ABSTRACT: The objective of the research was to find out the effect of tax evasion understanding and tax morale to enhance taxpayer awareness. Besides, this research was also to examine Maqasid Al-Syariah in strengthen the independent and dependent variables. The research was quantitative which employed the theory of planned behavior and attribution theory. The population was the taxpayers which involve 83 samples by purposively. The data were collected by using questionnaire and analyzed by multiple linear regression and moderated regression with absolute difference value. The result showed that the tax evasion understanding influenced positively and significant toward taxpayer awareness and tax morale showed the positive and significance influence toward the taxpayer awareness. In addition, this research also reveal that maqasid als-syariah unable to strengthen the tax evasion understanding in enhancing the taxpayer awareness with no influence on the result, and maqasid al-syariah was able to strengthen the tax morale in enhancing the taxpayer awareness with positive and significant influence.

KEYWORDS: Tax Evasion Understanding, Tax Morale, Taxpayer awareness, Maqasid Al-Syariah

I. INTRODUCTION

The lack of taxpayer awareness to pay their tax induce the lack of state income. There is a tax evasion case which is conducted by Sunardi, Director of PT Jambi Jaya Makmur (JIM) in 2019 who is fudge the tax invoices which is not accordance with the real transaction. When taxpayer awareness have to manifested without make tax evasion, public people must have knowledge to appreciate the benefits from their pay tax. The taxpayer awareness can be seen by the sincerity and desire of taxpayer to fulfill their responsibility by shown in their knowledge about the purpose of tax and their sincerity to pay and report tax (Megawangi & Agung, 2017). Tax is an alternative of state income which is still in use until today as a budgetair. The aim of budgetair are to increase state income to fund expense and growth of central government or regional government which is conducted by complete APBN according to the target of tax revenue (Rosianti & Mangonting, 2014). Tax is a dynamic resource of revenue which is follow the growth of social and economic a country.

The requirement of increased revenue, improvements and basic transformation in taxation are the reason to make alteration which is an improve taxation policy and administration so the basic taxation can be expanded and optimal the potential of tax revenue with uphold the principle of justice and give a good service to taxpayers (Hasanah, Muhammad & Indah, 2014). Tax is debt which is required contribution of taxpayers, forceful based on regulation which is not obtain the benefits directly and used to state necessary for the sake of public (Nauvalia, Yuniarti & Tri, 2018). However, the target of tax revenue not reached because there are bad habit by taxpayers which is manipulate the total of their invoice to pay called tax evasion (Faradiza, 2018). This contribution can't optimal when public don't have taxpayers awareness. Fitria (2017) said that the lack of taxpayer awareness to pay their tax is caused by their knowledge and understanding of tax.

Tax evasion is an effort which is conducted to reduce tax expanse by breaking regulation. Faradiza (2018) said this bad behavior will be decent or reasonable to do considering there are many bad act which is conducted by director and manager such as abuse the budget to personal needs or group, irregular taxation system and there are tax regulation which is profitable one side and disserve the other side. Tax evasion understanding must be known by taxpayers so they don't do that offense. Mira (2016) said, tax evasion is a taxpayers effort to reduce, remove, manipulate their tax debt or escape their responsibility. Tax evasion usually do by fudge financial statement, tax invoice or just write some sales report.

Tax morale is an intrinsic motivation which is taxpayers must have to decide are taxpayers will obey to their responsibility or not. In this perspective, taxpayers act on the basis moral and attitude of their confidence which is influence by social, ethnic, norm and it is because the higher taxpayers awareness it can make the higher tax compliance (Septarini, 2015). Tax morale is not measure individual behavior, but it measure individual attitude and it can see by their moral to pay taxes, confidence to contribute to public by pay their taxes (Khaerunnisa & Wiratno, 2014). Tax compliance is a responsibility to God, to government and public as a taxpayers to comply all the tax responsibility and do their right taxation (Tahar & Rachman, 2013).

