ACKNOWLEDGEMENT

Alhamdulillah Rabbil'Alamin, the researcher praises her highest gratitude to God Allah SWT who has been giving her the mercy and blessing for completing this thesis. Salam and Shalawat are due to the highly Prophet Muhammad SAW, his families and followers until the end of the world.

The researcher realized that there were some problems faced by her in accomplishing this research. Those problems could not be solved without getting helps, supports, motivation and encouragement from the people who pray, guide and help her along this time, she realizes these people have a lot contribute during her research and writing this thesis. They are:

1. The researcher's beloved parents Jagus, S.Pd and Idiawati for their love, prayer, and motivation for the success and happy life of the writer. Also, for the researcher brothers Naufal Hanif Muslim and Ahmad Fauzan Kamil, for their encouragement.
2. Prof. Drs. Hamdan Juhannis, M.A., Ph.D., the Rector of Alauddin State Islamic University of Makassar, who has given the researcher chance to study in English and Literature Department.
3. Dr. Hasyim Haddade, S.Ag., M.Ag., the Dean of Adab and Humanities Faculty of UIN Alauddin Makassar. All vices of the Dean of Adab and

Humanities Faculty, Dr. Andi Ibrahim S.Ag., S.S., M.Pd., Dr. Firdaus, M.Ag., H. Muh. Nur Akbar Rasyid, M.Pd., M.Ed., Ph.D.

4. Dr. Jumharia Djamereng, M. Hum., the Head of English and Literature Department and Syahruni Junaid, S.S., M.Pd. the secretary of English and Literature Department of Adab and Humanities Faculty of UIN Alauddin Makassar.
5. The deepest gratitude is sent to Dr. Sardian Maharani Asnur, S.Pd., M.Pd as first supervisor and Dr. Muhammad Syukri, S.S., S.Pd., M.Pd as the second supervisor. For their valuable time, patience, advice, encouragement and guided the researcher to complete this thesis.
6. The writer also would like to give her greatest thanks to Dr. Umar Thamrin, S.Ag., M.Hum. MA, as the first examiner and Dr. Hj. Nuri Emmiyati. M.Pd as the second examiner. Thanks for their valuable time, patience, direction and advice to complete this thesis.
7. The lectures of Adab and Humanities Faculty, for their knowledge and also to the staffs of Adab and Humanities Faculty for their help and administrative support.
8. To the beloved cousins Dhitya Ardhyarini Putri, A.Md Kes., Nurul Fadhilah Junaidi, S.Psi and Nurul Fauziyyah Junaidi, S.M., M.Tr.Apn., Thank you for accompanying the researcher and always being by her side and give support.
9. My thanks are addressed also to my friends, Vini, Miftah, Putriana, Anhar, Fitrah, Hilma, Isky, Tantri and all my amazing classmates at English and

Title : *Hesitation Uttered by Cinta Laura at Selected English Podcast*
Supervisor I : Dr. Sardian Maharani Asnur, S.Pd., M.Pd
Supervisor II : Dr. Muhammad Syukri, S.S., S.Pd., M.Pd

Language is the most important thing in human life. By using language, the speaker is expected to convey the information clearly. However, in the process of thinking when delivering ideas, sometimes people made hesitation pause. This hesitation pause is used when people need time to think of the appropriate word to say next that suddenly made the speaker make fillers or even corrected themselves. This study aims to analyze the types of hesitation uttered by Cinta Laura. The research used a descriptive qualitative method using the theory of hesitation based on Clark and Clark (1977). The data were taken from the youtube channel Powder Room Talk and Asian Boss. The result of the research shows that Cinta uttered all of the types of hesitation based on Clark and Clark's theory. There are nine types of hesitation: silent pause, filled pause, repeat, false start (retraced), false start (unretraced), correction, interjection, stutters, and slip of the tongue.

Keywords : *Hesitation, Types of Hesitation, English Podcast, Repetition, Self-explanatory*

CHAPTER I
INTRODUCTION

A. Background

Language is essential in human life because people use it to deliver their ideas and help people communicate with others in daily life. Language is used in any situation, whether in a formal situation such as a conference, presentation, speech, and so on or in an informal situation such as an interview or communicating with friends or family. By using language, the speaker expect to convey the information clearly so the hearer can easily understand the meaning of the speaker's utterance. However, communication is not always run smoothly. Goldman-Eisler (1968) observed that in spontaneous speech found, the people she interviewed made pauses from 5 to 65 percent of the total speaking time, and most people paused between 40 and 50 percent of the time. People spend a large proportion of their speaking time not speaking. According to Stewart (2008), when delivering ideas in spontaneous speech, people convey their utterances more than just the words they use. This is happening because when ordering some ideas, sometimes the speaker faces difficulties with the ideas in mind and the way to deliver them. In order to find the appropriate word they intended to say, people suddenly produce sounds with no meaning or even repeat their words.

Clark and Clark (1977) mentioned that the most common disruption in speaking is the hesitation pause, either a silent pause or a filled pause. A silent

pause is a pause that no speech that the speaker made while speaking, and a filled pause is a pause that the speaker made but filled with er, ah, uh, mm, etc. Hesitation mostly happens in spontaneous speaking, where the speaker has much information to say to the hearer (Rosa & Roza, 2013).

Clark and Clark (1977) adds that there are some issues to examine in the communication process, the alternation between planning and execution, and the formation of the articulatory program for pronunciation. First, people only sometimes make plans before they start to speak; as a result, they usually speak directly and make some errors in speaking. Second, in final preparation for speaking, the speaker must make a plan in their mind that tells the articulatory muscles what they are trying to say next. In this case, sometimes people also need to correct some errors because the speaker is trying to plan and speak simultaneously.

According to Rosa & Roza (2013), hesitation happens to either native English speakers or non-native English speakers. That is true that native is more fluent when speaking English because they use it in their daily activity. However, hesitation will always appear when people speak. For instance, in the classroom, although we speak our mother language with friends, sometimes we pause when we speak. While delivering our speech, we need to think about the next word or breathe and produce the hesitation word, so people often use hesitation while speaking. In other words, it is common to use hesitation, pause, or delay while speaking. Although hesitation is

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

disfluency when people speak, it is necessary to use to help the speaker think before speaking as claimed (Wang, 2021) hesitation markers can buy time for the speaker to catch up with their thoughts or be used as a strategy in conversation by the speaker who uses it. Hesitation helps the speaker flow conversation and think of the appropriate word to say. Based on Surah Al-Isra (17:53)

وَقُل لِّعِبَادِى يَقُولُوا۟ ٱلَّتِى هِىَ أَحْسَنُ

Translation : Tell My Servants (Oh Muhammad) “to say that which is best”. Allah commands prophet Muhammad SAW. to advise all the people to greet one another and converse with the best and most polite words to avoid misinterpretation or misunderstanding.

From the verse above, Islam teaches us as Muslim to converse with the best and most polite word to avoid misunderstanding. Selecting the appropriate word may be the way to avoid misunderstanding between people. Hesitation helps people buy time for speech to catch up with their thoughts or to fish out the right word for a situation.(Wang, 2021).

Furthermore, Using fillers and other hesitation devices in speech is the application of communication strategies. Using these strategies could help compensate for speech processing problems by allowing the speaker to gain time during a speech. This finally leads to building effective communication

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

by signaling the continuity of speech through producing some appropriate vocal indicators of hesitation (Khojastehraed, 2012).

The researcher decided to analyze the hesitation uttered by Cinta Laura as a speaker. The researcher is interested in analyzing Cinta Laura because she is a social activist in Indonesia who is passionate about education and creating awareness on the issues of bullying and violence against women and children. The researcher selected the moment she uses English in some podcast that talks about experiences in her life regarding Forgiveness and Boundaries on the Powder Room Talk and Education on Asian Boss, which can inspire many people based on the comment in the podcast. Furthermore, it is necessary to conduct this research because most people recognize hesitation as disfluency when people speak. In fact, hesitation occurs not only happen when people hesitate in uttered something but the people use hesitation in speaking, which can help people to find an appropriate word in communication while ordering their ideas.

B. Research Question

Based on the background above, the researcher formulate the research question as follows : "What are the types of hesitation uttered by Cinta Laura at selected English podcast?"

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

C. Research Objective

Related to the research question above, the researcher formulate this research objective as follows: "To describe the types of hesitation uttered by Cinta Laura at selected English podcast".

D. Research Significance

1. Theoritically, this research is expected to enhance understanding on hesitation.

2. Practically, this research is expected to give the students more knowledge about hesitation in speaking. Also to the next researchers, they can use this research as an additional information for the future study.

E. Scope of the Research

The researcher focused to analyzed the hesitation uttered byCinta Laura in selected podcast by using Clark and Clark theory. The researcher selected the english podcasts on youtube channel Powder Room Talk in episode Forgiveness and Boundaries and Asian Boss in episode Social Issues.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN

CHAPTER II
REVIEW OF RELATED LITERATURE

This chapter presents previous and pertinent ideas in order to support the analysis.

A. Previous Findings

There are several previous findings that are related to this topic that has been analyzed, as follows :

Anugrahini (2019) title of her research is *Hesitation Used by Donald Trump and Margaret Brennan in Face The Nation Program*. By using a qualitative descriptive method and the theory of Hesitation by Ralph Leon Rose, this researcher is trying to identify the types and how hesitation is produced. The finding shows that filled and silent pauses are mostly used during the interview. Hesitation appears for some specific reason. They need time to breathe before continuing the sentence and thinking about the next word they want to convey.

Maulita (2016) title of her research is *Hesitation in Bilingual Child's Speech*. This study used a descriptive method to analyze the data. This research uses Ralph Leon Rose's theory of Hesitation. The study investigated the types and the characters of hesitation used by a bilingual child. This research shows that the types of hesitation that are mostly used in bilingual child's utterances are pauses, repeats, false starts self correction, and word lengthening. The characteristics of hesitation are false pause, restarts, and repeats.

Oktamalia (2018) title of this research is *An Analysis Of Hesitation Types In Student's Speaking At STAIN Curup*. This research uses the theory of Clark and Tree to analyze hesitation types used by a student. The method of this research used a descriptive to analyze the data. The purpose of this study is to examine the hesitation uttered by the 3rd-semester student from English Study Program. This research shows that almost all of the students used hesitation in their speaking class, and factors of hesitation occurred because they were confused and shy and found it hard to find the appropriate word to say.

