ACKNOWLEDGMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Alhamdulillah rabbil'amin, I would like to express my highest gratitude to Allah SWT for the blessing, love, opportunities, health and mercy for me so that I as the researcher can complete this research. Also never forget to send Salam and Sholawat upon our prophet Muhammad SAW. This research entitled "Deixis in "Sam and Cat" American Teen Situation Comedies" is submitted as the final requirement of S-1 degree in English and Literature Department.

I am as the researcher fully realise that there are many individuals who have supported me in finishing this research. Therefore, I would like to give my great thanks to:

1. My endless sincere gratitude toward both my beloved parents, A. Ambo and Hj. Rafida for giving birth to me and for their patience, love, guidance, unlimited sincere prayer for my succesfulness, and for their support throughout my life and also for my brother Muhammad Akbar, my sisters Nur Afdaliah and Nur Fitri.
2. The Rector of UIN Alauddin Makassar, Prof. Hamdan Juhannis, M.A., Ph.D. and the Dean of Adab and Humanities Faculty, Dr. Hasyim Haddade, S,Ag., M. Ag. and his staff for their advice during the period when I studied at the university, especially in Adab and Humanities Faculty. The Head of English and Literature Department, Dr. Jumharia Djamareng, M.hum. and secretary of

English and Literature Department Syahrani Junaid, S.Pd., M.Hum. for the continuous encouragement.

3. My sincere gratitude for my supervisors Dr. Faidah Yusuf, S.S., M.Pd. and Dr. Muhammad Taufik, S.S., M.Hum. for their patience, motivation, support, and immense knowledge. Their guidance helped me in all the time of writing this research. Besides my supervisors, I would like to thank to my examiners Dr. H. Dahlan, S.S., M.Hum. and Dr. Umar Thamrin, S.Ag., M.Hum., M.A. for their question, correction and suggestion until completion of this research.
4. My gratitude to all the lecturers of Faculty of Adab and Humanities who have taught and educated me during my study in UIN Alauddin Makassar.
5. My special thanks to my friends or my classmates Nur Faika Wahid, Nafikah Aisyah Yusuf, S.Hum, Astri Anwar Kasim, S.Hum, Rika Nurjannah, S.Hum, Nur Qalby, S.Hum, Ahmad Saiful Ismail, Nurlinda Abbas, S.Hum, A. Nurul Mawaddah, S.Hum. Khaerunnisak Kasmar, S.Hum, Ryza Mauryz Khordi, S.Hum, Aswir Soleman, S.Hum, Almuhardi, Ahmad Saiful Ismail. And all member of AG-3.4.

Title : Deixis in “Sam and Cat” American Teen Situation Comedies
Consultant I : Dr. Faidah Yusuf, S.S., M.Pd
Consultant II : Dr. Muhammad Taufik, S.S., M.Hum.

This research discusses the Deixis in Sam and Cat American Teen Situation Comedies. This research focuses on finding the types of deixis and the impact of using deixis for humor in Sam and Cat American Teen Situation Comedies from 1 to 3 episodes. The data were analyzed using the descriptive qualitative method. The theory used in this research is theory of Levinson (1983) and Raymond (1980). The main instrument of the research is note taking. The findings show all types of deixis: person deixis (first person, second person, and third person deixis), time deixis, place deixis, social deixis, and discourse deixis. There are five types of deixis that have significant impacts: person deixis (first person, second person, and third person deixis), time deixis, place deixis, social deixis, and discourse deixis.

Keywords: *Pragmatic, Deixis, Humor, Comedies*

CHAPTER I

INTRODUCTION

A. Background

An important part of everyone's ability to interact and communicate in human daily life is language, because humans are social creatures who need interaction in their daily lives. According to Chaturvedi (2014), the language that surrounds us defines our personality, determines our social behavior, supports our societal system, indicates our thoughts and feelings, and also provides us a platform to share our ideas, cooperate, and refine our development process. Brown (2000) also stated that language is a system of spoken or written symbols that can be used as a tool to communicate with each other in a human community. "A system of human communication that consists of the systematic arrangement of sounds into bigger units, such as morphemes, words, phrases, and utterances," was said by Richard and Schmidh (2010) about language.

The important of language state is also mentioned in the Holy Qur'an, in surah Ar-rum verse 22, as follows:

وَمِنْ آيَاتِهِ خَلْقُ السَّمَوَاتِ وَالْأَرْضِ وَأَخْنِافُ السِّنِّكُمْ
وَالْوَنُكُورِ إِنَّ فِي ذَلِكَ لَآيَاتٍ لِّلْعَالَمِينَ ﴿٢٢﴾

Meaning:

"And among His signs are the creation of the heavens and the earth and the diversity of your language and colors." Indeed, in that are signs for those of knowledge".

The verses that explicitly discuss universal language are about God's creation, not human creation. Apart from that, how to use this verse in your daily life is to appreciate, maintain, be grateful for, and take advantage of God's other creations, including language. As a result, the verse's main theme is that any language in the world is a creation of Allah and must be researched and maintained.

Sometimes in English, the most difficult part of communication is when the listener or addressee is unable to understand or get the ambiguous utterances about what the speaker said about when, to whom, and where. Without context, it is difficult for the listener to understand the meaning of what the speakers said clearly. So that's why context is important to understand the meaning and avoid miscommunication between the speaker and listener. The study of meaning in relation to context is called pragmatics (Birner, 2012). According to Cruse (2000), such a scope for pragmatics includes the study of deixis, presupposition, reference, entailment, and speech acts. Deixis is a clearly defined form of referencing that is tied to the speaker's context, with the most basic distinction between deictic being near the speaker and away from the speaker, as said by Yule (1996). Deixis itself is very related to the context, and with a

different context, the reference of the deixis in question will also be different. Understanding context is very important in interpreting a speech because it is a framework that can provide feedback on a speech, as said by Hyland (2019). Context is therefore a frame that surrounds feedback and provides resources for its appropriate interpretation.

Deixis is a form of demonstrative pronouns and deictic adverbs that indicate where something is or where someone is pointing. For example, this and that indicate something is close to the speaker's mouth, while here and there indicate something is far away. The categories can be used to analyze the language because sometimes the listener or addressee doesn't understand what the speaker means. So, deixis can make language easier to understand. Deixis is a literary device found not only in everyday life but also in literature, for example, in comedies.

Levinson's (1983) theory includes five categories of deixis: person deixis, time deixis, place deixis, social deixis, and discourse deixis. Person deixis has three parts: the first person (I), the second person (You), and the third person (he/she/it). The researcher has used the theory to analyze the type of humor and its impact in Raymond's (1980) in Sam and Cat American Teen Situation Comedies.

