Presented in Universitas Islam Negeri Alauddin Makassar on Thursday, 09 July 2020

Acknowledgement

Sources for images, and reference citations for quotations and paraphrased material, are provided in the notes under/after each slide/group of slides in this PowerPoint presentation – **no plagiarism!**

Prologue

Researchers

- **Biggest consumer and producer of INFORMATION**

  - **Information Needs**
  - **Information Access**
  - **Information Evaluation**
  - **Information Use**
  - **Information Use Ethics**

What is Plagiarism?

- "To steal and pass off (the ideas or words of another) as one's own : use (another's production) without crediting the source." Merriam-Webster Online Dictionary http://www.m-w.com/cgi-bin/dictionary?book=Dictionary&va=ultimun

- "When you use another author's intellectual property—language, visuals, or ideas—in your own writing without giving proper credit, you commit a kind of academic theft called *plagiarism*," Hacker, Diana. A Writer's Reference. 6th ed. Boston: Bedford/St. Martin's, 2007.

- "In other words, plagiarism is an act of **fraud**. It involves both stealing someone else's work and lying about it afterward." **http://www.plagiarism.org/plagiarism-101/what-is-plagiarism**

- Plagiarize is a Latin word and means —**to kidnap.** Oxford English Dictionary

All of the following are considered plagiarism:

There are several ways to plagiarize:

- Turning in someone's work as your own

- Copying words or ideas from someone else without giving credit

- Failing to put a quotation in quotation marks

- Giving incorrect information about the source of a quotation

- Changing words but copying the sentence structure of a source without giving credit.

- Copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not

http://www.plagiarism.org/learning_center/what_is_plagiarism.html

Why does Plagiarism happen?

- **Lack of knowledge and skills**
  - ❑ **Researchers are unaware of procedures for citation and paraphrasing (Estow, Lawrence, & Adams, 2011; Walker, 2008)**
- **Authorial identity insecurities**
  - ❑ **Researchers are insecure about sounding unimpressive (Ballantine & Larres, 2012)**
- **Cultural differences**
  - ❑ **Martin (2012) found that individualist oriented students were more likely to plagiarize (Western culture is more individualist)**
- **Cognitive issues**
  - ❑ **Researchers do not perceive what they are doing is unethical (Walker, 2008)**

Why does Plagiarism happen?

Some other Reasons

- ❑ **Procrastination**

- ❑ **Easy and quick to cut & paste**

- ❑ **Pressure to maintain high grade point average**

- ❑ **Didn't keep track of where the information came from**

- ❑ **Believe it doesn't hurt anyone**

- ❑ **Believe they won't get caught**

- ❑ **Don't know they are plagiarizing**

TYPES OF PLAGIARISM

Types of Plagiarism

- **Intentional plagiarism:**

  - ❑ Copying words or ideas from others and using as your own
  - ❑ Cutting and pasting information without citing
  - ❑ Buying or borrowing a written work by someone else and submitting it as your work
  - ❑ Using videos, audio recorder or other media without citing

Plagiarism.org   http://www.plagiarism.org/learning_center/educational_tips.html

Types of Plagiarism

- **Unintentional plagiarism:**
  - ❑ Citing incorrectly, Omitting citations
  - ❑ Deficient of knowledge and understanding of how to paraphrase and summaries.
  - ❑ Failure to use your own "voice"
  - ❑ Extreme use of Quotations
  - ❑ Inexperienced writers and language issues.
- It doesn't matter whether the theft is intentional or accidental. Either way, it is plagiarism.