According to the previous research above, the similarity between the previous research and this research aims to analyze the hesitation. Then, the dissimilarity from previous research with this research are the object which none of the previous studies above analyze Cinta Laura. Furthermore, the theory of hesitation that used by the previous studies and this research is different, Anugrahini and Maulita use the hesitation theory from Ralph Leon Rose and Oktamalia use the theory of hesitation from Clark and Tree, while this research using the theory of hesitation by Clark and Clark.

MAKASSAR

B. Pertinent Ideas

1. Psycholinguistics

Psycholinguistics is the name used to study the psychological processes involved in language. Psycholinguistics is a study that understanding, producing and remembering language, and hence are concerned with listening, reading, speaking, writing, and language memory. They are also interested in how we acquire language and how it interacts with other psychological systems.(Harley, 2001).

According to Gleason & Ratner (1998) psycholinguistics is concerned with discovering the psychological processes by which humans acquire and use language. Psycholinguistics is also interested in the social rules involved in language use and the brain mechanism associated with language.

Psycholinguistics is a branch of the study that combines psychology and linguistics. It is concerned with the relationship between the human mind and language as it examines the processes that occur in the brain while producing and perceiving both written and spoken discourse. How people process this phenomenon in their brain is not only about the description of producing and perceiving language but about the description of what they have learned as background knowledge to interpret (Aitchinson, 2003).

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

2. Hesitation

Hesitation is a pause that happens when people speak. Nair (2000) stated that people hesitate anywhere in their speech, whether at the beginning, middle, or end of a speaker sentence. According to Clark and Clark (1977) hesitation is the common disruption in communication, either the silent pause, a period of no speech between words, or the filled pause, a gap filled by ah, ee uh, and mm.

Rosa & Roza (2013) mentioned that hesitation usually happens in spontaneous speaking, that people sometimes hesitate in delivering their ideas. What happens in the speaker's mind when people communicate is that they are thinking of the suitable word to deliver. This is where the hesitation can be found.

Maclay & Osgood (1959) speakers use hesitation to establish control in the conversation to make the listener keep hearing and not disturb the speaker's utterance. The speaker makes hesitation to show that they need time to think and still have control in their utterances. When a speaker is making pauses long enough, he will use some signal (um, er, etc) which says "I'm still in control, don't interrupt me!".

Garman (1990) emphasizes that hesitation is a set of tools with a certain time duration that are used for several problems that can be both correction of a produced discourse piece and planning problems of the coming discourse piece.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

3. Types of Hesitation

According to Clark and Clark's theory (1977), there are nine types of hesitation occurred during speech :

a. Silent Pause

A silent pause is a period of no speech between words. This is a pause where the speaker produces no words during their utterance. A silent pause indicates that the speaker is trying to remember their word or has finished their speech. Furthermore, the silent pause can also happen when the speaker wants to produce a meaningful word or surprising. Since silent pauses may occur for reasons other than planning, it considers imperative to examine vocalized hesitations as well (Osgood, 1959) . Gilquin (2008) divided silent pauses into three types: short pauses, medium pauses, and long pauses. A short pause is a pause under one second, which usually occurs when people breathe; this frequently happens to both natives and learners. A medium pause is a pause of one to three seconds, and a Long pause is more than three seconds.

For instance :

"*I hurt my ankle when I was // 7 years old.*"

The sentence above shows that the speaker pauses after mentioning "I was…", which may occur when the speaker is trying to remember when he hurt his ankle.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

b. Filled Pause

A filled pause is a space filled by er, um, ah, during speaking. This filled pause is used when people hesitate with their utterances, followed by some noises in their speech. This filled pause also can help the speaker think during their speech, so the listener is not bored.

For instance :

"*um.. thank you for asking*".

From the example above, the speaker uses "um" before saying the word because he is trying to find the appropriate word.

c. Repetition

Repeatition is repeat one or more words in a row. Repetition happens when the speaker tries to remember the next word they want to convey or tries to hide their hesitation in speaking. Therefore, the speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener. Totally 89 percent of all words repeated the function word, like articles (the / the speaker), prepositions (at/at the table), conjunctions (or/or the speaker), and pronouns (she/she goes). For instance :

"*I give you this / this book as a gift*".

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

From the example above, the speaker repeats the word “this” in his speech with different meanings and pronunciations. Then, he repeats the word “this” with the correct one.

d. False Start (Retraced)

A False start (retraced) is repeating one or some words before fixing the word. False start occurs when the speaker starts to produce a few words and then suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word they had said before, which was not suitable for the word the speaker wanted to say.

For Instance :

“*Turn on the stove / the heater switch*”.

From the instance above, the speaker changed the words “the heather switch” to correct his utterance.

e. False Start (Unretraced)

A False Start (unretracted) is correcting a word without repeating the wrong word. When people speak and make some error, they usually repeat it, but in this unretracted false start, the speaker does not repeat it.

For Instance :

“*Turn on the stove / heater switch*”.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

From the instance above, the speaker corrects his word. Instead of repeating the wrong word, the speaker continues his utterance and says the correct word.

f. Correction

There are many reasons why speakers may stop in the middle of their utterances. They may need to remember something they wanted to say, search for the right word, or select which of several examples they could mention. Corrections is like false starts, except that they contain an explicit *I mean, or rather or that* is to mark the phrase as a correction. Correction occurs coincidentally when the speaker forgets some words that need to be delivered to the listener or indicates the words had been misplanned. DuBois (1974) has noted that the correction phrases (that is, or rather, I mean and well) signal distinctly different errors speakers are about to correct :

For instance :

1) She hit Kane *that is,* Mary did- with a frying pan.
2) I'm trying to lease *or rather,* sublease –my apartment.
3) I really love *I mean,* despise –getting up in the morning.
4) I'll be done immediately *well,* in a few minutes.

The function of those correction are :

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

1) That is : reference editing. That is indicate o specify further the referent of *she*.
2) Or rather : nuance editing. Or rather is used to provide a word that slightly closer to what the speaker meant to say.
3) I mean : mistake editing . I mean is used for correcting a mistakein wording, one that would have left the utterance with a significantly wrong meaning.
4) Well : claim editing. Well is used to soften a claim the speaker decides is too excessive.

g. Interjection

Interjection shows that the speaker stops in the middle of their words. The speaker may forget something they wanted to refer to, they may have to think of the appropriate word to say next, or they may be selecting which of several examples they want to say. James (1973) has noted he has selected a specific interjection to indicate why the speaker must stop. For instance :

1) Cinta loves, *oh*, orange.
2) Cinta loves, *ah*, orange.
3) Cinta loves, *well*, orange.
4) Cinta loves, *say*, orange.

The function of those interjection are :

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

1) Oh : referent selection. Oh indicates that the speaker have to stop and say orange as one of several possibilities he could mention.
2) Ah : memory success. Ah indicates that the speaker had forgotten and finally can remember what Cinta loves.
3) Well : word approximation. Well indicates that the speaker thinks that orange is may the only description of what Cinta loves.
4) Say : exemplification. Say indicates that the speaker think that orange is just an example of what Cinta loves. On the other hand say could mean “let’s imagine”.

h. Stutters

Bloodstein (1995) stated that stuttering is the breaking up of speech fluency with pausing or specific interruptions. Gokdag (2017) adds that stuttering is an addition of words or sounds or an interruption of the speech, which the speaker can not control it. Stutter is where the speaker says the letter repeatedly, and difficult to continue to the following syllable.

For instance :

“*I shs should do that*”.

From the example above shows that the speaker said "sh should" double, where the speaker had difficulty uttering the first syllable "shs" and then repeating the word "should" correctly.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

i. Slips of the Tongue

A slip of the tongue occurs when the speaker pronounces a word that differ from the actual meaning of the word. According to (Freud, 1901), a slip of the tongue is an error that a speaker makes from repressed thoughts that are released from certain errors.

For instance :

"*You did not listen clarefully*"

From the example above, the speaker says the wrong pronunciation in pronouncing the word "carefully" become "clarefully". It can happen when the speaker may remembering the material that the speaker prepared for the listener.

There are also another theory that analyze about the type of hesitation. According to Rose (1998, p.9-10) hesitation is divided into six types.

a. Pauses

Pauses usually happen when the speaker hesitates during speaking, especially in spontaneous speaking. There are two types of pauses, silent pause and filled pause.

1) Silent pause

Silent pause occurs when the speaker stops in the middle of the utterance to thinking the next word he want to say.

For instance :

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

"I will tell you the story of the (…) Harry Potter".

From the example above, it can be seen that the speaker pauses after saying the word "the". That happens because the speaker need time to thinking the title of the story she wants to tell.

2) Filled Pause

A filled pause is a pause filled with several sounds so that the pauses are not only in the form of silence and also make listeners not get bored while the speaker is talking. This filled pause occurs when the speaker wants to take time during the thinking process. Filled pause is divided into two categories. First, lexicalized filled pause (filled with a phrase like Ok, well, you know). Second, unlexicalized filled pause (filled with some nonverbal utterance like *um* or *ee*).

For instance :

a) Lexicalized Filled Pause : "You know.. I bought a book yesterday".

b) Unlexicalized Filled Pause : "uh, close the door, please".

From the example above shows when the speaker doing filled pause uses lexical or non-lexical words. The speaker uses filled pause with

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

the aim of the listener knowing that the speaker is thinking of the next word to be delivered.

b. False Start

False start occurs when the speaker says a few words and then stops in the middle of the sentence because the speaker realizes there are errors in the pronunciation or utterance. After the speaker hesitates, they continue with the correct words they want to say.

For instance :

"Hi Laura, please open../ close the door, please".

The example above shows that the speaker made a false start. It indicates that the speaker realized he made mistake in choosing word so he change it with the word he want to use.

c. Repeats

Repetition is repeating words in a row. This repetition usually occurs when the speaker tries to remember the next utterance to be delivered. Thus, sometimes the speaker accidentally repeats one or more words several times until he finds the right word to be delivered.

For instance :

"You should put the book in the in the table".

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

The example above shows that the speaker repeats of the word “in the” in a single utterance.

d. Restart

Restart is when the speaker abandons an utterance or constituent and neither corrects nor repeats it partially or wholly. The restart occurs when a speaker utters a few words and suddenly returns to the beginning and iterates the same words.

