## ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

*Allhamdulillahirabbil 'alamin*, In the name of Allah SWT, the most Gracious and the merciful of all, the researcher would like to thank the Almighty Allah SWT, the most Beneficent and the most Merciful for his blessing in accomplishing this thesis. Secondly, the researcher would like thank to the prophet Muhammad SAW, who has brought human being from the darkness into the brightness.

In accomplishing this thesis, the researcher wishes to acknowledge him deepest gratitude for all support, help and motivation which has been given to him by a lot of people. Therefore, the researcher would like to express his deepest gratitude to the following people:

1. The highest special gratitude to his parents, Burhan S.Pd. and Suraedah S.E for their patience, love, attention, financial support. Who never stop cares, support and prayers for the best of luck the researcher in every single day, as well as his two brothers Muh Al Isra and Agym Nastiar and all families that always supported and motivated the researcher.
2. The highest appreciation to her supervisors, Dr.Nasrum, S.Pd. M.A and Ahmad, S.S.,M.Litt for their all guidance, support, advice, motivation, kindness and their precious time through accomplishing this thesis. Furthermore, the researcher would like to express thanks to his examiner, Dr.Muh Syukri, S.S, M.Hum and Dr.Muh Taufik, S.S, M.Hum for their guidance, correction and suggestion to accomplishing this thesis.

3. The Rector of UIN Alauddin Makassar, Prof. Hamdan Juhannis, MA., Ph. D and the Dean of Adab and Humanities Faculty, Dr. Hasyim Haddade, S.Ag., M. Ag., the Head of English and Literature Department, Dr. Jumharia Djamereng, M.Hum., the Secretary of English and Literature Department, Syahrani Junaid, S. Pd., M.Hum for encouragement and all the lecturer and staff during the period of his study at the university, especially in Adab and Humanities Faculty.
4. The gratitude for her friend in English and Literature Department 2017, especially AG5-6 with whom the researcher able to share her experience and knowledge during his study and writing this thesis.
5. Special thanks to his best friend Muh.Alam, Zulfikar, Muh Aminullah, Zulfahmi Bahar, Mutiah Dwi Arlina, Zaky Muchtar, Ilham Arief, Mia Audina, Khaerunnisa. who always give inspiration, support, help and encouragment during accomplishing this thesis.

The last but not least, highest appreciation for the researcher himself, for always believing himself, doing all hard work, always patient and never give up to accomplishing this thesis.

---

The aim of this research is to find the types of imagery and to identify the kinds of imagery in the Novel. The researcher used the theory of Kenney to find the types of imagery and to identify the kinds of imagery such as literal images, recurrent images, figurative images, and symbols. The data were analyzed used a descriptive qualitative method to find and to identify the types of imagery in the Novels. The result of this research, the researcher found that there are 74 data found in the types of imagery, the data are: 27 data found in literal images, 14 data found in recurrent images, 17 data found in figurative images, and 17 data found in symbols. Therefore, the researcher concluded all the types of imagery can be found in this novel by using the theory of Kenney.

**Keywords:** *Stylistics, Imagery, Andi Weir's Artemis.*

## CHAPTER I

### INTRODUCTION

#### A. Background

Language plays a critical part in life and could be a device society utilizes to communicate and respond. According to Finocchiaro (2002), language is a system of arbitrary vocal symbols that enables communication and interaction among all cultural members or those who have mastered the system. We can communicate our thoughts and feelings to others using language and understand what others are thinking and feeling.

John (2009) defines dialect as a type of language that, despite being variations of the same language, differs from others in three ways: vocabulary, syntax, and accent. Dialect is exceptionally vital in social life. Communication will run efficiently when the target dialect utilized is suitable. The dialect agrees with the speaker's circumstances and conditions, and the discourse's nature is carried out. This depends intensely on the deciding components within the act of dialect or communication, specifically, the questioner, the speaker's reason, the issues examined, and the circumstance. This utilization of dialect is called pragmatics.

According to Brown (2007), language is into some categories, such as a set of arbitrary symbols, primarily vocal symbols. Still, it may also be visual, have conventionalized meanings to which they refer, be used for communication, and operate in a speech community or culture. Be essentially

human, although possibly not limited to humans, and be acquired by all people in much the way language learning both have universal characteristics, including such systems of phonemes, morphemes, phrases, clauses, and context. Bradford (1997) states this is a hazy and elusive subject. Every contribution to the expansive and diverse field of literary studies will connect with style. Stylistics is essential in everyday life because stylistics are things that are frequently used when talking or wanting to convey something to someone. When we speak about style, it is very closely related and can make someone misunderstand if you do not understand what it is stylistics Kenney (1993:64). There are four types of imagery which is literal images, recurrent imagery, figurative images, symbols.

Imagery is part of stylistics that is useful for knowing the meaning of a word, which often makes us misunderstand the meaning of the word itself. In practice, many people, particularly readers or those who learn poetry, encounter some obstacles or problems in understanding the stanza of the poetry and determining the figurative language imagery stated.

Furthermore, according to Surah Al-Isra, verse 53 discusses the importance of imagery below.

وَقُلْ لِعِبَادِي يَقُولُوا الَّتِي هِيَ أَحْسَنُ إِنَّ الشَّيْطَانَ يَنْزِعُ بَيْنَهُمْ إِنَّ  
الشَّيْطَانَ كَانَ لِلْإِنْسَانِ عَدُوًّا مُّبِينًا

Translation:

*“And tell My servants to say that which is best. Indeed, Satan induces (dissension) among them. Indeed, Satan is ever, to mankind, a clear enemy.”*

The verse from the Qur'an mentioned above demonstrates that we are obliged to prioritize and select a good word between the two circumstances when it is impossible to blend them both. The advantage of a good speech is that it attracts people with noble, religious characteristics. When someone can control their tongue, they can manage all of their affairs (Tafsir Al wajiz by Shaykh Prof. Dr. Wahbah Az-Zuhaili).

The Imagery in this novel is very closely related to Kenney's theory because people can create words from various aspects of the four senses. Also, words can be a tool to express different kinds of feelings that you want to convey. Scholars' investigation can serve as intrigue in other scholarly perspectives among related viewpoints of religion, logic, ethics, and so on. Writing is to move forward with the quality of taste. The intellectual inquiry will take after the framework of logical consideration utilizing strategies, hypotheses, examination, and creativity.

Novels are a sort of scholarly work. Hence, the novel also uses dialect as a medium. Curiously or not, the dialect used in academic assignments depends on the educational capacity to utilize words. The nuance of scholarly sentiments in using words is needed. In addition, who must master the scarcest distinction in meaning and taste; subsequently, the information on the etymology of a writer is necessary.

Impossible if separate imagery, or the word choices used within the text, from the meaning of the term itself. According to Kenney (1993: 64), the word might have four. Literal images, recurrent imagery, figurative images, and symbols. We can use it to express our emotions to make people understand what we want to say. Imagery is regularly found in a few scholarly works. One of them is within the novel “Artemis” by Andy Wier, published in 2017. American novelist Andy Weir is best known for his scientifically accurate book “The Martian.” When he was 15 years old, Weir began working at Sandia National Laboratories as a computer programmer. The virtues and shortcomings of “Artemis”. This book’s benefit is that it contains a compelling plot and a few suitable lessons. The disadvantage of this novel is that it uses many inappropriate expressions for people who do not speak English well, especially understanding the meaning of the expressions because it is complicated to understand. Typically, this is done by the novel’s author to captivate readers interested in reading it. Readers won't be engaged as a result, despite the fantastic story in the book.

Numerous Researchers have examined the subject of imagery. Harliani discovered four different types of imagery: visual Imagery, olfactory Imagery, gustatory Imagery, auditory Imagery, and kinesthetic Imagery. In her thesis 2014, An Analysis of the Power of Imagery in Suzanne Collins's Novel "Catching Fire." Aang Kurniawan wrote an Imagery Analysis of Billy Collin's poem (2010). Fitriah Husain discussed this in 2018. An analysis of the imagery in “Song of Myself” (Walt Whitman's Poem) discovered seven

categories of imagery. Visual, Auditory, Organic, Tactual, Olfactory, Gustatory, and Kinesthetic. I found that we can use many types of imagery to interpret a word, both from the seven types of imagery and using Kenney's theory. This Research focuses on the language used and its meaning because utilizing specific imagery may cause readers to misunderstand and have misconceptions. The researcher will show how the author's language represents their views.

Based on the explanation above, the researcher is keen to examine the Imagery used in Andy Wier's novel "Artemis" because the researcher believes it has many images that are highly challenging for the average reader to understand.