The researcher is interested in deixis because we actually use it in our daily lives. However, some of us are unaware that it is part of our conversation. Aside from that, there are still problems in communication for those who are aware of deixis but

do not recognize its forms. As a reason, deixis is employed to convey the meaning of speech when the listener or reader is aware of who, where, and when the speech is delivered, and now many people enjoy jokes and tell people around them by using deixis. The researcher chooses situation comedies that have genres about daily life such as work, school, and family life presented in humorous ways that make it easier to understand the deixis in Sam and Cat American Teen Situation Comedies, which have a storyline about family, friends, and school just like in our real lives, and explains the deixis by showing the reader about deixis that exist in Sam and Cat American Teen Situation Comedies. Besides that, Sam and Cat American Teen Situation Comedies make us nostalgic with the atmosphere and the situation of the comedies.

B. Research Question

Based on the explanation in the background section above, the researcher has developed the following research question.

1. What types of deixis are found in Sam and Cat American Teen Situation Comedies?
2. How does deixis impact the humor in Sam and Cat American Teen Situation Comedies?

C. Objective of The Research

The following is the objective of this, followed by the researched question mentioned above.

1. To identify types of deixis that found in Sam and Cat American Teen Situation Comedies.

2. To identify the deixis impact of humor in Sam and Cat American Teen Situation Comedies.

D. Significant of The Research

The findings from the research were expected to benefit the students and others in the following ways:

1. Theoretically

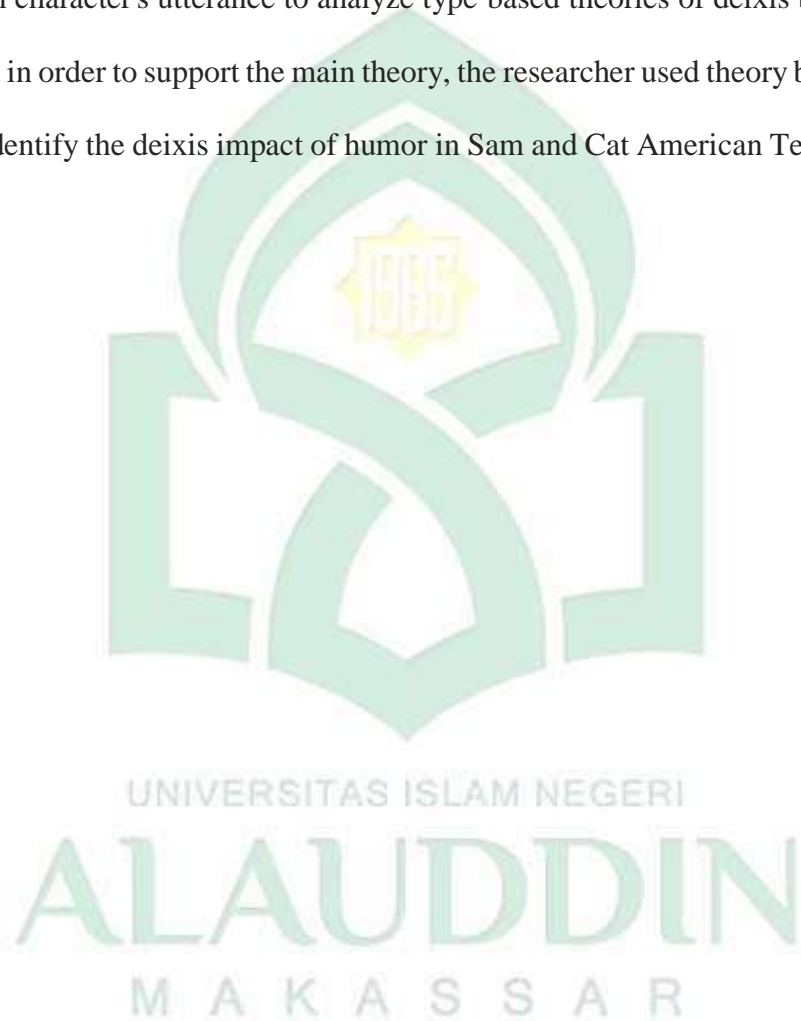

The researcher hopes that the research will assist students and readers in furthering the development of linguistic theory in the field of pragmatics related to deixis in situation comedies. Especially, person deixis, time deixis, place deixis, social deixis, and discourse deixis are used by following the theory presented by Levinson (1983).

2. Practically

The researcher hopes that the research can be a reference or source of information for future researchers who would conduct similar research. The students and readers can learn more about deixis by reading the research and also realize it in our utterances in daily life

E. Research Scope

The researcher has limited resources for the research problem. The scope of the research in situation comedies. Therefore, the researcher selected 3 videos and focused on the main character's utterance to analyze type based theories of deixis by Levinson (1983), and in order to support the main theory, the researcher used theory by Raymond (1980) to identify the deixis impact of humor in Sam and Cat American Teen Situation comedies.

CHAPTER II

REVIEW OF LITERATURE

A. Preview Study

The researcher can learn about previous studies that have some similarities and connections to the current research. Previous studies can also help the researcher conduct research. As a result, the researcher used some research below to develop ideas and a deeper understanding of deixis itself, and the the reasercher also conducted the research better than before.

The first is a study that analyzes the deixis trough in a movie script, conducted by Nurjannah in her thesis, *A Deixis Analyze of Moana Movie Script* (2018). This research focuses on George Yule's (1996) theory. The study was intended to investigate deixis based on the formulation of the research problem as follows: what types of deixis are found in the Moana Movie Script? And what is the dominant deixis used in the Moana movie script? The aims of this study are to investigate the kinds of deixis found in the Moana Movie Script and the dominant deixis used in the Moana Movie Script. This research used the qualitative descriptive method to conduct the data collection from the movie script, and the data analysis was done using a pragmatics approach. The result of this research showed that there are three types of deixis using George Yule (1996), such as person deixis, spatial deixis, and temporal deixis. Deixis person: I, me, my, myself; we, us; you, your; he, him. She, they, their, them, etc. The person deixis is the one who reached a greater level than another, which means it was used

1,041 times. The details of person usage are for the first person 519 times, the second person 311 times, and the third person 211 times. The next spatial deixis is: here, there, and that. Spatial deixis was used 105 times in this research. The last is temporal deixis: now, then, sometimes, etc. Temporal deixis was used 26 times in this research. The most dominant of all deixis was person deixis, which consisted of 1,041 deictic expressions.

The previous research is similar to the current research that studies deixis using a pragmatics approach. In contrast, the recent study identified deixis by using George Yule's theory in the Moana movie script, while the current study will focus on five types of deixis based on Levinson's (1983) theory in a different subject, Sam and Cat American Teen Situation Comedies.

Next, research on deixis was conducted by Nurmaharani (2021), with the title "Analysis of Deixis in The Frozen II by Jennifer Lee Movie." This research used a qualitative approach. She classified the deixis based on the Levinson theory that was found in the Frozen II movie by Jennifer Lee. The result of the study is that personal deixis is the most dominant deixis in the movie; the researcher found a lot of deictic expression in the movie. Such as person deixis, that is, I, me, my, mine, myself, we, us, our, ourselves. And then, the second person plural is you, your, yourself. The third person plural has he, she, it, her, his, its, they, and them. The researcher found 1056 person deixis, the details of which are: first person deixis (582), second person deixis (392), and third person deixis (171). Place deixis that have here, there, where, in, and also the name of the place, like an enchanted forest. The found 91 of place deixis. And

then, time deixis; we have now, tomorrow, morning, and tonight. The researcher found 82 time deixis. Then discourse deixis have this, that, well, so. Found spoken 230 times. The last, The researcher found that there are 50 times social deixis have a king, buddy, queen, and father.

