist many topics. They are; scaling, composite, tooth extraction, and dental braces. The researcher divided the records into 7 parts because the researcher paused the recording when the researcher has to move from one place into another place. The researcher only chose the topics that contain appropriate words of jargon in this study to be analyzed. After the process of data reduction, the researcher of this study came up with 37 data from 7 part data records. The process of the reduction based on the appropriate data which were related to the theories used by the researcher. Moreover the data selection was based on the criteria made by present researcher.

Forms of jargon used by dental nurse in Purnama dental clinic

Halligan's theory (2004) explained about forms of jargon which are pattern four forms of jargon. They are consisting of acronym, abbreviation, word, and phrase.

The researcher found all forms of jargon patterns based on Halligan's theory. They are: acronym, abbreviation, word, and phrase. The findings are as follow:

1. Acronym

Acronym is new words formed from the initial letters of words or word parts in a phrase or name. Acronyms which are pronounced as a word and containing only initial letters; e.g., NASA (National Aeronautics and Space Administration), Radar / 'rei,da:r/ Radio Detecting and Ranging), COBOL / 'keubol/ (Common Business Oriented Language), etc. The acronym find by the researcher is OHIS. OHIS are presented as follow:

Extract 1: Scaling session (00:03) 1st video

Ms.Yuni: Periksa dulu bagaimana **OHIS**nya

*(Check the **OHIS** first)*

Ms.Idha: Buka mulutta nah janganki langsung tutup kalau ngilu kita
rasa

(Open your mouth please and don't close if you feel pain)

This conversation was taken on September 26th 2016 at 07.02 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Yuni wanted knowing the condition of dental health and mouth, and then the patient dental condition to be checked and cleaned of the patient's tartar. And Ms.Yuni said to Ms.Idha to ask the patient to open her mouth to be checked and cleaned her tartar. In this conversation, Ms.Yuni said **OHIS**, that **OHIS** is a part of Acronym according to Halligan's theory (2004).

The context of this utterance is scaling process. **OHIS (Oral Highgine siniflaid index)** is a checking conducted to determine the condition of teeth and oral health based on tooth index, and tooth index are predetermined to be checked. This checking process is performed before further process to the patients.

2. Abbreviation

Abbreviation is initial letters that should be read separately. The people should spell as what the initial letters are, such as USA which is pronounced /yu es ai/ instead of /yusa/. The abbreviation find by the researcher is CPITN, OD, and DSA. CPITN, OD, and DSA are presented as follow:

Extract 2: Evaluation session after executing the patient (01:07) 3rd Video

Ms.Idha: Sudah nilai 3 Kalau berdasarkan nilai gigi **CPITN**
(*It's in the third level based on **CPITN** rating*)

This part was taken on September 26th 2016 at 07.05 pm. There was one speaker namely Idha.

In this part, Ms.Idha explained about **CPITN**, that **CPITN** is a part of abbreviation according to Halligan's theory (2004). Ms.Idha said that **CPITN (Community periodontal index of treatment needs)** is used to know the condition of gums or the condition around the gums, whether it is fusible to further worked

or not, and *CPITN* is used to measure of various diseases in the mouth, so that dental nurse could determine the best way to serve the patient.

The context of this utterance is in scaling process. *CPITN* is an abbreviation used by the dental nurse to measure the level of dental and periodontal health of the patient.

Extract 3: Evaluation session after executing the patient (01:09) 3rd Video

Ms.Idha: Waktuku tadi **OD** ki toh kerja keras lagi ini.

(When I was doing OD, I think it's going to be hard)

Ms.Yuni: Mungkin tidak rutinki kontrolnya itu, seharusnya 6 bulan sekali.

(Perhaps the control is not routine, it should be once in six month)

Mr.Yusrizal: mungkin jarangki itu sikat gigi, 1 kali sehari

(Perhaps she seldom brush her teeth, once in a day)

Ms.Idha: Bilangji tadi tawwa 2 kali sehari sikat gigi

(But, she said twice in a day)

This conversation was taken on September 26th 2016 at 08.15 pm. There are three speakers namely Idha, Yuni, and Yusrizal.

In this conversation, Ms.Idha, Ms.Yuni, and Mr.Yusrizal, discussed about the patient condition after doing scaling process. Which they uttered something that included in abbreviation group of jargon form, based on Halligan's theory (2004). They discussed about the patient's teeth condition that had been quite severe. In this video that consists of 01:09 duration, Ms.Idha mentioned **OD**, which **OD** itself is (*Oral diagnostic*) that is used to first checking.

In this context of this utterance is scaling process. **OD (Oral Diagnostik)** is a tool used by a dental nurse in the first checking in the patient, in this first checking the dental nurse wanted to know the condition of the patient's mouth or teeth before it is given further treatment.

Extract 4: Composite process (00:10) 4th Video

Mr.Ali: jam berapa datang itu **DSA** yg biasa?

*(What time does **DSA** come?)*

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this part, Mr.Ali called his assistant as **DSA**. Which DSA itself stands for **dental surgery assistant**. According to Halligan's theory, **DSA** included in the abbreviation group of jargon form.

In addition **DSA** is a person trained to help dental nurse and is responsible for the cleanliness and tidiness of equipment, instruments, and dental clinic materials. **DSA** should have an understanding and knowledge of sterilization and disinfection of instruments and practice equipment and have responsible for the preparation of the practice space for all dental procedures. **DSA** usually actively assist all dental nurse jobs, help the patient, before, during, and after anesthesia. For example, providing advice on the maintenance of oral hygiene to the patient, and the administration and patient acceptance.