## **B. Research Question**

In light of the preceding context, the Researcher was like to pose the following research questions:

1. What types of imagery are found in Andy Wier's novel *Artemis*?
2. What are the meanings of the Imagery used by Andy Wier's Novel *Artemis*?

## **C. Research Objectives**

The Objectives of the research was separated into two points based on the problem statements above:

1. To Find out Imagery in the Andy Wier's novel "Artemis."

2. To Find out the meanings of Imagery used by Andy Wier's novel "*Artemis*."

#### **D. Research Significance**

In this research, the researcher also expected to achieve some significance for the readers:

1. The researcher wishes this research can give everyone a new contribution and information knowledge, especially future literature students.
2. The researcher wishes this research is wanted to give a deeper understanding of knowledge and experience, especially for the researcher, generally, for other students. It also can be used as a reference.

#### **E. Scope of The Research**

In this research, the researcher was to analyzed the imagery and meaning. The researcher was focus on the types of imagery and meaning in Andy Wier's novel "*Artemis*" using Kenney's theory (1993). Which is the literal image, Recurrent imagery, figurative imagery, and symbols.

## CHAPTER II

### LITERATURE REVIEW

#### A. Previous Findings

Harliani (2014), in her thesis *An Analysis of the Power of Imagery in Suzanne Collins's Novel "Catching Fire."* Finding out the types of imagery used in the novel. The researcher found five kinds of imagery include visual imagery, olfactory imagery, gustatory imagery, auditory imagery, and kinesthetic imagery used Theory from Diyanni (2004:559).

Kurniawan (2010), in his thesis *An Imagery Analysis on Billy Collin's poem.* He is Discovering the types of imagery used in Billy Collin's poem. The researcher also found the power of imagery and the values contained in 3 poems by Billy Collin's there is *Another reason why I don't keep a gun in the house, The art of downing and the Flames.* And also describes some parts of the imagery consisting of Auditory, Visual, Gustatory, and Tactile Imageries used theory from I.A Richard (2001).

Husain (2018), in her thesis analysis of the imagery in "Song of Myself" (Walt Whitman's Poem). Found out there are seven categories of imagery. Visual, Auditory, Organic, Tactual, Olfactory, Gustatory, and Kinesthetic. And also focus on the seven types of imagery that Husain mentioned above. It is excellent for helping readers comprehend the significance of the distinction between different types of imagery used the theory from Hepburn (1998).

Based on the previous studies above, all of them analyzed Imagery.

However, there are some similarities and differences in this research, such as Harliani's research, she analyzed the types of Imagery in a novel and uses Theory from Diyanni (2004:559). Meanwhile, in this research, the researcher will use William Kenney (1993:64) Both this research and Harliani's research try to find the type of Imagery.

Then the difference thesis from Kurniawan, they analyze Imagery using the theory of I. A Richard, while in this research, the researcher will use the idea of William Kenney's theory (1993). Lastly, Husain analyzes poems, the same as this research but different from the novel that this will research, and of course, both want to analyze Imagery in their thesis. The researcher will analyze the type of Imagery used in the novel Artemis by Andy Weir and by using the theory of William Kenney's (1993).

## **B. Pertinent Ideas**

### **1. Definition of Stylistics**

Concurring with Verdonk (2002:3), The consideration of dialectic style is the subject of stylistics. For the story to be viewed as an artistic endeavor and to increase the value of the scholarly work, it is expected that it will use various stylistic devices in the academic work.

Other than Turners. G.W (Pranawa, 2005: 21) The branch of linguistics known as stylistics focuses on linguistic variety, or The branch of linguistics known as stylistics concentrates on differences

in language use.

According to Leech and Short's definition, stylistics is an interdisciplinary field of study that falls between linguistics and literary criticism. It implies that we can use a linguistic technique to study literary texts.

Besides this, according to Jeffries and McIntyre (2010:1), stylistics is the linguistic study of fashion in language that aims to explain how writers project meaning, how readers construct meaning, and why readers react to content in the ways that they do. Stylistics can be defined as the study of the deliberate use of distinctive forms of dialect. The goal of stylistics is to identify dialect tendencies through the analysis of fashion thinking. Due to viewing their work in public venues, these highlights are used to group them into categories.

There is a slight chance that someone will select from the language as a whole. According to Widdowson (1975:4), stylistics is a zone of mediation between two disciplines in language expansion. It indicates that it is possible to use stylistics to alter literary text language and writing.

Based on the definitions above, we can say that stylistics is an interdisciplinary branch of writing that examines academic discourse, particularly the type of dialect used in academic writing with an introduction to phonetics.

## **2. The Meaning of Imagery**

The literary device known as imagery conjures up images in the reader's mind, including sensation and emotion, in addition to visual perception, despite being most frequently employed in connection with metaphorical language.

Perrine (1993: 372) asserts that the term "picture" may frequently imply a mental image, something perceived in the mind's eye, and that visual symbolism is the type of symbolism that occurs most often in verse. But an image can communicate through sound, smell, and physical sensation.

An increase A picture can be a concrete representation of sense perception, feeling, or concept, according to Diyanni (2002:703). Images can appeal to one or more of our senses, including the gustatory, olfactory, tactile, auditory, and visual. From the definitions mentioned above, the writer has concluded that using imagery in literary works helps convey those works' genuine meaning.

### **a. The Element of Imagery**

A branch of contemporary linguistics called stylistics is used to analyze literary style and language choices made by authors or speakers in non-literary contexts. Diction, imagery, and sentence structure are the three categories into which Kenney divided stylistics (1993:64), although, in this investigation, the author as a whole focuses on the imagery.

## **b. Types of Imagery**

There are four different types of images, according to Kenney (1993: 64), and they are as follows:

### **1) Literal Images**

Images may be either literal or figurative. A literal image involves no necessary change or extension in the meaning of the words. Swift's reference to the Emperor of Lilliput's "arched nose" is an example of a literal image.

Since fiction deals with people, places, and things, and their relationships in action, it must depend heavily on literal imagery. An essential function of literal imagery is to satisfy the reader's demand for specific, concrete detail, his desire to know how things look, sound, smell, taste, and feel. It contributes to the vivid representation of the experience we expect from the best fiction.

### **2) Recurrent Imagery**

While remaining literal in each instance, images may contribute to the total design of a story if they frequently recur in the story. William Faulkner's short story "Dry September" has several images of dryness. For the most part, the individual images are perfectly literal. It has not rained long, and the land is parched and dry. Yet by their frequent

recurrence, the images take on a suggestive power, arousing associations with barrenness, sterility, impotence, and frustration, all of which are relevant to the story's meaning.

Recurrent imagery may consist of several repetitions of the same image or the frequent occurrence of images that, while not identical, all relate to a single theme. The images may be entirely literal or a mixture of literal and figurative.

### 3) **Figurative Images**

Figurative images are sometimes called "tropes" or, more commonly, "figures of speech." An image is figurative when one must understand it in some sense other than the literal. Robert Burns's "My love is like a red rose" is an example of a figurative image since love cannot be like a rose.

The line from Burns is an example of a particular kind of figurative image called a simile. A simile is an explicit comparison of dissimilar objects (love and roses) involving the use of such comparative words as "like" or "as." A bolder figure is a metaphor in which because the comparison remains implicit. The statement seems to assert an identification. If Burns had said, "My love is a rose," this would have been a metaphor.

The frequency with which a writer resorts to figurative imagery is an essential quality of style. Jonathan Swift and

Ernest Hemingway are two writers, obviously dissimilar in many ways, who are alike in that they make sparing use of figurative imagery. On the other hand, Thomas Wolfe is an example of a writer of fiction whose style of figurative imagery is a significant element. The stylistic austerity of Swift and Hemingway reflects the austerity with which they view human experience. Wolfe's highly figurative style, involving the frequent uniting of dissimilar objects and sensations, suggests his openness to a wide range of expertise.

Figurative imagery used recurrently is likely to be significant. In Stephen Crane's novel *The Red Badge of Courage*, men are frequently compared to brute animals. The recurrence of this kind of comparison suggests a skepticism critical to the novel's meaning about the supposed uniqueness of the Old man's place in the universe. It seems to be implied that man is essentially an animal, driven blindly, like other animals, by his instincts, and not a rational being, acting based on "values" and principles" that he likes to imagine himself.

In the best fiction, figurative imagery is not merely ornamental but is an integral part of the real meaning of the work. The rarity of figurative language in Hemingway, like it is abundant in Wolfe, is impressive because of its

appropriateness to the whole structure of the work. The particular pattern of recurrent imagery in *The Red Badge of Courage* is essential to that novel's meaning. We may well be pleased by vividness and originality in imagery, but the ultimate question is always, "What does it contribute to the work?"