The current study has similarities with the previous study, which focused on deixis using a pragmatics approach and also Levinson's (1983) theory. Meanwhile, different objects and one of the research problem that Nurmaharani analyzed was the dominant deixis in her research, while this research will analyze the impact humor of deixis types that are found in Sam and Cat American Teen Situation Comedies.

The last related research is Rahmi (2018) with her title A Pragmatic Study on Deixis in The Song's Lyric of the Deen Squad Album. The researcher has come to the conclusion that the purpose of this study is to identify the types of deixis in The Song's Lyric of the Deen Squad Album and determine the dominant and also reference meaning of each deixis on Allan Cruse's theory. As a result, found that types of deixis like person deixis, spatial deixis, temporal deixis, and social deixis are used in the songs. The four types of deixis occur in every song on the Deen Squad album, and person deixis is the most dominant.

The analysis research above conducted research using the same method as current research, which is the qualitative descriptive method and uses a pragmatic approach. The analysis research above conducted research on different objects, namely Sam and Cat American Teen Situation Comedies, and different theories by Levinson (1983). The specific difference between the three previous studies above and this

research is in the formulation of the second problem concerning the impact of deixis on humor in Sam and Cat American Teen Situation Comedies.

B. Review of Conceptual Framework

1. Pragmatics

Pragmatics is one of the related branches of linguistic study that is conducted with the meaning as communicated by a speaker and interpreted by a listener, as concluded by Yule (1996). According to Yule (1996), pragmatics is the study of contextual meaning. This type of study necessarily involves the interpretation of what people mean in a particular context and how the context influences what is said. It requires a consideration of how speakers organize what they want to say in accordance with who they are talking to, where they are talking, and under what circumstances.

The theory of pragmatics describes the relationship between language and context. It is based on the work of Levinson (1983) and others, including a discussion of presuppositions, speech acts, conversational implicatures, aspects of discourse structure, and deixis.

The researcher concludes that pragmatics is the study of speakers' intentions toward the listener, which relates to the context of how the language is used. It can convey about people's intended meanings, their purpose or goal.

2. Deixis

Deixis is a linguistic term derived from the Greek word *deiktikos*, which means "pointing." It refers to linguistic expressions used to achieve a thing pointed to directly, for instance when we say "it" to show something in context (Yule 1996). According to Yule (1996), deixis is divided into three types: person deixis (me, you), spatial deixis (here, there), and temporal deixis (now, then).

Levinson (1983) divides deixis into two types: major deixis and minor deixis. Person deixis, time deixis, and place deixis were categorized as major classes. While what is included in the minor class is social deixis and discourse deixis, which people rarely use now days. Deixis is an important field studied in pragmatics, semantics, and linguistics. The term deixis essentially concerns the ways in which languages encode or grammatically feature the context of the utterance or speech event, and it also concerns the ways in which the interpretation of utterances depends on the analysis of that context, as Levinson (1983) explained.

Based on the previously stated information, the researcher concludes that deixis is a word that refers to something that is always moving or changing depending on the context of the speaker. The researcher's theory relies on Levinson's (1983) classification of types of deixis: person deixis, time deixis, place deixis, social deixis, and discourse deixis.

a. Person Deixis

Person deixis concerns encoding the participants in the speech event in which a given utterance is delivered. The category of personal deixis can be divided into three parts:

1) First Person

First person is the grammaticalization of the speaker's reference to himself. Meanwhile, first person deixis is a deictic reference that relates to the speaker or both speakers in a group, and it is articulated in a singular and plural pronoun. I, me, myself, and my are singular pronouns. we, us, ourselves, our, and ours are plural pronouns. For example, I can't sleep yet.

In that case, the word "I" refers to the speaker, and it is expressed as a single pronoun. Use the deictic "I" to point to the speaker himself in the sentence.

2) Second Person

Second person, a deictic reference to a person defined addressee (you, yours, yourselves). When the context is required to determine the reference, the word "you" can be used both deictically and none deictically. When the reference is general rather than to a particular identifiable person. For example, I know you are the thief.

The word "you" is referring to the addressee it can be categorized into the second person of deixis.

3) Third Person

The encoding of a reference to a person or entity who is neither the speaker nor the addressee of an utterance is known as third person deixis. Third person deixis identifies the addressee (he/his, she/her, and they/them). For example, A: What is Superman doing up there? B: He is learning to fly.

Superman is not the speaker or addressee in that dialogue, so the word "he" refers to him. As a result, it might be classified as third person deixis.

b. Time Deixis

Time deixis makes reference to specific stages of communication. So it is important to be mindful of when a statement occurs versus when a listener hears it. Another name for time deixis is temporal deixis.

Time deixis is easy to know if the speaker and addressee share the same understanding of the time of the conversation and the course of the conversation and the purpose of the conversation. In time deixis there is also the reference of participant role and divided into two: the moment utterance or coding time (CT) that focus on the speaker and reception or receiving time (RT) is one the addressee. The usage of CT

depends on the speaker on the three tense past (event complete before CT), present (event whose includes CT) and future (event succeeding CT). For example, she's always ready for tomorrow. According to Curuse (2000) time deixis can be found is a variety of words including now, yesterday, tomorrow, today, months, afternoon and so on. For example: You should have been here yesterday!

The terms "yesterday" relate to a difine to the specific time. As a result, it can be classified as time deixis.

c. Place Deixis

Place deixis or spatial deixis is the position or orientation of an entity relative to the speaker. Place deixis refers to the ways people talk about where something or someone is relative to their own location. As for place, it can be deixis if the place can be seen from the location of the people who are communicating in the speaking activity. Place deixis is conveyed by demonstrative pronouns like this and that, and by demonstrative adverbs such as here and there.

Cruse (2006) points out that the spatial deixis word shows the position of the speaker in space. Adverbs here and there are most essential spatial deictics, usually expounded in this, these, there, here, that, and those. The adverbs of place "here" and "there" mean close to the speaker's location (proximal) and away from the speaker's location (distal), respectively. For example, she loves living here.

The preposition "here" refers to a specific place within an utterance; use demonstrative adverbs. As a result, it can be classified as place deixis.

d. Social Deixis

Social deixis concerns the way a sentence reflects or establishes the social status of the speaker or the context in which the speech act occurs. It means refer to the social characteristics or distinctions between the participant or referents in a speech event. There are two basic social dimensions, relational and absolute. Relational concerns surround the honorifics usage between the speaker and its referent, addressee, bystander, and setting. While absolute focuses on the authorized speaker and authorized recipients, a discourse Here are some examples of titles in English that show respect for exalted people, including such forms as Your Honor and Your Royal Highness. For example, boss, can you give me my salary?

