PERSETUJUAN PEMBIMBING

Pembimbing penulisan proposal skripsi Saudara **Mildaranti**, NIM: 20400112150, mahasiswa Jurusan Pendidikan Bahasa Inggris pada Fakultas Tarbiyah dan Keguruan UIN Alauddin Makassar, setelah meneliti dan mengoreksi secara seksama proposal skripsi berjudul, “Using Tea Party Strategy as a Pre-Reading Activity to Improve the Students’ Reading Comprehension at the Second Grade of Senior High School 1 Anggeraja, Enrekang Regency”, memandang bahwa proposal skripsi tersebut telah memenuhi syarat – syarat ilmiah dan dapat disetujui untuk diseminarkan.

Demikian persetujuan ini diberikan untuk proses selanjutnya.

Makassar, Juni 2016

ACKNOWLEDGMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Alhamdulillah Rabbil Alamin, all praise be to Allah, the Lord of the Worlds. The Almighty God for his guidance, health, and help who has blessed upon the researcher in completing this thesis. Peace be upon prophet Muhammad SAW, the last messenger of Allah, and to all his families, companion and followers.

The researcher is extremely grateful to Allah SWT, because of his strength at all times until she can accomplish this thesis. The researcher realized without His blessing she can not accomplish her thesis.

During writing this thesis, the researcher received valuable suggestion, advice, strong guidance, useful correction, motivation and supporting from a number of people. Without them, the accomplishing of this thesis would never been completely done. Therefore, the researcher would like to express her greatest grateful and appreciation for those people, they are:

1. The researcher's beloved parents, **Muh. Kasli Patu** and **Rasida**, who always give her dreams to be the excellent daughter, who always keep their praying to their daughter.
2. The researcher's beloved sisters, **Luvitaliani** and **Nur Rahma**, for their support and affection.
3. **Prof. Dr. H. Musafir Pababbari, M. Si.** as the Rector of State Islamic University of Alauddin Makassar.

4. **Dr. Muhammad Amri, Lc., M. Ag.** as the Dean of Tarbiyah and Teaching Science Faculty of State Islamic University of Alauddin Makassar.
5. **Dr. Kamsinah, M.Pd.I.** and **Sitti Nurpahmi, S.Pd., M.Pd.** as the Head and Secretary in English Education Department of Tarbiyah and Teaching Science Faculty, State Islamic University of Alauddin Makassar.
6. The researcher's sincere thanks to **Dr. Djuwairiah Ahmad, M.Pd., M. TESOL** as her first consultant and **Nur Aliyah Nur, S.Pd.I., M.Pd.** as the second consultant who always give their advice, correction, and guidance. This is an incredible moment to share with them to complete this research paper.
7. The researcher's deepest appreciation to the Headmaster of Senior High School 1 Anggeraja, Enrekang Regency, **Drs. Husain** and **Mrs. Rahmi, S.Pd** as the English teacher of IX grade of Senior High School 1 Anggeraja, who had permitted the researcher to conduct her research in Senior High School 1 Anggeraja. As well as the **students of IX grade** of Senior High School 1 Anggeraja who already involved and helped the researcher during the research.
8. The researcher's classmates in English Education Department, **PBI 7 and 8** (Period 2012), **Elsa Agsari, Riski Indrayana, Musfirah** and all of them who could not be mentioned one by one. Thank for sharing knowledge and filling many special memories with her.

9. The researcher warm thanks to **AVENGERS**, **Nasrah (Caca)**, **Irnawati (Irna)**, **Andi Dian Anugrah (Uge)**, **Arsyl (Accil)**, and **Alm. Wawan Wirawan Samrih (Wawan)**. Who always fulfill the researcher's day with laugh, joy, and sorrow . Especially to my beloved friends **Alm. Wirawan Samrih**, we never stop to keep our praying to be with you there, may Allah SWT, always keep you in His side. Amin Ya Rabbal Alamin.
10. The researcher's crazy friends in **LLC**, thank you for the friendship that we have made from Junior High School until we are in college.
11. The researcher's friends in Rahmatul Asri Boarding School, **XPERD**, thank you for togetherness.
12. The researcher's best friends, **Amalia Indaryati** and **Yulia Ratna Sari**, who always give a strong support and motivation.
13. The researcher's flexible friend, **Anita Puspita Sari Iskandar** thank you for the jokes and not too serious.
14. The researcher's friend in Mathematics, **Irmayanti** who helped in counting the data of the research.
15. The researcher's friends in **KKN-P 2015**, **Uwi**, **Fitria**, **Ukhti Fitri**, **Ukhti Nia**, **Ukhti Irma**, **Nela**, **Rina**, **Udin**, **Adin**, and **Asrul**, thank as well as all the children there who were coloring the researcher's day in KKN-P.
16. The researcher's indebted thanks to **Firah (PBI 34)**, who had being the researcher's proof reader.

17. The last to everyone who could not be mentioned yet, thank a lot for the contributions to complete this writing thesis.

The researcher realizes that in writing this paper is still far from the completeness, the researcher considers that there are many weaknesses in this thesis. Therefore, any suggestions, and comments are very expected from the readers.

Makassar, June 2016

ABSTRACT

Name : Mildaranti
Reg. Number : 20400112150
Title : **Using Tea Party Strategy as a Pre-Reading Activity to Improve the Students' Reading Comprehension at the Second Grade of Senior High School 1 Anggeraja, Enrekang Regency.**

This research is about using tea party strategy as a teaching strategy in reading. The objectives of the research are explaining the improvement of the students' reading comprehension in applying tea party strategy and detecting the students' activity of using tea party in teaching learning process.

The researcher used a classroom action research. The researcher held two cycles where each cycle consisted of four meetings. This classroom action research was held at the XI Senior High School 1 Anggeraja, Enrekang Regency, it consisted of 31 students as the research subject. It covered 26 females and 5 males. The instruments used to collect data were test and observation sheet. In analyzing the data, the researcher used quantitative analysis. The quantitative data analyses were collected through the test as well as observational sheet in finding the percentage of the students' activity. The quantitative data were used to measure the students' scores during the cycle and finding the mean percentage, it aimed to know the students' improvement in reading comprehension.

The findings showed that using tea party strategy as a pre-reading activity was success to improve the students' reading comprehension. It was proved by the improvements of the students' achievement. In the preliminary test, the students got the mean score only 56.45% which was classified as fair score. In the achievement test of the second cycle, the students' mean score improved with the mean score 70.32 which were classified as fairly good score. The researcher try to conduct the second cycle to got the research target. The results of the achievement test in the second cycle were successful in achieving up to 81.61%. Moreover, the data from the observational sheet showed that most of the students become very active in the class, it because the strategy brought the students to be enthusiastic in teaching learning process.

Regarding on this research, the researcher concludes that using tea party strategy as a pre-reading activity is able to improve the students reading comprehension significantly. Therefore, the researcher suggests to provide various teaching strategy as tea party strategy especially in teaching reading in order to make the students' not bored in learning and teaching process.

CHAPTER I

INTRODUCTION

A. Background

In learning language, one of the aspects that should be improved is reading. In daily life, it is very important to get information from every reading passage, especially in learning English. Reading is one of the basic skills in English which is not simply translated word by word but need to be acquired during language course. Therefore, when the students learn to read, they should be able to comprehend the readings text during the process of reading. They are not only expected to read the text in good pronunciation but also to find the meaning of each word within the text.

According to Teixeira in Karang (2014), reading is a key of language skill that has a significant role in the teaching and learning of foreign languages. This skill allows students to have access to ideas that is communicated by people in different locations and eras, give them the opportunity to broaden their horizons and increase their knowledge. Reading in a foreign language is essential not only for promoting the students' personal and cognitive development, but also for improving their study and job prospects in a globalized society.

Reading is a fundamental skill upon which all formal education depends. Teaching reading is continuing process; it has to be given

continuously from the first to the highest education level. Teaching reading to students at very young age is, therefore, the basis for the higher level. Low reading achievement is the problem which causes the performing of school is low, it harms the students and make the loss of public confidence in the school system.