Plagiarism.org http://www.plagiarism.org/learning_center/educational_tips.html

Types of Plagiarism

10 MOST COMMON TYPES OF PLAGIARISM RANKED IN ORDER OF SEVERITY OF INTENT

- **#1. Clone**
  - Submitting another's work, word-for-word, as one's own

- **#2. CTRL-C**
  - Contains significant portions of text from a single source without alterations

- **#3. Find - Replace**
  - Changing key words and phrases but retaining the essential content of the source

- **#4. Remix**
  - Paraphrases from multiple sources, made to fit together

- **#5. Recycle**
  - Borrows generously from the writer's previous work without citation

  http://turnitin.com/assets/en_us/media/plagiarism_spectrum.php

Types of Plagiarism

10 MOST COMMON TYPES OF PLAGIARISM RANKED IN ORDER OF SEVERITY OF INTENT

- **#6. Hybrid**
  - Combines perfectly cited sources with copied passages without citation

- **#7. Mashup**
  - Mixes copied material from multiple sources

- **#8. 404 Error**
  - Includes citations to non-existent or inaccurate information about sources

- **#9. Aggregator**
  - Includes proper citation to sources but the paper contains almost no original work

- **#10. Re-tweet**
  - Includes proper citation, but relies too closely on the text's original wording

  http://turnitin.com/assets/en_us/media/plagiarism_spectrum.php

Self Plagiarism

- **Copying material you have previously produced and passing it off as a new production.**

- Writers often maintain that because they are the authors, they can reuse their work as they please; it couldn't be defined as "plagiarism" since they are not taking any words or ideas from someone else.

- However, while the debate on whether self-plagiarism is possible continues, the ethics of self-plagiarism is significant, especially because self-plagiarism can infringe upon a publisher's copyright.

Why is plagiarism a bad thing?

- **Because it infringes academic ethics and academic norms**

- **Because it is a form of theft and a type of fraud**

- **Because plagiarists ultimately cheat themselves**

- **Because plagiarists cheat their fellow students**

- **Because plagiarism reflects incompetence**

Consequences

Is Plagiarism only An Ethical Issue?

No it is not. It is more than that.

What if plagiarism is detected ?

UGC Regulations

Penalties for Students

Plagiarism Disciplinary Authority (PDA) of the HEI, based on recommendations of the Academic Misconduct Panel (AMP), shall impose penalty considering the severity of the Plagiarism.

- **Level 1: Similarities above 10 % to 4o% -** Such student shall not be given any mark and/or credit for the plagiarized script and shall be asked to submit a revised script within a stipulated time period not exceeding 6 months.

- **Level 2: Similarities above 40 % to 6o% -** Such student shall not be given any mark and/or credit for the plagiarized script and shall be asked to submit a revised script after a time period of one year but not exceeding eighteen months.

- **Level 3: Similarities above 6o% -** Such student shall not be given any mark and/or credit for the plagiarized script and his/her registration for that course to be cancelled.

UGC Regulations

Penalties for faculty, staff, researcher of HEI

- **Level 1: Similarities above 10 % to 4o% -** Shall be asked to withdraw manuscript submitted for publication and shall not be allowed to publish any work for

  a minimum period of one year.

- **Level 2: Similarities above 40% to 6o% -** shall be asked to withdraw manuscript submitted for publication and shall not be allowed to publish any work for a minimum period of two years and shall be denied a right to one annual increment and shall not be allowed to be a supervisor to any UG, PG, Master's, M'Phil., Ph.D' student/scholar for a period of two years.

- **Level 3: Similarities above 60 % -** shall be asked to withdraw manuscript submitted for publication and shall not be allowed to publish any work for a minimum period of three years and shall be denied a right to two successive annual increments and shall not be allowed to be a supervisor to any UG, PG, Master's, M.Phil., Ph.D. student/scholar for a period of three years.

HOW TO AVOID PLAGIARISM?

How to avoid plagiarism?

- **To Avoid plagiarism, you must be authentic and acknowledge:**

- Other people's ideas, opinions, and theories.

- Other people's evidence

- Other people's research.

- Direct quotations.

- Paraphrased information.

- Facts and statistics gathered from any source.

- Develop a topic based on previously written material but write something new and original

- Rely on opinions of experts on a topic but improve upon those opinions

- Give credit to researchers while making your own contribution

- Follow a standard documentation method such as MLA or APA format

A few tips: Good Scholarly Practice

Start of Research Work

- Read very carefully guidelines for writing thesis / dissertations / research papers.

- Guidelines for research and results reporting.

- Attend research methodology workshop, English remedial course, training in reference management tools, Library orientation programme etc. author workshops and course on technical writing skills etc.

- Get account to check plagiarism, use of reference management tools, research forums, online discussion groups.