The word "boss" is a deictic expression; it is referring to the relationship between the boss and his employee. So, the word "boss" includes the social deixis.

e. Discourse Deixis

A term that refers to particular portions of a discourse deixis refers to the way we express ourselves in conversation, including the way we talk about a particular conversation. Discourse deixis is the use of that and this; the use of this can be used to refer to a forthcoming portion of the discourse, and the use of that can be used for a

preceding portion. In conclusion, discourse deixis contains the speaker's utterance in the speech event. For example, A says, "I will do an examination this morning." B says, "Good luck with that!"

The word "that" refers to the utterance that is spoken before it can be categorized as discourse deixis.

3. Context

The central topics of linguistic pragmatics are those aspects of meaning that are dependent on context, as said by Cruse (2006). According to Yule (1993), "context" is an action that means how person, time, and place are possible to produce a referent that always refers to someone or something.

Based on the explanation above, the researcher concludes that context is any information needed for interpreting the utterance or sentence, which consists of person, place, or thing, although in the spoken or written forms, that is the important factor to complete the meaning of the utterance or sentence.

4. Humor

The word humor comes from the Greek language, meaning "body fluid." Humoral medieval medicine knowledge taught fluid balance in the human body, which controls human health and emotion. According to Raymond (1980),

humor is a cognitive experience in which the speaker's only intention is to provoke laughter in an audience whose main purpose is to provide entertainment for them. In general, humor is often used to lighten up a difficult or stressful situation and brighten up the social atmosphere. It is considered by many to be a pleasant and positive experience, so it is reasonable to assume that the humor may have a positive physiological effect on the body.

5. Sam and Cat Situation Comedies

Sam and Cat is an American teen situation comedy that is the sequel to *Clarly and Victorious*, which is the subject of this research. The main characters of this situation comedy are Sam, Cat, Dice, and Nona. This comedy has 36 episodes with a duration of 23 minutes in each episode. For your information, situation comedies, or sitcoms, are half-hour mini-stories starring the same characters on a weekly basis, based on Mendrinós (2004). Taflinger (1996) states that there are three types of sitcoms: actcom (action comedy), domcom (domestic comedy), and dracom (drama comedy). The researcher downloaded the object Sam and Cat teen situation comedies from the Netflix app. Netflix is a platform on internet connected devices that makes it easy for users to watch a wide variety of content, such as movies, dramas, anime, TV shows, etc. The explanation of Netflix above was obtained by the researcher from trusted sites.

Since ancient times, comedy has been presented in various forms such as theater, books, plays, banter, and opera. At this time, people can find and enjoy comedy presented in various media such as the internet, newspapers, movies, television shows, apps, and more. Henderson (1993) said that comedy is "art, discourse, or work with a general purpose to be funny and entertain the audience by persuading them to laugh at them." Besides tragedy, comedy is one of the two genres in drama. Comedy can be distinguished into two main types:

a. Visual Comedy

Visual comedy is a type of comedy that delivers its punch to the audience through visual contact or non spoken action. An example of visual comedy would include body language, facial expressions, and intentionally stupid actions.

b. Spoken Comedy

Spoken comedy is commonly performed using spoken language. Examples of spoken comedy included jokes, word play, language accents, and song lyrics.

Based on the source and context of humor, comedy is classified into multiple genres, including:

1. Blank Comedy

A form of comedy that deals with disturbing and sometimes unacceptable issues such as drugs, alcohols, war, and horror.

2. Blue Comedy

A form of comedy that deals with the sensual of gender and race issues.

3. Musical Comedy

A form of comedy is mostly derived from music singing and dancing.

4. Satire Comedy

Comedy relies on headlining important news and current affairs as well as offensive insults directed at the audience or other performers.

5. Insult Comedy

Insults comedy consists mainly of offensive insults directed at the audience or other performers.

6. Improvisational Comedy

A form of comedy in which the performed do not have predetermined lines and instead create their own material on the spot.

7. Wit Comedy

Wit comedy also known as wordplay, it is a form of comedy based on clever manipulation of language.

8. Cringe Comedy

A form of comedy involving inappropriate use of words or actions to achieve humor.

9. Parody Comedy

Parody and homage are both types of humor that involve using existing works as a basis for jokes, but they differ in where they draw their humor from.

Based on the types of genre above, Sam and Cat American Teen Situation Comedies are included in spoken comedy because of the language spoken and word play in the main character's utterance. The reason the researcher chose Sam and Cat teen situation comedies is because each drama has a purpose, and sometimes that purpose is overly dramatic. In Sam and Cat the purpose is dramatic, but it's still related to our daily lives.

CHAPTER III

RESEARCH METHODOLOGY

In this part, the researcher presents the research methodology. The research method, data source, research object, research instrument, data collection procedure, and data analysis procedure are part of methodological activities.

A. Research Method

The researcher used qualitative descriptive as the method. Qualitative-descriptive analysis is primarily described as a method for identifying, analyzing, and reporting on data (Braun and Clarke, 2006). Frankel and Wallen (2009) state that qualitative descriptive research is a method that focuses more on words than numbers and that there is no statistical procedure.

In conducting the research, they had no relation to numbering or calculation. That way, the qualitative descriptive method is selected by the researcher.

B. Data Source

The data for the research is Sam and Cat teen situation comedies, season 1, and focuses only on episodes 1 through 3 of the total of 36 episodes with a duration of 23 minutes in each episode, which are published in the Netflix app (www.netflix.com). The researcher used the transcript from three episodes whose utterances are from the

main characters in those episodes of Sam and Cat to obtain the data. Every utterance had been written by the researcher to assure that the transcript is exactly the same as what the main characters said in those episodes.

Each selected episode has a different title: the first is Pilot, the second is Favorite Show, and the third is The Brit Brats.

C. Research Instrument

The instrument of this research is the researcher herself. The research has a main role in collecting and analyzing the data, and the researcher used note-taking to mark the utterance in the transcript and duration of the data relevant to the theory. Moreover, a supporting instrument such as a data sheet had been used by the researcher to help her characterize it in a way that was easier to understand.

D. Data Collection Procedure

To collect the data, the researcher conducted some procedures as follows:

1. The researcher downloaded all selected episodes of Sam and Cat American Teen Situation Comedies on Netflix
2. During the watching process, the researcher marks some data that relates to the focus of the research.

3. The researcher classified the types of deixis that have been found based on Levinson (1983).
4. The researcher analyzed the data and noted down all of the data that he had found.

E. Data Analysis Procedure

Following data collection, the researcher analyzed the data as follows:

1. The researcher defined the types of deixis found in the video by using Levinson's (1983) theory.
2. The researcher defined the deixis impact of humor found in the video by using Raymond (1980).
3. The researcher concluded the analysis based on the results of the research.

CHAPTER IV

FINDING AND DISCUSSION

In this chapter, the researcher presents two sections, which are findings and discussion about deixis analysis and the deixis impact on humor that the researcher found in Sam and Cat American Teen Situation comedies. The aim of this chapter is to answer the research question based on the research problem that was described in Chapter 1.