3. Word

Word is the smallest of the linguistic units which can occur on its own in a speech or writing. The words found by the researcher is OHIS. OHIS are presented as follow:

Extract 5: Scaling process (00:21) 1st video

Ms.Yuni: kayaknya ini **Gingivitis** ki

*(I thing that she is **gingivitis**)*

Ms.Idha: iya, ini juga dibawahnya

(Yes, this is also in the under part)

This conversation was taken on September 26th 2016 at 07.02 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Yuni confirmed that the teeth of the patient had been gingivitis, gingivitis itself included in the word group of jargon form according to Halligan's theory (2004). And Ms.Idha also confirmed this, that patient's tartar was already quite severe.

The context of this utterance is scaling process. Gingivitis can occur because of tartar, deficiency of vitamin C or the change in hormone, such as menstruation or pregnant women. An acute inflammation of the gingival with spontaneous bleeding, pain, pseudo membranous formed, and halitosis. It usually occurs in young adults and it is associated with the poor oral hygiene.

Extract 6: Scaling process (00:11) 2nd video

Ms.Idha: **Sextant** satunya 2, **Sextant** tiganya 2, **Sextant** empat dan lima 2, **Sextant** enam 3

(The first sextant is 2, the third sextant is 2, the fourth and the fifth sextant is 2, and the sixth sextant is 3)

Ms.Yuni: Karena kalau saya lihat itu gingivitisnya parah sekalimi meradangmi

(Because when I see the gingivitis is in a serious condition)

This conversation was taken on September 26th 2016 at 07.02 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Idha explained to Mr.Yusrizal the condition of patient's tartar that she was working, and Mr.Yusrizal wrote down all of the patient's teeth sextants. And also in this conversation Ms.Yuni saw that the patient's tartar condition is already very inflamed.

The context of this utterance is scaling process. Sextant is a part of the teeth will be checked, for example the left, right, or front side.

Extract 7: Evaluation session by dental nurse (00:22) 3rd video

Ms.Idha: itu yang bagian depan **Pocketnya** dalam sekalimi

*(In fron position of **pocket** is too deep)*

Mr.Yusrizal: pasti berdarahmi itu

(It has been bloody)

This conversation was taken on September 26th 2016 at 08.15 pm. There are two speakers namely Idha and Yusrizal.

In this conversation, Ms.Idha explained that the gum pocket or the **pocket** of a patient is already very deep or severe, when scaling process, and also Mr.Yusrizal confirmed that pocket of the patient has been blood. Where the

pocket itself included the category in the word group of jargon form according to Halligan's theory (2004).

The context of this sentence is when the other dental nurse told to his partner. Pocket usually occurs because of tartar or vitamin deficiencies, and also commonly occur because of trauma to the teeth, for example at the time when brush teeth, wrong position of the toothbrush and when the gums is opened or it doesn't stick to the teeth. Pocket is a deepening of pathological gingival crevice, periodontal pocket.

Extract 8: Evaluation session by dental nurse (00:34) 3rd video

Ms.Yuni: kalau **Supra** masih adaji

(The supra is still there)

Mr.Yusrizal: kalau Sextantnya iya?

(What about the sextant?)

Ms.Idha: ada yang nilai 3

(There in the third rating)

This conversation was taken on September 26th 2016 at 08.15 pm. There are three speakers namely Yuni, Idha and Yusrizal.

In this conversation, in this video, Ms.Yuni explained if the patient's tartar is still in the **supra** category, it means that it's still better than the sub-gingival calculus.

Extract 9: Evaluation session by dental nurse (00:55) 3rd video

Ms.Yuni: pantas **Bleeding** sekali

(It makes so bleeding)

This part was taken on September 26th 2016 at 07.02 pm. There are one speakers namely Yuni.

In this part, before Ms.Yuni said **Bleeding**, Ms.Idha explain the values of the patient's tartar. In the scaling process of the patient's tartar, it had been severe bleeding.

Extract 10: Evaluation session by dental nurse (00:58) 3rd video

Ms.Idha: iya pegal sekali tanganku pegang itu alat **Tremor** saya rasa
(*My hand is weary when I hold this tool, I feel **Tremor***)

Ms.Yuni: itumi tadi saya bilang parah sekalimi ini
(*Just now I said it's in a serious condition*)

This conversation was taken on September 26th 2016 at 08.15 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Idha complained in scaling process because her hand felt sore when holding tartar cleaning tool. Which her hand felt **Tremor**, **Tremor** included the category in the word group of jargon form according to Halligan's theory (2004). So that, Ms.Yuni in this conversation said that the patient's tartar has been very severe.

Extract 11: Evaluation session by dental nurse (01:23) 3rd video

Ms.Yuni: iya memang tawwa karena pembetulan **Calculus**
(*Yes of course because it's in **calculus** formation*)

This part was taken on September 26th 2016 at 08.15 pm. There are two speakers namely Idha and Yuni.

In this part, Ms.Yuni said that the patient's tartar included in **calculus** formation. **Calculus** included the category in the word group of jargon form according to Halligan's theory (2004).

The context of this utterance is scaling process. Stone formed in a hollow organ or duct, which is composed of mineral salt deposits, cholesterol that thicken or dry up, mucus or cell mongering.

Extract 12: Evaluation session by dental nurse (01:28) 3rd video

Ms.Idha: mungkin caranya juga biasa hauski toh giginya jadi

Abrasiki

*(Perhaps the way she brushed her teeth is not good so her teeth became **abras**)*

Ms.Yuni: caranya juga sikat gigi tidak terlalu benar

(The way she brush her tooth is not really good)

This conversation was taken on September 26th 2016 at 08.15 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Idha explained that the teeth of the patient had been **Abrasi**, and Ms.Yuni also thought that the way patient brush her teeth might not be true.