Based on the researcher's preliminary study which was conducted by interviewing the teacher and the students at the SMAN 1 Anggeraja, then the researcher found that the lack ability of the teacher and the students in reading comprehension are caused by several problems such as; understanding English vocabulary, finding the main idea of the text they read, students are not accustomed to practice reading in the classroom and daily life in fact, when the teacher give the student a passage they could not understand the topic of the paragraph. Last teachers could not find the right strategy or technique to provide materials for students to learn and quickly understand the material presented, it makes the students felt bored when they got Reading lesson. Based on factors that are mentioned above the biggest problem is how to choose appropriate technique or strategy because student can easily get bored if teacher presents material with traditional technique.

The solution of the problem above is the teacher should have suitable strategy of teaching reading that makes the students feel interesting with reading lesson. The teachers should provide the students with various reading activities. There should be a pre-reading activity to prepare the

students before they read the whole texts. Pre-reading will help the students to build their basic knowledge of the texts. It is absolutely help them have certain amount of background knowledge about the reading text because the strategy will help the students to get better comprehension.

Learning reading English perhaps make the students feeling that it is a bored activity in studying English especially when the teachers asked them to read unfamiliar texts. Based on the problem above it is necessary to apply the strategies to solve the problem of students in Reading English in order students can read and understand the meaning of every reading passage. Tea party strategy is chosen to solve this problem. According to Beer (2003) Tea party is a strategy that makes the students involve in an interactive activity. This strategy helped the students analyze and discuss the phrase or sentences that would be written in the cards, they will socialize it and guess what the text would be about.

Based on the reality above, the researcher intended to carry out class action research under the title “*Using Tea Party Strategy as a Pre-Reading Activity to Improve the Students’ Reading Comprehension at the Second Grade of SMAN 1 Anggeraja Enrekang Regency*”

B. Research Problems

The researcher intended to focus on answering these questions:

1. How is the students’ reading comprehension improvement after using tea party strategy as a pre-reading activity?

2. How is the students' activity in the classroom by using tea party strategy?

C. Research Objectives

The objective of study is based on the statement of the problems above:

1. To improve the students' reading comprehension by using tea party strategy as a pre-reading activity.
2. To find out the students' activity in the classroom by using tea party strategy.

D. Research Significances

This research concerned with using tea party strategy as a pre-reading activity to improve the students' reading comprehension. Related to the target of this research, it had two significances both theoretical and practical significances.

Theoretically, this research could be used to give the evidence about implementation theory based on problem that faced above that was improving reading comprehension by using tea party strategy. Furthermore, the results of this thesis were expected to enrich theories and can be a reference for future studies related to tea party strategy to improve the students' reading comprehension.

Practically, the researcher expected that this thesis was useful for the researcher herself, so it broaden her knowledge in teaching reading. In the other hand, this thesis would be useful to the teachers which could give them a new strategy in teaching reading, they would not be stuck only in some

particular teaching strategies. Using tea party strategy could be a good alternative or variation in teaching reading, where it made the students enjoy following the lesson. Besides that, the researcher expected the strategy could be a great way to improve the students' reading comprehension that more effective and efficiently without taking too much time and too seriously. Moreover, by having the situation, they were expected to have an improvement in their reading comprehension, which appeared in their result of the study.

E. Research Scope

The scope of this research was focused on the use of tea party strategy as a pre-reading activity to improve the students' reading comprehension especially narrative text at the second grade of SMAN 1 Anggeraja Enrekang Regency.

F. Operational Definition of Term

1. Tea Party Strategy

Tea Party is a strategy where the students pretend like they are in the party while talking and discussing some topics. Regarding to improve the students' reading comprehension, Tea party is to allow the students to predict what they think will happen in the text. This strategy helps the students to build the basic information before they read the whole texts; this strategy will make the students become active because they will discuss and socialize it with their friends then guessing what the text will be about.

2. *Pre-Reading Activity*

Pre-reading activity means that the research will perform activities such as relating passage contents to make the students get familiarity with the topic, vocabulary, or complex structures in the passage. In the other side, pre-reading activity is the beginning steps to help the students get a prior knowledge in order that students will get deep comprehension of the text before they read the whole text.

3. *Reading Comprehension*

Reading comprehension is the ability in understanding the text. So, the students do not only read but also comprehend the text in order to catch some ideas and information from the text. In addition, reading comprehension refers to meaning, understanding, and entertainment. In the text the reader must understand about meaning of the text in order the students feel to be entertained while reading.

CHAPTER II

LITERATURE REVIEW

In this chapter, the researcher discussed the literature review of this research. It consists of some previous related studies and some pertinent ideas. For more detail information, the explanations as follow :

A. Some Previous Related Studies

Karang (2013) conducted a research entitled “*Improving Reading Comprehension Through KWL Strategy at the Eight Grade Students of SMPN 1 Almapura*” She outlined that using KWL strategy can improve students’ reading comprehension at the Eight Grade students of SMPN 1 Almapura. To compare with my research while Karang issued about reading comprehension by using KWL strategy, my own research discussed about improving reading comprehension by using tea party strategy. KWL strategy helped students to be active thinkers while they read (Carr & Ogle in Karang, 2013) giving them specific things to look for and having them reflect on what they learned when they are finished reading, while tea party strategy was a strategy to prepare the students before they read the whole material in order they comprehended the text deeply when the teacher gave them the whole text. To sum up KWL strategy helps the students to be active thinkers while they read and tea party strategy helps the students in predicting the text before they read the whole text.

Sulastrri (2012), conducted an action research untitled “*Improving the First Year Students’ Reading Comprehension Ability Through Team Games Tournament at SMA Muhammadiyah 6 Makassar*”. She found that using TGT was effective to improve the first year students’ reading comprehension at SMA Muhammadiyah 6 Makassar. To compare with my research while Sulastrri issued about reading comprehension by using Team Games Tournament, my own research was discussed about improving reading comprehension by using tea party strategy. Team Games Tournament was one type of collaborative learning that force the students to comprehend the text quickly because their comprehension would be tested by Team Games Tournament, while tea party strategy was distributing index cards to the students that contain a phrase of the text and the students would be mingle and discussing with the other students to find what the text will be about. To sum up both of strategy were collaborative learning that make the students interesting in reading but, the previous research focus on how the result of the students comprehension in reading and my research itself talked more about how to prepare the students in recognizing the text.

Romli (2014), conducted an action research untitled “*Improving the Students’ Reading Comprehension of Narrative Text through Story Mapping (A Classroom Action Research of the Second Grade of MTS Tarbiyatul Falah)*”. It can be concluded that story mapping can improve the students’ reading comprehension in narrative text. It is proved from

the result of the test increase in every cycle, and also the students' enthusiasm in learning process. To compare with my research, while Romli used story mapping to improve the students' reading comprehension of narrative text. The research used tea party strategy to improve the students' reading comprehension. Story mapping as media in teaching reading made the students easy to retell and write the text by visualizing story character, events and setting but story mapping can be applied only for certain kinds of text, such as narrative text, then the maps can be applied to the stories, particularly the shorter text. In addition, applying story mapping in teaching narrative text needs a longer time than without using this method. Therefore, this method can not be used for anytime of teaching. Tea party strategy was a simple strategy to apply in teaching reading and the research believed it can be applied almost of reading text. To sum up story mapping can be applied only for certain texts and tea party strategy is applicable for reading texts.

Regarding those previous findings above, the research concluded that there are many various strategies and methods in teaching reading as well as ways to improve the students' reading comprehension. Each strategies and methods had a specific characteristic and quality that was different with the others. But, generally the aim was improving the students' reading comprehension. In this case, the researcher decided to

use tea party strategy to improve the students' reading comprehension at the second grade.