For instance :

“You know how much to this.. how much the cost of the book?”.

The example above shows that the speaker utter few words and then return to the beginning without complete the first sentences. The speaker did not find the right word to continue so he restarting the same words. It indicates that the speaker want to clarify or may forget to deliver what he wants to say.

e. Word lengthening

Word lengthening occurs when the speaker takes the word articulation longerthan it should. Lengthening also can happen when the speaker gets interrupted while delivering his speech.

For instance :

“I want to buy a book a:nd a pen”.

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

The example above shows that the word “and” must be said is short, but the speaker says it longer than what should be. This shows the pronounciaton of the words that are not normal or extended pronounciation so that it is not in accordance with the pronounciation of words that should or commonly called lengthening.

4. Factor of Hesitation

Many factors affect people to hesitate during communication. According to Clark and Clark (1977), hesitation occurs when people take time to plan the following utterances, the more complex the planning, the more time it should take, and the more speech will disrupt.

a. Cognitive Difficulty

From the study of Goldman-Eisler (1968) who presented people with New Yorker cartoon and asked them to talk about each one. One group was asked to describe each cartoon, and another group was asked to explain why each one was funny. There were more hesitations scattered through the explanations than through the descriptions, probably because it was harder to explain and find the appropriate words to express them. At the level of word selection, hesitations should appear when the speaker has difficulty finding the right word.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

b. Situational Anxiety

When people talk about topics they are anxious about, they tend to produce more silent pauses and specific other speech errors because that anxiety disrupts the planning and execution processes generally. It may be complicated to deliver the sentence they want to say, so they spend more time planning.

c. Social Factors

When communicating, speakers must make clear when they still have something to say and when they are finished. If they hesitate too long, someone else may take over the conversation. It might push the speaker to use more filled pauses, for example, *uh,* to fill spaces where other speakers might possibly take over. On the other hand, sometimes people tell stories to increase silent pause, perhaps because they are more careful in selecting words or executing more slowly to make themselves more comprehensible. A concern with speakers trying to be comprehensible with the use of silent pauses and concern with finishing their contribution leadsto the use of filled pauses to signal their attention to continue.

According to Nair (2000) Normally, the people make hesitation pause under the following circumstances :

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

a. People use hesitation when uncertain about what to say next or when deciding what to say next. This can occur when the speaker have something to say but have not planned it in detail. Usually occur immediately after the first or two words in an idea.

b. People use hesitation pauseswhen they have difficulty finding an appropriate word.

c. People use hesitation pauses when they want to say a significant word, have high lexical content, or sound surprising in that context.

d. People use hesitation pauses when they have difficulty completing a particular syntactic structure.

According to Carroll (1985, p. 268) hesitation normally occurs under these sorroundings :

a. People pause for breathing

People sometimes should come back up for air throughout speaking. Speech is made because the individuals expel air from lungs, and that they should pause sometimes to inhale before continued.

b. People pause for pragmatic reasons

Pragmatic reason is for effect within which speaer use varieties of hesitations to form them sounds a lot of like native and for achieving a particular communicative result on the listener.

c. People pause for linguistic planning

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

People need to plan what they are going to say, that is why they need time to make a planning before execute their utterances.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

CHAPTER III
RESEARCH METHODOLOGY

A. Method of Research

This study used a descriptive qualitative method to analyze the utterance of hesitation used by Cinta Laura. According to Biklen (1992), descriptive study is a method such as spoken, written, and someone's behavioral inspection. It describes specific information, a phenomenon, event, or occurrence as it is to give information about the social phenomena. Hancock B., Windridge K., and Ockleford E (2009) state that qualitative research is a method that is focused on description and interpretation. By applying this method, the researcher will investigate utterances related to the object of the research.

B. Data Source

The researcher gets the data by herself, searching, downloading, analyzing, and classifying the types of language phenomena of hesitation in speech uttered by Cinta Laura as a guest star in selected podcast. The podcasts are from the selected two English podcasts on youtube. There are from the youtube channel Powder Room Talk and Asian Boss. First, podcast from the youtube channel Powder Room Talk, Cinta Laura as a guest star speaks about Forgiveness and Boundaries.The video was taken from a source : https://www.youtube.com/watch?v=7hp-zC2clV0&t=402s. The duration of

the video was 01:19:48. The interview happened on April 20, 2021. Second, podcast from the youtube channel Asian Boss, Cinta speaks about Education System in Indonesia. The video was taken from a source : https://www.youtube.com/watch?v=8eRtq88UVqA&t=1762s. The duration of the video was 50:53. The interview happened on October 24, 2020.

C. Instrument of the Research

The instrument of this study is the researcher herself. According to Guba (1985), Human beings as the instrument of choice for naturalistic iniquity. Human beings can feel subtle cues in the environment to which they naturally know what is happening and how to respond. In this research, the researcher took the data from the utterances produced by Cinta Laura in Powder Room Talk and Asian Boss.

D. Data Collection

The researcher used procedures in collecting the data, as follows :

1. The researcher watched the video on youtube channel The Powder Room Talk EpisodeForgiveness and Boundaries with Cinta Laura Kiehl and Asian BossEpisode Social Issues with Cinta Laura.
2. The researcher made a transcript from utterances of Cinta Laura.
3. The researcher selected the hesitation used by Cinta Laura.

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

4. The researcher categorized and analyzed the utterance that produce byCinta Laura which contain hesitation based onthe theory of Hesitation by Clark and Clark.

E. Technique of Data Analysis

After the researcher collected the data above, the data were analyzed in following steps :

1. The researcher marked the utterances of Cinta Laura.
2. The researcher identified the types of hesitation used by Cinta Laura.
3. The researcher classified the types of hesitation used by Cinta Laura by used a table.

No.	Types of Hesitation	Frequency
1	A Silent Pause	
2	A Filled Pause	
3	Repetition	
4	False Start (retraced)	
5	False Start (unretraced)	
6	Correction	
7	Interjection	
8	Stutter	
9	A Slip of the Tongue	

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

4. The researcher make some explanations to clarifiedabout the hesitation types and how hesitation used by Cinta Laura based on the table above.

CHAPTER IV
FINDINGS AND DISCUSSION

This chapter consists of findings and discussions of the research. The findings present the result of the data analysis of types of hesitation uttered by Cinta Laura at Powder Talk Room and Asian Boss. Meanwhile, the discussions present a detail description of the data findings.

A. Findings

Hesitation is a pause that the speaker used when still need time to think the appropiate word to say. After analyzing the data, the researcher finds hesitation types used by Cinta Laura. Clark and Clark (1977) classified hesitation into nine types : Silent Pause, Filled Pause, Repetition, False Start (Retraced), False Start (Unretraced), Correction, Interjection, Stutters, and Slip of The Tongue. After analyzing the data, the researcher revealed all types of hesitation uttered by Cinta Laura.

1. Types of Hesitation Uttered by Cinta Laura

No.	Types of Hesitation	Frequency
1	A Silent Pause	3
2	A Filled Pause	5
3	Repetition	8
4	False Start (retraced)	4
5	False Start (unretraced)	4

6	Correction	5
7	Interjection	2
8	Stutter	4
9	A Slip of the Tongue	1

a. Silent Pause

According to Clark & Clark (1977) a silent pause is a period of no speech between words. This is a pause where the speaker produces no words during their utterance.

Powder Room Talk

Extract 1 (00:21:45)

*But at the same time we can't blame them the reason being is because a lot of people in this country you know **(…)** live under the poverty level line or are of middle class and below and they live very difficult lives.*

The utterance above shows that Cinta made a silent pause for 2 seconds. The silent pause happens when Cinta comments about media entertainment, especially for tv, that provides content almost only slapstick content and lacks substances. According to Stenstrom (1994), a silent pause give some time for the speaker to think about what to utter next.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Extract 2 (00:23:13)

*I know what forgiveness means and for me it meant **(…)** pushing uh taking out all the poison in my heart and **(…)** leaving it behind me.*

The conversation above shows that Cinta made silent pauses for 3 seconds and 2 seconds. This silent pause happens when Cinta talks about her experience overcoming her problems when she gets bullied. Also, she shows what forgiveness means by making hand gestures as though she had pictured the word she had said. Brown and Yule (1983, p.163) define a silent pause as an extended pause because they usually extend between 3 to 16 seconds and cause the speaker to provide sufficient information to the hearers. The sufficient information that Cinta tried to explain in the podcast is to share her opinion about the meaning of forgiveness for her, as she explains very emotionally and be careful of the word she uses, which made her pay attention to every word she says.

Extract 3 (00:51:14)

*You know and **(…)** oftentimes as human beings i realize that it's easier to dwell on the sorrows it's easier to stay bitter yes but you need to remind yourself how badly do you want to be happy.*

Cinta made a silent pause for 3 seconds. The silent pause happens when Cinta talks about her choices in life. According to Stenstrom (1994), silent pauses give the speaker time to think about what to utter next.

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

b. Filled Pause

According to Clark & Clark (1977) states that a filled pause is a space filled by er, um, ah, during speaking. This filled pause is used when people hesitate with their utterances. This filled pause can help the speaker to think during their speech.

Powder Room Talk

Extract 4 (00:05:43)

*After having spent eight years in the U.S **um** there was something that really stuck out to me.*

Based on the utterance above shows that Cinta made a filled pause with the word "um." The filled pause happens when Cinta pauses after saying the word "U.S." Kharismawan (2017) states that the filled pause is a gap between words that produce by the speaker when they plan to say something. Cinta used the sound **um** to fill her hesitation part.

Extract 5 (01.17.39)

*I'm not going to get an apology from those people but let it be because **um** that's something they have to work on that's a growth they have to **um** experience on their own.*

The utterance above showed that Cinta made a filled pause with the word "um." This filled pause happens when Cinta talks about the people who

bullied her and made fun of her accent. Cinta made an opinion about that idea that made her fill her hesitation part with filler.

Asian Boss

Extract 6 (17:12)

*If you ask me this question growing up I would have been very very confused because you know I had always i had always had **um** an identity crisis.*

The conversation above shows that Cinta made a filled pause with the word "um". Goodwin (1987) states that one of the typical reasons for a delay is the speaker searching memory for a word. Cinta made repetition before the filler was uttered. Also, it can be seen from her facial expression when she finally can find the right word to say, she smiles a little bit after saying the word "identity crisis."