Abrasi is a substance or structure as a result of a mechanical process and flaking of the surface tissue. Teeth abrasion, thirsty of teeth tissue is not because the teeth contact but due to other causes. For example, the use of abrasive toothpaste, harsh toothbrush or excessive usage of the teeth cleaning tools. Abrasion of teeth is usually on the neck part of the buccal, anterior and posterior.

Extract 13: Evaluation session by dental nurse (01:17) 3rd video

Ms.Idha: Untuk pemeriksaan awal yaitu **Sonde** dengan **Eksafator**

*(For the first checking, it's it **sonde** and **eksafator**)*

This part was taken on September 26th 2016 at 08.15 pm. There are two speakers namely Idha and Yuni.

In this part, Ms.Idha explained in the initial checking she used 4 tied together, one of them is *sonde* and *eksafator*. *Sonde* and *eksafator* included the category in the word group of jargon form according to Halligan's theory (2004).

Extract 14: composite process (00:12) 4th Video

Mr.Ali: Ambil **Section** dulu

(Take a section please)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In the extract above, Mr.Ali asked a *section* to his assistant for early work early to patient who experienced a case on his teeth that want to patch up his teeth. *Section* itself according to the Halligan's theory (2004) are included in the word group of jargon form.

The context of this conversation is when one of the dental nurses asked about the thing to absorb spittle for the treatment that will be done. The dental nurse used jargon "*section*" to his assistant as this is the way dental nurse says that term.

Extract 15: Composite process (00:12) 4th Video

Mr. Ali: **Fissure** dulu

(Fissure please)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In the extract above, Mr.Ali asked a *fissure* to his assistant to work for dental fillings to patient. *Fissure* itself according to the Halligan's theory (2004) are included in the word group of jargon form.

The context of this sentence is when the other dental nurse told to his partner. *Fissure* of checking with use of sharp sonde will feel stuck due to the early stages of caries.

Extract 16: Composite process (00:12) 4th Video

Mr.Ali: **Bonding** lagi

(Bonding please)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali wanted to add a bonding to the patient's teeth that he was doing so that the patient's teeth can be the same color of the patient's natural teeth.

In the context of this utterance is tooth filling process. Bonding is the force that holds a substance with other substances, can be mechanically, chemically, or fidik.

Extract 17: Composite process (00:12) 4th Video

Mr. Ali: Ambilkan **Etchant**

(Take an Etchant)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali wanted to add an *etching* to the patient's teeth that he was doing so that a layer of the patient's teeth can be last longer and look natural. This sentence is still related to the previous sentence about the patient is given additional coating.

Extract 18: Composite process (00:12) 4th Video

Mr. Ali: **Composite** lagi

(Composite please)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked a *composite* on his assistant to add material in the dental fillings of the patient, so that, the patient's teeth could look natural.

In the context of this utterance is composite process. Physical mixtures of metal, ceramic, or polymer. The goal is to take the advantage of each part.

Extract 19: Composite process (00:15) 4th Video

Mr. Ali: Itu dulu **Pinset**

(Take a pinset please)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked his assistant to take a *pinset* to grip the cotton in the mouth and patient's teeth when he was working. In the context of this utterance is tooth filling process. In dental treatment *pinset* used to clip the cotton during dental treatment process.

Extract 20: Composite process (00:20) 4th Video

Mr. Ali: Ambilkan **Sealer**

(Take a sealer)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, besides to dental fillings, Mr.Ali will also clean the patient's tartar so that the patient's teeth looked cleaner. So, Mr.Ali asked his assistant to take a *sealer*.

Extract 21: Behel treatment (00:40) 6th Video

Mr. Ali: Ambilkan **Power O/Cain**

(Take a Power O/Cain please)

This part was taken on September 28th 2016 at 07.30 pm. There are one speaker namely Ali and one assistant namely Wahyu

In this part, Mr. Ali asked a *power O/chain* to his assistant to put in dental patient's teeth who was controlling her behel. In the context of this utterance is Behel treatment. To bind a nitti or to glue a nitti in order not lose.

Extract 22: Behel treatment (00:36) 6th video

Mr. Ali: Kasih pas dulu **Spiegel**

(Fitting the Spiegel first)

This extract was taken on September 28th 2016 at 007.30 pm. There are one speakers namely Ali and one assistant namely Wahyu.

In this extract, Mr. Ali asked his assistant to make the *spiegel* is appropriate at the patient's mouth so that all sides of the patient's mouth can be seen more clear, so that the working process could walk better.

Extract 23: Behel treatment (00:20) 7th Video

Mr. Ali: Ambilkan **Nitti**

(Take a Nitti)

This extract was taken on September 28th 2016 at 07.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr. Ali asked his assistant to take a *nitti* because Mr. Ali will replace the patient's behel that in behel control. *Nitti* was used to Behel treatment process.

Extract 24: Behel treatment (00.30) 7th video

Mr. Ali: Pasangkan dulu **Bracket**

*(Set the **bracket** please)*

This extract was taken on September 28th 2016 at 07.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked his assistant to set a **bracket** to the patient that she was doing. In order for the patient's teeth looked tidy. In the context of this utterance is Behel treatment process. Metal or plastic proffered on orthodontic bands or seeded directly to the teeth. Orthodontists arch wire or other wire can be placed to the tool.

Extract 25: Behel treatment (02:00) 7th video

Mr. Ali: Sudah rapi semua **Orthonya**

*(All of the **ortho** has been neat)*

This extract was taken on September 28th 2016 at 07.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali's assistant told to Mr.Ali that **ortho** of the patient had been tidy, it means that the dental nurse working had been completed. According to the Halligan's theory (2004) **ortho** are included in the word group of jargon form.