A. Finding

In this section, the researcher presents the data taken from the main character's utterance in three episodes of Sam and Cat American Teen Situation Comedies. It was recognized and analyzed based on Levinson's theory of deixis into five categories: person deixis, time deixis, place deixis, social deixis, and discourse deixis. A related discussion of humor by Raymond (1980) will be found in this section as well. The following data were found by the researcher:

Types of deixis and deixis impact of humor are found in Sam and Cat American Teen Situation Comedies.

Note:

PD: Person Deixis

PID: Place Deixis

TD: Time Deixis

DD: Discourse Deixis

SD: Social Deixis

Table types of deixis found in Sam and Cat American teen situation comedies that have impact humor.

Episode	Utterance	Type of Deixis	Analysis
1. Pilot	You a cop?	PD	"You" as the second person part of the deixis person type who was asked by the first person.
	I Will take a jumbo	PD	"I" as the first person part of the deixis person type and as the speaker
	And why is there a battery in my buritto ?	PD	"In" is how the place name deixis refers to the place.
	Whoa! Ha haha! Oh My Gosh! That was so much fun!	DD	"That" as the discourse deixis, refers to a previous incident.
	That's you and me. From swimming in garbage.	<ul style="list-style-type: none"> • DD • PD • PD 	"That" refers to the discourse deixis, "you" refers to the hearer as the second person in person deixis type, "me" refers to the first person deixis, and "in"

			refers to place as place deixis.
	No nononono. This Is celebrity hair. See, I got hair from Will Smith, Katy Perry, I got Ryan Seacrest	PD	"This" as place deixis refers to the type of hair that the speaker has.
	Okay, we 'll try that first! You pump his legs, and I'll bounce on his chest!	<ul style="list-style-type: none"> • PD • PD • PD 	"We" as the first person plural refers to two persons as the speaker and the hearer, "on" refers to the place as place deixis, and "his" refers to the third person in person deixis.
	Oh. Did she go to the gun range?	PD	"She," as the third person singular, is the subject of the plural pronoun.
	Not anymore. I'm tired of those rotten kids putting me in sacks! Peeing everywhere! It's time for me to move to Elderly Acres.	<ul style="list-style-type: none"> • DD • PD 	"Those," as discourse deixis plural pronoun from that. The word "move to" includes place deixis. It points to the place where the speaker wants to live.

	No! I love this place Look at that guys! He is single and he is hot.	<ul style="list-style-type: none"> • DD • PD 	"This" and "That" include discourse deixis. He is the third person deixis.
2. Favorite	Ah! Good morning.	TD	'Good Morning' as time deixis that refers time in the morning
2. Favorite Show	Why'd you do that ?	DD	'That' refers to the previous situation as the discourse deixis
	Look. I took two rib bones and made them into a weapon. Hyaaaaah!	PD	'I' refers to the speaker as the first person and 'Them' as the third person plural
	Ewe, Bob, you're drooling on my sweater.	<ul style="list-style-type: none"> • PD • PD 	'You' refers to the hearer as the second person and 'On' as place deixis refers to the place
	My boss wants all this stuff to go to this address.	SD	'Boss' as the social deixis that have high position
	I did this	<ul style="list-style-type: none"> • PD • DD 	"I" refers to the speaker as the first person 'This' as discourse deixis
	You guys wanna break some bootles?	PD	"You" as second person that refers to the listener.
	Ooh. Thank you. I'm going away now	TD	"Now" refers to time deixis.

3. The Brit Brats	I am the master of prank phone calls	SD	“Master” as the social deixis refers to someone like leader
	I'm his new manager.	SD	“Manager” as the social deixis who have important position
	Did something poop on your forehead?	PD	“On” as place deixis refers to a location and “Your” as the second person from possessive pronouns you
	The Goat sneezed in my face	PD	“In” as place deixis refers to place

Based on the table above, the researcher will mention all of the types of deixis data that have been found, as follows:

Datum 1

First episode “Pilot” (00.26)

Sam: **You** a cop?

The utterance said by Sam There was a second person, namely "**you.**" It referred to the addressee in the utterance, which is the food worker. It was when Sam stopped her motorbike on the side of the road to buy some food, and the food worker recognized her, but before answering, she gave a question back to him.

Knowing how the deixis impact of humor works. When the question is asked by Sam in the utterance above, It's just a random question because we can see it has nothing to do with the way the food worker is dressed, stands in the food truck, and his appearance doesn't look like that of a cop. But Sam asked the question that made the

food worker confused and silent for a moment, then he said no, indicating that Sam is not a fugitive.

Datum 2

First episode “Pilot” (00.36)

Sam: **I** will take a jumbo

The utterance said by Sam There was a first-person pronoun, "I." I referred to the speaker herself as the object. She wanted the listener or the food worker to make her order. The situation of the utterance when Sam orders a burrito from the food worker

Knowing the deixis impact of the humor in the utterance above, we know that the deixis "I" refers to the speaker herself, and she was in that situation. After hearing the food worker say that breakfast with burritos is disgusting, Sam ordered a jumbo one instead. Generally, after hearing the statement of a food worker, we would not buy the burrito.

Datum 3

First episode “Pilot” (01.46)

Sam: And why is there a battery **in my burrito?**

The utterance said by Sam There was a place called "**In**." It referred to the location of the battery in her burrito. At that moment, Sam was just talking alone with the burritos, who were surprised and confused.

For knowing the deixis impact of the humor in the utterance above, deixis "**In my burrito.**" It made the audience laugh because there is a battery in her burrito. If Sam said the battery was in the remote control or walk clock, it wouldn't make the

audience laugh, but in this moment, why is the battery in food? It's not in the right place.

Datum 4

First episode "Pilot" (02.40)

Cat: Whoa! Ha haha! Oh my Gosh! **That** was so much fun!

The utterance said by Cat There was a discourse dissent "that." It refers to the moment when Sam tried to pull her out of the trash heap after pouring it into the garbage truck.

For knowing the deixis impact of humor in the utterance above. Deixis "that" was said by Cat. The moment when she was buried by trash and Sam helped her out of there she said it was so fun. In a normal situation, someone who gets into this situation will be angry or feel disgusting.

Datum 5

First episode "Pilot" (04.46)

Sam: **That's you** and **me**. From swimming **in garbage**.

The utterances made by Sam There are three types of deixis found in utterances above: primarily discourse deixis "that," place deixis "in," first person deixis "me," and second person deixis "you." That refers to the cat question before because she feels a bad smell. In reference to the garbage and location, there was a strong smell. Me referred to the speaker herself, Sam. It is able to be included in first person deixis because the word "me" is included as the object in the singular pronoun. You refer to the hearer in the utterance, which is Cat, as the second person. This moment occurred when Sam and Cat got out of the garbage and got a bad smell.