Taxpayers awareness is an important factor to improve tax compliance to pay their taxes because taxpayers awareness is a beginning of taxpayers to comply their responsibility as a taxpayers (Ardhyanto & Sasana, 2017). The more taxpayers aware to comply their responsibility, taxpayers will obey to the regulation of taxation but when taxpayers awareness is less, it can make taxpayers not understand about their right and obligations so that can make the lack of tax compliance (Suyanto & Heru, 2018). Taxpayers awareness closely related with reasoning of taxpayers to decide their tax compliance to pay their taxes. As a citizen, people not trust too much about tax existence because they still think its same with upeti, its incriminating, the payment system is difficult, and many people especially in Indonesia not understand what and how to count it moreover to report it (Ariesta & Latifah, 2017).

Maqasid Al-Syariah aim to realize masalah in the word or in akhirat (Ramadhan, Ahim & Hafiez, 2018). Maqasid Al-syariah aim to got benefit and kindness, and prevent badness. Substantially, the aim of maqasid al-syariah contain masalah (Firdaus, 2018). Besides, the main of maqasid al-syariah is hope a well being based on material and spiritual, such an realized maqasid al-syariah in our life and do a kindness in the world (Mutakin, 2017).

In fact, there are many taxpayers not understand about the valid regulation of taxation, and it can caused to tax revenue of Indonesia (Agustiniingsih, 2016). The taxpayers in Indonesia assume that tax regulation encumber taxpayers until they unwilling to pay their tax (Ermawati, 2018). In this case, taxpayer required to have knowledge about tax, who is give understanding about taxpayers awareness. Tax planning is a phenomena that happen in Indonesia which is conducted by taxpayers to minimize the calculate of tax that they have to pay and called tax evasion.

Taxpayers who is make tax evasion would ignoring formal provisions taxation which is must be their responsibility and make bad attitude such as fudge the documents, fill incomplete data or incorrect data. This tax evasion behavior will cause reduction of state income. Tax morale is a motivation to comply taxpayers responsibility in paying their taxes and to reduce tax evasion. Tax morale is motivation which is needed by taxpayers to do their responsibility to pay their tax will give benefit and masalah to public.

Based on description above, problem formulation of this research are: (1) Does tax evasion understanding influence to improve taxpayers awareness? (2) Does tax morale influence improve taxpayers awareness? (3) Does maqasid al-syariah strengthen tax evasion understanding to improve taxpayers awareness? (4) Does maqasid al-syariah strengthen tax morale to improve taxpayers awareness?

II. LITERATURE REVIEW

Maqasid Al-Syariah

Maqasid Al-syariah is a concept which is focus on the method to realize masalah and can support public safety which is the ultimate goals to realize is to do syariat, make masalah and kindness to all people in the earth which is impact to masalah and kindness in eternity (Mutakin, 2017). Tax can be categorize as a dharuriat needs because it's a largest income source in Indonesia. Therefore, mashlahah is a material and non-material condition, which can improve human status as a most precious creature (Bahsoan, 2011). Masalahah is divided by three, such as; dharuriat (primer), haajiyat (sekunder) and tahsiniat (Tertiary). The first is something which is must exist to realized human life. It's like religion, consume, marriage, study and many more which is include in 5 section; (1) hifdzu al-din (preserve religion) (2) hifdzu al-nafs (preserve soul), (3) hifdzu an-nasl (preserve progeny), (4) hifdzu al-mal (preserve asset) and (5) hifdzu al-aql (preserve intellect).