B. Pertinent Ideas

a. Tea Party Strategy

1) Definition of Tea Party Strategy

According to Tompkins (1998), Tea Party is a strategy to encourage students to read or reread pre-selected excerpt from the story. This practice of reading the excerpts and discussing the story will improve students' fluency and comprehension skill because Tea Party strategy is a strategy that improves students understanding of story before they read. According to Beer (2003) this strategy gets students to consider parts of a text before reading it. The teacher takes actual phrases from the text about to be read, and writes one on each index card to hand out to each student. Several students can have the same phrase. When students receive their cards, they walk around the classroom, share their cards, listen to others, and discuss how the cards might be connected and make inferences as to what the text might be about. After this, they get into smaller groups to discuss what they've learned from the cards and what they think are possibilities for setting, characters, and problems in the text.

2) Procedure of Tea Party Strategy

Shoob in Maiyuhendri (2014) states that there are several steps in implementing the Tea Party Strategy, they are:

- a) Selecting eight to ten statements from the text.
- b) Writing the statements on index cards, repeating statements to match of number students in the class.
- c) Distributing one card to each student, he or she is then given a chance to read the statement silently.
- d) Students move in the classroom and read the statement on their index cards to as many other classmates as possible.
- e) Students meet in small group of their own choosing to discuss what they guessed about the text from the statement.
- f) In their groups, they make predictions and list questions.
- g) The student then read in the text to check accuracy of their prediction and answer their questions.

b. Pre-Reading Activity

In contemporary practice teaching reading is usually divided into three phases. They are pre-reading, while reading and post reading activities, each of which has its own particular aims and procedure.

According to Mihara in Romdona (2011) states that Pre-reading activity is the activity where the student's using their prior knowledge and guessing the content of the text that she/he is going to read. Readers who possess prior knowledge of the content area of the text should comprehend its content. Thus to help students activate appropriate prior knowledge, pre-reading strategy is considered useful.

c. Reading Comprehension

Tarigan (2008) states reading comprehension is kind of reading activity that aims understand literary standards, critical review, printed drama, patterns of fiction. Kintsch in Romdona (2014) defined that reading comprehension is the process of making meaning from the text which has the purpose to gain an overall understanding of what is described in the text rather than to obtain meaning from isolated words or sentences.

Pang et al in Karang (2014) states that reading is about understanding written texts. It is a complex activity that involves both perception and thought. Reading consists of two related processes: word recognition and comprehension. Word recognition refers to the process of perceiving how written symbols correspond to one's spoken language. Comprehension is the process of making sense of words, sentences and connected text. Readers typically make use of background knowledge, vocabulary, grammatical knowledge, experience with text and other strategies to help them understand written text.

CHAPTER III
RESEARCH METHOD

A. Method of the Research

1. Research Design

In this research, the researcher conducted *Classroom Action Research (CAR)*. It was conducted by the teachers or lecturers who want to help their students mastered the materials. The main proposes of Classroom Action Research were to identify and to solve the students' problem in the class.

Kemmis and Taggart in Arikunto (2013) described the model or the procedures of Classroom Action Research into four steps. They are; (1) plan, (2) action, (3) observation and evaluation, and (4) reflection. The relations among them is called a cycle. Cycle action research can be drawn as follows:

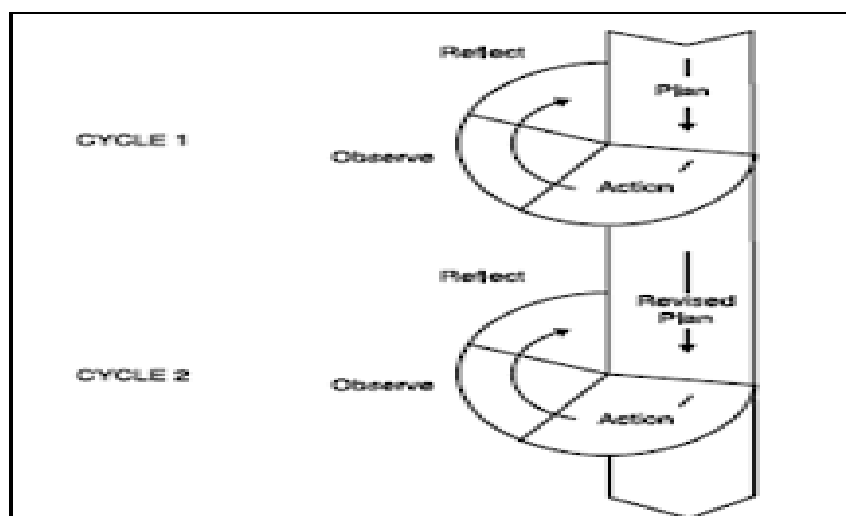

Figure 1. (Kemmis and McTaggart in Mulhal 2012)

This research consists of two cycles. Each cycle consists of four meetings.

In a cycle, it consists of four steps. They are:

1. *Plan*

In this step, the researcher prepared what the students had to do in the action step. The researcher prepared all of the instruments to get valid data, such as tests, observation sheet, answer key of the tests, answer sheets, etc.

2. *Action*

Action referred to the activities that were done by researcher in classroom related to improving reading comprehension through tea party strategy at the second grade of SMAN 1 Anggeraja. Based on lesson plan during learning activities there were three main activities organized namely pre-reading, reading activity and post-reading.

a. Pre-Reading Activity

- 1) Greeting the students
- 2) Introducing Tea Party Strategies

a) *Create Cards*

The researcher used index cards or small sheets of paper. And then, the researcher wrote phrases, sentences, or words from the text that the students would read. The researcher should remember to not paraphrase the text; the students should have the exact material provided in the text. The teacher chose the phrases that offer insight into characters, plot, setting, and conflicts.

b) *Have Students “Socialize”*

The researcher passed out cards and had students roam around the room, talking and chatting individually about the information on the cards and what they thought the text would be about. This should take between ten-twelve minutes. As students studied the phrases on their cards they began to develop an outline in their minds about the story and text elements. They gained insight into possible settings, characters, cause and effect relationships, the sequencing of the material, and gained insight into what the story would be about.

c) *Return to Small Groups*

The students met in small groups to discuss their predictions and what they thought is happening in the story or text. The students found their friends in a group. It was about four-to-five students per group was ideal.

d) *Record Predictions*

Students should write collaborative “We Think” statements. The paragraph began with, “We think that this selection is about...”. The researcher may have them wrote this in their notebook or on large pieces of chart paper for easier viewing.

e) *Sharing “We Think” Statements*

The groups of students can share their “We Think” statements. Researcher should remember to ask them to explain how they reached their prediction.

b. Reading Activity

After finishing the pre-reading activity, the researcher gave reading text to the students. The students read the text used for the tea party strategy. The researcher used literature circles or allow for a specific time for students to read the text. If the students used large pieces of chart paper for their predictions you may consider posting them around the room for others to reflect on as they read and review the text.

c. Post-Reading Activity

In post activity, the researcher asked the subject if there were any questions related to the lesson. Furthermore, discussing what they had been learned together. Finally, the researcher gave conclusion of the material.

3. Observation

In this step, the researcher observed what happened in the classroom, what the students did in the classroom. She had to also observe the weaknesses of the learning process. She wrote down all the students' activities during the teaching and learning process. The writing or the note was evaluated for the next step.

4. Reflection

In this step, the researcher analyzed the weaknesses that she had seen while observing. After analyzing the weaknesses, she looked for the

problems causing the weaknesses. Also, in this step, she had to think what she had to do at the next step.

2. *Research Variables*

This research had two variables which were explained by Arikunto (2010): Independent variable and Dependent variable.

a. Independent Variable

Independent variable is a variable that is stated to cause some outcome; it is the cause (Schreiber & Asner-self, 2011). In this research, the independent variable is using Tea Party Strategy.

b. Dependent Variable

Based on what is stated by Schreiber & Asner-self (2011), dependent variable is the outcome of the independent variable; it is the effect. The dependent variable observed in this research is students' reading comprehension.

B. Research Participant

The subject of this research is all the students of the second grade. They were the students of SMAN 1 Anggeraja Enrekang Regency. Based on the researcher interview, there were about 31 students in the class, covering 5 boys and 26 girls.

C. Research Target

The students' achievement in learning process was assessed by KKM (Kriteria Ketuntasan Minimal) of the second grade in SMAN 1 Anggeraja. The

point of KKM was 75 points. The students had to master the material 65% to get the KKM.