#### 4) Symbols

A symbol is a kind of image that differs from other images in the use to which it is put. Because symbolism often proves a stumbling block for inexperienced readers, we shall approach the subject of the literary symbol indirectly. We are all familiar with one kind of symbolism, the kind we call language. Words are symbols of their referents, of the things they refer to. The word "tree" symbolizes a class of material object.

As a symbolic system, language is limited. We don't have a name for everything. Even in a relatively simple discourse on familiar topics, we must frequently resort to modifiers. Note how many modifiers I have used in the preceding sentence. I had to attach "relatively simple, to "discourse" because we don't have a single name—a symbol—for the thing I had in mind.

Even with the help of modifiers, many things cannot be

talked about—as you know, if an experience has ever left you speechless, we have by no means succeeded in embodying all of the human experience in language. Now a literary symbol is simply the author's attempt to name those many areas of human experience that ordinary language, literal or figurative, is inadequate to deal with. This is all we mean by the more formal definitions of the symbol we may use occasionally. In this attempt, the symbol, while evoking a concrete, objective reality, also suggests an additional "level of meaning" beyond that reality. The writer's use of symbols is continuous with the process of language that we know.

An example from Melville; Herman Melville's *Moby Dick* is widely regarded as one of the most significant symbolic novels. In reading a work like *Moby Dick*, it is vital to remember that the white whale does not "stand for" something that can be neatly stated in other words. Instead, *Moby Dick* names a whole range of experiences and perceptions of experience that had never been called before and for which we still have no name other than the one Melville gave it. *Moby Dick* is an instance of a novel essentially symbolic in its design. The symbol may, of course, play a less central role in a given work of fiction. The green light in Fitzgerald's *The Great Gatsby* is an example of a

symbol employed to extend the significance of the novel's non-symbolic action.

As this discussion indicates, although related to the image, the symbol may transcend the limitations of "style" in the limited sense we have been using the term to become the significant structural principle of the work. But suppose we remind ourselves that style reflects the author's way of perceiving and organizing his perceptions. In that case, we can see that even a symbol of the magnitude of Melville's whale remains related to the concept of style.

### C. Synopsis of Novel "*Artemis*"

The futuristic setting of Andy Weir's book *Artemis* is not made clear. 26-year-old Jasmine "Jazz" Bashara resides in Artemis, the first and only town on the moon. When she was six, her father relocated there from Saudi Arabia. Ammar Bashara, her father, is a welder. Jazz and Ammar fell out when Jazz was a teen because she unintentionally ruined her father's welding shop. Jazz has been attempting to raise funds necessary to repay him for years. She makes a living as a messenger by bringing illegal goods into Artemis. She is aided in this by her friend Kelvin, who lives in Kenya and works for the Kenya Space Program.

A wealthy businessman named Trond Landvik tells Jazz one day that he wants to hire Jazz to sabotage Sanchez Aluminum when Jazz brings contraband to Trond. He intends to run their mining and smelting

operations on the moon. Jazz takes the job after Trond offers to pay more than twice what Jazz owes her father. Jazz obtains the necessary supplies from her father and a scientist called Martin Svoboda, but she keeps the illegal sabotage work secretively from them. While wearing a spacesuit, she travels across part of the moon's surface and manages to destroy three of Sanchez Aluminum's four harvesters before she must flee. She returns to Trond's house to confer with him about the following steps to take, but she finds him murdered. Jazz dons a disguise and pays a visit to Trond's enigmatic business partner Jin Chu in his hotel room. She discovers an assassin waiting in his hotel room, ostensibly there to kill Jin Chu. She avoids the killer and enters Jun Chu's room to take a suspicious wire sample.

According to Svoboda's analysis, it is a very effective fiber optic cable that would be tremendously lucrative if produced and marketed. Only low-gravity environments can be used to produce the substance. Jazz learns that the criminal organization O Palácio owns Sanchez Aluminum. Therefore, Artemis will come under illegal control if they continue to hold only mining and smelting rights. Jazz enlists the aid of her father and several other friends. They come up with a strategy to thwart O Palácio together.

## **CHAPTER III**

### **RESEARCH METHODOLOGY**

#### **A. Research Design**

The researcher employed a qualitative descriptive approach in this study. Reading, comprehending, and providing context for the data are all part of the qualitative descriptive approach, which also aims to describe everything associated with the research issue. Instead of using numbers to analyze and understand data, Bogdan and Biklen created the qualitative descriptive method as a technique (F. K. Halim 2017:28). This approach was used to explain the vocabulary in Andy Wier's book "Artemis."

#### **B. Source of Data**

The entire text of Andy Wier's book "Artemis" served as the research's data source (2017). The researcher chose texts which contain terms that have imagery meaning. This book consists of 320 pages and 17 chapters.

#### **C. Instrument of The Research**

The researcher employed note-taking as a tool in this study. Taking notes is a technique for gathering data that involves using note cards to record the data findings from the data source. The note card also includes the number and page where the data was discovered, making it easier to locate (Ray,2005: 13).

#### **D. Procedure of Data Collection**

There are some procedures that have been done in the process of

collecting data as follows:

1. The researcher read the novel from Andy Wier's "*Artemis*" (2017) to carefully.
2. The researcher identified the imagery that has the literal image, recurrent imagery, figurative images, symbol. meaning by using Kenney's theory (1993).
3. The researcher took notes and write down the data that have been identifying as imagery.
4. The researcher classified literal image, recurrent imagery, figurative images, symbol.

#### **E. Technique of Data Analysis**

Based on the description of the data collection procedure and the Technique of Data Analysis, the researcher used Kenney's theory (1993). This theory consists of four kinds of imagery: literal, recurrent, figurative, and symbolic. In this research, the researcher has analyzed imagery with literal, recurrent, figurative, and symbolic meanings. In the last step, the researcher concluded the data analysis.

## CHAPTER IV

### FINDINGS AND DISCUSSIONS

This chapter consists of findings and discussions that show the result of the research. The researcher would like to show what has been found in Andy weir's novel "*Artemis*."

#### A. Findings

In this part, the researcher presents the findings based on four types of imagery in Andy weir's novel "*Artemis*" Through data analysis, it was found that there are four types of imagery. All kinds of imagery proposed by Kenney's theory (1993:64) were found in the novel. They identify items about the literal image, recurrent imagery, figurative images, and symbols

To understand the data collection, the writer presented table with explanation types of imagery, such as; (A) literal images, (B) recurrent imagery, (C) figurative images, and (D) symbols. Then the source (novel) of the data was explained with C is chapter, P is page, and D is data.

NO	DATA	TYPES OF IMAGERY			
		A	B	C	D
1	EVA Suits are tough, but it is best <b>not to grind them againts Regolith</b> (C-1: P-9/D-1)	✓			
2	I remember <b>making a model of Artemis</b> as an assignment in	✓			

	elementary school (C-1: P-11/D-2)				
3	I lay in the bunk and stared at the ceiling which was less than a meter from my face, technically, it is a <b>capsule domicile</b> (C-1: P-12/D-3)	✓			
4	Bob Lewis is a former US Marine with a <b>no-bullshit attitude</b> . important, he is the EVA guild's head trainer (C-1: P-10/D-4)	✓			
5	the massive airlock complex is the second-largest chamber in the city. <b>Only aldrin park is larger</b> (C-1: P-14/D-5)	✓			
6	Good morning, Mr. Nakoshi " <b>I said cheerfully</b> ". He and dad had been buddies since I was a little girl. He was family to me, like a beloved uncle (C-1: P-15/D-6)	✓			
7	He shook his head. Three thousand Rudy's been sniffing around. <b>More risk means more pay</b> (C-1: P-16/D7)	✓			
8	the hallways of <b>Shepard feature wood paneling and tasteful, noise-absorption carpeting</b> (C-1: P-17/D8)	✓			
9	We have got plenty of silicon on the moon, so glass is locally made. <b>But still, talk about ostentatious</b> (C-1: P-17/D9)	✓			
10	I will no longer challenge you on anything <i>Stark trek</i> -related. <b>Are you going to apollo 11 site</b> while you are here? (C-1: P-18/D10)	✓			