Ortho is the specialty of dentistry that is concerned with the study and treatment of malocclusions (improper bites). Which may be a result of tooth irregularity disproportionate jaw relationship, or both. Orthodontic treatment can focus facial growth. In the letter case it is better definid as "dent facial orthopedics".

Extract 26: Tooth extraction process (01:50) 5th video

Mr. Ali: Ambilkan dulu **Anastesi**

*(Take an **anastesi** please)*

This extract was taken on September 27th 2016 at 09.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked assistant to take an **anesthesi** to inject the patient's gum before the patient's teeth removed, so that the patient didn't feel too sick.

In the context of this utterance is tooth extraction. **Anesthesi** is used to omit the pain in areas that will be done for anesthesia without loss of consciousness. **Anesthesi** will be done by a dental nurse in the case of tooth extraction, so that the patients will not feel pain.

4. Phrase

Phrase is a group of words which form a grammatical unit. It does not contain a finite verb and does not have a subject-predicate structure. Phrase found by the researcher is OHIS. OHIS are presented as follow:

Extract 27: Scaling process and evaluation (00:13) 3rd video

Ms.Idha: **Sub Gingival Calculus** ki memang

*(She is indeed **sub gingival calculus**)*

Ms.Yuni: Oh iya

(Yes)

This conversation was taken on September 26th 2016 at 07.02 pm. There are two speakers namely Idha and Yuni.

In this conversation, Ms.Idha confirmed that patient's tartar has been sub-gingival calculus which the sub-gingival calculus was already very severe. And Ms.Yuni also agreed that the patient's tartar had been in the 3 level. The context of this sentence is when the other dental nurse told to her partner.

Extract 28: Evaluation session by dental nurse (01:33) 3rd video

Mr.Yusrizal: **Calculus Index** sudah nilai tiga

(Calculus index is in the third level)

This part was taken on September 26th 2016 at 07.02 pm. There are one speaker namely Yusrizal.

In this part, Mr.Yusrizal confirmed also that the patient's tartar had been in the 3 level, in this video he mentioned *calculus index*, where the *calculus index* are included in the word group of jargon form, according to Halligan's theory (2004). *Calculus index* conducted to determine the number of tartar in the mouth.

Extract 29: Composite process (22:23) 4th Video

Mr.Ali: Kasih dulu **like curing**

(Give a like curing)

This extract was taken on September 27th 2016 at 08.0 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked his assistant a *like curing* for dental fillings process of the patient could be brighter. The context of this sentence is when the other dental nurse told to his assistant.

Extract 30: Composite process (22:27) 4th Video

Mr. Ali: Kasihki dulu mulutnya **Cotton Roll**

(Give her mouth a cotton roll)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked his assistant to give *cotton roll* into the mouth of the patients at the working time, *cotton roll* can hold up the patient's tongue.

Extract 31: Composite process (22:30) 4th Video

Mr. Ali: Ambilkan **Plastic Filling Instrument**

(Take a plastic filling instrument)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr.Ali asked his assistant to be taken a *plastic filling instrument*, to take the extra material at the teeth treatment time.

Extract 32: Composite process (04:57) 5th Video

Mr. Ali: Nyalakan **High Speed**

(Turn on the High speed)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr. Ali told to his assistant to turn on the *high speed* to take dental jarigan patient's teeth that had been died. High speed itself is categorized in the phrase group of jargon form, according to the Halligan's theory (2004).

Extract 33: Composite process (22:35) 4th Video

Mr. Ali: Siapkan **Celluloid Strip**

(Prepare for Celluloid Strip)

This extract was taken on September 27th 2016 at 08.02 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr. Ali asked his assistant to prepare a colloid strep used to give a space of the patient's teeth during the dental fillings process. Long thin plastic sheet that serves as a matrix on a same teeth color fillings in the anterior teeth.

Extract 34: Tooth extraction process (01:55) 5th video

Mr. Ali: Siapkan **Tang Anterior** Dan **Tang Posterior**

(Prepare for Tang anterior and tang posterior)

This extract was taken on September 27th 2016 at 09.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, in the tooth extraction Mr. Ali told his assistant to *prepare tang anterior* and *tang posterior* to be used to remove patient's teeth. In this

extract, Mr. Ali mentioned two phrase, according to the Halligan's theory (2004), that *tang anterior* and *tang posterior* included in the category of phrase group of jargon forms. It's used to primary teeth and permanent teeth.

Extract 35: Tooth extraction process (01:57) 5th video

Mr. Ali: Ambilkan juga **Cito jet** dan **Oral jet**

(Take a cito jet and oral jet too)

This extract was taken on September 27th 2016 at 09.30 pm. There are one speaker namely Ali and one assistant namely Wahyu.

In this extract, Mr. Ali told to his assistant to take *cito jet* and *oral jet* to be used to anesthetize the gums, so that the patient does not feel pain. *Cito jet* and *oral jet* had the same function but different shape.

B. Discussion

In this part, the researcher discussed more about jargon used by dental nurse in Purnama dental clinic when they talked each other during the treatment. The researcher also discussed about the meaning of jargon itself. From the findings, the researcher found the dental nurse in Purnama dental clinic used 37 jargons during they served scaling, composite, tooth extraction, and dental braces. They used a particular word that is called jargon. They have their own jargon and used it in their field in order to make their communication became easier to be understood by people in this community.

Form of jargon used by dental nurse in Purnama dental clinic

a. Acronym

The researcher found acronym according to Haligan's theory (2004), which is used by the dental nurse, in **extract 1** the researcher found 1 acronym used by dental nurse. In **extract 1** in scaling session when Ms.Yuni would check the patient's teeth and mouth before executing, and asked for help from his friend to check on the patient. Ms.Yuni said "Check the OHIS first" and Ms.Idha said "Open your mouth please and do not close if you feel pain".

b. Abbreviation

Based on Halligan's theory the researcher found 3 abbreviations in **extract 2**, **extract 3**, and **extract 4** when the dental nurse did evaluation session after executing the patient. One of that In **extract 2**, Ms.Idha said "*It's in the third level based on CPITN rating*" from this extract Ms.Idha explained that *CPITN* is used to measure of various diseases in the mouth, so that dental nurse could determine the best way to serve the patient.