D. Research Instruments

In order to collect the intended data, this research used two instruments namely reading test and observation sheet.

1. Reading Test

There were two kinds of test to measure students' reading comprehension namely pre-test and post-test. First test or initial reflection intended to assess the pre-existing reading comprehension of the subjects which were administered in the first meeting later the researcher conducted the research by using tea party strategy in the classroom. The second test was administered in the end of each session. The function of administering post test is to evaluate the improvement of tea party strategy in teaching reading comprehension. First test and second test were in the form of multiple choice items which was consisted of 10 questions of first test and 10 questions of second test. The expected answer were A, B, C, and D. Each correct answer had 1 point and incorrect answer got 0 point. The purpose of pre-test conducted was to find out initial condition of subject in reading comprehension. Meanwhile the second test reflected the improvement of tea party strategy when it was applied in second grade of SMAN 1 Anggeraja.

2. Observation Sheet

Observation is one of the very important records methods for obtaining comprehensive data in qualitative research especially when a

composite of both oral and visual data become vital to the research. Observation itself consist of two types, they are participant observer and non-participant observer.

In this research, the researcher used observation sheet to monitor the students' activity during the learning process by using tea party strategy. The researcher took a participant observation because the researcher was the teacher and the observer of this research.

This instrument was used to take the data of students' performance and activities in teaching and learning process in the class. The data from this instrument in a cycle was used as a basis data to continue to the next cycle. The data used to prepare all the materials needed in the following steps.

E. Data Collection Procedure

1. Reading Test

The researcher used reading test in form of narrative text as the instrument for collecting data. The test consists of test the first cycle and second cycle. Test of the first cycle and second cycle are used to know whether there was an improvement of the students' reading comprehension after using tea party strategy.

2. Observation Sheet

In this technique, the data was taken from the notes about everything happened during teaching learning process which were about the students' responses and participation in teaching learning process. This instrument was also as a barometer to do previous data collecting. By direct

observing, there were possibilities to take some notes, behavior, improvement, and so on, which were happened any time.

F. Data Analysis Technique

The quantitative data was analyzed as follows:

- a. The formula was used in scoring the students' correct answers was

$$\text{Score} = \frac{\text{Students correct answer}}{\text{Total Number of items}} \times 10$$

(Departemen Pendidikan dan Kebudayaan, 2004)

- b. Classifying the scores of the students into following criteria.

The mean score of the students was classified into seven levels as follows:

Table 1. Classification Score of Students

Score	Criteria
9.6 – 10	Excellent
8.6 – 9.5	Very Good
7.6 – 8.5	Good
6.6 – 7.5	Fairly Good
5.6 – 6.5	Fairly
3.6 – 5.5	Poor
0 – 3.5	Very Poor

(Departemen Pendidikan dan Kebudayaan, 2004)

c. Calculating the rate percentage of the students' scores:

$$\% = \frac{F}{N} \times 100$$

Where:

% : Percentage

F : Frequency

N : The total number of the students

(Gay, 2006)

d. The mean score of the students' achievement:

$$\bar{X} = \frac{\sum X}{N}$$

Where:

\bar{X} = Mean Score

$\sum X$ = The sum of all score

N = The number of subject (students)

(Gay, 2006)

CHAPTER IV

FINDING AND DISCUSSION

In this chapter, the researcher presents the result of the research. In this point, the researcher shows the finding of the data which are collected then followed by the discussion of the findings. It includes the data which were collected during the research. The explanation as follows:

A. Findings

Based on the research problem, this section is divided in two parts. The explanations are as follows:

1. The Improvement of the Students' Reading Comprehension after Using Tea Party Strategy as a Pre-Reading Activity.

The first cycle was conducted from 28th of March until 14th of April 2016. It consisted of four meetings included preliminary test and two achievement tests. In this step, the researcher prepared all the material and media that was needed during teaching-learning process such as teaching material, flash cards, lesson plan, and observation sheet to observe the students' activities during teaching-learning process.

Based on the schedule of the class, the first meeting was conducted on 28th of March 2016. The meeting was started from 07.45 a.m-09.00 a.m. Every meeting was provided 90 minutes so, the researcher had to use the time effectively. In this meeting the researcher began with introducing herself as a researcher. The researcher explained the aim of her research and the reason

conducting the research. Before conducting the action, the students were given the preliminary test (see the pictures below) to measure the student prior knowledge in comprehending the text. The preliminary test consisted of 10 items of multiple choices in form of narrative text.

Picture 1. The students were doing the preliminary test

After calculating the students' score, the researcher found out mean score of preliminary cycle test was low with mean score was 56.45%. The score showed that the students still had difficulties in comprehending the text because the score did not achieve the target of the student success criteria. Therefore, the researcher tried to apply tea party strategy in pre-reading activity to improve the students reading comprehension in order to achieve the target.

Based on the schedule, the researcher conducted the second meeting on 7th April 2016. The class was started at 09.00 – 10.10 a.m. in the morning. In this meeting, the researcher taught the material by applying tea party strategy. The procedures (see the pictures below and for further, see the Lesson Plan in the Appendix XIV) as well as the third meeting that conducted on 11th April 2016.

Pictures 2. TEA PARTY STRATEGY ACTIVITIES

1. The students roamed around the class, talking and sharing about the information

2. The students divided in 4 groups (1st Cycle)
3. The students divided into 5 groups (2nd Cycle)

4. The students discussed the information of the text in the cards

5. The students found the prediction of the text and wrote the prediction in a paper

6. The students retell the prediction of the text

7. The student read the text while checking the closer prediction of the text

Based on the schedule, the researcher conducted the fourth meeting on 14th April 2016. The class was started at 09.00 – 10.10 a.m. in the morning. In this meeting, the researcher gave the students the achievement test (see the

pictures below) to measure the students' achievement during the first cycle. The achievement test consisted of 10 items of multiple choices in form of narrative text.

Picture 3. The students were doing achievement test of the first cycle

Covering the data, the researcher found the mean score of the students' achievement test in the first cycle was 70.32%. The score was classified as fairly good. Based on the result of the students' achievement test, there were 25.81% the students who got good score (70-80) which improved become 8 students than in the preliminary test was none of the students got good score. Although, there was improvement in cycle 1, this condition had not reached yet the criteria of success that had been decided. It means that, the researcher needed to evaluate and improve the students' reading comprehension in the next cycle in order to catch the criteria of success. So that, although the result of the students' score had not reached yet, the researcher realized that had to do more efforts to improve the students' reading comprehension through tea party strategy. It needed to have more improvement in the next cycle.

The planning for the first and second cycle were the same. There were all the material and media that was needed during teaching-learning process. The second cycle was conducted for four meetings. It was held on April, 18th, 21st, 25th, and 28th. For this planning, the researcher would make a competition of every group in the 3rd meeting to make the students become more active in form of reading section. The researcher also prepared the reward for any group who got the winner. In addition, to know the improvement of the students reading comprehension by using tea party strategy, the researcher prepared the achievement test that consisted of 10 items of multiple choices in form of narrative text.

The researcher conducted the first meeting on Monday, April 18th 2016. The meeting was started from 07.45 a.m – 09.00 a.m. The researcher taught the material by using tea party strategy. The procedures (see the pictures below and for further, see the Lesson Plan in the Appendix XV) as well as the second meeting that held on 21st April 2016.

Pictures 4. TEA PARTY STRATEGY ACTIVITIES

1. The students roamed around the class, talking and sharing about the information

2. The students divided in 4 groups (1st Cycle) 3. The students divided into 5 groups (2nd Cycle)

4. The students discussed the information of the text in the cards

5. The students found the prediction of the text and wrote the prediction in a paper

6. The students retell the prediction of the text

7. The student read the text while checking the

In the next meeting on Monday, April 25th 2016, the research was held a game in form of predicting the text. It aimed to improve the students' reading comprehension and their activeness. The game was about finding the prediction quickly. The researcher divided the students into five groups, the researcher gave them the flash card that consisted of sentences that related to the text that the students would predict. Then, every group sent their representative to write down on the whiteboard the prediction. The researcher counted 1-30 seconds to

stop them wrote. The winner is the closer prediction that the students already wrote in the whiteboard.