11	it is technically not a currency, “ <b>Trond said from the credenza.</b> ” we are not a country (C-1: P-19/D11)	✓			
12	So, <b>Artemis’s air is pure oxygen at 20 percent Earth’s air pressure.</b> That gives us the right amount of oxygen while minimizing pressure on the hulls (C-1: P-20/D12)	✓			
13	Flammable materials are illegal unless there is a really good reason for them. <b>The last thing that we want is a bunch of idiots wandering around with lighters</b> (C-1: P-21/D13)	✓			
14	I like American TV shows and my favorite food is ginger ice cream. <b>But I usually eat gunk</b> (C-1: P23/D14)	✓			
15	A few people who know one another emigrate, they set up a service of some kind, then they hire their friends. And of course, they hire people they know. <b>Tale as old as time,</b> really (C-2: P26/D15)	✓			
16	According to the doc, she has a black eye, A <b>hematoma on her check</b> , two bruised ribs, and a concussion (C-2: P27/D16)	✓			
17	I brought up a web browser on my Gizmo and searched for “ <b>ZAFO</b> ” it was a conjugation of the Spanish verb <i>zafar</i> , meaning “to release” (C-2: P33/D17)	✓			
18	first, <b>they collect anorthite ore.</b> That’s easy. All they have to do is pick up the right rocks (C-2: P39/D18)	✓			
19	Trond said. <b>There is plenty of olivine and ilmenite around.</b>	✓			

	Those are great for making iron, but if you want aluminum you need Anorthide (C-2: P41/D19)				
20	Dale set my helmet on a bench, then took my hand and unclamped the seals on the glove. He rotated the glove at the wrist and pulled it off. “You went too far this time jazz, way to far” you are going to <b>lecture me on morality</b> (C-7: P110/D20)	✓			
21	I know but a deal’s a deal’s “Billy!” said. Dale “all my drinks are on jazz from now on!” she’s a millionaire (C-12: P180/D21)	✓			
22	We both stripped down to our underwear. What? I am supposed to <b>demurred around the gay guy?</b> (C-13: P195/D22)	✓			
23	do not believe me? Put ice water in a saucepan and cook it. The <b>water temperature will stay at 0 degrees until the last ice cube melts</b> (C-14: P212/D23)	✓			
24	She dodged to the side and hammer-locked my arm. Of-course I did! How dare you try to <b>destroy my life’s work!</b> (C-15: P221/D24)	✓			
25	Dad you are not a bad father. <b>I am just a shitty daughter</b> (C-17: P250/D25)	✓			
26	I left without further comment. I did not want to spend any more time <b>inside the mind of an economist</b> . It was dark and	✓			

	disturbing (C17: P256/D26)				
27	<b>I hit the ground, scrambled to my feet, and clawed at the hatch crank. My ears popped. Alarm blared in my helmet. The tank was on its last legs-it could not counteract the leak anymore (C-1: P9/D27)</b>		✓		
28	<b>Bob Lewis is a former US Marine with a no-bullshit attitude. More important, he is the EVA Guild's head trainer. He answers to the Guild master, but Bob and Bob alone determine your suitability to become a member (C-1: P10/D28)</b>		✓		
29	<b>Conrad's full of plumbers, glass blowers, metalworkers, welding shops, repair shops... the list go on but aldrin is truly a resort. It has hotels, casinos, whorehouse, theaters, and even an honest-to-God parks with real grass (C-1: P14/D29)</b>		✓		
30	<b>I was headed to the estate of on of the richest richfucks in town. Trond Landvik. He had made a fortune in Norwegian telecom industry. His home occupied a big chunk of Shepard's ground floor-stupidly huge, considering it was just him, his daughter, and a live-in maid (C-1: P17/D30)</b>		✓		
31	<b>, Oh, poor billionaire, I said "maybe you should have some moors installed so you can pine on them" "yeah, yeah,</b>		✓		

	<b>rich people are evil blah, blah, blah” (C-2: P40/D31)</b>			
32	<b>Once everyone de-trained, Raj called out in a clear, lud voice, “this is the 2:34 p.m. traaaain to Apollo Eleveeeeeeeen! All aboooood” he held out a vintage-looking brass ticket shredder (C-4: P68/D32)</b>	✓		
33	<b>I leapt directly to the roof of the next harvester over-the one I had just meticulously turned into a time bomb. All that work for nothing. Sigh. Snip. Snip. Snip. Snip! The other two harvesters backed away (C-6: P97/D33)</b>	✓		
34	<b>aww, fuck, I said. They did not need to find me. They just needed to beat me back to town. Then they could guard every airlock. Eventually I had run out of air and have to surrender. “Shit! Damn! Crap! Ass! Son of bitch!” it is important to vary your profanities. If you use the same one too often it loses strength. I fumed in my suit for a minute more, then calmed down and got to scheming (C-6: P103/D34)</b>	✓		
35	<b>do you know who owns Sanches Alumunium? I shrugged “some Brazilian company.” “They are owned by O palacio, Brazil’s largest and most powerful organized cryme syndicated.” I froze shit, shit, shit shitty, shit! “I see” I said. “Spiteful bunch, are they?” (C-9: P143/D35)</b>	✓		
36	<b>He looked truly pained. “It is just...it cost a lot of money to make that sample. We had to launch a dedicated satellite</b>	✓		

	<p>with a centrifuge to grow in the low-Earth orbit. I will super-super-duper-duper fired! If I go home without it.” (C-10: P149/D36)</p>				
37	<p>“It is zero. Fucking zero!” he formed a circle with his arms. “zeeeeeeeerrroooo!” I sat on the stool next to him. “So...no lights get lost in transmissions? At all?” “Right! Well, at least, as far as I can tell. The precision of my OLTS is decibels per kilometer.” (C-10: P160/D37)</p>		✓		
38	<p>, it all caught up with me. Constand danger, poverty, anger, and worst of all. Sheer, unmitigated fatigue (C-11: P170/D38)</p>		✓		
39	<p>I had gone beyond sleepy into what my father used to call “Overtired”. He usually used that term while chucking my cranky, eight-year-old ass into my bunk for a forced nap (C-11: P170/D39)</p>		✓		
40	<p>they are not dead, they are not dead, They are not dead. I repeated the mantra to keep from losing shit (C-16: P229/D40)</p>		✓		
41	<p>I bounded over the gray, dusty terrain toward the huge dome of Conrad bubble. It is airlock, ringed with red lights, stood distressingly far away (C-1: P8/D41)</p>			✓	
42	<p>the long strides paid off. I was really <b>hauling my ass</b> now I even left Bob behind and he is the most skilled EVA master</p>			✓	

	on the moon (C-1: P8/D42)				
43	I live in Conrad down 15, a grungy are fifteen floors underground in Conrad bubble. <b>If my neighborhood were wine</b> , connoisseurs would describe it as shitty, with overtones of failure and poor life decisions” (C-1: P8/D43)			✓	
44	Technically, it is a “capsule domicile” but everyone calls them <b>coffins</b> . It is just an enclosed bunk with a door I can lock (C-1: P12/D44)			✓	
45	I checked the landing zone schedule on my Gizmo. No <b>meatship</b> today (C-1: P15/D45)			✓	
46	I paid a monthly fee to store trigger at the port. Where else would I keep him? I have less space at home than a typical <b>earth prisoner</b> (C-1: P17/D46)			✓	
47	the door slid open to reveal a bulky Russian woman. Irina had been with the Landvik’s since the <b>dawn of time</b> (C-1: P17/D47)			✓	
48	“But not as magical Artemis!” Jin beamed. This is my first visit to the moon. I am like a <b>kid in a candy store</b> (C-1: P18/D48)			✓	
49	Coffee’s just a <b>bad kind of tea</b> ” I said. “Black tea is the only hot drink worth having” (C-1: P19/D49)			✓	
50	and she will not do it unless Rudy provides something			✓	

	compelling. So, we do have some <b>cheeks and balances</b> . Just not many (C-2: P26/D50)				
51	“Smuggling? Me? <b>Golly gee</b> , (C-2: P26/D51)			✓	
52	He <b>rabbit-punched</b> the barely conscious man in the eye then let his head fall to the ground (C-2: P27/D52)			✓	
53	I was trying really hard to get away too his grip was like an <b>iron vise</b> . i still think about that sometimes late at night (C-2: P27/D53)			✓	
54	Irina opened the door and frowned at me like I had just <b>pissed in her borscht</b> as usual (C-2: P35/D54)			✓	
55	Trond turned to his daughter. “ <b>All right, Pumpkin</b> , time for you to skedaddle (C-2: P37/D55)			✓	
56	okay, if I could not set the alarm time, I had use a less subtle approach. I disconnected both <b>Alligator clips</b> (C-6: P99/D56)			✓	
57	you know what’s worse than having barbed rocks in your eyes? <b>Grinding barbed rocks into your eyes</b> (C-14: P205/D57)			✓	
58	“I am the <b>EVA</b> master here,” Bob said. “Stop right now and let me cross-connect!” (C-1: P8/D58)				✓
59	I live in Artemis, the first (and so far, only) city on the moon. It is made of five huge spheres called “ <b>Bubbles</b> ” (C-1:				✓