Besides that, abbreviation is a shortened form a word or phrase. Abbreviation is an expression that is pronounced letter by letter. There are 2 kinds of abbreviation, they are; shortening and initialism. But the researcher just found initialism jargon abbreviation that used by dental nurse in Purnama dental clinic, they are; CPITN, OD, and DSA.

c. Word

The researcher found more word that is used by dental nurse in Purnama dental clinic when in working area, one of that is in **extract 5**, when the dental nurse scaling process, Ms.Yuni said “*I thing that she is **gingivitis***”, gingivitis itself included in word group of jargon form according to Halligan’s theory.

d. Phrase

In this research, the research found more phrase that is used by dental nurse in the working area according to Halligan’s theory. When Mr.Ali said “*Give a **like curing***” Mr.Ali asked his assistant a **like curing** for dental fillings process of the patient could be brighter. The context of this sentence is when the other dental nurse told to his assistant.

According to Palmer (1962, p.155), jargon is a set of special vocabulary items used by members of some profession or specialized group. Generally, jargon cannot be understood by common people outside the community. Jargon is created as the identity of a 39 community to have a special characteristic. In addition, they used the terms which called jargons to create their own identity of their group itself. They used the same language and the same vocabularies in the same area. It means that they have aims to show who the group of society are. They used their different word and create new term to show that there are no other communities that use same form of jargon like they use. The researcher also interpreted that there are many factors that influence particular languages in the society, is that not only influenced by situation but also the topic of the activity used. It means that the dental nurse use their jargon when the situation does not

allow talking explicitly when there are patients or other people who does not belong to their community in clinic. It also related to the topic that they were talking about. For example: they usually use their jargon when they talk about something not so good about someone else. So that's the example of situation when they use the jargon itself. It can be conclude that not all the time they use jargon but in certain time that they deserve to use jargon.

Related to the previous study from Laila Putri (2012) in her thesis "*An Analysis of Computer Jargon in Macbook Users' Guide*". This study analyzed the form, meaning, word relation, and function of jargon. There were 94 computer jargons found from MacBook operation. Based on structural formation, there are 24 words (26%) and 21 phrases (22%). Meanwhile, based on unpredictable formation, there are 5 clippings (5%), 4 blend (4%), 4 acronyms (4%), 36 abbreviations (39%). The meaning of jargon in this study was analyzed using intentionality approach which every jargon has different meaning compared to the language used in other major. The similarity of this study with Laila's study is Laila and the writer investigated and analyzed the jargon used by community. However there is a difference between Laila's study and the researcher's study, the difference is about subject of the study. Laila's study tried to observe jargon used by "*An Analysis of Computer Jargon in Macbook Users' Guide*, however the researcher's study tries to observe the *jargon used by dental nurse in Purnama dental clinic* which is located in jalan Mallengkeri Raya, Makassar.

Next, the second study was conducted from Aditya Eko Sigit Wicaksono (2010) in his thesis "*An Analysis of Military Jargon in a Video Game: Call of*

Duty 4 Modern Warfare". This study analyzed the form, function, and meaning of jargon. There are 107 jargons found in this study. The result of form classifications shows that 55 jargons belong to word, 25 phrases, 21 abbreviations, and 6 acronyms. The similarity of this study with Wicaksono study is Wicaksono and the researcher investigated and analyzed the jargon used by community, However there is a difference between Wicaksono's study and the researcher's study, the difference is about subject of the study. Wicaksono's study tried to observe jargon used by *Military Jargon in a Video Game: Call of Duty 4 Modern Warfare*, however the researcher's study tried to observe the *jargon used by dental nurse in Purnama dental clinic* which is located in jalan Mallengkeri Raya, Makassar.

And the last study by Susi Rahmi, (2006) in her thesis "*Nature Lovers Community Jargon Unand*". Susi concluded there are 39 jargons and classified into four, namely mountaineering (mountain climbing), caving (caving), climbing (rock climbing), and rafting (water sports). The similarity of this study with Rahmi study is Rahmi and the researcher investigated and analyzed the jargon used by community, However there is a difference between Rahmi's study and the researcher's study, the difference is about subject of the study. Rahmi's study tried to observe jargon used by *Nature Lovers Community Jargon Unand*, however the researcher's study tried to observe the *jargon used by dental nurse in Purnama dental clinic* which is located in jalan Mallengkeri Raya, Makassar.

In this research, the researcher found all of forms of jargon based on Halligan's theory (2004) which is the dominant form is the word group.

Everyone must follow Al-Qur'an and Al-Hadist. It is written in Surah Ar-Rum verse 22 "*And among His Sign is the creation of the heavens and earth, and the variations in your languages and your colors: verily in that are Sign for those who know*". A natural things who is fear about the possible extinction of a language, it is given the existence of some cases of certain languages helps, or abandon edits user, furthermore there is no concern of community users. It means, the lose of the world's culture heritage is priceless. It can be said that the language and culture reflects the view of the world that is unique and reflects the way in which the speech community to solve the problem in facing of the world by formulating ways of thinking, philosophical system and understanding the world. Moreover, the extinction of a language means an entity that can't be replaced in science and understanding of human, the world view of the language has disappeared forever. That's why the jargon is researched as one of the language variety used by the community.

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion of the study and the suggestion of the researcher would like to give. This chapter is divided into two sections. They are conclusions and suggestions. The detail of each section will be presented below.