In the third meeting, the atmosphere of the class was really different because the students were crowded in joining the games. The students were really enthusiastic and enjoy the competition. It made the researcher happy because it was a little improvement of the students in comprehending the text. It was proved with their comprehension in predicting the text. In the fourth meeting on 28th April 2016, the researcher gave the students achievement test (see the pictures below) to know the improvement of the students' reading comprehension during the second cycle. The achievement test consisted of 10 items of multiple choices in form of narrative text. After calculating the score, the researcher found the mean score of the achievement test in the second cycle was 81.61%. The students' score showed the improvement than in the first cycle (70.32%).

Picture 5. The students were doing achievement test of the second cycle

In addition, there was the target of successfulness of the students that had been decided by the researcher. The target is the students have to master the material 65% to get the success criteria of the students (KKM); the point of KKM is 75 points. The data showed that 81.61 percentages of the students already mastered the material especially in reading comprehension. It meant that the Classroom Action Research (CAR) was success and the cycle was stopped. It made the research satisfied of the students' improvement in using tea party strategy to improve the students' reading comprehension.

Toward teaching learning process in this cycle the researcher was satisfied because her work hard to improve the students' reading comprehension had been reached. There was an improvement after applying the second cycle of class action research (CAR). It can be seen from the result of the students' achievement test of the second cycle was 81.61%, it was totally improved than in the first cycle was 70.32%.

From the data during first and second cycle which was consisted of preliminary test and two achievement tests. It could be seen from the first test and the second cycle in the first cycle to the second test of the second cycle which has been showed that more than 75% of the students who passed the target of successful criteria (KKM). It meant that the researcher decided to stop the Classroom Action Research (CAR) because it was succeeded. Therefore, the researcher did not need to rearrange for next planning. Regarding the result of the data that has been explained, it should be concluded that using tea party strategy as a pre-reading activity can improve the students' reading comprehension.

2. The Students' Activity in the Classroom by Using Tea Party Strategy.

The observation was conducted during each cycle. It included how the students work together, how the students being active during learning process, optimized their comprehension in comprehending the text and how the situation and condition of the class was applying tea party strategy as a pre-reading activity to improve the students' reading comprehension. The researcher used observation sheet to find out the percentage of students' activity during teaching and learning process in every cycle. Then, the researcher calculated the total percentage of students' activities to get the data which was used as a basis data for the next cycle.

Based on the observational sheet in the first cycle (see Appendix.VI), the researcher was glad to see the students' attendance. They were really enthusiasm in attending the class even they still had difficult in comprehending the material (see the pictures below). Even though some points had improved but, they still needed to be improved in the next cycle.

Picture 6. The students were enthusiasm in attending the class

Regarding the observational sheet in the first cycle, there were some points that did not work well. It because some of the students were afraid and shy to ask what they did not understand, they still lack of vocabulary, and they did not accustomed in reading so, they still felt difficult in understanding what the text was about.

The students' activeness towards tea party strategy in teaching and learning process was still beyond the researcher's expectation. It proved with the mean score was 2.7%. There were some indicators still needed to be improved.

In the other side, the observational sheet of the students' activity towards tea party strategy in the second cycle (see Appendix. X) was better than the previous observation. The mean score of the observation was up to 3.6%. Most of the students showed their activeness in learning process (see the poughtures below). It can be seen that the students were not ashamed in asking or clarifying their understanding of the test, sharing and discussing the test as well as comprehending the text well.

Picture 7. The students showed their activeness in learning process

The students were enthusiastic in learning process, it changed their perception towards reading lesson that was bored activity, by using tea party strategy the students would be more enjoy and not taking too much serious in learning. Moreover, the students would be easy to comprehend the text well. The students' activity in classroom by using tea party strategy showed a specific progress of the students' activeness. The students could comprehend the text and did the indicators of the activity well.

B. Discussion

From the result of using tea party strategy as a pre-reading activity to improve the students' reading comprehension done for two cycles, the researcher obtained some results. Those results are discussed based on the research questions and separated into two points as the following:

1. The Improvement of the Students' Reading Comprehension after Using Tea Party Strategy as a Pre-Reading Activity.

After applying tea party strategy as a pre-reading activity in teaching reading especially narrative text that it was bringing the students to different atmosphere. Based on the data, this strategy was successful in improving the students' reading comprehension. It can be seen from the improvement of the students' mean scores from 56.45% in the preliminary test before using tea party strategy up to 70.32% in the first cycle. Classically the students' learning percentage improved.

Even though in the first cycle it had not reached the target point, which was 75, the researcher directly conducted the second cycle with considering the

reflection in advance. In the second cycle, the researcher gave the students a prediction game in order to improve the students' reading comprehension by predicting the text. As the result of the students' mean score in the second cycle improved to 81.61% and it was indicated that the target point was reached. This was correlated with Yeeding (2007) investigated the effects of pre-reading activities on learners' motivation and reading comprehension ability. Results showed that the activities subjects were highly motivated, enthusiastic to read. After the experiment, they scored significantly higher. It could be said that using tea party strategy as a pre-reading activity could improve the students' reading comprehension.

Furthermore, using tea party strategy as a pre-reading activity could improve the students reading comprehension. It could be seen in every cycle that had been conducted by the researcher. It also could be proved by looking at the appendix XIII. Almost of the students reached the research target that was 75 point. According to metacognitive theory, Klein at al (1991), involves thinking about what one is doing while reading. Klein at al (1991) stated that strategic readers attempt some activity while reading such as identifying the purpose of the reading before reading and identifying the form or type of the text before reading. Indicated that by choosing a various activity in reading comprehension could improve the students' reading comprehension. For instance, the students could understand the text well by doing pre-reading activity before they read the whole of the text than asking them to read the text directly. Correlating with this research, the researcher could say that using tea party strategy as a pre-

reading activity could improve the students' reading comprehension because it showed a significant improvement in students' reading comprehension.

2. The Students' Activity in the Classroom by Using Tea Party Strategy.

Tea party strategy brought the students become active, cooperative with their friends, and got interactive in their class because in every meeting it had different activities in delivering the material than before applying tea party strategy.

According to the observational sheet, tea party strategy made the students become more active. It was proved with observational that had been conducted by the researcher. In the observational sheet of the first cycle, the students looked still felt ashamed in asking which was they did not understand, difficult in understanding the text, and did not accustomed in reading. It was proved with 2.7%. In the other side, the observation sheet that was held in the second cycle showed a specific progress with percentage 3.6%. The students become more energetic in doing the activity such as they did not feel ashamed when they want to ask a question, discuss with their friends and they could comprehend the text perfectly.

According to Beer (2013), tea party is a strategy that makes the students involve in an interactive activity. In every meeting showed that the students participated actively by showing their activities through this research even though in the first meeting the students did not showed their performance as well as the others.

Tea party strategy brought the students into the different atmosphere. The activity would make the students became enjoyable. The steps of learning activities were roaming around the class while discussing the sentences of the cards with their friends to help the students recognizing the text would be about. Then, dividing the students into several groups so, they could be easy to discuss the sentences with their friends in group while analyzing the sentences in order they can share their own opinion about the text. After that, the students wrote their prediction on the paper and shared it with the others group. At last, the researcher gave the whole of the text and the students were enthusiastic in reading the text while matching their prediction which was closer to the text. Moreover, the students tried to find the mind idea of the text as well as the moral value of the text. In the end, the researcher submitted their paper and closed the class.

By using tea party strategy, the students would be enjoy and not taking too seriously in learning activities so that they could comprehend the text well. It was proved by the students' achievement result was very satisfactory. It could be seen from the result finding of the first test to second test of first cycle until the last test of the second cycle. The students' score was improved significantly. In the first test previously, the students' score was low that it was proved with none students got excellent score, very good score as well as good score. The highest score only 4 students as classified fairly good score and the lowest up to 15 students as classified poor. Furthermore, in the second test of first cycle was better that the first test. It showed that the highest score was reached by 8

students as classified as good score and the lowest score was reached by 7 students as classified fairly. Differently with the second cycle, the second test of the second cycle showed an improvement of the students' score. It was proved with the highest score had been reached by 1 students as classified excellent, 6 students got very good score and good score got up to 21 students as well as 3 students got fairly good. From the explanation, tea party strategy is suitable strategy to be applied in learning English especially in reading activity. It made the students active and enthusiastic in predicting the text.