Theory of Planned Behaviour

Theory of planned behavior is a theory which can be used to predict individual behavior when they don't have any control to themselves. Attribution theory which was stated by Fritz Heider in 1958 and developed by Harold Kelly in 1972 support theory of planned behavior in this article. Theory of planned behavior which was stated by Azjen (1991) explain about the factors that can influence tax compliance behavior from psychology side, taxpayers behavior influenced by various variable. Theory of planned behavior behavior is a theory which can be used to predict individual behavior when they don't have any control to themselves (Tyas, 2013). Before individual make something to do, they will have confidence about the result of their behavior and they will decide to do that or not (Brata, Isna & Agus, 2017). This theory is support by attribution theory. Attribution theory related with taxpayers attitude, taxpayers awareness and tax knowledge are an internal factors which

make someone to make decisions which is taxpayers action depend on taxpayers behavior (Arifah, Rini & Kharis, 2017) .

The effort which is conducted by taxpayers to minimize their tax payment will make this country loss many income from tax revenue. Taxpayers who is understand the regulation will do their right and obligations taxation based on the regulation (Arviana & Arja, 2014).Taxpayers who understand about tax regulation will obey with the regulation than taxpayers who not understand the regulation and it influence to taxpayers awareness. Based on analysis, the hypothesis is tax evasion understanding improve taxpayers awareness.

Taxpayers

Taxpayers awareness is an important factor which is impact to state income. Therefore, tax morale is needed as a taxpayers motivation to comply their responsibility. Taxpayers who have a good moral will comply their responsibility as a taxpayers and to support their country. Based on analysis, the hypothesis is tax morale improve taxpayers awareness.

Tax knowledge is an important thing because its related with human life. When we see in the other side (maqasid al-syariah), tax revenue is the ways to give benefits to the others such as repair a streets, procurement public facilities, and many more. Based on analysis, the hypothesis is maqasid al-syariah strengthen tax evasion understanding to improve taxpayer awareness.

Tax Morale

The moral of taxpayers is a condition which is taxpayers have to pay their taxes. All about moral and awareness are include in Al-Qur’an to do the good things not the bad things. Qur’an surah an-nisa ayat 135 explain about human have to do the good things and stay away from the bad things which is forbidden in Islam. Based on analysis, the hypothesis is mqasid al-syariah strengthen tax morale to improve taxpayers awareness.

III. METHODS

The research method used in this research is quantitative which is use numeric and statistic calculation. Quantitative research is a method to know the population and samples about the main variable, and make random sampling and use research instrument and data analysis to test the hypothesis (Indriantoro and Supomo, 2013). This research used causal-comparative. Causal comparative is a research which is measure the strengthen between two variable or more, also show the line of independent and dependent variable and find out the causality (Kuncoro, 2013).

According to Indriantoro and Supomo (2013:15) Population is a group of individuals, incident and many more who have their own characteristic. Population of the research are taxpayers which is register in KPP Pratama Makassar Barat. This research use purposive sampling because the source of information is choose by researcher. This research used descriptive analysis and moderated regression analysis.

IV. RESULT AND DISSCUSSION

Based on table 1 below, the result of descriptive statistic analysis to tax evasion understanding show that the minimum is 14, maximum 25 and average is 22,23 with standard deviation 2,421. Next, the result of tax morale is the minimum is 13, maximum 13 and average 18,02 with standard deviation 1,981. The result of taxpayers awareness show that minimum is 18, maximum 25, average 22,92 and standard deviation 2,171. The last variable is maqasid al-syariah show that minimum 12, maximum 25, average 21,93 and standard deviation 2,299.

Table 1. Descriptive Statistics

	N	Minimum	Maximum	Mean	Std. Deviation
Tax Evasion Understanding	83	14	25	22,23	2,421
Tax Morale	83	13	20	18,02	1,981
Taxpayers Awareness	83	18	25	22,92	2,171
Maqasid Al-Syariah	83	12	25	21,93	2,299
Valid N (listwise)	83				

Source: Output SPSS 22 (2020)

Data Analysis

Normality Test

6

Table 2. Normality Test- One Sample Kolmogorov-Smirnov

		Unstandardized Residual
N		83
Normal Parameters ^a		Mean
		.0000000
		Std. Deviation
		.13857320
Most Extreme Differences	Absolute	.086
	Positive	.086
	Negative	-.073
Test Statistic		.086
Asymp. Sig. (2-tailed)		.194
a. Test distribution is Normal.		
Source: Output SPSS 22(2020)		

Based on the table 2 above, the data is normal because the result is higher than 0,05, it is 0,194. The result show that the data is normal.