A. Conclusions

This research is used to answer one problem concerning the forms of jargon used of dental nurse in Purnama dental clinic. Related to the forms of jargon, they share acronym, abbreviation, word, and phrase. The first is the acronym with 1 data, the second is abbreviation with 3 data, the third is the word with 22 data, and the last is phrase with 13 data. Word places the most frequent one because some jargons are constituted from word. To make them simpler, word is used that the communication takes place more effective.

B. Suggestions

Based on the result of the study, it can be suggested some points to the following parties.

1. Students of English Literature Department

The students of English Literature Department are expected to have better understanding of dental nurse's jargon in the clinic. The understanding might improve their competence in learning ESP.

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion of the study and the suggestion of the researcher would like to give. This chapter is divided into two sections. They are conclusions and suggestions. The detail of each section will be presented below.

A. Conclusions

This research is used to answer one problem concerning the forms of jargon used of dental nurse in Purnama dental clinic. Related to the forms of jargon, they share acronym, abbreviation, word, and phrase. The first is the acronym with 1 data, the second is abbreviation with 3 data, the third is the word with 22 data, and the last is phrase with 13 data. Word places the most frequent one because some jargons are constituted from word. To make them simpler, word is used that the communication takes place more effective.

B. Suggestions

Based on the result of the study, it can be suggested some points to the following parties.

1. Students of English Literature Department

The students of English Literature Department are expected to have better understanding of dental nurse's jargon in the clinic. The understanding might improve their competence in learning ESP.

2. English Literature Department

This research is expected to contribute as a teaching and learning resource in relation to language variation and ESP course.

3. Other Researchers

Other researchers are suggested to dig deeper cases concerning the language variation such as morphological process of word formation. They may also conduct a study on such subject at the same field with different focus because the imperfectness of this study such as language shift or assimilation.

Hopefully, the future researcher presents better research. First is for the next researchers are expected to explore and investigate some other phenomena of jargon happen in society in any speech community in order to add other types of jargon, so it will be found more various languages than before. The next researchers are expected to investigate jargon happen in other community in different clinic; it can be in different area or different country. Second, try to find out and reveal more possible reason why each community have own jargon and use it. It will be more interesting when we know that each group or community exactly have their own and different reasons. The last suggestion, hopefully the next researchers have a lot of other theories which is support their study, it make the sources will be more various.

Interview session:

1. Apa makna dari **OHIS**?

(What is the meaning of OHIS?)

Ms.Yuni: **OHIS** adalah singkatan dari *Oral highgine index siniflaid* merupakan pemeriksaan yang dilakukan untuk menentukan keadaan kesehatan gigi dan mulut berdasarkan gigi index, index itu ialah gigi yang telah ditetapkan untuk diperiksa.

(OHIS (Oral Highgine index siniflaid) is a checking conducted to determine the condition of teeth and oral health based on tooth index, and tooth index are predetermined to be checked).

2. Apa makna dari **CPITN**?

(What is the meaning of CPITN?)

Ms.Idha: **CPITN** singkatan dari *community periodontal index treatment needs* adalah pengukur berbagai macam penyakit periodonntal untuk menentukan pengobatan yang sesuai atau yang dibutuhkan oleh pasien.

(CPITN (Community periodontal index of treatment needs) is used to know the condition of gums or the condition around the gums, whether it is fusible to further worked or not, and *CPITN* is used to measure of various diseases in the mouth, so that dental nurse could determine the best way to serve the patient).

3. Apa makna dari **OD**?

(What is the meaning of OD?)

Ms.Idha: **OD** adalah *Oral Diagnostik* alat empat serangkai yang digunakan untuk pemeriksaan awal, ada kaca mulut, pinset, sonde, dan eksafator yang digunakan pada pemeriksaan awal pada pasien sebelum adanya tindakan lebih lanjut.

(OD (Oral Diagnostik) is a tool used by a dental nurse in the first checking in the patient, in this first checking the dental nurse wanted to know the condition of the patient's mouth or teeth before it is given further treatment).

4. Apa makna dari **DSA**?

(What is the meaning of **DSA**?)

Mr. Ali: **DSA** singkatan dari *dental surgery assistant* adalah orang yang terlatih untuk membantu perawat gigi dan bertanggung jawab untuk kebersihan dan kerapian peralatan, instrumen, dan bahan klinik gigi.

(**DSA** (*dental surgery assistant*) is a person trained to help dental nurse and is responsible for the cleanliness and tidiness of equipment, instruments, and dental clinic materials).

5. Apa makna dari **Gingivitis**?

(What is the meaning of Gingivitis?)

Ms. Yuni: **Gingivitis** bisa muncul karena adanya karang gigi, kekurangan vitamin C atau perubahan hormon, seperti mens atau ibu hamil

(**Gingivitis** can occur because of tartar, deficiency of vitamin C or the change in hormone, such as menstruation or pregnant women).

6. Apa makna dari **sextant**?

(What is the meaning of **sextant**?)

Ms. Idha: Sextan adalah bagian dari gigi yang akan di cek, misalnya bagian kiri, kanan, atau depan).

(Sextant is a part of the teeth will be checked, for example the left, right, or front side)

7. Apa makna dari **Pocket**?

(What is the meaning of **Pocket**?)

Ms. Idha: **Pocket** biasanya muncul karena karang gigi atau kekurangan vitamin, dan umumnya terjadi karena trauma pada gigi, misalnya pada saat menyikat gigi, posisi sikat gigi yang salah dan ketika gusi terbuka atau tidak melekat pada gigi.

(**Pocket** usually occurs because of tartar or vitamin deficiencies, and also commonly occur because of trauma to the teeth, for example at the time when brush teeth, wrong position of the toothbrush and when the gums is opened or it doesn't stick to the teeth.