For knowing the deixis impact of the humor in the utterance above, deixis "you, me, and in garbage." You and I refer to Sam and Cat. The funny moment in this situation was when Cat made her utterance and asked about the bad smell, even though it was coming from her and Sam's bodies. It wouldn't be funny if she realized that without asking, and there wasn't anything around that could potentially cause a smell either.

Datum 6

First episode "Pilot" (07.03)

Dice: No nononono. **This** is celebrity hair. See, I got hair from Will Smith, Katy Perry, I got Ryan Seacrest

The utterance said by Dice There was a discourse epithet, "**This**." This word refers to the hair. Dice wanted the hearers, Sam and Cat, to know that the hair he sells is not ordinary hair. It was when Dice sold the celebrities' hair to Sam and Cat. Cat is interested in one of those strands, whereas Sam is not interested in buying it.

Knowing the deixis impact of the humor from the utterance above, deixis "this." That moment has an impact on humor because he's trying to convince Sam and Cat to buy the hair he's selling and the hair that he got from a famous artist. This situation wouldn't be funny if it were just normal hair sold in the general store.

Datum 7

First episode "Pilot" (17.48)

Cat: Okay, **we**'ll try that first! You pump **his** legs, and I'll bounce **on his chest**.

The utterance said by Cat There is a first person deixis of "we," a third person deixis of "his," and a place deixis of "on." The word "we" is a plural pronoun. That referred to Sam and Cat, who were trying to help a manager from the inside out after

he fainted. The word "his" refers to the singular third person deixis, whom Sam and Cat are trying to wake up from stupor. On refers to the location where Cat will bounce so that the manager wakes up from his stupor.

For knowing how the deixis impact of the humor in the utterance above, deixis "we, on, and his." The humor moment in this situation refers to Sam and Cat, a teen who are no longer tall in stature but instead wakes a person who has fainted by poking his chest (referring to deixis' on') with her body (sit on his chest and lift him repeatedly) instead of with her hands. While Sam holds his leg, Deixis "his" is the person being treated like that, an old manager.

Datum 8

First episode "Pilot" (12.17)

Cat: Oh. Did **she** go to the gun range?

The utterance said by Cat There was a third person deixis; "she" is the subject of the plural pronoun. It referred to Nona. She is trying to guess where Nona went by telling utterance jokes to Sam.

Knowing the deixis impact of the humor from the utterance above, deixis "she" refers to Nona, who, for her age, most prefers flower gardening to going to the gun range. It will be funny when someone Nona's age has a hobby like going to the gun range, because just taking care of the kids makes it easy to get tired.

Datum 9

First episode "Pilot" (08.25)

Nona: Not anymore. I'm tired of **those** rotten kids putting me in sacks! Peeing everywhere! It's time for me to move to **Elderly Acres**.

In the utterance above, there were discourse and place deixis. The word "those" is discourse deixis; it refers to the naughty kids. "**Elderly Acres**" is a place deixis; it refers to the place that Nona wants to live, away from those kids. This was the moment when Nona complained because she was tired of the misbehavior of the children she raised in the building. That's why she wants to move to another place.

Knowing the deixis impact of the humor in the utterance above, deixis "those and Elderly Acres." She was so tired of the mischief of those kids. So, she chose to live in an elderly association called Elderly Acre. In that situation, she always said the kids were entrusted to her, and she was still willing to take care of them. Actually, some grandmothers prefer to live with their granddaughters instead of living in an elderly association, but this lady prefers to leave her granddaughter because she can't stand the behavior of these kids.

Datum 10

First episode "Pilot" (15.15)

Nona: No! I love **this** place Look at **that** guy! **He** is single and he is hot.

The utterance said by Nona There were discourses deixis "that" and "this." Those two discourse words are that, which refers to the place away from the speaker, and this, which refers to the place in which she is living. Third-person deixis is "he." She referred to the guy; she wanted the listener to know that she was interested in that guy. The moment was when Cat tried to persuade her grandmother to go back home and live together again, but Nona was comfortable in that place, living with people the same age as her, and she began to be attracted to one of the men who also lived in that building.

Knowing the deixis impact of the humor in the utterance above, deixis "this, that, and he." The funny moment of all of those refers to placing deixis that comforts Nona; she said deixis "that" refers to the old guy that Nona likes. That's so funny because she was old but still attracted to the guy, who made her feel comfortable living in Elderly Acres. Deixis's words have an impact on humor because it turns out that the guy Nona likes is him, and they are both attracted to each other.

Datum 11

Second episode "Favorite Show" (00.32)

Cat: Ah! **Good morning.**

The utterance said by Cat There was a time when it said, "**Good morning.**" It refers to when Cat wakes up Sam in the morning by tying her up, but Sam doesn't like being woken up like that.

Knowing the deixis impact of the humor in the utterance above, deixis "Good morning," the funny moment occurs in the morning, which repeats itself when Sam forbids Cat to wake her the way she does but she does it anyway in the morning.

Datum 12

Second episode "Favorite Show" (03.24)

Sam: Why'd you do **that**?

The utterance said by Sam There was a discourse dissent "that." It referred to Cat when she imitated the sound of the bell every time a guest pressed the bell before opening the door.

Knowing how the deixis impact of the humor from the utterance above, deixis "that" reverts to Cat's habit of imitating sound, whether it's a bell or a phone.

Datum 13**Second episode “Favorite Show” (05.55)**

Sam: Look. **I** took two rib bones and made **them** into a weapon. Hyaah!

The utterance said by Sam There were first-person deixis ("I") and third-person deixis. The word "I" refers to the speaker; she wants the listener to see what she has done to those bones. The word "them" referred to the bones, which Sam had made into a weapon.

Knowing the deixis impact of the humor from the utterance above, deixis "I" refers to Sam, who always experiments with strange things. Deixis "them" refers to the weapon made from scrap bone.

Datum 14**Second episode “Favorite Show” (08.25)**

Cat: Ewe, Bob, **you're drooling on my sweater.**

The utterance said by Cat There was a second person, Deixis, called "you." It referred to the addressee in the utterance, which is Bob. It was when Bob hugged Cat's leg. Place deixis "on" refers to the location of drooling by Bob in the sweater that Cat is wearing.

For knowing how the deixis impact of the humor from the utterance above, deixis "you" refers to Bob hugging Cat's feet like a koala and it being his habit. That moment makes the audiences laugh at the same time Deixis says "on my sweater," the sweater of Cat's drooling by Bob because it's been hanging at her feet for too long.

Datum 15**Second episode “Favorite Show” (19.23)**

Sam: My **boss** wants all this stuff to go to this address.

The utterance above was made by Sam. The word "boss" is a social deixis that refers to someone who has a high position in a company. This moment occurred when Sam tricked the studio staff into taking things from the studio to surprise Cat so she wouldn't be sad anymore with the cancellation of "That's a Drag," her favorite show.

Knowing the deixis impact of the humor from the utterance above, deixis "Boss." The funny moment in that social deixis was when Sam disguised herself as the assistant president in the studio to trick the staff and said the deixis to escape because she was almost caught taking things out of the studio.

Datum 16

Second episode "Favorite Show" (20.38)

Sam: I did **this**.