Multicollinearity Test

1

Table 3. Multicollinearity Test Coefficients^a

Model		Collinearity Statistics	
		Tolerance	VIF
1	(Constant)		
	Tax Evasion Understanding	.915	1,092
	Tax Morale	.908	1,101
	Maqasid Al-Syariah	.849	1,178

4 Dependent Variable: Taxpayers Awareness
Source: Output SPSS 22(2020)

Based on the table 3 above, the result of multicollinearity test show **1** that all independent variables don't have multicollinearity problem because the VIF value is lowest than 10. Tax evasion understanding have 1,092 of VIF value, tax morale have 1,101 of value and maqasid al-syariah have 1,178 of VIF value. The result show that all of independent and dependent variable exempt from multicollinearity indication.

Heterokedastisitas Test

Table 4. Glesjer Test Coefficients^a

Model		Unstandardized Coefficients		Standardized Coefficients		t	Sig.
		B	Std. Error	Beta			
1	(Constant)	.730	.836			.873	.385
	Tax Evasion Understanding	-.099	.064	-.178		-1,551	.125
	Tax Morale	.067	.081	.095		.829	.410
	Maqasid Al-Syariah	-.050	.073	-.081		-.684	.496

a. Dependent Variable: Taxpayers Awareness

4

Source: Output SPSS 22(2020)

Based on table 4 above, the result of heterokedastisitas test show all of the probability value of all independent and dependent variable is higher than 0,05, so all the data is exempt from heterokdastisitas indication.

Auto correlation Test

Table 5. Auto correlation Test Model Summary

Model	R	R Square	Adjusted Square	RStd. Error of the Estimate	Durbin-Watson
1	,308 ^a	,095	,061	,14118	1,539

a. Predictors: (Constant), Maqasid Al-Syariah, Tax Evasion Understanding, Tax Morale

b. Dependent Variable: Taxpayers awareness

Sourcer: Output SPSS 22(2020)

7

Based on the table 5 above, the result of auto correlation test is in this exempt from auto correlation indication because the value of durbin Watson is higher than 1 and lowest than 3, 1,539.

Validity Test

Table 6. Validity Test

Variable	Item	r result	r table	Information
Tax Evasion Understanding	X1.1	0,659	0,216	Valid
	X1.2	0,742		Valid
	X1.3	0,805		Valid
	X1.4	0,744		Valid
	X1.5	0,504		Valid
Tax Morale	X2.1	0,725	0,216	Valid
	X2.2	0,809		Valid
	X2.3	0,804		Valid
	X2.4	0,713		Valid
Taxpayer Awareness	Y1	0,769	0,216	Valid
	Y2	0,815		Valid
	Y3	0,769		Valid
	Y4	0,843		Valid
	Y5	0,726		Valid
Maqasid Al-Syariah	Z1	0,735	0,216	Valid
	Z2	0,871		Valid
	Z3	0,786		Valid
	Z4	0,614		Valid
	Z5	0,578		Valid

Source: Output SPSS 22(2020)

Based on the table 6 above, the result of validity test show that all item is valid because the value of r result is higher than r table.

Reliability Test

Tabel 7. Hasil Uji Reliabilitas

No	Variabel	Cronbach' Alpha	Keterangan
1	Tax Evasion Understanding	0,723	Reliable
2	Tax Morale	0,751	Reliable
3	Taxpayers Awareness	0,837	Reliable
4	Maqasid Al-Syariah	0,748	Reliable

Source: Output SPSS 22(2020)

Based on the table 7 above, the result of reliability test show that all the item of questionare is reliable because the value of cronbach alpha is higher than 0,60.