Extract 7 (33:44)

*So when we rebuilt those schools we had sometimes **um uh** volunteers from Australia teach the teachers and kids english.*

The researcher discovers that Cinta made a filled pause. This filled pause happens when Cinta tells about the school she rebuilt and had a volunteer from Australia. But before Cinta said "volunteer", she made a filled pause with the word "um.. uh". According to Goffman (1981, p.293), fillers are

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

elements whereby the speaker needs time to think about the required word to produce.

Extract 8 (35:28)

*One of our biggest success stories is about a child named **uh** Bonar he went through our educational system got a scholarship to high school and finally attended the university of Indonesia.*

The utterance above happens when Cinta share a story about a child who succeeds in his education at the school that Cinta rebuilt. After Cinta tells about the child's story, she tries to remember his name by saying, "*One of our biggest success stories is about a child named.."* when Cinta tries to remember the child's name, she makes a filled pause.

c. Repetition

Repetiton is repeating a word or some word. Repetition happens when the speaker tries to remember the next word they want to convey or tries to hide their hesitation in speaking. Therefore, the speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener (Clark & Clark, 1977).

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Powder Room Talk

Extract 9 (00:07:22)

*Even if things don't change drastically in my lifetime i do believe that there is something i can do at least **that first step .. um that first step** to move in a better direction.*

The researcher finds that Cinta made a repetition in her utterances. Cinta repeated the word "that first step" twice. Where in the middle of the repetition word, Cinta uttered a filled pause. The repetition happened when she got information that there are only a few victims of sexual violence and abuse that report their injustices. In that case, Cinta made a platform to help the victims to speak up, at least "that first step", to move in a better direction. The word "that first step" is stressed and repeated by Cinta. The reason for repetition is used when the speaker stresses her word to convince the interlocutor, to make sure about the intention or to recall a memory (Mubarak, 2019).

Extract 10 (00:09:44)

*That's **i wasn't happy i wasn't happy** when all i was doing was trying to strive for perfection.*

The sentence above shows that Cinta made a repetition in her utterances. Cinta repeats the word "I wasn't happy" twice. The repetition happens when Cinta explains the internal struggle in her life. She always wanted to be the

best above everything else. Cinta was serious in mentioning that she was not happy then, which might make her do the repetition. This repetition occurs to show the feeling of the speaker (Mubarak, 2019).

Extract 11 (00:57:25)

If they're not helping if they're not helping *you build yourself up, don't let their opinions or their existence affect you.*

The sentences above show that Cinta made a repetition in her utterances. Cinta repeats the utterance "if they're not helping" twice. After making a repetition, Cinta continues to share her opinion about self-improvement.

Asian Boss

Excerpt 12 (6.58)

Marie : Did you ever um get any backlash or did somebody criticize you for being too direct in Indonesia? What happened? I'm very curious.

Cinta : ***All the time all the time*** *i mean i think in the beginning of my career people thought that i was slightly arrogant although i was not trying to be.*

UNIVERSITAS ISLAM NEGERI

Cinta Laura made a repetition of her conversation above. The repetition word "all the time" says twice. Cinta made repetition when she started to answer the assumption from the host. Perrin and Paradis (2003) say that repetition can function as a positive reply, when the speaker agrees with the utterance from the interlocutor.

ALAUDDIN MAKASSAR

Excerpt 13 (17.12)

If you ask me this question growing up i would have been very very confused because you know i ***had always i had always had*** *um an identity crisis.*

Based on the utterance above shows that Cinta made repetition. The repetition happens when Cinta says the word "I had always" twice. After repeating, Cinta uttered a filled pause which probably can help her recall her memory about what to say next (Mubarak, 2019).

Extract 14 (23:37)

You know is a very sad way of looking at this issue because i think we all know that victims are never ever at fault. It is the perpetrator who has a decision to not take the action that they had ***decided to take or decided to take.***

The researcher finds that Cinta made repetition. The repetition happens when Cinta says the word "decided to take" twice. Cinta continues her utterance after saying the first word of "decided to take". It can be seen that after saying that word, Cinta says "or", but she may not have the next word to say, so she stops it by repeating the word "decided to take."

Excerpt 15 (29.02)

We see a lot of fake news and ***if we can't discern if we can't discern*** *facts from fiction then we're in deep trouble.*

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

The utterance above shows that Cinta made repetition. The repetition of the word “if we can’t discern” said twice. This repetition happens when Cinta tries to explain what she has said before.

Extract 16 (37:51)

You know even quota internet quota is expensive for most of these kids and you can't expect them to be able to study ***on their own because on their own because*** *some of their parents didn't even finish high school, didn't even finish junior high so you know who's there to guide them.*

The utterance above shows that Cinta made a repetition. The repetition of the word “on their own” says twice. The repetition happens when Cinta share her opinion about unprivileged kids that have to study from their phone. The repetitions in the utterances function as the fillers to give the speaker time to plan what to say next (Kharismawan, 2017).

d. False Start (retraced)

Based on Clark & Clark’s theory, a false start (retraced) is repeating one or some words before fixing the word. False start (retraced) occurs when the speaker starts to produce a few words and then suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

they had been saying before, which was not suitable for the word that the speaker wanted to say.

Powder Room Talk

Extract 17 (00:40:48)

*That is when realized **why am i not allowed to be why am i not allowed to have friends**, like having friends who actually understand me is amazing.*

Cinta Laura made a false start (retraced). The false start (retraced) occurs when Cinta corrects her utterance by repeating the word and then changing it to the correct word she wants to say. She uttered, "why am I not allowed to be" and changed it to, "why am I not allowed to have friends."

Extract 18 (00:43:15)

*It was when i finally **let go of the perfect trying to be perfect** that i was able to accomplish my mission in helping people or gradually helping people.*

The sentence above shows that Cinta Laura made a false start (retraced). The false start (retraced) occurs when she corrects her word while repeating the wrong word. Cinta corrects her word from "the perfect" become "trying to be perfect".

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Asian Boss

Extract 19 (30:52)

A fact that my mom discovered was that in the city of Bogor alone which is a tiny city in West Java there were thousands of schools under horrible condition meaning some of them had ***roof roof the tiles of their roof*** *collapsing or like kids were learning on the floor without furniture and that's obviously bad for* ***their development right their physical development.***

The statement above shows that Cinta made some false starts (retraced). The first false start (retraced) occurs after Cinta repeats the word "roof" and then suddenly pauses in the middle of her utterances. After hesitating for a while, she directly corrects the word she had said before, which was unsuitable for the word she wanted to say, so she changes it to "the tiles of the roof."

The false start also occurs when Cinta makes an opinion about the factor that can cause the horrible condition school for the student. She says that is bad for the student's development but realizes the word she uses is unsuitable for the word she wants to utter, so she directly corrects it with "their physical development."

Extract 20 (36:02)

So it really shows you that it doesn't matter where you come from ***you really you truly*** *can achieve big things if you're willing to put the work.*

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

The utterance above shows that Cinta made a false start (retraced). This false start (retraced) occurs when Cinta said the word “you really” and directly corrects it with “you truly.”

e. False start (unretraced)

According to Clark & Clark (1977) states that a false start (unretraced) is a correction of a word without repeating the wrong word. When people speak and make some error, they usually repeat it, but in this unretraced false start, the speaker does not repeat it.

Powder Room Talk

Extract 21 (00:04:55)

*Oh i think this is going to be a long story to tell and we will have to really delve into it throughout the show but **the f**.. i had my first big epiphany so to speak in 2018.*

The researcher discovers the utterance above shows that Cinta Laura utters a false start (unretraced). Cinta starts to tell her story when one of the hosts asks why Cinta returned to Indonesia after finishing her study at Columbia University.

The false start (unretraced) occurs when she does not finish the first utterance, but she starts to produce the next utterance with a complete one. Cinta produces the word “the f” but suddenly stops and changes the sentence

become “I had my first big epiphany…” This selection of words made Cinta stop when she uttered the first utterance.

Extract 22 (00:23:13)

*I know what forgiveness means and for me it meant **pushing taking** out all the poison in my heart and leaving it behind me.*

The utterance above shows that Cinta made a false Start (unretraced). The false start (unretraced) occurs when Cinta describes the meaning of forgiveness to her. She says the word “pushing” but corrects it to the word “taking.”

Asian Boss

Extract 23 (09:38)

*I'm not gonna lie hurt me for several years because at that age the tender age of 13 as I said I didn't really truly know who i was yet and **i felt i kept I I I would** often ask myself what have I done wrong why are people making fun of me.*

Cinta Laura made a false start (unretraced) in her utterance above. The false start (unretraced) occurs twice, from saying “I felt” and “I kept” and then finally saying “I would,”.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Extract 24 (46:45)

*If korea where they **could could South South** Korea with you know a country with twenty million people can have Kpop become a global phenomenon there's no reason why Indonesia can't have something equivalent to that.*

The utterance above is categorized as a false Start (unretraced). The false start (unretraced) happened when Cinta made an expectation of making Indonesia like K-pop. The word "could" is Cinta's mistake in choosing a word, so she changes it to the word she actually wants to say, "South." Cinta's repetition seems to underline the mistake she says before, so she repeats the word "South" twice.

f. Correction

Correction is how speakers correct themselves during their utterances by using correction phrases (that is, or rather, I mean, well) to explain that they have made a mistake Clark & Clark (1977). Correction occurs coincidentally when the speaker forgets some words which need to be delivered to the listener or indicates that the words had been misplanned.

Powder Room Talk

Extract 25 (00: 38.46)

*Until I entered the entertainment industry and then things got really really rough you know **I mean** imagine in that you know the reason why i think i had a victim mentality for so long is because i experienced what i experienced at such a young age.*

The researcher finds the utterance above shows that Cinta made a correction. The correction happens when Cinta states that “things got really rough” to prevent the significantly wrong meaning from the hearer, she corrects with the word “I mean.” Then, Cinta explains what she meant by saying things got really rough by telling her experiences.