	P11/D59)				
60	“It was just a <b>Lark</b> ,” I said nonchalantly. “It is not like EVA work is a real job” (C-1: P13/D60)				✓
61	there is nothing more annoying than trust-fund boys looking for “ <b>Moon poon</b> ” (C-1: P15/D61)				✓
62	he closed the box and stamped it with the Artemis symbol-a capital <b>A</b> with the right side styled (C-1: P15/D62)				✓
63	Three thousand <b>slugs</b> (C-1: P16/D63)				✓
64	He set the <b>Gizmo</b> on top of the box (C-1: P16/D64)				✓
65	, but it is good at carrying heavy things. So, I decided it was male. I named him <b>trigger</b> (C-1: P16/D65)				✓
66	I grew up watching <b>Star Trek</b> . Now I get to live it (C-1: P18/D66)				✓
67	one Slugs gets one gram of cargo delivered from Earth to Artemis, courtesy of <b>KSC</b> (C-1: P19/D67)				✓
68	<b>Mr. Do-Right Mr. Do-Right</b> (C-2: P26/D68)				✓
69	He was paying me a million slugs. We could play <b>007</b> if he wanted (C-3: P46/D69)				✓
70	“This thing is a <b>Tank</b> ”, Trond. It is not going to be easy to kill (C-3: P47D/70)				✓

71	He had been assigned to Artemis by <b>ESA</b> (C-3: P51/D71)				✓
72	<b>“Svyate der’mo!”</b> he put his hand on his chest and panted (C-9: P138/D72)				✓
73	This is not an Operation to <b>O palacio</b> . it is just an avenue for creative accounting (C-9: P142/D73)				✓
74	He spun to a wall-mounted machine. <b>“That’s where my spectrometer came in!”</b> He stroked it gently. <b>“I call her Nora”</b> (C-10: P162/D74)				✓

## B. Discussion

In this section, the researcher analyzed the data found in Andy Weir’s novel *Artemis*. As a reader of the novel, the researcher identified four types of imagery based on Kenney’s theory: literal image, recurrent imagery, figurative images, and symbols. And researcher explains how imagery changes the atmosphere, storyline, describes how the situation occurs in some data that have been found as imagery in this novel. This research differs from previous research in chapter two, where the discussion is about discovering several types of imagery, such as visual, auditory, tactile, kinesthetic, olfactory, and gustatory. And also the same as researching imagery in writing techniques.

## 1. Types of Imagery Used in The Novel

### a. Literal Image

The literal images describe Images, literal or figurative. A literal image involves no necessary change or extension in the meaning of the words. Literal image is described as Images that are literal or figurative. A literal image involves no necessary change or extension in the meaning of the words.

In datum 1, EVA Suits are tough, but it is best **not to grind them againts Regolith** ... means a statement about the literal image which does not need to involve or expansion about the meaning of that statement, from that sentences the reader can know what they are talking about while reading the words, the readers imagine the situation on the moon and also what happened in the moon.

Same with the sentences in datum 2, I remember **making a model of Artemis** as an assignment in elementary school ... means a statement about the literal image which does not need to involve or expansion word about the meaning of that statement, from that sentences the reader can know what they are talking about while reading the word, the readers imagine the situation in the elementary school and also making a mode of Artemis.

In datum 3, I lay in the bunk and stared at the ceiling which was less than a meter from my face, technically, it is a **capsule domicile** ... the context of this sentence happened. Jazz explained where Jazz

lived and how Jazz experienced the situation. The word of it is “**a capsule domicile**” creates the literal image we see as we read that word. Readers can feel how narrow the so-called capsule domicile is and imagine a place where Jazz rests. The domicile capsule here is a thin place like a capsule that only fits one person to rest.

In datum 4, Bob Lewis is a former US Marine with a **no-bullshit attitude**. important, he is the EVA guild’s head trainer... In this particular excerpt, we can see how individual images with the sentence **no-bullshit attitude** Mean an expression of visual imagery which describe something in detail and represent a visual sense impression. From that words, the reader can imagine how strict that person is by using the phrase no-bullshit attitude as a parable of someone who does not like small talk about something and is unyielding in carrying out his duties or training someone while those words read.

In datum 5, the massive airlock complex is the second-largest chamber in the city. **Only aldrin park is larger ...** categorized as a literal image because it describes a place. The reader can imagine how expansive **aldrin park** is, with very complex specifications in the range of several parks described by Jazz while reading his words.

In the bold sentences in datum 6, Good morning, Mr. Nakoshi, "**I said cheerfully.**" He and dad had been buddies since I was a little girl. He was family to me, like a beloved uncle ... One part of this type of

imagery is literal imagery. In this context, Jazz welcomes Mr. Nakoshi was overjoyed because Mr. Nakoshi has been a close friend of his father since he was a child, and as a second person to Jazz who was very close to Jazz, Jazz described him as an excellent uncle. So that the readers can correctly understand the figure that has been described by Jazz while reading the word

In the following sentences in datum 7, He shook his head. Three thousand Rudy's been sniffing around. **More risk means more pay** ... also included in literal images because at that incident, what was meant **by more risk means more money** was about Jazz's work as a courier in the month that he lived to fulfill his needs. It is evident that when Jazz delivers an item to the recipient, it always depends on what kids she brings.

In the next datum 8, the hallways of **Shepard feature wood paneling and tasteful, noise-absorption carpeting...** in this case, it is also included in the category of literal images because it describes a place that is in Shepard is a prosperous district located in Artemis. It has a **wooden walkway and uses beautiful sound-absorbing carpets**, so readers can imagine how the shapes and structures described by jazz as depicted by Shepard District's central jazz after sending the package to the recipient.

It is significantly closer to the last datum, in datum 9. We have plenty of silicon on the moon, so the glass is locally made. **But still,**

**talk about ostentatious** ... In this section, jazz explains that what is meant by the affluent area in Artemis is an area that is truly magnificent and very sparkling with some of the features that exist in the Shepard area and also as a visual image for the readers to be able to understand what jazz means, so that jazz labels it with the word pretentious and also includes it as a literal image as an explanation that it was a city of the rich.

Next, in datum 10, I will no longer challenge you on anything Stark trek-related. **Are you going to the apollo 11 sites** while you are here?... in this case, a literal picture is to describe a site called apollo 11 where readers are required to imagine this apollo 11 place, which Jin will visit after talking to Trond because Jin heard about the EVA tour. Still, Trond at that time also told Jin that there is a place as good as apollo 11 that Jin would like to visit and also explained the details that are the reasons why this belongs to the category of literal images.

Move to the next datum 11, it is technically not a currency, **"Trond said from the credenza."** we are not a country... in this part of the literal image, it explains in more detail where a credenza is a place where Trond usually makes tea or coffee so that readers can imagine how **credenza** is while talking to jazz and genies about the problem of naming currencies to make transactions on the moon.

In this datum 12, So **Artemis's air is pure oxygen at 20 percent of Earth's air pressure.** That gives us the right amount of oxygen

while minimizing stress on the hulls... In the case of this literal image, the genie explains in detail how much oxygen is different between the Earth and the Artemis and makes the readers able to understand precisely and imagine the content and elements that make the difference between oxygen on Earth and the Artemis's because the jinn also explains that in that **Artemis's has pure oxygen with an air pressure of 20 percent of the air pressure on Earth.**

Please move to the next datum, 13. Flammable materials are illegal unless there is a perfect reason for them. **The last thing that we want is a bunch of idiots wandering around with lighters...** in this literal image example, the use of fire in Artemis is strictly prohibited. Artemis itself consists of pure oxygen. Jazz misses how humans on Earth are accustomed to playing lighters. Readers can imagine how the risk of playing lighters in the Artemis area is where the use of fire is strictly prohibited, especially when you want to smoke, then jazz's statement about wanting **a bunch of idiots playing lighters** illustrates that Artemis is a place where is not allowed to play with lighters as is the habit of smoking humans on Earth and play lighter.

In this datum 14, I like American TV shows, and my favorite food is ginger ice cream. **But I usually eat gunk ...** on this one statement, jazz sent a message to kelvin Otleno and told him his favorite food. Still, jazz very often eats gunk. After reading this

statement, readers can imagine how the **taste of gunk**. As we know, gunk is a pile of garbage that describes the flavor, making it an example of a literal image.