The utterance said by Sam There was a discourse entitled "**This**." It referred to the surprise that Sam gave Cat. That moment occurs when Cat is very enthusiastic because the stuff from her favorite show is at her home.

For knowing how the deixis impact of the humor from the utterance above, the deixis "this." Actually, Sam didn't want to admit that she did all that, but there was no other choice. She confussed with an eventful expression; she didn't like being called sweet for doing all that.

Datum 17

Second episode "Favorite Show" (07.03)

Sam: **You** guys wanna break some bottles?

The utterance said by Sam There was a second person deixis "you," which refers to the addressee in the utterance, which is Ethan and Bob. It was when Sam

offered to do something to play with Ethan and Bob. But Cat disagrees and offers to play another one.

Knowing the deixis impact of the humor from the utterance above, the deixis "you" has a funny moment because it's referring to little kids, but Sam invites them to play breaking bottles again and again with her absurd idea.

Datum 18

Second episode "Favorite Show" (21.35)

Nona: Ooh. Thank you. I'm going away **now**.

The utterance said by Nona The word "now" refers to the present moment. The moment occurred when Nona returned Ethan and Bob to Sam Cat because she had given up on the behavior of the two boys, and after that she went straight home.

Knowing the deixis impact of the humor from the utterance above, deixis "now" have a funny moment that made the audience laugh when Nona said the deixis that situation looks very tired because she just arrived to take Ethan and Bob to Cat's house. But she desperately wanted to go back to rest, even though it was her granddaughter's home.

Datum 19

Third episode "The Brit Brats" (00.48)

Sam: I am the **master** of prank phone calls.

The utterance said by Sam There was a social deity named "**Master**." The word "master" refers to the leader. The speaker wanted the listener to know that she was an expert at making prank calls.

Knowing the deixis impact of the humor from the utterance above, the deixis "master" refers to something bad, and Chloe and Max are intrigued to try and follow Sam's why.

Datum 20

Third episode "The Brit Brats" (06.03)

Dice: I'm his new **manager**.

The utterance said by Dice There was a social deity named "**Manager**." It referred to Dice as the manager of Goomer, a boxer, as we know that managers have an important role in society. It was when he told Sam and Cat that he would be the manager because Goomer has the potential to win and will earn a lot of money.

Knowing the deixis impact of the humor from the utterance above, deixis "manager," the funny moment when Dice becomes a boxer's manager, in addition to being too young and generally too small to be a manager,

Datum 21

Third episode "The Brit Brats" (09.15)

Sam: Did something poop **on your forehead**?

The utterance said by Sam There was a place called "**On**." It refers to the poop shape on Dilben's forehead. The second person deixis "**your**" referred to the dice as a possessive pronoun of you. It was when Dilben suddenly came to Cat's home in a weird outfit and with a unique hairstyle.

Knowing the deixis impact of the humor from the utterance above, the funny moment in deixis was when Sam reprimanded Dilben's hair, which was like poop. If she said that in the toilet, that's not funny because it's not funny, but in this situation, she notices the wrinkle on Dilben's forehead.

Datum 22

Third episode “The Brit Brats” (18.18)

Dice: The Goat sneezed **in my face**

The utterance said by Dice The utterance above occurred when Sam told Dice to look after the goat in the bathroom; unfortunately, the goat sneezed in his face, and it’s something disgusting. The word "in" can be classified as a place deixis that refers to the sneezed location in Dice's face.

Knowing the deixis impact of the humor from the utterance above Deixis has funny moments, like when Dice got sneezed on by the goat and blood filled his face. That moment wouldn’t be funny if the situation hadn’t happened because it made Dice scream.

B. Discussion

In this chapter, the researcher explains the data that has been found and is displayed in the findings section. All the data shown in the previous section is collected from Sam and Cat American Teen Situation Comedies, in this case from 1 to 3 episodes. The data collected is limited by the research focus; therefore, only deixis is used by the main characters.

1. Types of deixis are found in Sam and Cat American Teen Situation Comedies.

Levinson states that deixis concerns the ways in which languages encode the features of the context of utterances or speech events. In this study, the researcher found 22 dates in Sam and Cat American Teen Situation Comedies.

Based on the table in finding, from the five types of deixis, there are 13 person deixis (first person, second person, and third person), 2 time deixis, 8 place deixis, 3

social deixis, and 7 discourse deixis. All of the deixis types found were used by the main character's utterances, for a total of 33 deixis discovered from 3 episodes.

From the table, it can be seen that the most dominant type of deixis used in Sam and Cat American Teen Situation Comedies is person deixis, followed by place deixis, discourse deixis, social deixis, and time deixis.

a. Person Deixis

Person deixis is an utterance produced by the speaker in a speech. According to Levinson (1983), person deixis is divided into three types. Researchers found 13 deixis categories of person deixis, including first, second, and third deixis. The function of person deixis is applied to the thing or person who is the speaker in an utterance.

1) First Person

The first person is the speaker's reference to himself. First deixis can be divided into first person singular and first person plural. In this case, the researcher found five deictic expressions.

First person, deixis singular The researcher found 2 types of deixis persons singular, namely I and Me. Next, in person deixis plural form, in the data the researcher found 1 type of deixis, namely "we." In the deixis person, for the first person shown on the utterance "I will take a Jumbo," The function of first-person deixis is to refer the message to the speaker himself or herself.

2) Second Person

Second person deixis is a deictic reference that refers to the addressee. According to Levinson (1983), second person deixis can be identified in the word (you, your, yours, yourselves). In this research, the researcher found four that divided second deixis into two types, namely you and your. In the third person, for the second person

shown on the utterance "You a cop?" The function of second person deixis is the word that refers to the addressee as the listener or receiver of the message.

3) Third Person

Third person deixis encodes references to persons and entities that are neither speakers nor addressees of the utterance in question. According to Levinson (1983), third-person deixis is identified into utterances (he/his, she/her, and they/them) and objects like "him, her, it, and them." The function of third person deixis is the word that refers to two, neither speaker nor addressee.

In the table, the researcher found 4 that divided 5 types of third person, namely she, he, them, and his. In the third person, for the second person shown on the utterance, "Did **she** go to the gun range?"

b. Time Deixis

Time deixis concerns the encoding of temporal points in the speech event. In the table, the researcher found 2 time divisions with 2 types, namely, now and good morning. In the time digression shown on the utterance "I'm going away **now**," The function of time deixis is that the word refers to the time when utterance was done.

c. Place Deixis

Place deixis (spatial deixis) focuses on the place where the speech event occurs and deals with distance. According to Levinson (1983), place denotes the proximal and distal locations of the speaker. The function of the word deixis is to refer to or point out the location of the speaker.

In the data, the researcher found eight that were divided into five types, namely: "Elderly Acres," "On, in, and Move to." in the place where diacritical marks are shown on the utterance "That's you and me." From swimming **in the garbage**.

d. Social Deixis

Social deixis concerns the sentence that occurs in the social station in which the speech act occurs. Social differentiation is marked by relative social status. Levinson (1983) states social deixis can be identified in utterance (my husband, teacher, cousin, mother). The function of social deixis is word-referenced to the social relationship held between speaker and addressee, or some other referent.