Extract 26 (1.00.58)

*Obviously as children **i'm sure well maybe i'm not sure** but like i personally have had problems with my parents for example don't get me wrong i love them so much we're close i see them two to three times a year because they live in Bali.*

The utterance above shows that Cinta made a correction. The correction happens when the speaker uses the word “well” to soften a claim that she decides is too excessive Clark and Clark (1977). In the conversation, Cinta says that she was sure, but after that she uses the word “well” and claims that she was unsure that she had a problem with her parents because they had a different point of view.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Asian Boss

Extract 27 (10:22)

*You know I feel like since the start of my career people always viewed me as an adult, they didn't realize **i mean** you know i'm only in my 20s now and i've been in the industry for 13 years people never gave me the chance to make mistakes as a little girl.*

The word "I mean" above is categorized as a correction. The correction happens when Cinta tells her experience when she was bullied at thirteen because of her different accent, and people did not realize that she was still a child back then. The word "I mean" that the speaker uses is to correct the word that may be misinterpreted by the listener, Baalen (2001). Cinta uses the word "I mean" here to explain she should not get bullied at that age because of her different accent.

Extract 28 (36:27)

*Sometimes i look back and i'm like how did we build11 schools over 4.000 children has gone through our education system. So yeah **i mean** it's not just me though like I need to thank my family too because they also put a lot of hard work into what we've done.*

Based on the utterance above shows that Cinta made a correction with the word "I mean". The correction occurs when Cinta says she does not believe she built eleven schools with over 4.000 children. The correction word is used to avoid the listener from making an explicit statement, Baalen (2001). Cinta

corrected her words by saying, “I mean” here, to explain that she is not the only one who built the school but also her family.

Extract 29 (37:19)

*You can't expect these kids to study off of a little android phone you know it's hard **i mean** it's even hard for privileged kids anywhere in the world to study you know from their laptops you know kids have short attention spans you know you need it you need a teacher to be able to guide these kids.*

The utterance above shows that Cinta made a correction. The correction happened when Cinta criticized the Indonesian educational system that lets kids study on their phones. The word "I mean," which Cinta uses here to give more explanation to avoid misleading information in her sentences when she says, "it's hard."

g. Interjection

James (1973) has noted, he has selected a specific interjection to indicatethe reason why the speaker have to stop. “Oh” : referent selection, “ah” : memory success, “well” : word approximation, “say” : exemplification.

Powder Room Talk

Extract 30 (00:58:08)

*Like I just pretend like they don't exist and if the.. if the **let's say** they're still on my social media as i say i mute them and the less i see of them on my feed in my life i forget they’re exist.*

The word "let's say" above is categorized as an interjection. The interjection happens when Cinta shares how to create boundaries with people we do not like. Cinta said "if the" twice, then used the interjection phrase "let's say". The word" let's say" is used as an exemplification by Clark and Clark's theory. Cinta explained by giving an example of the words that she has said before.

Asian Boss

Extract 31 (38:24)

Marie : It's very honorable even that the fact that you're donating some of your own money, i don't think you can see that from other like well like people who are well off?

*Cinta : I mean yes it makes me very sad because obviously the richin Indonesia are extremely rich and donating **let's say** even only a thousand dollars a month would mean absolutely nothing to them because a thousand dollars can be spent on a dinner.*

The utterance above shows that Cinta made an interjection. This interjection happens when Cinta is asked about no donations for her school from people who are well off to donate. Cinta agrees by saying the word “yes” and continuing to make an explanation. When she tries to give more explanation, she utters the interjection phrase “let’s say” to provide an example that said rich Indonesia could obviously help to donate even only a thousand dollars.

UNIVERSITAS ISLAM NEGERI ALAUDDIN MAKASSAR

h. Stutters

Gokdag (2017) state that stuttering is an addition of words or sounds or an interruption of speech that the speaker can not control. Stutter is where the speaker says the letter repeatedly, and difficult to continue to the following syllable.

Powder Room Talk

Extract 32 (00:08:19)

*So you know i've always **aa.. ii..** i've always been around very strong independent women and i felt like indonesia needs more role models that make women believe that they can achieve whatever they want in life.*

The sentence above shows that Cinta made a stutter. The stutter happens when Cinta talks about the human rights that we deserve a stable and happy life regardless of our gender because gender means absolutely nothing, even the roles that have been bestowed to us by society are all social constructs.

After making an argumentation, Cinta continues to speak and makes repetition in her pronunciation. She pronounces "I've always" correctly at first, but after she repeats the word, suddenly, in the middle of her utterances, she stutters. This can be classified as stuttering because she has difficulty uttering the first syllable.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Extract 33 (00:09:55)

*I wasn't happy when all i was doing was trying to strive for perfection and strive for**a..a** a rank.*

Based on the utterance above shows that Cinta made stutters. This utterance is categorized as stutters because Cinta Laura says the letter "a" repeatedly. As Gokdag (2017) mention, stuttering is an addition of words or sounds or an interruption of speech that the speaker can not control.

Asian Boss

Extract 34 (09:38)

*You know that i'm not gonna lie hurt me for several years because at that age the tender age of 13as i said i didn't really truly know who i was yet and **i felt i kept I I I would** often ask myself what have i done wrong why are people making fun of me.*

The researcher finds the utterance above is categorized as a stutter. The stutter occurs when Cinta keeps making a mistake in choosing the appropriate word to say from the word "I felt," then changes it to "I kept" and says the letter "I" repeatedly. According to Gokdag (2017), this can be classified as a stutter because the speaker kept saying a letter repeatedly, and difficult to continue to the next utterance because the speaker could not control it.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Extract 35 (37.20)

*What makes me really scared is that you know unfortunately Indonesia still has a huge digital gap and you can't **ex ex expect** these kids to study off of a little android phone.*

The utterance above shows that Cinta made a stutter. The stuttering occurs when Cinta tries to say the word "expect" instead of saying it correctly, she says the letter "ex" repeatedly. This can be classified as a stutter because Cinta has difficulty continuing to the following syllable because she cannot control it.

i. Slip of The Tongue

Clark & Clark (1977) in their study, says that a slip of the tongue occurs when the speaker pronounces a word differently from the actual meaning of the word.

Asian Boss

Extract 36 (11:30)

*And **that's a sas that's a sad** truth because why do i need to prove myself in order for people to respect me or appreciate me.*

The utterance above shows that Cinta made a slip of the tongue. A slip of the tongue occurs when Cinta spontaneously says the word "sas" while she wants

to utter the word “sad.” It can be classified as a slip of the tongue because Cinta uttered the wrong pronunciation when she tries to say the word “sad.”

B. Discussion

Based on the findings above, the researcher gives further description and explanation about hesitation which uttered by Cinta Laura in the podcast Powder Room Talk and Asian Boss. Here, the researcher begins the discussion by answering the research question about the types of hesitation uttered by Cinta Laura. Hesitation usually happens in spontaneous speaking, and people sometimes hesitate to deliver their ideas. What happens in the speaker's mind when people communicate is that they are thinking of the suitable word to say, so people use hesitation to establish control in the conversation.

To answer the research question, the researcher uses the theory of hesitation based on Clark and Clark (1977). There are nine types of hesitation: a silent pause, a filled pause, a false start (retraced), a false start (unretraced), repetition, correction, interjection, stutters, and a slip of the tongue. Based on the findings above, the researcher found all types of hesitation uttered by Cinta Laura.

First, a silent pause is a period of no speech between words. Cinta Laura’s utterances in the podcasts are categorized as silent pauses because Cinta paused during her speaking. Stenstrom (1994) mentions in his study that silent

pauses give the speaker time to think about what to utter next. Even though the duration of the silent pause that Cinta made is not long, it can be estimated as pauses. Furthermore, Gilquin (2008) in his study, divided silent pauses into three types: short pauses, medium pauses, and long pauses. A short pause is a pause under one second, which usually occurs when people breathe; this frequently happens to both natives and learners. A medium pause is a pause of one to three seconds, and a Long pause is more than three seconds. Based on the results, Cinta frequently made some medium pauses. The silent pause may be a chance for the speaker to breathe, but as a person who usually speaks too, we can see the difference between when we need to take a breath and when we need time to think.

Second, a filled pause is a space filled by "er, um, uh" during speaking. Cinta Laura's utterances are categorized in filled pauses because Cinta made some filled pauses with the words "um" and "uh" while speaking. According to Goffman (1981, p.293), a filler is an element whereby the speaker momentarily needs time to think of the required word to produce.

Fillers as time-creating devices were almost the same as fillers for hesitating purposes. Therefore, the difference was fillers as hesitating purposes referred to as unlexicalized filled pauses, and time-creating devices referred to as lexical filled pauses. Cinta uttered silent and filled pauses here are devices to take time before an increase in information.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Third, repeat is repeating one or more words in a row. Cinta Laura's utterances are categorized in repetition because Cinta repeats her words. The speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener. This repetition would not occur if the speaker could think exactly what to say next. This speculation is supported by Beattie and Bradburry (1979), finding that when the speaker tries to avoid silent pauses, the amount of repetition increases substantially.

Forth, a false start (retraced) is repeating one or some words before fixing the word. Cinta Laura's utterances are categorized as false start (retraced) because Cinta made some corrections from her utterance by repeating the wrong word before fixing the word. False start (retraced) occurs when the speaker starts to produce a few words and then suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word they had been saying before, which was unsuitable for the word that the speaker wanted to say.

Fifth, a false start (unretraced) is correcting a word without repeating the wrong word. Cinta Laura's utterances above are categorized as a false start (unretraced) because Cinta did not finish the first utterance, yet she started producing the next utterance. The result of this research is suitable with the explanation in the second chapter, which states that hesitation happens when they are not sure what they will say is the correct words (Nair, 2000).

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

Sixth, correction is the way speakers correct themselves during their utterances. James (1973) stated that there are correction phrases that signal why speakers are interrupting themselves, such as (that is, or rather, I mean, well). Cinta Laura's utterances above are categorized as correction because Cinta corrects using a correction phrase. The result of this research is suitable with the explanation in the second chapter, which states that correction occurs coincidentally when speakers forget some words which need to be delivered to the listener or indicate that the words are misplanned. According to Baalen (2001), hesitation as a politeness device to ensure the speaker's utterance is not hurting the listener's feelings. People usually discuss sensitive topics in conversation, which may lead to strong emotions between speakers and listeners. So, corrections help the speaker to make the explanation to avoid the listener making explicit statements.