Pocket is a deepening of pathological gingival crevice, periodontal pocket)

8. Apa makna dari **supra**?

(What is the meaning of **supra**?)

Ms.Yuni: jika gusi pasien masih dalam kategori supra, itu berarti bahwa masih lebih baik di bandingkan sub-gingival calculus.

(if the patient's tartar is still in the supra category, it means that it's still better than the sub-gingival calculus.)

9. Apa makna dari **bleeding**?

(What is the meaning of **bleeding**?)

Ms.Idha: the values of the patient's tartar. In the scaling process of the patient's tartar, it had been severe bleeding.

10. Apa makna dari **tremor**?

(What is the meaning of tremor?)

Ms.Idha: in scaling process because her hand felt sore when holding tartar cleaning tool.

11. Apa makna dari **calculus**?

(What is the meaning of calculus?)

Ms.Yuni: The patient's tartar included in calculus formation.

12. Apa makna dari **abrasi**?

(What is the meaning of abrasi?)

Ms.Idha: Abrasi is a substance or structure as a result of a mechanical process and flaking of the surface tissue. Tooth abrasion, thirsty of tooth tissue is not because the teeth contact but due to other causes. For example, the use of abrasive toothpaste, harsh toothbrush or excessive usage of the teeth cleaning tools. Abrasion of teeth is usually on the neck part of the buccal, anterior and posterior.

13. Apa makna dari **sonde dan eksafator**?

(What is the meaning of sonde and eksafator?)

Ms.Idha: in the initial checking she used 4 tied together, one of them is sonde and eksafator

14. Apa makna dari **section**?

(What is the meaning of section?)

Mr. Ali: work early to patient who experienced a case on his teeth that want to patch up his teeth

15. Apa makna dari **fissure**?

(What is the meaning of fissure?)

Mr. Ali: Fissure of checking with use of sharp sonde will feel stuck due to the early stages of caries.

16. Apa makna dari **bonding**?

(What is the meaning of bonding?)

Mr. Ali: Bonding is the force that holds a substance with other substances, can be mechanically, chemically, or fidik.

17. Apa makna dari **etchant**?

(What is the meaning of etchant?)

Mr. Ali: wanted to add an etchant to the patient's teeth that he was doing so that a layer of the patient's teeth can be last longer and look natural.

18. Apa makna dari **composite**?

(What is the meaning of composite?)

Mr. Ali: Composite is Physical mixtures of metal, ceramic, or polymer. The goal is to take the advantage of each part.

19. Apa makna dari **pinset**?

(What is the meaning of pinset?)

Mr. Ali: In dental treatment pinset used to clip the cotton during dental treatment process

20. Apa makna dari **sealer**?

(What is the meaning of sealer?)

Mr. Ali: will also clean the patient's tartar so that the patient's teeth looked cleaner.

21. Apa makna dari **power O/Cain**?

(What is the meaning of power O/Cain?)

Mr. Ali: power O/Cain is To bind a nitti or to glue a nitti in order not lose.

22. Apa makna dari **spiegel**?

(What is the meaning of spiegel?)

Mr. Ali: Spiegel is appropriate at the patient's mouth so that all sides of the patient's mouth can be seen more clear, so that the working process could walk better.

23. Apa makna dari **nitti**?

(What is the meaning of nitti?)

Mr. Ali: Nitti was used to Behel treatment process.

24. Apa makna dari **bracket**?

(What is the meaning of bracket?)

Mr. Ali: bracket is metal or plastic proffered on orthodontic bands or seeded directly to the teeth. Orthodontists arch wire or other wire can be placed to the tool.

25. Apa makna dari **ortho**?

(What is the meaning of ortho?)

Mr. Ali: Ortho is the specialty of dentistry that is concerned with the study and treatment of malocclusions (improper bites). Which may be a result of tooth irregularity disproportionate jaw relationship, or both. Orthodontic treatment can focus facial growth. In the letter case it is better defined as “dent facial orthopedics”.

26. Apa makna dari **anastesi**?

(What is the meaning of anastesi?)

Mr. Ali: Anesthesi is used to omit the pain in areas that will be done for anesthesia without loss of consciousness. Anesthesi will be done by a dental nurse in the case of tooth extraction, so that the patients will not feel pain.

27. Apa makna dari **Sub gingival calculus**?

(What is the meaning of sub gingival calculus?)

Ms. Idha: that patient's tartar has been sub-gingival calculus which the sub-gingival calculus was already very severe.

28. Apa makna dari **Calculus index**?

(What is the meaning of calculus index?)

Mr. Yusrizal: Calculus index conducted to determine the number of tartar in the mouth.

29. Apa makna dari **like curing**?

(What is the meaning of like curing?)

Mr. Ali: like curing for dental fillings process of the patient could be brighter.

30. Apa makna dari **cotton roll**?

(What is the meaning of cotton roll?)

Mr. Ali: Cotton roll into the mouth of the patients at the working time, *cotton roll* can hold up the patient's tongue.

31. Apa makna dari **plastic filling instrument**?

(What is the meaning of plastic filling instrument?)

Mr. Ali: plastic filling instrument to take the extra material at the teeth treatment time.

32. Apa makna dari **high speed**?

(What is the meaning of high speed?)

Mr. Ali: high speed to take dental jarigan patient's teeth that had been died.

33. Apa makna dari **Celluloid strip**?

(What is the meaning of celluloid strip?)

Mr. Ali: celluloid strip is long thin plastic sheet that serves as a matrix on a same teeth color fillings in the anterior teeth.

34. Apa makna dari **Tang Anterior Dan Tang Posterior**?

(What is the meaning of Tang Anterior Dan Tang Posterior?)