Please talk about this datum 15. A few people who know one another emigrate and set up a service. Then they hire their friends. And, of course, they hire people they know. **A tale as old as time** is an exciting example of a literal image because jazz explains the conditions that occurred there when she and Rudy were in an industrial area. Readers can get conclusions and reading experience that things like this have happened. **The tale is as old as time**, so it is no longer a strange thing for readers.

Please talk about this datum 16. According to the doc, she has a black eye, **A hematoma on her cheek**, two bruised ribs, and a concussion... the explanation in the sentence also becomes part of the literal image after seeing the person experiencing **a hematoma on her cheek**, which is the concrete language of medicine which explains that there is swelling of the blood vessels on the cheek so that readers can imagine and feel how the events of a fight between Rudy and Binh.

Move to the next datum 17, I brought up a web browser on my Gizmo and searched for **“ZAFO” it was a conjugation of the Spanish verb Zafar**, meaning “to release” ... in this session, jazz tries to find out the meaning of the word ZAFO using his Gizmo

which has the root word **Zafar** which means stay away, and so when we read this statement, it is clear that the word ZAFO is a word from Spanish which means stay away (Zafar) while reading the word.

Time to move to the datum 18. First, **they collect anorthite ore**. That's easy. All they have to do is pick up the suitable rocks... in this statement, Jazz says that the primary thing is to **collect Anorthide ore** to make aluminum using the harvest, a stone search engine. Readers will imagine how aluminum is made while reading Jazz's statement about aluminum manufacture. This statement is included in the literal category image as an example to fulfill the reader's request for specific details.

Then go to datum 19, Trond said. **There is plenty of olivine and ilmenite around**. Those are great for making iron, but if you want aluminum, you need Anorthide... In this case, Trond explains that he lives in a lowland area with many **olivine and ilmenite** ores as iron-making materials. In this explanation, the reader imagines the ores, that are the essential ingredients for making iron, aluminum, and others and also as a clear indication of what ores are. We must use that in manufacturing the material itself. Then this statement is categorized in a literal image.

In datum 20, Dale set my helmet on a bench, took my hand, and unclamped the seals on the glove. He rotated the glove at the wrist and pulled it off. "You went too far this time, jazz, way too far" you are

going to **lecture me on morality**... in the case where Jazz has an argument with Dale, who is always looking for trouble with him then, Jazz utters words that make Dale feel sick of Jazz's words, here the reader will be able to understand how Dale feels getting bad words from Jazz and also says that he will get **a lecture on morals** from Dale, that explanation is also included in the category of literal images that we can feel.

Next to datum 21, I know, but a deal's a deal, "Billy!" said. Dale "all my **drinks are on jazz from now on!**" she's a millionaire... in this statement, Dale calls a waiter and says that all the drinks that Dale **drinks from now on are paid for by Jazz** because Jazz is now a millionaire, readers will feel the effect of Dale's statement which is very happy because his drinks will be fully paid for by Jazz, the information like this is one part of the literal image that the reader can feel when reading the statement.

Move to datum 22. We both stripped down to our underwear. What? I am supposed to **demurred around the gay guy?**... In this case, Dale's statement is unequivocal enough to convince Jazz that he should be ashamed to be almost naked in front of gay people like him. In this sentence, the reader will feel both a sensation and a statement simultaneously, which Dale makes because, in general, he is **almost naked, even in front of gay people**. It can happen while the reader continues his reading and also one of the forms or examples of literal

image.

Go to the datum 23, do not believe me? Put ice water in a saucepan and cook it. The **water temperature will stay at 0 degrees until the last ice cube melts...** at this time, Jazz made a statement about the melting point of an object in Artemis by stating that **water and ice will be at a temperature of 0 degrees** Celsius until the last ice from the water melts, here every reader will understand precisely what happens at Artemis because Artemis has the laws of physics are different from those on earth, thus enabling the reader to understand the specifics so as not to be misunderstood when reading the sentence.

In datum 24, She dodged to the side and hammer-locked my arm. Of course, I did! How dare you try to **destroy my life's work!** At this point, Dale is furious and asserts how you can damage his **life's work.** The readers here can undoubtedly understand what dale's artwork means, namely a digging tool or machine, because at that time, Sanchez and Jazz were fighting because of a dispute. This sentence is included as an example of a literal image.

In datum 25, Dad, you are not a bad father. **I am just a shitty daughter...** in this case, Jazzmine, better known as Jazz, made a statement of regret towards his father as she stated clearly that his father was not bad. Still, she **could not be good.** Here, the readers can clearly understand the feelings that are being experienced by Jazz because of the statement from Jazz which is also an example of a

literal image itself which becomes a specific explanation of something to the readers.

In the last part of literal image datum 26, I left without further comment. I did not want to spend any more time **inside the mind of an economist**. It was dark and disturbing.... the last example of a literal image is how Jazz makes a detailed statement about the actions performed by Jazz after a little conversation with Ngungi. And here, readers can feel how complicated a discussion is when discussing the economy together with someone who understands what **economics** is

#### b. Recurrent Imagery

While remaining literal in each instance, images may contribute to the total design of a story if they frequently recur in the story. Recurrent imagery may consist of several repetitions of the same image or the frequent occurrence of images that, while not identical, all relate to a single theme. The images may be entirely literal or a mixture of literal and figurative.

If we talk about this sentence, in datum 27, **I hit the ground, scrambled to my feet, and clawed at the hatch crank. My ears popped. An alarm blared in my helmet. The tank was on its last legs-it could not counteract the leak anymore...** this phrase is categorized as a recurring image because it describes how jazz feels when it is hard to stand up, the feeling is broken because of running out of breath, including the eardrums that feel like they are about to

explode. The oxygen gas they have is very thin. The reader will feel how someone feels and expresses when they are in a state emergency and will run out of breath when encountering problems on their way in Artemis.

In the next datum 28, **Bob Lewis is a former US Marine with a no-bullshit attitude. More important, he is the EVA Guild's head trainer. He answers to the Guild master, but Bob and Bob alone determine your suitability to become a member...** this sentence can be categorized as a recurring picture because of the individual repetition that occurs, namely Bob Lewis, who has explained that he is the only one who teaches, the head teacher, and who accepts new members. When reading this, the reader will feel the suggestive power given by Bob as the holder of control over all things related to EVA as the total design in this novel.

In datum 29, **Conrad's full of plumbers, glass blowers, metalworkers, welding shops, repair shops... the list goes on, but Aldrin is truly a resort. It has hotels, casinos, whorehouse, theaters, and even an honest-to-God parks with real grass...**in this one-sentence fragment, it is included in the category of recurrent images, although not identical, all of them are related to one theme, and when the reader reads an explanation like this, it will provide an image which shows that the splendor that is in Aldrin Conrad itself with its many features and various buildings that can become the

center of visits in the area itself.

If we talk about datum 30, **I was headed to the estate of one of the richest richfucks in town. Trond Landvik. He had made a fortune in the Norwegian telecom industry. His home occupied a big chunk of Shepard's ground floor-stupidly huge, considering it was just him, his daughter, and a live-in maid...**in the discussion, this time is a sentence that includes examples of repeated images as explained by jazz that there is someone namely Trond Landvik who is very, very rich even more than the wealthiest person in the city with an explanation starting from his job and the shape of his house. Readers will be able to describe what jazz is meant as recurrent images because it provides a complete description of an explanation of a character in the answer given by jazz.

In datum 31, **Oh, poor billionaire, I said, "maybe you should have some moors installed so you can pine on them" "yeah, yeah, rich people are evil, blah, blah, blah"** ...In this explanation, jazz uses a recurring image as a parable that he wants to convey to the reader that how rich people complain so that jazz gives a statement that you can buy a special place to complain. It ends with blah blah blah, which is an explanation that jazz no longer wants to give the same example to the billionaire who accompanied him to speak. This is also categorized as recurring images, as described earlier, to provide a total impression to the reader.

Next datum 32, **Once everyone de-trained, Raj called out in a clear, loud voice, “this is the 2:34 p.m. traaaain to Apollo Eleveeeeeeeen! All aboooooarrd” he held out a vintage-looking brass ticket shredder...**In this statement, loud and repeated words are shown, which also include examples of recurring images, namely a trained cashier at Artemis shouting in a loud, firm, and clear voice that the Apollo majors will depart soon, accompanied by tearing the ticket in his hand, readers will be able to interpret this statement very, very clearly for a total design of the events that occurred at that time.