In the data, the researcher found 3 social dimensions that divided into 3 types, namely manager, master, and boss. In the social deixis shown on the utterance "I'm his new **manager**,"

e. Discourse Deixis

Discourse deixis is the expression of the referent that is not shown in the text. On the other hand, the referent is attached to the last, next, or current position of the discourse. Levinson (1983) states that discourse concerns the use of expressions that refer to some position of the discourse. The function of discourse analysis is to refer to situations near the speaker and the speaker's distance from the addressee.

The researcher found seven discourse categories that divided into three types, namely this, that, and those. In the discourse deixis shown on the utterance "**That** was so fun,"

All the types exist in this situation comedy. It is explained that we actually often use it in our daily lives, and it is also agreed upon by the previous study by Nurmaharani (2021) in the chapter titled "Analysis of Deixis in The Frozen II" by Jennifer Lee. She also found all the types of deixis in this book. The difference between the three previous studies in Chapter 2 and this research is in the second research problem. In this

research, the researcher argues about the impact of deixis on humor. While the previous research focused on the dominance of deixis found in their research.

2. Deixis Impact of the humor in Sam and Cat American Teen Situation Comedies

Lyons (1977) stated that the main purpose of deixis in linguistics is to prefer the function of personal and demonstrative pronouns, tense of a variety of other grammatical and lexical features, and relating utterance. Meanwhile, humor, according to Raymond (1980), is a cognitive experience whose sole intention is to provoke laughter in the audience and whose main purpose is to provide amusement to them. It is often used to make light of difficult or stressful situations and to brighten up a social atmosphere in general with enjoyable and positive experiences. They also add that depending on the situation, which means that the impact humor depends on the context of the situation. Based on the statements above, it can be concluded that not all deixis contains humor, but humor could be interactive if it contained deixis, as in the following example in Sam and Cat American Teen Situation Comedies, which we can see from the data found by the researcher. For example, in first-person deixis "I will take a jumbo," the impact of "I" is humor because it refers to Sam as the speaker. Before ordering the burrito, she asks the food worker how the breakfast burrito is, and the food worker answers that it is disgusting. Sam, as the first person plural "I," even ordered the jumbo one. The thing that made us laugh was that she heard the answer from the food worker but still ordered, plus what she ordered was a jumbo burrito. An example of second person deixis is when Sam said, "You guys wanna break some bottles?"

The reason the second person plural, "you," has an impact on humor is because it refers to Ethan and Bob. In this situation, Sam offered to break some bottles for Ethan and Bob. That moment made the audience laugh because she offered to do bad things to Ethan and Bob while they were kids, and luckily at that time Cat didn't agree and offered to play according to their age. Another example of third person deixis is in the utterance "He is single and he's hot!" The word "he" refers to the old man. The moment that made that diatribe have impact in humor was when Cat persuaded her grandmother to move back in with her, but Nona insisted on staying in the Elderly Acres for comfortable reasons, and the thing that makes us laugh is when she refers to the old man whom she is crushing on while saying that he is single and hot.

The utterance time digraph that has been found to have impact on humor sounds like "Ah!" Good morning. It was when Cat woke up Sam in the morning by surprising Sam and Cat, and she had said that she didn't like Cat doing that in the morning, but Cat did it anyway even though she said it just one day ago in the morning. An example of place deixis that have impact on humor is the utterance "Did something poop on your forehead?" The place deixis "on your forehead" had impact humor when Sam suddenly asked Dilben's hair, which she thought looked like poop. In this situation, the word deixis has a humorous impact because Sam asks if something on your forehead is poop. The audience maybe won't laugh if Sam says something poops in the toilet is normal, but in her utterance she said something poops on Dilben's.

The social deixis that have an impact humor in the utterance of Dice, "I'm his new manager." The social deixis "manager" refers to Dice, who really likes money and whatever it is he will sell. The moment that shows social deixis is when he becomes

the manager of a boxer who is much older than him because he believes that he has the potential to earn a lot of money when he becomes Goomer's manager.

The last example of discourse devices that have an impact on humor is in this utterance of Cat: "Whoah! Ha haha! Oh my gosh! That was so much fun! The discourse deixis "That" made the audience laugh because of that situation. Cat felt very excited and had fun with what happened to her being buried by the garbage truck. In a normal situation, someone who is buried in the garbage would be angry, disgusted, and immediately ask for help to get out of there, but it's different for Cat, who feels that very exciting. Meanwhile, here is one example of deixis that doesn't have an impact on humor: the first person deixis in the utterance "I didn't know you were coming to visit." The person expressing "I" in this moment didn't make the audience laugh, and nothing can provoke laughter.

Deixis does have an impact on humor, as can be seen from the data above; not all of it has an impact, but deixis is the important thing in humor. Usually, as a species, we only know the types of deixis as pronouns, adverbs of place, adverbs of time, and conjunctions, such as I, That, In, On, and Tomorrow. But it turns out that deixis can also provoke laughter in the listeners or audience.

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Basically, based on the results of analysis, interpretation, and discussion in the previous chapter, it can be concluded that the analysis of the Sam and Cat American Teen Situation Comedies helped answer the problems in the research objectives. Based on the discussion in the previous chapter, it can be concluded that all the types of deixis exist, and the most dominant deixis found in the data is person deixis. The researcher has found 13 deixis types from 33 deixis types.

From the formulation of the second problem, it can be concluded that not all deixis that have been found have an impact on the humor. Without some of the deixis that have been found in the data, humor will not be built in situation comedies. Because of our limited knowledge of deixis, sometimes its existence is omitted because people are more familiar with its forms as pronouns, adverbs of time and place, and conjunctions. Therefore, by conducting research on deixis, it is hoped that people will be more sensitive to deixis.

B. Suggestion

In the field of language studies, the results of this study are expected to be a reference in further research, especially research in pragmatic studies, especially deixis in a sentence. Research on pragmatics needs to be done both in the pragmatics of a language and in the pragmatics of literary works in general and in particular. This is

because deixis is never separated from our lives when communicating. It can also be a guide for literary writers in using deixis in pragmatic studies, both from person deixis and from time deixis, space deixis, social deixis, and discourse deixis.

Therefore, the results of this study are expected to be better understood by all readers so that they can be useful in understanding the elements of deixis in conversation and in literary works. The deixis element is very useful as a reference so that a story or an utterance becomes more concise and easy for the reader to understand. This research is expected to be able to explain the types of deixis to the readers. For educators, this pragmatic study deixis element is expected to be an addition to teaching materials or a reference in deixis elements, and it will introduce the types and forms of pragmatic study deixis.

The researcher hoped that further researchers could develop research skills not only in comedy but in other fields. For other researchers, it should be suggested that they use this research as a source of information and input so that it is useful in examining other values when carrying out research in the field in which it is relevant.