The goal of the research had been reached, that was improving reading comprehension. The students had been reached the target of the successful criteria in the second cycle. Thus this research consisted of four meetings in every cycle. Even though some of them did not reach the highest score but, they already mastered more than 75% the material. It made the researcher really happy.

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the result in the previous chapter about using tea party strategy to improve the students' reading comprehension at the second grade of Senior High School 1 Anggeraja, Enrekang Regency, it can be concluded as follows:

1. Using tea party strategy as a pre-reading activity was able to improve the students' reading comprehension. It was proved by the students' score of the first cycle to the second cycle. The students' mean score in the first cycle was 70.32% and in the second cycle it was up to 81.61%. The mean score of the second cycle was classified as good score that indicated the successful criteria in achieving the target 75 points. Hence, it can be seen that the students' reading comprehension was improve significantly.
2. The observational sheet that consisted of the students' indicators of activity by using tea party strategy as a pre-reading activity indicated that most of the students showed their progress in activeness of applying tea party strategy in teaching-learning process.

B. Suggestion

Regarding to the teaching reading by using tea party strategy, the researcher proposes some suggestions as follows:

1. The teacher should provide the students with various teaching strategy in order to make the students more interested and being active during teaching learning activity.
2. It is suggested to use tea party strategy as interactive activity in reading comprehension. This strategy is also used as a warming up in pre-reading activity to help the students became enjoyable and lively in learning process.
3. For the next researcher, the researcher suggested that the use tea party strategy is also available for the others English skills such as speaking and writing. It is also effective in improving the students' vocabulary mastery.

PRELIMINARY TEST

NAME :

SUBJECT :

CLASS : IX Grade

Id Number :

THE LEGEND OF LAKE TOBA

Once, a fisherman named Batara Guru Sahala lived in Batak land. One day he caught a fish. He was surprised to find that the fish could talk. It begged Sahala to set it free. He did accordingly.

As soon as the fish was free, it changed into a woman. She was so beautiful that Sahala fell in love with her at once. He asked her to marry him. The woman agreed to marry Sahala. However, she told him that he must never let out the secret that she was once a fish. Sahala promised her that he would not tell anyone about it.

They were happily married, and had two daughters. Every morning Sahala went out fishing. His daughters would bring him his lunch. One day, however, instead of bringing the food to their father, the two girls ate it. When Sahala knew what they had done with the meal, he is very angry. He shouted at the saying. "You behaved exactly like the daughters of a fish!"

The girls did not know what their father meant. They went home and asked their mother about it. Their mother was very annoyed. Although Sahala apologized to her later, she would not forgive him for breaking his promise.

Then the earth began to shake, and volcanoes started to erupt. The earth cracked and formed a big hole. People said that hole become Lake Toba.

1. Batara Guru Sahala was a....
 - a. Farmer
 - b. Villager
 - c. Sailor
 - d. Fisherman

2. Batara Guru Sahala had.....daughter.
 - a. Two
 - b. Three
 - c. Four
 - d. Five

3. How did they feel when Batara Guru Sahala were married and have two daughters?
 - a. Happy
 - b. Doubt
 - c. Sad
 - d. Angry

4. His wife was annoyed because.....
 - a. Sahala apologized to her
 - b. He forgave her for the mistake she made
 - c. Sahala broke his promise
 - d. His daughters ate Sahala's meal

5. What happened when the earth shook?
 - a. The earth began to shake
 - b. The earth cracked and made a big hole
 - c. The earth became Lake Toba
 - d. Volcanoes started to erupt

Once upon a time there was a poor widow who had an only son named Jack. They were so poor that they didn't have anything except a cow. When the cow had grown too old, his mother sent Jack to the market to sell it. On the way

to the market, Jack met a butcher who had some beautiful beans in his hand. The butcher told the boy that the beans were of great value and persuaded the silly lad to sell the cow for the beans.

Jack brought them, happily. When he told his mother about this, his mother became so angry that she threw the beans out of the window.

When Jack woke up in the morning, he felt the sun shining into a pan of his room, but all the rest was quite dark and shady. So he jumped to the window. What did he see? The beanstalk grew up quite close past Jack's window. He opened the window and jumped to the beanstalk which ran up just like a big ladder

He climbed and climbed till at last he reached the sky. While looking around, he saw a very huge castle. He was very amazed. Then Jack walked along the path leading to the castle. There was a big tail woman on the doorstep. Jack greeted her and asked for the giantess mercy to give him breakfast, because he felt very hungry. Although the giantess grumbled at first, finally she gave Jack a hunk of bread and cheese and a jug of milk.

Jack hadn't finished when the whole house began to tremble with the noise of someone's coming. "Oh! It's my husband!" cried the giantess. "What on earth shall I do?"

Hastily the giantess opened a very big cupboard and hid Jack there.

6. What is the story about?
 - a. jack and a butcher
 - b. jack and the giantess
 - c. a poor widow and his son
 - d. Jack and the bean stalk
7. Where did Jack sell his cow?
 - a. at the market
 - b. at the giants castle

- c. at the butchers house
 - d. on the way to the market
8. Oh! It's my husband !" cried the giantess (paragraph 7) from the sentence we know that the giantess is ... her husband
- a. afraid of
 - b. angry with
 - c. fed up with
 - d. annoyed with
9. Jack's mother looked very furious when jack told that....
- a. the beans were precious
 - b. the butcher bought his cow
 - c. he traded his cow for the beans
 - d. he had sold his cow to a butcher
10. What do we learn from the text?
- a. Jack's mother was a furious mother
 - b. Poverty makes people hopeless
 - c. Jack was innocent boy
 - d. Sincerity makes jack get something precious

Appendix II.

ACHIEVEMENT TEST CYCLE 1

NAME :	SUBJECT :
CLASS : IX Grade	Id Number :

Text 1 for questions number 1-5

Once upon time, there was a king who had three sons. The two sons were clever. The third son did not speak much so he was called Simpleton. When the king had become old, he did not know which son should become the king.

Then he got a bright idea and said; “Go forth, who brings me the most beautiful carpet will be king after me”. He blew three feathers in the air, and said: “You should go as they fly”. One feather flew to the east, the second to the west, but the third flew straight up and did not fly far.

So one brother went to the right, and the other went to the left. Simpleton was sad because his feather did not fly far. Then all at once he saw a trap-door close to the feather. He found some steps, and went down the door. Then he came to another door, knocked at it. The door opened, and he saw a fat toad sitting. She asked what he wanted. He answered; “I should get the prettiest and finest carpet in the world”. Then she called a young toad; “Bring me the great box!”

The young toad brought the box. The fat toad opened it, and gave simpleton a carpet out of it. The carpet was so beautiful. So Simpleton thanked her, and brought it to the kingdom. Meanwhile his brothers just got some coarse handkerchiefs from the shepherds’ wives whom they had met. When the king saw Simpleton’s carpet he was very astonished and said,” Well, the kingdom

belongs to the Simpleton”. But his two brothers argued that it was impossible that simpleton should be king, they asked the king to make a new agreement.

Then the father said; “Who brings me the most beautiful ring will inherit the kingdom”. He blew three feathers, which they were to follow. Those of the two eldest again went east and west, and simpleton’s feather flew straight up, and fell down near the trap-door. Again the fat toad gave him a ring sparkled with jewels. Meanwhile his two brothers just got old carriage-rings. However they did not cease from tormenting the king until he made a third condition.

So the king declared; “who brings the most beautiful woman home will be the king”. He again blew the three feathers into the air. Then Simpleton went down to the fat toad, and said; “I am to take home the most beautiful woman”. Then, she gave him a yellow turnip which had been hollowed out. Mournfully Simpleton said; “What am I to do with it?”. The toad answered; “Just put one of my little toads into it!”. Then Simpleton seized one little toad and put her into the yellow coach. Surprisingly the little toad turned into a beautiful maiden. So Simpleton took her to the king. On the other hand, his brother brought peasant women to the kingdom.