A few tips: Good Scholarly Practice

Be Honest

- Avoiding plagiarism is quite simple. The best method for avoiding it is to **simply be honest**; when you've used a source in your paper, give credit where it's due. Acknowledge the author of the original work you've used.

A few tips: Good Scholarly Practice

Be Organized

- A balance between the ideas you have taken from other sources and your own, original ideas.

- Take notes of referred sources- marking page numbers, record bibliographic information or web addresses for every source.

- Note-taking

  - First note source's bibliographic information.

  - Paraphrase or summarize as you go

  - Put a "P" or an "S" next to paraphrases & summaries

  - Use a "Q" to mark the beginning and end of passages copied directly from the text..

  - Use different colored ink for copied ideas

  - Whether you paraphrase or copy direct quotations, always keep the citation/page information with the text, so that if you decide to rearrange your notes you have a record of what came from where.

- Remember to write down not just the useful information you discover but where you have found it too.

- It's very difficult to backtrack later if you can't remember which book or website the information comes from

INTEGRATING SOURCES : PURPOSE

Quotations, paraphrases, and summaries serve many purposes. We use them to . . .

- Provide support for claims or add credibility to writing

- Refer to work that leads up to the work you are now doing

- Give examples of several points of view on a subject

- Call attention to a position that you wish to agree or disagree with

- Highlight a particularly striking phrase, sentence, or passage by quoting the original

- Distance yourself from the original by quoting it in order to cue readers that the words are not your own

- Expand the breadth or depth of your writing

Quote

When you quote you present another writer's actual words to support your own ideas.

- As an academic writer, you will use quotations for four major purposes:

  - to support your ideas;

  - to preserve special or elegant language;

  - to comment on the quotation; or

  - to distance yourself from the quotation.

From Lindsay Radcliffe, UTSA Tutor and NCB Instructor

Summarize

- **Distill the main points from the text.**

- **Focus on key concepts, not on sub-points or supporting details.**

- **Should be comprehensive but concise.**

    - **For example, a 15-page article may be summarized in a paragraph or two.**

- **The purpose of the summary is to give scholars a "preview" of the material covered in the article and let them decide whether they will take the time to read it.**

From Lindsay Radcliffe, UTSA Tutor and NCB Instructor

Paraphrase

- A paraphrase is a restatement **in your own words** of someone else's ideas.

- Changing a few words of the original sentences does NOT make your writing a legitimate paraphrase.

- You must change **both** the **words** and the **sentence structure** of the original, **without** changing the content.

- Also, you should keep in mind that paraphrased passages **still require citation** because the ideas came from another source, even though you are putting them in your own words.

  - Change the order & structure of sentences

  - Use synonyms/different forms of words

  - May change the voice or perspective

  - Cite properly

Source: http://www.academicintegrity.uoguelph.ca/

The original:

To argue that information literacy should have a higher place within academia is certainly not new, nor is the despair many information professionals feel about the disparity between the needs for an informationally literate populace and the amount of education in information use they are able to provide.

The paraphrase

To say that information literacy should be higher in university circles is not new, and neither is the unhappiness many professionals of information have when they see the difference between the needs for an information literate population and the amount of training in information they can give.

Study both for a few seconds

The paraphrase you looked at is just a doctored version of the original, changed a bit so it looks like something different. But the word order, paragraph structure, and even some of the actual words are the same. That's plagiarism. Even with the changes, the whole paraphrase is still 80% the intellectual property of the original author.

The original

To argue that information literacy should have a higher place within academia is certainly not new, nor is the despair many information professionals feel about the disparity between the needs for an informationally literate populace and the amount of education in information use they are able to provide.

The Interpretation

Badke contends that the call to make information literacy a significant part of academic life is not new, and neither is the problem that the need for information literacy is greater than is our ability to meet that need.

(Note that very few of the original words are used, that the interpretation reveals an UNDERSTANDING rather than an IMITATION of the original.)

What to Cite?