Seventh, interjection shows that the speaker stops in the middle of their words. There are particular interjection phrases to signal why people had to stop (oh, ah, well, and say). The speaker may have to think of the appropriate word to say next, they may forget something to say or select several examples they want to say (Clark and Clark 1977). Cinta Laura’s utterances above are categorized as Interjections because Cinta Laura uses interjection phrases to make an example of her argument. Sometimes, by telling or giving an example of the ideas we convey can help people to imagine what we are

trying to say. In this case, giving the interjection phrases to the utterance help the speaker's sentences to be understandable to the interlocutor.

Eighth, stuttering is the breaking up of speech fluency with pausing or specific interruptions. Stutters are when the speaker says the letter repeatedly, and difficult to continue to the following syllable. Cinta Laura's utterance above is categorized as Stutter because Cinta stutters when speaking. Gokdag (2017), stuttering is an addition of words, sounds, or interruption of speech that the speaker can not control. It can be seen from the findings above that Cinta can not control her utterances. Furthermore, according to Robin Lickey (2018), there are three different way of Stuttering, a stuttered repetition where it usually involves a sound that can be repeated easily, a stuttered block where it usually involves a long tense articulatory closure on a stop consonant and a stuttered prolongation where it usually involves a sound that can be prolonged easily.

Last, a slip of the tongue occurs when the speaker pronounces a word that differs from the actual meaning of the word. Cinta Laura's utterance was categorized as a slip of the tongue because Cinta Laura made a mistake in pronouncing the word. Based on the result in Extract 35, Cinta wants to say, "that's a sad truth," but it turns to "that's a sas truth." That slip of the tongue is a mistake that the speaker makes from repressed thoughts released from certain errors. Furthermore, most everyday slips of the tongue are simply the

result of a sound being carried over from one word to the next, as a sound used in one word in anticipation of its occurrence in the following word.

In their study, Clark and Clark (1977) said that silent and filled pause is the most common disruption in speaking, while repeats, unretraced false start, and retraced false start are self explanatory. Furthermore, Khojastehraed (2012) stated using fillers and other hesitation devices in speech is the application of communication strategies. Using these strategies could help compensate for speech processing problems by allowing the speaker to gain time during a speech. This finally leads to effective communication by signaling the continuity of speech by producing appropriate vocal indicators of hesitation. According to Shiffrin (1978), filler functions depend on the speaker's situation. Filler is sometimes used as the breathing pause, as time creating device, as an attention-getting device by the speakers, and also can be used as a mitigating device not to hurt the listener's feelings.

The finding of this research is different from a study conducted by Rizki Oktamalia (2020) analysis of hesitation types in students speaking at STAIN CURUP. In her research, the researcher found nine types of hesitation based on Clark and Clark's theory, not all types of hesitation uttered by the student, and that is only a slip of the tongue. Furthermore, the students hesitate to speak because they are getting difficulty, confused, shy, and reluctant.

The findings of this study are also different from the study conducted by Anugrahini (2019), Hesitation Used by Donald Trump and Margaret Brennan in Face The Nation Program. Her research found Donald Trump and Margaret Brennan frequently produced that filled pause because they did interviews that discussed essential issues in United States. Also, the study by Maulita (2016), which analyzed the hesitation in bilingual child's speech, found that the most dominant hesitation type used is pause.

Based on the result of the study, the researcher can conclude that everyone has different factors in uttered hesitation. It depends on the speaker's situation. When people talk about topics they are anxious about, they tend to produce more pauses and specific other speech errors because that anxiety disrupts the planning and execution processes generally. It may be complicated to deliver the sentence they want to say. Furthermore, when communicating, speakers must make clear when they still have something to say and when they are finished. If they hesitate too long, someone else may take over the conversation. It may push the speaker to use more filled pauses, for example, *uh,* to fill spaces where other speakers might take over. On the other hand, sometimes people tell stories to increase silent pause, perhaps because they are more careful in selecting words or executing more slowly to make themselves more comprehensible. At the level of word selection, hesitations sometimes appear when the speaker needs time to find the right word.

UNIVERSITAS ISLAM NEGERI
ALAUDDIN
MAKASSAR

The speaker would spontaneously use these hesitation devices to gain time while thinking about the following words. While trying to fix the utterance, the speaker used these hesitation devices to help the speaker think, such as silent and filled pauses. While repetition, false start (retraced), false start (unretraced), correction, and interjection are the devices to help the speaker fix and clarify the mistake in choosing a word. Then, stuttering and a slip of the tongue are the difficulties in controlling the speaker's utterance. Furthermore, most of the reason Cinta uttered hesitation is self-explanatory, where Cinta realized there were mistakes in her utterances, so she needed time to correct herself. Besides, the researcher can conclude whether a speaker is a native speaker or not, they could do hesitation in their communication. Because when we speak spontaneously, we must make a plan directly, and we still have difficulty when we utter something because sometimes we can not control our utterances.

Furthermore, the result of this study has a relation with Qur'an Surah Al-Isra (53) : Allah SAW. commands prophet Muhammad SAW. to advise all the people to greet one another and converse with the best and most polite words to avoid misinterpretation or misunderstanding. From the verse above, Islam teaches us as Muslim to converse with the best and most polite word to avoid misunderstanding. Selecting or planning the appropriate word to say may be the way to avoid misunderstanding between people.

CHAPTER V
CONCLUSION AND SUGGESTION

In this chapter, the writer presents conclusions and suggestions. The conclusions present the summary of the research findings related to the formulation and objectives of the research. The suggestions give particular matters suggested to the next researcher.

A. Conclusion

This study is conducted to find types of hesitations uttered by Cinta Laura in youtube channel Powder Room Talk and Asian Boss. The conclusion of this research can be answered by the research question. The researcher found 36 data which are categorized as types of hesitation. The types of hesitation are silent pause, filled pause, repetition, false start (retraced), false start (unretraced), correction, interjection, stutter, and slip of the tongue.

Cinta Laura as a guest star uttered all of the types of hesitation based on theory of Clark and Clark (1977) in her interview or conversation in Youtube Channel Powder Room Talk and Asian Boss. From the discussion above, the researcher can conclude that the most of the reason Cinta uttered hesitation is to corrected her utterances . It indicates that hesitation not only occurs for non native speaker but also for native speaker. Hesitation could help people in speaking because by gaining time and corrects themselve to searching the appropiate word could build effective communication.

B. Suggestion

Based on the result of this research, the researcher gives some suggestion :

1. To the students

The researcher suggest to learn and explore more about hesitation. By understanding hesitations, the student will know that all people definitely get hesitation during speaking, not only for foreign language but for native speaker also.

2. To the next researcher

The researcher suggest for further researcher who wants to conduct research related to hesitation in speaking, to observe another research subject because it will provide more understanding, and also conduct more detail research in hesitation especially the factor of hesitation.

HESITATION UTTERED BY CINTA LAURA AT SELECTED ENGLISH PODCAST

Anisah Nur Wahidah

Alauddin State Islamic University of Makassar, English and Literature, Faculty of Adab and Humanities. H.M. Yasin Limpo Street No. 165

niswa1208@gmail.com

ABSTRACT

Language is the most important thing in human life. By using language, the speaker is expected to convey the information clearly. However, in the process of thinking when delivering ideas, sometimes people made hesitation pause. This hesitation pause is used when people need time to think of the appropriate word to say next that suddenly made the speaker make fillers or even corrected themselves. This study aims to analyze the types of hesitation uttered by Cinta Laura. The research used a descriptive qualitative method using the theory of hesitation based on Clark and Clark (1977). The data were taken from the youtube channel Powder Room Talk and Asian Boss. The result of the research shows that Cinta uttered all of the types of hesitation based on Clark and Clark's theory. There are nine types of hesitation: silent pause, filled pause, repeat, false start (retraced), false start (unretraced), correction, interjection, stutters, and slip of the tongue.

Keywords : *Hesitation, Types of Hesitation, English Podcast, Repetition.*

ABSTRAK

Bahasa merupakan hal yang terpenting dalam kehidupan manusia. Dengan menggunakan bahasa, pembicara berharap dapat menyampaikan informasi dengan jelas. Akan tetapi, dalam proses berfikir saat ingin menyampaikan ide, terkadang pembicara membuat jeda. Jeda ini berguna saat pembicara membutuhkan waktu untuk memikirkan kata yang akan diutarakan selanjutnya yang menyebabkan pembicara membuat jeda atau mengoreksi diri sendiri. Penelitian ini bertujuan untuk menganalisis tipe hesitation yang diutarakan Cinta Laura. Penelitian ini menggunakan metode kualitatif deskriptif dengan menggunakan teori hesitation oleh Clark dan Clark (1977). Data diambil dari kanal youtube Powder Room Talk dan Asian Boss. Hasil penelitian menunjukkan bahwa Cinta menggunakan semua tipe hesitation oleh teori Clark dan Clark. Ada sembilan tipe hesitation : silent pause, filled pause, repeat, false start (retraced), false start (unretraced), correction, interjection, stutters, and slip of the tongue.

Kata Kunci : Hesitation, Tipe Hesitation, Podcast Bahasa Inggris, Repetition.

INTRODUCTION

Language is essential in human life because people use it to deliver their ideas and help people communicate with others in daily life. Language is used in any situation, whether in a formal situation such as a conference, presentation, speech, and so on or in an informal situation such as an interview or communicating with friends or family. Speaking is the way to bring a message from one person to others in order to interact with them, (Abdullah, 2013). Communication is about more than just exchanging information, but it's also understanding the emotion and as well as being able to clearly convey a message, (Yusuf, 2017). When communicate, the speaker expect to convey the information clearly so the hearer can easily understand the meaning of the speaker's utterance. However, communication is not always run smoothly. Goldman-Eisler (1968) observed that in spontaneous speech found, the people she interviewed made pauses from 5 to 65 percent of the total speaking time, and most people paused between 40 and 50 percent of the time. According to Stewart (2008), when delivering ideas in spontaneous speech, people convey their utterances more than just the words they use. This is happening because when ordering some ideas, sometimes the speaker faces difficulties with the ideas in mind and the way to deliver them. In order to find the appropriate word they intended to say, people suddenly produce sounds with no meaning or even repeat their words.