When the king saw the women he said; “After my death the kingdom belongs to my youngest son”. But the two eldest brothers kept arguing that whose wife could leap through a ring which hung in the center of the hall would be the king. The king agreed. Then the two peasant women jumped through the ring but they fell which made their arms and legs broke. On the other hand, the pretty maiden sprang through the ring as lightly as a deer which made the two peasants ceased. So Simpleton received the crown and ruled wisely the kingdom.

1. What is the story about?
 - a. Simpleton
 - b. The Three Feathers
 - c. The King and Three Sons
 - d. The King and Three Feathers
2. What are the challenges given by the king to his sons?
 - a. Carpet, Ring, and Beautiful Woman
 - b. Carpet, Ring and Peasant Woman

- c. Ring, Old Carriage-rings and Beautiful Woman
 - d. Handkerchiefs, Ring and Beautiful Woman
3. Then Simpleton went down to the fat toad, and said; “I am to take home the most beautiful woman”. The underlined words closest meaning with
 - a. find
 - b. catch
 - c. bring
 - d. buy
 4. But his two brothers argued that it was impossible that simpleton should be king, they asked the king to make a new agreement (Paragraph 4), from the sentences we know that two brothers ... with Simpleton.
 - a. afraid
 - b. angry
 - c. disagree
 - d. annoyed
 5. What is the moral value of the text?
 - a. Don't judge a book by it's cover
 - b. Honestly begins at home
 - c. United we stand, divided we fall
 - d. Common people may prove great ones

Text 2, for questions number 6-10

A fox fell into a well and couldn't get out. By and by a thirsty goat came along. Seeing the fox in the well it asked if the water was good. “Good,” said the fox, “It's the best water I've tasted in all my life. Come down and try it yourself.”

The goat was thirsty so he got into the well. When he had drunk enough, he looked around but there was no way to get out. Then the fox said, “I have a good idea. You stand on your hind legs and put your forelegs against the side of the well. Then I'll climb on your back, from there. I'll step on your horns, and I can get out. And when I'm out, I'll help you out of the well.” The goat did as he was asked and the fox got on his back and climbed out of the well. Then he coolly walked away. The goat called out loudly after him and reminded him of his promise to help him out. The fox merely turn to him and said, “if you only

had thought carefully about getting out, you wouldn't have jumped into the well."

The goat felt very sad. He called out loudly. An old man walking nearby heard him and put a plank into the well. The goat out and thanked the old man.

6. The text tells the story of ...
 - a. a fox
 - b. a goat
 - c. a fox and a goat
 - d. the goat and an old woman
7. "The goat did as he was asked" (Paragraph 3)
What does the above sentence mean?
 - a. The goat drank enough and looked around.
 - b. The goat came down to the well and drank.
 - c. The goat called out loudly after the fox got out.
 - d. The goat stood on his hind legs and put his forelegs against the side of the well.
8. "Come down and try it yourself." (Paragraph 1). The underlined word refers to
 - a. a well
 - b. water
 - c. life
 - d. a goat
9. What do we learn from the text?
 - a. The fox's idea of how to get out of the well
 - b. How the fox helped the goat
 - c. How both the goat and the fox got out of the well
 - d. Why the fox got into the well
10. What kinds of the story above?
 - a. Report text
 - b. Descriptive text
 - c. Narrative text
 - d. Procedure text

Appendix III.

ACHIEVEMENT TEST CYCLE 2

NAME :	SUBJECT :
CLASS : IX Grade	Id Number :

Read the text and choose the correct answer to answer the questions!

Text 1, for question number 1-5!

There was once a man who was very much in love with a girl. This man is very romantic. The man folded 1,000 pieces of paper cranes as a gift to his girl. Although he was just a small executive in his company, they were very happy together.

One day, his girl told him she was going to Paris and would never come back. She also told him that she could visualize any bright future for both of them, so let's go their own ways. The man was heartbroken but he agreed.

One day he regained his confidence. He worked hard day and night, just to make something out of himself. Finally with all these hard work and the help of his friends, the man had set up his own company. "You never fail until you stop trying", that was what he always told himself, "I must make it in life!"

One rainy day, when the man was driving, he saw an elderly couple sharing an umbrella in the rain walking to some destination. It didn't take him long to realize that those were his ex-girlfriend's parents. He drove slowly beside the couple. He wanted them to see him in his luxury car. He wanted them to know that he wasn't the same one anymore.

The couple was walking towards a cemetery. Following them, the man got out of his car. There, he saw his ex-girlfriend, a photograph of her smiling sweetly. He saw his precious paper cranes in a bottle placed beside her tomb.

The couple saw him. The man walked over and asked them why this had happened. They explained that their daughter did not leave for France. She was stricken ill with cancer. She had believed that he would make it someday, but she did not want her illness to be his obstacle. Therefore she had chosen to leave him.

His daughter had wanted her parents to put his paper cranes beside her. If the day came, when fate brings him to her again, he could take some of those paper cranes back with him. The man just wept.

1. What is the suitable title of the story?
 - a. True Love
 - b. The Last Request
 - c. Let Me Love You
 - d. Because of Cancer

2. Where will the girl go?
 - a. Singapore
 - b. Paris
 - c. America
 - d. England

3. One day he regained his confidence. The underlined word is closest meaning to
 - a. Get
 - b. Put
 - c. Feel
 - d. Find

4. Which statement is incorrect according to the text?
 - a. The man folded 500 pieces of paper cranes as a gift to his girl
 - b. The man was heartbroken but he agreed
 - c. The couple was walking towards a cemetery
 - d. He wanted them to see him in his luxury car

5. What is the main idea of the paragraph?
- Paper cranes will be unforgettable gift
 - The man who love his girl very much
 - The girl who was stricken ill with cancer
 - The parents who love their daughter so much

Text 2, for question number 6-10!

The Smart Parrot

A man in Puerto Rico had a wonderful parrot. There was no another parrot like it.

It was very, very smart. This parrot would say any word-except one. He would not say the name of the town where he was born. The name of the town was Catano.

The man tried to teach the parrot to say Catano. But the bird would not say the word. At first the man was very nice, but then he got angry. "You are a stupid bird! Why can't you say the word? Say Catano, or I will kill you!" but the parrot would not say it. Then the man got to so angry that the shouted over and over, "Say Catano, or I'll kill you!" but the bird would not talk.

One day after trying for many hours to make the bird say Catano, the man got very angry. He picked up the bird and threw him into the chicken house. "You are more stupid than the chickens. Soon I will eat them, and I will eat you, too."

In the chicken house there are four old chickens. They were for Sunday's dinner. The man put the parrot in the chicken house and left.

The next day the man came back to the chicken house. He opened the door and stopped. He was very surprised at what he saw! He saw three dead chickens on the floor. The parrot was screaming at the fourth chicken, "Say Catano, or I'll kill you!"

6. Where does the story take place?
- a. London
 - b. Puerto Rico
 - c. Jakarta
 - d. Buenos Aires
7. How often did the owner teach the bird how to say the word?
- a. Always
 - b. Everyday
 - c. Many times
 - d. Every second
8. Which statement is true according to the text?
- a. The parrot could say Catano
 - b. At last the parrot could say Catano
 - c. Catano was the name at the parrot
 - d. The man never got angry at the parrot
9. What does the man do to the bird because the bird cannot say the name of a place?
- a. The man ate the bird.
 - b. The sold the bird.
 - c. The man killed the bird.
 - d. The man taught the bird
10. It is most likely that
- a. The bird killed the three chickens.
 - b. The three chickens killed the bird.
 - c. The bird played with the chicken.
 - d. The bird killed one of the three chickens.

LESSON PLAN

Educational Unit	: SMA Negeri 1 Anggeraja
Class/Semester	: XI/2
Lesson	: English
Time	: 2 x 60 Mniutes
Aspect	: Reading

A. Competency Standards

Reading

5. Understanding the meaning of short functional text and essay form of report, narrative and analytical exposition in the context of daily life and to access knowledge.