Mr. Ali: that tang anterior and tang posterior included in the category of phrase group of jargon forms. It's used to primary teeth and permanent teeth.

35. Apa makna dari **Cito jet dan Oral jet**?

(What is the meaning of Cito jet dan Oral jet?)

Mr. Ali: cito jet and oral jet to be used to anesthetize the gums, so that the patient does not feel pain. Cito jet and oral jet had the same function but different shape.

BIOGRAPHY

Nurhayati Anwar was born in Makassar, South Sulawesi, on December 17th 1994. She is the first child of Anwar and Hatifa. She has one brother. Selling and traveling are her hobbies. She began her school at elementary school SDI Barua of Gowa regency and graduated in 2006. In the same year, she continued her study in Senior High school in SMPN 26 Makassar and graduated in 2009. Then she continued her study in Senior High School in SMAN 2 Sungguminasa of Gowa regency and graduated in 2012. After finishing her study at the school, enrolled at Alauddin State Islamic University of Makassar in 2012 and took English and Literature department (BSI) of Adab and Humanities Faculty.

Permohonan Penunjukkan
Pembimbing/Konsultan

Samata, 4 Desember 2015

Kepada

Yth. Ketua Jurusan Bahasa & Sastra Inggris
Fakultas Adab dan Humaniora
Di Tempat

Assalamualaikum Wr. Wb.

Yang bertanda tangan di bawah ini:

Nama : NURHAYATI
Tempat/Tgl lahir : GOWA, 5 DESEMBER 1994
Nomor Induk : 40300112075
Jurusan/Prodi : BAHASA & SASTRA INGGRIS
No Hp/email : 085399223317
Judul Skripsi :

Jargon use by Polices of Gowa Police Resort Departement (Sociolinguistics Approach)

Mengajukan permohonan kepada Bapak/ibu untuk menunjuk dosen pembimbing/konsultan penulisan Skripsi dalam rangka penyelesaian studi pada Program Sarjana (S1). Bersama ini saya lampirkan draf skripsi tersebut.

Yang bermohon

NURHAYATI

Kepada

Yth. Sdr/.....

Assalamu'alaikum. Wr.Wb.

Setelah memperhatikan dan menelaah draf skripsi sdr.i, maka kami menunjuk;

1. Dr. Hj. Neri Ernagati, d.pd. sebagai konsultan I

2. Muh. Taafik, S.S. M. Hum. sebagai konsultan II

Selanjutnya saudari/i diharapkan berkonsultasi lebih intensif kepada kedua konsultan tersebut untuk merampungkan skripsi sdr.

Samata, 8/12/2015

Nomor : 1244 Tahun 2015

Tentang

**PEMBIMBING / PEMBANTU PEMBIMBING PENELITIAN
DAN PENYUSUNAN SKRIPSI MAHASISWA**

DEKAN FAKULTAS ADAB DAN HUMANIORA UIN ALAUDDIN MAKASSAR :

Membaca : Surat permohonan Mahasiswi Fakultas Adab dan Humaniora UIN Alauddin :
Nama : **NURHAYATI** N I M : 40300112075
Tanggal : 04 Desember 2015 untuk mendapatkan pembimbing Skripsi dengan
Judul:

**JARGON USE BY POLICES OF GOWA POLICE RESORT
DEPARTMENT(SOCIOLINGUISTICS APPROACH)**

- Menimbang : 1. Bahwa untuk membantu penelitian dan penyusunan skripsi mahasiswa tersebut dipandang perlu untuk menetapkan pembimbing.
2. Bahwa mereka yang ditetapkan dalam Surat Keputusan ini dipandang cakap dan memenuhi syarat untuk melaksanakan tugas sebagai pembimbing penelitian dan penyusunan skripsi mahasiswa tersebut di atas.
- Mengingat : 1. Undang-Undang Nomor 20 Tahun 2003 tentang Sistem Pendidikan Nasional;
2. Peraturan Pemerintah Nomor 60 Tahun 1999 tentang Pendidikan Tinggi;
3. Surat Keputusan Menteri Agama R.I. Nomor 25 Tahun 2013 tentang Organisasi dan Tata Kerja UIN Alauddin Makassar;
4. Surat Keputusan Menteri Agama R.I. Nomor 403 Tahun 1998 tentang Kurikulum IAIN Alauddin;
5. Surat Keputusan Menteri Agama R.I. Nomor 93 Tahun 2007 tentang Statuta UIN Alauddin;
6. Surat Keputusan Rektor IAIN Alauddin Makassar Nomor 42 Tahun 1993 tentang Penulisan dan Ujian Skripsi / Munaqasyah pada IAIN Alauddin;
7. Surat Keputusan Rektor UIN Alauddin Nomor 516 Tahun 2012 tentang Kalender Kegiatan Akademik UIN Alauddin Tahun 2013.

MEMUTUSKAN

- Menetapkan :
- Pertama : Mengangkat / menunjuk Saudara :
1. **Dr. Hj. Nuri Emmiyati, M.Pd.**
2. **Muhammad Taufiq, S.S., M.Hum.**
- Kedua : Tugas Dosen Pembimbing adalah memberi bimbingan dalam segi-segi metodologi dan teknik penulisan sampai selesai dan Mahasiswa tersebut lulus Ujian.
- Ketiga : Biaya pembimbing/pembantu Skripsi dibebankan kepada Anggaran Fakultas Adab dan Humaniora UIN Alauddin sesuai persetujuan Rektor UIN Alauddin Makassar.
- Keempat : Surat Keputusan ini berlaku sejak tanggal ditetapkan dan apabila ternyata di kemudian hari terdapat kekeliruan didalamnya, maka akan diperbaiki sebagaimana mestinya.