Linear Regression Analysis

Determination Coefficient Test

Based on the tabel 7 below, the gain of R rasio is 0,388. It means, independent variabel can explain dependent variabel with 0,388.

Table 7. Determination Coefficient Test Model Summary

Model	R	R Square	Adjusted R Square	Std. Error of the Estimate
1	,388 ^a	,151	,130	2,02524

a. Predictors: (Constant), Tax Morale, Tax Evasion Understanding

Source: Output SPSS 22(2020)

F-Test Anova

Table 8. F-Test-Anova

Model		Sum of Squares	Df	Mean Square	f	Sig.
1	Regression	58,282	2	29,141	7,105	,001
	Residual	328,128	80	4,102		
	Total	386,410	82			

a. Dependent Variable: Taxpayers Awareness

b. Predictors: (Constant), Tax Morale, Tax Evasion Understanding

Source: Output SPSS 22(2020)

Based on the table 8 above, the result of moderated analysis regression is f ratio is 7,105 with 0,001 significant lower than 0,05. It means tax evasion understanding and tax morale influence taxpayers awareness.

T-Test

Table 9. T-Test Coefficients^a

Model		Unstandardized Coefficients		Standardized Coefficients		T	Sig.
		B	Std. Error	Beta			
1	(Constant)	11,713	2,981			3,929	,000
	Tax Evasion Understanding	,248	,093	,277		2,684	,009
	Tax Morale	,315	,113	,288		2,789	,007

4 a. Dependent Variable: Taxpayers Awareness

Source: Output SPSS 22(2020)

Based on the table 9 above, tax evasion understanding variable have t ratio > t table about 2,684 while t table with significant $\alpha = 0,05/2 = 0,025$ (2 tailed) and $df(n-2-1) = 83-2-1=80$ about 1,999 with unstandardized about 0,248 and significant 0,119 lower than 0,05 so H_1 accepted and tax morale variable have t ratio > t table about 2,789 while t table with sig. $\alpha = 0,05/2 = 0,025$ (2 tailed) and $df(n-2-1) = 83-2-1=80$ about 1,999 with coefficient unstandardized about 0,315 and significant 0,007 yang lower than 0,05 so H_2 accepted.

The result of the research showed that taxpayers have a greater tax evasion understanding so many taxpayers who register in KPP Pratama Makassar Barat assume if they have a good knowledge about tax evasion, they will now the bad effect of the bad behavior can make the biggest income loss and can't growth our country. Based on the research, many taxpayers understand that tax is an important thing to fund our country and public facilities also for taxpayers importance. Theory of planned behavior is relevant to explain taxpayers behavior to comply their responsibility and their awareness. Based on theory of planned behavior, taxpayers know that their payment taxes is important to support economy in a country.

Besides, based on this research taxpayers think when they have a good moral, it can give a good effect to taxpayers awareness to comply their responsibility although they can't have a direct benefits but they will know a benefit soon. This research is in line with theory of planned behavior because in this case taxpayers must have their taxpayers awareness. In theory of planned behavior, taxpayers know when they pay their tax, they want a benefits from their payment. A good attitude to obey a tax regulation will minimize bad attitude like tax evasion.

**Moderated Regression Analysis
Determination Coefficient Test**

1 Table 10. Determination Coefficient Test Model Summary

Model	R	R Square	Adjusted R Square	Std. Error of the Estimate
1	.494 ^a	.244	.195	1,948

a. Predictors: (Constant), X2_M, Zscore: Tax Evasion Understanding, X1_M, Zscore: Tax Morale, Zscore: Maqasid Al-Syariah

2 Based on the table 10 above, the value of R square is 0,244. It is means that taxpayers awareness influenced by tax evasion understanding and tax morale variable which is moderated by maqasid al-syariah and the rest is influenced by the other variable.