B. Basic Competence

- 5.2 Responding meaning and rhetorical steps in the essay that uses written language diversity accurately, smoothly, and acceptable in the context of daily life and to access knowledge in text form of: report, narrative and analytical exposition.

C. Indicator

1. Recognizing kinds of narrative text.
2. State the purpose of narrative text.
3. Finding the prediction of narrative text.
4. Mention the characters in the narrative text that has been read.
5. Retell the story of narrative text.
6. Make a summary from the text that has been read.

D. Purpose of Learning

Students are able to:

1. Recognize kinds of narrative text.
2. State the purpose of narrative text.
3. Find the prediction of narrative text.
4. Mention the characters in the narrative text that has been read.
5. Retell the story of narrative text.
6. Make a summary from the text that has been read.

E. Learning Material

Narrative Text:

1. Purpose: To amuse or entertain the readers with actual or imaginary experiences indifferent ways.
2. Generic Structure: Orientation, Complication, Resolution.
3. Language Features: use of noun phrases, connectives, adverbial phrases of time and place, simple past tense, action verbs, saying verbs, thinking verbs, feeling verbs, and verbs of sense.
4. Story of Narrative Text:

The Three Feathers

Once upon time, there was a king who had three sons. The two sons were clever. The third son did not speak much so he was called Simpleton. When the king had become old, he did not know which son should become the king.

Then he got a bright idea and said; “Go forth, who brings me the most beautiful carpet will be king after me”. He blew three feathers in the air, and said: “You should go as they fly”. One feather flew to the east, the second to the west, but the third flew straight up and did not fly far.

So one brother went to the right, and the other went to the left. Simpleton was sad because his feather did not fly far. Then all at once he saw a trap-door close to the feather. He found some steps, and went down the door. Then he came to another door, knocked at it. The door opened, and he saw a fat toad sitting. She asked what he wanted. He answered; “I should get the prettiest and finest carpet in the world”. Then she called a young toad; “Bring me the great box!”

The young toad brought the box. The fat toad opened it, and gave simpleton a carpet out of it. The carpet was so beautiful. So Simpleton thanked her, and brought it to the kingdom. Meanwhile his brothers just got some coarse handkerchiefs from the shepherds’ wives whom they had met. When the king saw Simpleton’s carpet he was very astonished and said,” Well, the kingdom belongs to the Simpleton”. But his two brothers argued that it was impossible that simpleton should be king, they asked the king to make a new agreement.

Then the father said; “Who brings me the most beautiful ring will inherit the kingdom”. He blew three feathers, which they were to follow. Those of the two eldest again went east and went west, and simpleton’s feather flew straight up, and fell down near the trap-door. Again the fat toad gave him a ring sparkled with jewels. Meanwhile his two brothers just got old carriage-rings. However they did not cease from tormenting the king until he made a third condition.

So the king declared; “who brings the most beautiful woman home will be the king”. He again blew the three feathers into the air. Then Simpleton went down to the fat toad, and said; “I am to take home the most beautiful woman”. Then, she gave him a yellow turnip which had been hollowed out. Mournfully Simpleton said; “What am I to do with it?”. The toad answered; “Just put one of my little toads into it!”. Then Simpleton seized one little toad and put her into the yellow coach. Surprisingly the little toad turned into a beautiful maiden. So Simpleton took her to the king. On the other hand, his brother brought peasant women to the kingdom.

When the king saw the women he said; “After my death the kingdom belongs to my youngest son”. But the two eldest brothers kept arguing that whose wife could leap through

a ring which hung in the center of the hall would be the king. The king agreed. Then the two peasant women jumped through the ring but they fell which made their arms and legs broke. On the other hand, the pretty maiden sprang through the ring as lightly as a deer which made the two peasants ceased. So Simpleton received the crown and ruled wisely the kingdom.

4. Work Sheet

H. Learning Activities

a. Pre-Activities

- ✓ Praying
- ✓ Greeting
- ✓ Checking the attendance list
- ✓ Checking the students prior knowledge of narrative text

b. Main Activities

1. Pre-Reading Activity

- ✓ Distributing the flashcards
- ✓ Asking the students to roam around the class, talking and sharing about the information on the cards
- ✓ Dividing the students into 4 group
- ✓ Discussing the information of the text on the cards
- ✓ Finding the prediction of the text
- ✓ Write the prediction in a paper
- ✓ Retelling the prediction of the text

2. Reading Activity

- ✓ Giving the whole of the text
- ✓ Reading the text while checking the closer prediction of the text.
- ✓ Finding the moral value of the text

3. Post-Reading Activity

- ✓ Make a summary of the narrative text in the paper
- ✓ Submit the paper

c. Post Activity

- ✓ Asking the students which was do not understand
- ✓ Asking the student their perception towards the learning process
- ✓ Finishing the class
- ✓ Greeting

4. Story of Narrative Text:

Let me love you

There was once a man who was very much in love with a girl. This man is very romantic. The man folded 1,000 pieces of paper cranes as a gift to his girl. Although he was just a small executive in his company, they were very happy together.

One day, his girl told him she was going to Paris and would never come back. She also told him that she could visualize any bright future for both of them, so let's go their own ways. The man was heartbroken but he agreed.

One day he regained his confidence. He worked hard day and night, just to make something out of himself. Finally with all these hard work and the help of his friends, the man had set up his own company. "You never fail until you stop trying", that was what he always told himself, "I must make it in life!"

One rainy day, when the man was driving, he saw an elderly couple sharing an umbrella in the rain walking to some destination. It didn't take him long to realize that those were his ex-girlfriend's parents. He drove slowly beside the couple. He wanted them to see him in his luxury car. He wanted them to know that he wasn't the same one anymore.

The couple was walking towards a cemetery. Following them, the man got out of his car. There, he saw his ex-girlfriend, a photograph of her smiling sweetly. He saw his precious paper cranes in a bottle placed beside her tomb.

The couple saw him. The man walked over and asked them why this had happened. They explained that their daughter did not leave for France. She was stricken ill with cancer. She had believed that he would make it someday, but she did not want her illness to be his obstacle. Therefore she had chosen to leave him.

His daughter had wanted her parents to put his paper cranes beside her. If the day came, when fate brings him to her again, he could take some of those paper cranes back with him. The man just wept.

F. Method or technique : Tea Party Strategy

G. Media/Source/Instrument :

1. Handbook
2. Dictionary
3. Flashcards
4. Work Sheet

H. Learning Activities

a. Pre-Activities

- ✓ Praying
- ✓ Greeting
- ✓ Checking the attendance list
- ✓ Checking the students prior knowledge of narrative text

b. Main Activities

1. Pre-Reading Activity

- ✓ Distributing the flashcards
- ✓ Asking the students to roam around the class, talking and sharing about the information on the cards
- ✓ Dividing the students into 4 group
- ✓ Discussing the information of the text on the cards
- ✓ Finding the prediction of the text
- ✓ Write the prediction in a paper
- ✓ Retelling the prediction of the text

2. Reading Activity

- ✓ Giving the whole of the text
- ✓ Reading the text while checking the closer prediction of the text.
- ✓ Finding the moral value of the text

3. Post-Reading Activity

- ✓ Make a summary of the narrative text in the paper
- ✓ Submit the paper

c. Post Activity

- ✓ Asking the students which is do not understand
- ✓ Asking the student their perception towards the learning process
- ✓ Finishing the class
- ✓ Greeting

I. Assessment:

1. Technique : Ongoing process
2. Test : 10 items of multiple choices

No.	Question	Score
1.	Read the text and choose the correct answer to answer the questions! Text 1, for question number 1-5!	

	<ul style="list-style-type: none"> a. The man ate the bird. b. The sold the bird. c. The man killed the bird. d. The man taught the bird 	
10.	<p>It is most likely that</p> <ul style="list-style-type: none"> a. The bird killed the three chickens. b. The three chickens killed the bird. c. The bird played with the chicken. d. The bird killed one of the three chickens. 	10