Clark and Clark (1977) mentioned that the most common disruption in speaking is the hesitation pause, either a silent pause or a filled pause. A silent pause is a pause that no speech that the speaker made while speaking, and a filled pause is a pause that the speaker made but filled with er, ah, uh, mm, etc. Although hesitation is disfluency when people speak, it is necessary to use to help the speaker think before speaking as claimed (Wang, 2021) hesitation markers can buy time for the speaker to catch up with their thoughts or be used as a strategy in conversation by the speaker who uses it. Hesitation helps the speaker flow conversation and think of the appropriate word to say.

Furthermore, Using fillers and other hesitation devices in speech is the application of communication strategies. Using these strategies could help compensate for speech processing problems by allowing the speaker to gain time during a speech. This finally leads to building effective communication by signaling the continuity of speech through producing some appropriate vocal indicators of hesitation (Khojastehraed, 2012).

The researcher decided to analyze the hesitation uttered by Cinta Laura as a speaker. The researcher is interested in analyzing Cinta Laura because she is a social activist in Indonesia who is passionate about education and creating awareness on the issues of bullying and violence against women and children. The researcher selected the moment she uses English in some podcast that talks about experiences in her life regarding Forgiveness and Boundaries on the Powder Room Talk and Education on Asian Boss, which can inspire many people based on the comment in the podcast. Furthermore, it is necessary to conduct this research because most people recognize hesitation as disfluency when people speak. In fact, hesitation occurs not only happen when people hesitate in uttered something but the people use hesitation in speaking, which can help people to find an appropriate word in communication while ordering their ideas.

LITERATURE REVIEW

A. Psycholinguistic

Psycholinguistics is concerned with discovering the psychological processes by which humans acquire and use language. Psycholinguistics is also interested in the social rules involved in language use and the brain mechanism associated with language (Gleason & Ratner, 1998).

Psycholinguistics is a branch of the study that combines psychology and linguistics. It is concerned with the relationship between the human mind and language as it examines the processes that occur in the brain while producing and perceiving both written and spoken discourse. How people process this phenomenon in their brain is not only about the description of producing and perceiving language

but about the description of what they have learned as background knowledge to interpret (Aitchinson, 2003).

B. Hesitation

Hesitation is a pause that happens when people speak. According to Clark and Clark (1977) hesitation is the common disruption in communication, either the silent pause, a period of no speech between words, or the filled pause, a gap filled by ah, ee uh, and mm.

Maclay & Osgood (1959) states that the speaker use hesitation to establish control in the conversation to make the listener keep hearing and not disturb the speaker's utterance. The speaker makes hesitation to show that they need time to think and still have control in their utterances. When a speaker is making pauses long enough, he will use some signal (um, er, etc) which says "I'm still in control, don't interrupt me!".

C. Types of Hesitation

According to Clark and Clark's theory (1977), there are nine types of hesitation occurred during speech :

a. Silent Pause

A silent pause is a period of no speech between words. This is a pause where the speaker produces no words during their utterance. A silent pause indicates that the speaker is trying to remember their word or has finished their speech

For instance :

"*I hurt my ankle when I was // 7 years old.*"

b. Filled Pause

A filled pause is a space filled by er, um, ah, during speaking. This filled pause is used when people hesitate with their utterances, followed by some noises in their speech.

For instance :

"*um.. thank you for asking*".

c. Repetition

Repetition is repeat one or more words in a row. Repetition happens when the speaker tries to remember the next word they want to convey or tries to hide their hesitation in speaking. Therefore, the speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener. Totally 89 percent of all words repeated the function word, like articles (the / the speaker), prepositions (at/at the table), conjunctions (or/or the speaker), and pronouns (she/she goes).

For instance :

"*I give you this / this book as a gift*".

d. False Start (retraced)

A false start (retraced) is repeating one or some words before fixing the word. False start occurs when the speaker starts to produce a few words and then

suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word they had said before, which was not suitable for the word the speaker wanted to say.

For Instance :

"*Turn on the stove / the heater switch*".

e. False Start (unretraced)

A false start (unretracted) is correcting a word without repeating the wrong word. When people speak and make some error, they usually repeat it, but in this unretracted false start, the speaker does not repeat it.

For Instance :

"*Turn on the stove / heater switch*".

f. Correction

Correction is like false starts, except that they contain an explicit *I mean, or rather or that* is to mark the phrase as a correction. Correction occurs coincidentally when the speaker forgets some words that need to be delivered to the listener or indicates the words had been misplanned. DuBois (1974) has noted that the correction phrases (that is, or rather, I mean and well) signal distinctly different errors speakers are about to correct :

For instance :

The function of those correction are :

1) That is : reference editing. That is indicate o specify further the referent of *she.*
2) Or rather : nuance editing. Or rather is used to provide a word that slightly closer to what the speaker meant to say.
3) I mean : mistake editing . I mean is used for correcting a mistakein wording, one that would have left the utterance with a significantly wrong meaning.
4) Well : claim editing. Well is used to soften a claim the speaker decides is too excessive.

g. Interjection

Interjection shows that the speaker stops in the middle of their words. The speaker may forget something they wanted to refer to, they may have to think of the appropriate word to say next, or they may be selecting which of several examples they want to say. James (1973) has noted he has selected a specific interjection to indicate why the speaker must stop.

For instance :

The function of those interjection are :

1) Oh : referent selection. Oh indicates that the speaker have to stop and say orange as one of several possibilities he could mention.
2) Ah : memory success. Ah indicates that the speaker had forgotten and finally can remember what Cinta loves.

3) Well : word approximation. Well indicates that the speaker thinks that orange is may the only description of what Cinta loves.

4) Say : exemplification. Say indicates that the speaker think that orange is just an example of what Cinta loves. On the other hand say could mean "let's imagine".

h. Stutters

Gokdag (2017) states that stuttering is an addition of words or sounds or an interruption of the speech, which the speaker can not control it. Stutter is where the speaker says the letter repeatedly, and difficult to continue to the following syllable.

For instance :

"*I shs should do that*".

i. Slips of the Tongue

A slip of the tongue occurs when the speaker pronounces a word that differ from the actual meaning of the word. According to (Freud, 1901), a slip of the tongue is an error that a speaker makes from repressed thoughts that are released from certain errors.

For instance :

"*You did not listen clarefully.*"

RESEARCH METHOD

The researcher used qualitative descriptive method to analyze the data with a view to describe everything related to research topic and to analyze the form of descriptions. This study aims to analyze the types of hesitation uttered by Cinta Laura. There were two objects of research that were used by the researcher; material object and formal object. The material object used in this research was the utterance of Cinta Laura while the formal object was hesitation theory by Clark and Clark. The researcher used the researcher herself as the instrument. After collecting all the data that related to the topic of this research, the researcher focused on analyzing the data using theory by Clark and Clark.

FINDINGS AND DISCUSSIONS

1. Types of Hesitation

Hesitation is a pause that the speaker used when still need time to think the appropiate word to say. After analyzing the data, the researcher finds hesitation types used by Cinta Laura. Clark and Clark (1977) classified hesitation into nine types : Silent Pause, Filled Pause, Repetition, False Start (Retraced), False Start (Unretraced), Correction, Interjection, Stutters, and Slip of The Tongue. After

analyzing the data, the researcher revealed all types of hesitation uttered by Cinta Laura.

a. Silent Pause

According to Clark & Clark (1977) a silent pause is a period of no speech between words. This is a pause where the speaker produces no words during their utterance.

Powder Room Talk

Extract 1 (00:21:45)

*But at the same time we can't blame them the reason being is because a lot of people in this country you know **(…)** live under the poverty level line or are of middle class and below and they live very difficult lives.*

Extract 2 (00:23:13)

*I know what forgiveness means and for me it meant **(…)** pushing uh taking out all the poison in my heart and **(…)** leaving it behind me.*

Extract 3 (00:51:14)

*You know and **(…)** oftentimes as human beings i realize that it's easier to dwell on the sorrows it's easier to stay bitter yes but you need to remind yourself how badly do you want to be happy.*

Cinta Laura's utterances in the podcasts are categorized as silent pauses because Cinta paused during her speaking. Stenstrom (1994) mentions in his study that silent pauses give the speaker time to think about what to utter next. Furthermore, Gilquin (2008) in his study, divided silent pauses into three types: short pauses, medium pauses, and long pauses. A short pause is a pause under one second, which usually occurs when people breathe; this frequently happens to both natives and learners. A medium pause is a pause of one to three seconds, and a Long pause is more than three seconds. Based on the results, Cinta frequently made some medium pauses. The silent pause may be a chance for the speaker to breathe, but as a person who usually speaks too, we can see the difference between when we need to take a breath and when we need time to think.

b. Filled Pause

According to Clark & Clark (1977) states that a filled pause is a space filled by er, um, ah, during speaking. This filled pause is used when people hesitate with their utterances. This filled pause can help the speaker to think during their speech.

Powder Room Talk

Extract 4 (00:05:43)

*After having spent eight years in the U.S **um** there was something that really stuck out to me.*

Extract 5 (01.17.39)
I'm not going to get an apology from those people but let it be because ***um*** *that's something they have to work on that's a growth they have to* ***um*** *experience on their own*

Asian Boss
Extract 6 (17:12)
If you ask me this question growing up I would have been very very confused because you know I had always i had always had ***um*** *an identity crisis.*

Extract 7 (33:44)
So when we rebuilt those schools we had sometimes ***um uh*** *volunteers from Australia teach the teachers and kids english.*

Extract 8 (35:28)
One of our biggest success stories is about a child named ***uh*** *Bonar he went through our educational system got a scholarship to high school and finally attended the university of Indonesia.*

Cinta Laura's utterances are categorized in filled pauses because Cinta made some filled pauses with the words "um" and "uh" while speaking. According to Goffman (1981, p.293), a filler is an element whereby the speaker momentarily needs time to think of the required word to produce.

Fillers as time-creating devices were almost the same as fillers for hesitating purposes. Therefore, the difference was fillers as hesitating purposes referred to as unlexicalized filled pauses, and time-creating devices referred to as lexical filled pauses. Cinta uttered silent and filled pauses here are devices to take time before an increase in information.

c. Repetition

Repetiton is repeating a word or some word. Repetition happens when the speaker tries to remember the next word they want to convey or tries to hide their hesitation in speaking. Therefore, the speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener (Clark & Clark, 1977).