Go to datum 33. **I leapt directly to the roof of the next harvester over-the one I had just meticulously turned into a time bomb. All that work for nothing. Sigh. Snip. Snip. Snip. Snip! The other two harvesters backed away...**Here the reader will be faced with recurrent images again because when Jazz arranges the harvester to run according to the wishes of Jazz and also sets a time bomb which indicates the harvester will run collecting ore in that area although not identical but all related to one theme, namely the harvester's property, Jazz. Readers can understand the complete design presented by Jazz about the working harvester.

In datum 34, **aww, fuck, I said. They did not need to find me. They just needed to beat me back to town. Then they could guard every airlock. Eventually, I had run out of air and had to surrender. "Shit! Damn! Crap! Ass! Son of bitch!" it is important**

**to vary your profanities. If you use the same one too often, it loses strength. I fumed in my suit for a minute more, then calmed down and got to scheming...**In this phrase, Jazz expresses anger towards a group of people who want to catch Jazz after doing illegal things in Artemis. Readers will also feel the suggestive effect of Jazz's words through various reproaches from various types of harsh words uttered by Jazz. This is also an example of recurrent images because it gives a suggestive effect to the reader by using a recurrent image as an addition to the events experienced by Jazz.

Go to datum 35. **Do you know who owns Sanches Alumunium?** I shrugged **"some Brazilian company."** **"They are owned by O Palacio, Brazil's largest and most powerful organized crime syndicated."** I froze **shit, shit, shit, shitty, shit!** "I see," I said. **"Spiteful bunch, are they?"**..... this explanation is the same as the previous explanation about Jazz being angry with the biggest organized crime syndicate in Brazil looking for Sanchez aluminum to be used to launder money. Here, the reader is again met with the phrase "recurrent images" as a form of great anger towards the Brazilian organization.

Next to datum 36, He looked genuinely pained. **"It is just...it cost a lot of money to make that sample. We had to launch a dedicated satellite with a centrifuge to grow in the low-Earth orbit. I will super-super-duper-duper fired! If I go home without**

**it.**".... in this case, it is shown how a very precarious situation occurred between Jazz and Jin chu, which discusses the charming city of ZAFO. When the reader reads this sentence, of course, the reader will immediately realize and know that this is one example of a recurrent image that shows Jin Chu's fear of not bringing home the box that was secured by Jazz by telling Jin Chu I would really and be fired if he came back home without bringing that ZAFO to home.

In datum 37, **"It is zero. Fucking zero!"** he formed a circle with his arms. **"zeeeeerrroooo!"** I sat on the stool next to him. **"So...no lights get lost in transmissions? At all?"** **"Right! Well, at least, as far as I can tell. The precision of my OLTS is decibels per kilometer."**...in this case, Jazz and Svoboda are talking about the attenuation of OLTS produced by fiber optic cable while ZAFO here is described as having zero attenuation, repeatedly Svoboda says zero to convince Jazz that it is a very expensive masterpiece, the reader will feel slapped with the words Svoboda which very, very, clearly gives the impression of a suggestion to the reader that ZAFO is a device that has no attenuation at all or no light is reduced when transmitting.

Go to datum 38. **It all caught up with me. Constand danger, poverty, anger, and worst of all. Sheer, unmitigated fatigue...**In this statement, Jazz expresses all the feelings that have been felt, whether they are threatened because poor Palacio because they don't

have much money are angry because Ngungi also interfered with the events experienced by Jazz. Here it is clear enough for the reader that this is one of several examples that have been given of recurring images. However, they are not identical word for word but are closely related to each other, namely explaining the feelings experienced by Jazz.

Same with the last datum, datum 39, **I had gone beyond sleepy into what my father used to call "Overtired." He usually used that term while chucking my cranky, eight-year-old ass into my bunk for a forced nap...**As with the explanation from the last datum, here Jazz expresses his father's habit when he is tired of working by using the word overtired as an explanation and also explains how he was forcefully thrown to the bed by his father. The reader must have known what Jazz meant because this explanation is very related. With the previous description, namely Jazz's feelings, it's just that the context is different in the last discussion, Jazz's feelings. Still, in this discussion, Jazz represents his father's feelings, who is very tired of working all day with his hammer.

Talk about datum 40. **They are not dead. They are not dead. They are not dead. I repeated the mantra to keep from losing shit...**in the last case talking about recurring image is how Jazz is talking to himself when he has to pass through a road full of piles of corpses along the way. The reader will also be hypnotized by how

Jazz feels, who keeps repeating that they are not dead, they are not dead, they are not over. The statement here is unambiguous to give a suggestive effect on Jazz and the readers so that Jazz does not lose his sanity.

### c. Figurative Images

Figurative images are sometimes called "tropes" or, more commonly, "figures of speech." An Image is figurative when it must be understood in some sense other than the literal. In the best fiction, figurative imagery is not merely ornamental but is an integral part of the real meaning of the work.

If we talk about this datum 41, **I bounded over the gray**, dusty terrain toward the huge dome of Conrad's bubble. It is an airlock, ringed with red lights, standing distressingly far away... in the first part of the figurative image, the example is to use the word **I bounded over the gray**, as a figurative word, namely to make this story an aesthetic side which if generalized it will only be an I landed on the moon, so the word moon is changed using figurative theory image as a form of a figurative word in its true meaning.

Next to datum 42, the long strides paid off. I was **hauling my ass** now. I even left Bob behind, and he is the most skilled EVA master on the moon... In this case, the word **hauling ass now** functions as a figurative image that describes how fast Jazz runs by taking Bob as an example because Bob is the best person to walk

on the moon, here the reader can draw the conclusion that the word figurative is an aesthetic word. to describe the feelings and situations experienced by Jazz.

In this datum 43, I live in Conrad down 15. A dingy is fifteen floors underground in Conrad's bubble. **If my neighborhood were wine**, connoisseurs would describe it as shitty, with overtones of failure and poor life decisions"... In this example of a figurative image, Jazz's neighbor is related to the word rotten **wine** figurative images that indicate how Jazz lives where he lives, the reader can also quite clearly understand what the word horrible **wine** means is an expression that is an expression of being annoyed because Jazz lives in slums.

In datum 44, Technically, it is a "capsule domicile," but everyone calls them **coffins**. It is just an enclosed bunk with a door I can lock... in this section, Jazz mentions his place of residence as **a coffin** which means the word is a coffin. This is also an example of a figurative image because a coffin is a different place from a bed. Only Jazz uses this word so that readers can feel and understand how narrow it is.

Next to datum 45, I checked the landing zone schedule on my Gizmo. No **meatship** today... When we want to say Vehicle, we usually use the word vehicle or motorbike, but in this case, Jazz uses the word **mateship** instead of the word vehicle. And it is clear enough to describe to the readers what is meant by **meatship** is a vehicle

people use to travel.

According to datum 46, I paid a monthly fee to store the trigger at the port. Where else would I keep him? I have less space at home than a typical **earth prisoner**... this time, Jazz uses the word **Earth prisoner** as a figurative image, which is expected that readers who typed in reading can understand the situation experienced by Jazz and the place where he lives is so narrow that he doesn't have enough space to store Jazz's triggered instrument at home.

In datum 47, the door slid open to reveal a bulky Russian woman. Irina had been with the Landvik's since the **dawn of time**.... in the fragment of the word beginning of time is an example of a figurative image that depicts a Russian named Irina who has worked with Trond Landvik since ancient times, the word dawn of time is clear enough for readers not only as an explanation but also as a figurative image to describe a time.

Next datum 48, "but not as magical Artemis!" Jin beamed. This is my first visit to the moon. I am like a **kid in a candy store**.... In this case, the genie uses a figurative image instead of the word impressed and is very impressed with a place he has never visited, namely by using the **word kid in a Candy store**. Readers will also understand very well how attractive a child is and are very happy when invited to go to a candy shop's they will surely be impressed and want to explore more about the area.

In datum 49, "Coffee's just a **bad kind of tea**," I said. "Black tea is the only hot drink worth having"...in Jazz's statement, this time he described coffee's just a **bad kind of tea**. Morning readers who do not know the meaning of Jazz may be confused to hear these words, but as we know that in the Saudi Arabia area, tea has become a characteristic of the Saudi Arabia people as a nice drink. Here, the figurative image plays a role in explaining the meaning of the two different words.

Go to the datum 50, and she will not do it unless Rudy provides something compelling. So, we do have some **cheeks and balances**. Just not many... the word cheeks and balances here is an example of a figurative image where Jazz describes an event and compares itself with Rudy using that word. For some readers, the words **cheeks and balances** combine different words. Still, here the reader is expected to understand the meaning of the word, namely Rudy and Jazz have their advantages and disadvantages.