F-Test

1 Table 11. F-Test- ANOVA

Model		Sum of Squares	Df	Mean Square	F	Sig.
1	Regression	94,195	5	18,839	4,964	,001
	Residual	292,215	77	3,795		
	Total	386,410	82			

a. Dependent Variable: Taxpayers Awareness

b. Predictors: (Constant), X2_M, Zscore: Tax Evasion Understanding, X1_M, Zscore: Tax Morale, Zscore: Maqasid Al-Syariah

7 Source: Output SPSS 22(2020)

Based on the table 11 above, the result of moderated regression analysis show f ratio value is 4,964 with significant 0,001 which is lower than 0,05. The result of the significant value is lowers than 5% and f ratio about 4,964 higher than f table about 3,11.

T-Test

Table 12. T-Test Coefficients^a

Model		Unstandardized Coefficients		Standardized Coefficients	t	Sig.
		B	Std. Error	Beta		
1	(Constant)	22,300	,491		45,381	,000
	Zscore: Tax Evasion Understanding	,680	,227	,313	3,000	,004
	Zscore: Tax Morale	,744	,239	,343	3,114	,003
	Zscore: Maqasid Al-Syariah	,616	,263	,284	2,342	,022
	X1_M	-,019	,277	-,008	-,070	,945
	X2_M	,632	,307	,234	2,057	,043

a. Dependent Variable: Taxpayers Awareness

4

Source: Output SPSS 22 (2020)

Based on the table 11 above, the result of moderated regression analysis show moderated variable X1_1 have a ratio < t table about -0,70 and t table about 1,999 with significant value is 0,945 higher than 0,05 and X2_M have t ratio > t table about 2,057 and t table about 1,999 with significant value 0,043 lower than 0,05.

This analysis show that tax evasion understanding and tax morale variable influence to improve taxpayers awareness. It's because taxpayers have a low aware and desire to do their responsibility although they know tax payment is important to comply punlib and country needs. In fact, there are many taxpayers not understand about the valid regulation of taxation, and it can caused to tax revenue of Indonesia (Agustinarsih, 2016).

This research is same with Kurniawati & Agus (2014) research which is show when taxpayers do tax evasion, they will ignore the formal terms of taxation such as fudge a documents, invoice and etc even though they know the benefit of their payment is to improve our economy and facilities but its depends to the taxpayers, does they want to obey the regulation or not. According to Khaerunnisa & Wiratno (2014) research, tax morale not measure individual behavior, but it measure individual attitude and it can see by their moral to pay taxes, confidence to contribute to public by pay their taxes. The purpose of the process is to reach what is mawasid al-syariah concept. Maqasid al-syariah have a important role to growth our financial and economy (Putra, 2017).

V. CONCLUSION

2

Based on data analysis about maqasid al-syariah strengthen tax evasion understanding and tax morale to improve tax awareness, the conclusion are tax evasion understanding influenced positively and significant toward taxpayer awareness. The research showed that taxpayers have a greater tax evasion understanding so many taxpayers who register in KPP Pratama Makassar Barat assume if they have a good knowledge about tax evasion, they will now the bad effect of the bad behavior can make the biggest income loss and can't growth our country. The second conclusion is, tax morale showed the positive and significance influence toward the taxpayer awareness. Taxpayers think when they have a good moral, it can give a good effect to taxpayers awareness to comply their responsibility although they can't have a direct benefits but they will know a benefit soon. In addition, this research also reveal that maqasid als-syariah unable to strengthen the tax evasion understanding in enhancing the taxpayer awareness with no influence on the result, and maqasid al-syariah was able to strengthen the tax morale in enhancing the taxpayer awareness with positive and significant influence.

The limitation of this research is variable in used is limit just used tax evasion understanding, tax morale, taxpayer awareness and maqasid al-syariah. Researcher hope the next research can use another variable. The distribution of the questionnaire just 100 questionnaire. Respondent in this research is who is be in KPP Pratama Makassar Barat while researcher make a research.