- When you write some paper / dissertation or thesis you may use:

    - Words;

    - Opinions;

    - Statistics;

    - Facts;

    - Information from an author or any other source, and

    - Pictorial representations,

    You should put down a footnote, quotation marks, and/or an in-text parenthetical reference to the author. If there is no author, then state where you found the information.

Exception for citation: Common Knowledge

What is Common Knowledge?

- A well-known fact.

- Information that is likely to appear in numerous sources and to be familiar to large numbers of people.

- This is the only time you do not need to cite information, provided that you do not copy that information word-for word from a source.

- If at least 10 peer-review papers in your discipline don't give a citation for the information, then you don't need to.

- **BUT WHEN IN DOUBT, ALWAYS CITE THE SOURCE!**

Examples of Common Knowledge

- Martin Luther King, Jr. was assassinated on April 4, 1968.

- The Sun rises in the east.

- Smoking can cause respiratory diseases such as emphysema and cancer.

Citation Formats

There are app 250 citation manuals. You can use any or follow these guidelines:

American Psychological Association (APA): psychology, education, and other social sciences.

Modern Language Association (MLA): literature, arts, and humanities.

American Medical Association (AMA): medicine, health, and biological sciences.

Chicago Manual of Style: used with all subjects in the real world by books, magazines, newspapers, and other non-scholarly publications.

Bureau of Indian Standards IS:2381-1978

Fair Use for Students

- **Fair use is a provision of copyright law that allows you to use a limited amount of copyrighted materials for your school projects.**

- **Fair use has some rules you need to follow.**

- **Fair use ALWAYS assumes that you cite the source for any material you use.**

How much material can I use?

- **Printed materials**
  - You may put text in your project as long as you stick to the limits:
    - 10% or up to 1000 words of a long work
    - 250 words of a poem
    - 2 pages from a children's book
    - 1 chart or picture
  - The material must belong to you or to the school for you to use it.
- **Videos, DVD's or clips from the Internet**
  - You can use 10% or up to 3 minutes.
- **Music**
  - Again, the limit is 10%.
- **Internet**
  - Images can be downloaded for projects. Sound files and video may also be downloaded for use in multimedia projects.
  - Limits still apply and you have to cite sources.

Websites Which Construct Citations

Use these websites to create your bibliography

- ❑ **Easy Bib** http://www.easybib.com/
  Generate citations in MLA, APA & Chicago formats.

- ❑ **Citation Machine** http://www.citationmachine.net/
  Generates citations in MLA, APA, Chicago, & Turabian formats.

- ❑ **Noodle Tools** https://www.noodletools.com/
  Integrated tools for **note- taking**, **outlining**, **citation**, **document archiving/annotation**, and **collaborative research and writing**

Anti Pliagrism software

There are contradictions in results from open access free anti-plagiarism software, such as:

- PaperRater.com http://www.paperrater.com/plagiarism_checker

- Plagiarism Checker http://smallseotools.com/plagiarism-checker/

- SeeSources.com http://www.plagscan.com/seesources/

- PlagTracker.com http://www.plagtracker.com/

Use of subscribed commercial software is more reliable and authentic, such as:

- iThenticate http://www.ithenticate.com/

- Turnitin http://turnitin.com/

- URKUND http://www.urkund.com/en/

CONCLUSION

- **Plagiarism is a form of theft so it needs serious attention as well action.**

- **It also affect copyright issues**

- **As an rough estimates between 10% to 15% of academicians and 25% to 35 % students in universities and colleges are plagiarists**

- **plagiarism must be prevented at all levels of academic work from student papers to academic books**

- **India does not have a statutory body to deal with scientific misconduct in academia like the Office of Research Integrity in the US.**

- **China has also strengthened its regulatory system to counter the rampant problems of plagiarism and is ready with a new law to clamp down on academic cheating at its universities**

- **It can be reduced by proper awareness, counselling, following strict research and ethical guidelines, open and transparent policy, by putting contents online etc.**

Acknowledgement

- I would like express my sincere thanks to Authors of various Internet sources used to prepare this presentation.

- Wherever possible the links have been provided. However any omission is duly regretted.

- The presentation is mainly prepared to create an awareness amongst students and researchers about the plague of plagiarism.

Thank You
Very Much
For Your Patient Hearing