Powder Room Talk
Extract 9 (00:07:22)
Even if things don't change drastically in my lifetime i do believe that there is something i can do at least ***that first step .. um that first step*** *to move in a better direction.*

Extract 10 (00:09:44)
*That's **i wasn't happy i wasn't happy** when all i was doing was trying to strive for perfection.*

Extract 11 (00:57:25)
***If they're not helping if they're not helping** you build yourself up, don't let their opinions or their existence affect you.*

Asian Boss
Excerpt 12 (6.58)
Marie : Did you ever um get any backlash or did somebody criticize you for being too direct in Indonesia? What happened? I'm very curious.

*Cinta : **All the time all the time** i mean i think in the beginning of my career people thought that i was slightly arrogant although i was not trying to be.*

Excerpt 13 (17.12)
*If you ask me this question growing up i would have been very very confused because you know i **had always i had always had** um an identity crisis.*

Extract 14 (23:37)
*You know is a very sad way of looking at this issue because i think we all know that victims are never ever at fault. It is the perpetrator who has a decision to not take the action that they had **decided to take or decided to take.***

Excerpt 15 (29.02)
*We see a lot of fake news and **if we can't discern if we can't discern** facts from fiction then we're in deep trouble.*

Extract 16 (37:51)
*You know even quota internet quota is expensive for most of these kids and you can't expect them to be able to study **on their own because on their own because** some of their parents didn't even finish high school, didn't even finish junior high so you know who's there to guide them.*

Cinta Laura's utterances are categorized in repetition because Cinta repeats her words. The speaker usually repeats the same word where the mistake exists several times until they get the proper word to deliver to the listener. This repetition would not occur if the speaker could think exactly what to say next. This speculation is supported by Beattie and Bradburry (1979), finding that when the speaker tries to avoid silent pauses, the amount of repetition increases substantially.

d. False Start (retraced)

Based on Clark & Clark's theory, a false start (retraced) is repeating one or some words before fixing the word. False start (retraced) occurs when the speaker starts to produce a few words and then suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word they had been saying before, which was not suitable for the word that the speaker wanted to say.

Powder Room Talk

Extract 17 (00:40:48)

*That is when realized **why am i not allowed to be why am i not allowed to have friends**, like having friends who actually understand me is amazing.*

Extract 18 (00:43:15)

*It was when i finally **let go of the perfect trying to be perfect** that i was able to accomplish my mission in helping people or gradually helping people.*

Asian Boss

Extract 19 (30:52)

*A fact that my mom discovered was that in the city of Bogor alone which is a tiny city in West Java there were thousands of schools under horrible condition meaning some of them had **roof roof the tiles of their roof** collapsing or like kids were learning on the floor without furniture and that's obviously bad for **their development right their physical development.***

Extract 20 (36:02)

*So it really shows you that it doesn't matter where you come from **you really you truly** can achieve big things if you're willing to put the work.*

Cinta Laura's utterances are categorized as false start (retraced) because Cinta made some corrections from her utterance by repeating the wrong word before fixing the word. False start (retraced) occurs when the speaker starts to produce a few words and then suddenly pauses in the middle of an utterance because they realize there is a wrong word or pronunciation. After hesitating for a while, the speaker directly corrected the wrong word they had been saying before, which was unsuitable for the word that the speaker wanted to say.

e. False start (unretraced)

According to Clark & Clark (1977) states that a false start (unretraced) is a correction of a word without repeating the wrong word. When people speak and make

some error, they usually repeat it, but in this unretraced false start, the speaker does not repeat it.

Powder Room Talk
Extract 21 (00:04:55)
*Oh i think this is going to be a long story to tell and we will have to really delve into it throughout the show but **the f**.. i had my first big epiphany so to speak in 2018.*

Extract 22 (00:23:13)
*I know what forgiveness means and for me it meant **pushing taking** out all the poison in my heart and leaving it behind me.*

Asian Boss
Extract 23 (09:38)
*I'm not gonna lie hurt me for several years because at that age the tender age of 13 as I said I didn't really truly know who i was yet and **i felt i kept I I I would** often ask myself what have I done wrong why are people making fun of me.*

Extract 24 (46:45)
*If korea where they **could could South South** Korea with you know a country with twenty million people can have Kpop become a global phenomenon there's no reason why Indonesia can't have something equivalent to that.*

Cinta Laura's utterances above are categorized as a false start (unretraced) because Cinta did not finish the first utterance, yet she started producing the next utterance. The result of this research is suitable with the explanation in the second chapter, which states that hesitation happens when they are not sure what they will say is the correct words (Nair, 2000).

f. Correction

Correction is how speakers correct themselves during their utterances by using correction phrases (that is, or rather, I mean, well) to explain that they have made a mistake Clark & Clark (1977).

Powder Room Talk
Extract 25 (00: 38.46)
*Until I entered the entertainment industry and then things got really really rough you know **I mean** imagine in that you know the reason why i think i had a victim mentality for so long is because i experienced what i experienced at such a young age.*

Extract 26 (1.00.58)
*Obviously as children **i'm sure well maybe i'm not sure** but like i personally have had problems with my parents for example don't get me wrong i love them so much we're close i see them two to three times a year because they live in Bali.*

Asian Boss
Extract 27 (10:22)
*You know I feel like since the start of my career people always viewed me as an adult, they didn't realize **i mean** you know i'm only in my 20s now and i've been in the industry for 13 years people never gave me the chance to make mistakes as a little girl.*

Extract 28 (36:27)
*Sometimes i look back and i'm like how did we build11 schools over 4.000 children has gone through our education system. So yeah **i mean** it's not just me though like I need to thank my family too because they also put a lot of hard work into what we've done.*

Extract 29 (37:19)
*You can't expect these kids to study off of a little android phone you know it's hard **i mean** it's even hard for privileged kids anywhere in the world to study you know from their laptops you know kids have short attention spans you know you need it you need a teacher to be able to guide these kids.*

Correction is the way speakers correct themselves during their utterances. James (1973) stated that there are correction phrases that signal why speakers are interrupting themselves, such as (that is, or rather, I mean, well). Cinta Laura's utterances above are categorized as correction because Cinta corrects using a correction phrase.

g. Interjection

James (1973) has noted, he has selected a specific interjection to indicatethe reason why the speaker have to stop. “Oh” : referent selection, “ah” : memory success, “well” : word approximation, “say” : exemplification.

Powder Room Talk
Extract 30 (00:58:08)
*Like I just pretend like they don't exist and if the.. if the **let's say** they're still on my social media as i say i mute them and the less i see of them on my feed in my life i forget they’re exist.*

Asian Boss

Extract 31 (38:24)
Marie : It's very honorable even that the fact that you're donating some of your own money, i don't think you can see that from other like well like people who are well off?
*Cinta : I mean yes it makes me very sad because obviously the richin Indonesia are extremely rich and donating **let's say** even only a thousand dollars a month would mean absolutely nothing to them because a thousand dollars can be spent on a dinner.*

Interjection shows that the speaker stops in the middle of their words. There are particular interjection phrases to signal why people had to stop (oh, ah, well, and say). The speaker may have to think of the appropriate word to say next, they may forget something to say or select several examples they want to say (Clark and Clark 1977). Cinta Laura's utterances above are categorized as Interjections because Cinta Laura uses interjection phrases to make an example of her argument. Sometimes, by telling or giving an example of the ideas we convey can help people to imagine what we are trying to say. In this case, giving the interjection phrases to the utterance help the speaker's sentences to be understandable to the interlocutor.

h. Stutters

Gokdag (2017) state that stuttering is an addition of words or sounds or an interruption of speech that the speaker can not control. Stutter is where the speaker says the letter repeatedly, and difficult to continue to the following syllable. Bloodstein (1995) stated that stuttering is the breaking up of speech fluency with pausing or specific interruptions

Powder Room Talk
Extract 32 (00:08:19)
*So you know i've always **aa.. ii..** i've always been around very strong independent women and i felt like indonesia needs more role models that make women believe that they can achieve whatever they want in life.*

Extract 33 (00:09:55)
*I wasn't happy when all i was doing was trying to strive for perfection and strive for **a..a** a rank.*

Asian Boss
Extract 34 (09:38)
*You know that i'm not gonna lie hurt me for several years because at that age the tender age of 13as i said i didn't really truly know who i was yet and **i felt i kept I I I would** often ask myself what have i done wrong why are people making fun of me.*

Extract 35 (37.20)

*What makes me really scared is that you know unfortunately Indonesia still has a huge digital gap and you can't **ex ex expect** these kids to study off of a little android phone.*

Cinta Laura's utterance above is categorized as Stutter because Cinta stutters when speaking. Stutters are when the speaker says the letter repeatedly, and difficult to continue to the following syllable.

i. Slip of The Tongue

Clark & Clark (1977) in their study, says that a slip of the tongue occurs when the speaker pronounces a word differently from the actual meaning of the word.

Asian Boss

Extract 36 (11:30)

*And **that's a sas that's a sad** truth because why do i need to prove myself in order for people to respect me or appreciate me.*

Cinta Laura's utterance was categorized as a slip of the tongue because Cinta Laura made a mistake in pronouncing the word. Based on the result in Extract 35, Cinta wants to say, "that's a sad truth," but it turns to "that's a sas truth." That slip of the tongue is a mistake that the speaker makes from repressed thoughts released from certain errors. Furthermore, most everyday slips of the tongue are simply the result of a sound being carried over from one word to the next, as a sound used in one word in anticipation of its occurrence in the following word.

CONCLUSION

This study is conducted to find types of hesitations uttered by Cinta Laura in youtube channel Powder Room Talk and Asian Boss. The conclusion of this research can be answered by the research question. The researcher found 36 data which are categorized as types of hesitation. The types of hesitation are silent pause, filled pause, repetition, false start (retraced), false start (unretraced), correction, interjection, stutter, and slip of the tongue.

Cinta Laura as a guest star uttered all of the types of hesitation based on theory of Clark and Clark (1977) in her interview or conversation in Youtube Channel Powder Room Talk and Asian Boss. From the discussion above, the researcher can conclude that the most of the reason Cinta uttered hesitation is to corrected her utterances. It indicates that hesitation not only occurs for non native speaker but also for native speaker. Hesitation could help people in speaking because by gaining time and corrects themselve to searching the appropiate word could build effective communication.