In datum 51, "Smuggling? Me? **Golly gee**, ...in some cases that are often experienced by readers when reading a story, is the lack of knowledge about a figurative image which plays a significant role in every story, both in novels and on several sites to read a story, the word **Golly gee** here replaces the word we often hear, namely expression when shocked or shocked after listening to the other person talking's we speak.

Talk about this datum 52, He **rabbit-punched** the barely conscious man in the eye, then let his head fall to the ground... In this case, it describes an incident about a fight between Binh and Rudy, which used the word He **rabbit-punched** as a substitute for hitting him at high speed. For some readers, this figurative word is often found when they want to explain the scene that occurred at the time of the beating. We know that rabbits are very agile.

Let's go to the next datum, 53. I was trying hard to get away, too. His grip was like an **iron vise**. I still think about that sometimes late at night... In this case, Jazz explains that Rudy's grip is like an **iron vise**. When the reader reads what Jazz said, the reader will immediately feel and understand how firm Rudy's grip is by using the word iron as a figurative word. strong to change using human strength.

In datum 54, Irina opened the door and frowned at me as I had just **pissed in her borscht** as usual... In this statement, Jazz describes an expression using a figurative image, namely, I had just **pissed on her borscht**. Usually, this word is used to describe an event, but here Jazz uses it as a figurative word to express Irina's feelings and facial expressions when opening the door.

Next datum 55, Trond turned to his daughter. "**All right, Pumpkin**, time for you to skedaddle... in this discussion with the same theme, namely figurative image, Trond uses the word **Pumpkin** as a substitute for his child, some readers who have

often encountered words like this must be good at reading but what we know is that Pumpkin is a fruit that we usually eat with a sweet taste.., the statement here is enough to make the reader able to understand the meaning of the word Pumpkin as a substitute for the word Trond.

According to datum 56, if I could not set the alarm time, I had to use a less subtle approach. I disconnected both **Alligator clips**... here it is explained that **Alligator clips** are part of the harvester that functions to hold the seeds from harvesting ore. For readers, it is an example of figurative images because crocodiles are animals while the harvest is a machine. It is when grasping ore, like only a crocodile, it bites its prey very firmly.

Last part of figurative images datum 57, you know what's worse than having barbed rocks in your eyes? **Grinding barbed rocks into your eyes**... at the end of the few examples of the figurative image is Dale's words which quickly caught Jazz's hand when several moonstones entered his eyes. Namely, by saying **Grinding barbed rock into your eyes**, some readers can quite clearly see and imagine how painful it is when some small stones enter a person's eyes, and it is very, very dangerous if you rub them again. It can be concluded that after being struck by the misfortune of Jazz's eyes, Dale Strictly says don't repeat it by using a figurative image as a means of conveying it to Jazz.

#### d. Symbols

A symbol is a kind of image that differs from other images in the use to which it is put. Because symbolism often proves a stumbling block for inexperienced readers, we shall approach the subject of the literary symbol indirectly. Language is limited. We don't have a name for everything. Even in a relatively simple discourse on familiar topics, we must frequently resort to modifiers. Note how many modifiers I have used in the preceding sentence. I had to attach "relatively simple, to "discourse" because we don't have a single name—a symbol—for the thing I had in mind.

The first part of the symbol in datum 58, "I am the **EVA** master here," Bob said. "Stop right now and let me cross-connect!"...in the first part, where Bob is an astronaut who has been on the moon for a long time, and he straightforwardly says that I am an expert on **EVA** here, ordinary readers who want to read stories like this should look for some symbols that are used to explain some parts whether it's place names, events, names of people and much more as. as a stepping stone to quickly understand the word in question, the word **EVA** is a word that describes the activities of astronauts outside their planes.

Following the example in datum 59, I live in Artemis, the first (and so far, only) city on the moon. It is made of five giant spheres called "**Bubbles**"... in this explanation, the word **bubbles** becomes a

symbol to explain the material form of the places in Artemis itself. Readers are required first to know that what is meant here is not the **bubbles** that we usually see but the shape of some parts of the city of Artemis.

Another statement in datum 60, "It was just a **Lark**," I said nonchalantly. "It is not like EVA work is a real job".... in this case, the word **Lark** is interpreted as a feeling of fun if we interpret it verbally by the translator, but the word **lark** here is a symbol of a nonsense word said by Jazz to reply to Dale's words who mocked Jazz for not being able to pass the EVA test selection, the readers must understand what is meant by the phrase substitute for an event because language itself is very limited to what is felt by humans.

Next to datum 61, there is nothing more annoying than trust-fund boys looking for "**Moon poon**"....in this case, the word **Moon Poon** is a symbol to explain the uniqueness of the moon, but for some lay readers who do not understand clearly that the symbol is not just a form, it can change feelings that words cannot describe and as a result, from typing can we make words then the symbol here becomes a tool to find out what is meant in the story.

In datum 62, he closed the box. He stamped it with the Artemis symbol-a capital **A** with the right side styled... in this case, it is elementary to understand that Artemis has an oversized **A** symbol in the name of Artemis itself as a sign that it is part of Artemis itself,

here the reader can quite understand what kind of symbol is meant by the reading.

In this datum 63, ...Three thousand **slugs**... as is the case with some symbols that we usually encounter, the word **slugs** here becomes a word symbol to describe the currency used by everyone in transactions at Artemis. Readers should be able to carefully observe each symbol in a story so as not to become ambiguous in reading.

Move to the datum 64. ...He set the **Gizmo** on top of the box... In this explanation, symbols can also be a tool, as in the He set his **Gizmo** section, readers who want to know the meaning of using the word **Gizmo** as a symbol to read in detail the events that occurred as shapes and objects that we have never seen. Or feel it, the gismo here is a tool like a cellphone with many features and clothes used by astronauts.

In the bold word of datum 65, it is good at carrying heavy things. So, I decided it was male. I named him **Trigger**... in this case, the symbol becomes an object used by Jazz to carry goods which we usually call the word vehicle. Still, it is different from the car's shape than Jazz named **Trigger**. The morning the reader is very comfortable reading because it no longer requires additional skills in interpreting a word. After all, the new word was issued by Jazz when naming a vehicle he often uses to deliver packages.

Next to the datum 66, I grew up watching **Star Trek**. Now I get

to live it... as Jin said that he lived watching the star trek series, but later became a symbol of the expression of his feelings. For a group of readers, it would be familiar with the word **Star Trek**, but unlike people who have never watched star trek, it would be homework if you don't understand how to give symbols to your feelings.

According to datum 67, one slug gets one gram of cargo delivered from Earth to Artemis, courtesy of **KSC**... in this case, the word **KSC** becomes a symbol for the Kenya space corporation, which is a corporation that facilitates every transaction that wants to be carried out between Earth and Artemis for readers, this is an obstacle to understanding the continuation of the story because these words are used for someone who understands science fiction and also some parts of the astronaut.

In the datum 68, **Mr. Do-Right.**, you sure get some strange notions... Likewise with the example of this symbol, said **Mr. Do-Right** is part of the symbol used by some people when talking to the other person who thinks he is always right so that he is branded using the word as a symbol, the reader must be familiar with it. We often use symbols like this to symbolize feelings or parables about something that does not have the original word.

In this datum 69, He was paying me a million slugs. We could play **007** if he wanted... in this case, the symbol acts as an action film that shows a shooting scene with criminals symbolized using **007**. For

the readers, once again, the story has many additional symbols that can only be obtained if we have enough insight into some of the uses of symbols in some writings.

Next to the datum 70, "This thing is a **Tank**," Trond. It is not going to be easy to kill... in this section. The word tank is meant to be one of the symbols that describes extreme resistance as, in general, a **tank** is a fighting vehicle specially designed to pass through various obstacles on the battlefield, for readers when reading this story can draw the conclusion that the harvest used to harvest the ore is very strong like a tank.

In the next datum 71, He had been assigned to Artemis by **ESA**.... This time, several symbols require special skills, namely, how much insight the readers have about matters relating to outer space. The **ESA** is a symbol of an intergovernmental organization specializing in space investigations.

Go to datum 72, "**Svyate der'mo!**" he put his hand on his chest and panted... this explanation is quite complicated. After all, it uses the word symbolic symbol from the Ukrainian language, "**Svyate der'mo!**" which means hell, several times I explain to the reader how important it is to have a lot of insight into the word used as a symbol to describe something because the author can't choose who the writing will be read to.

Next to datum 73, This is not an Operation to **O Palacio**. It is just

an avenue for creative accounting...at this time again, we are met by the word that becomes a symbol, namely **O Palacio**. Literally o Palacio is a language from Spanish, which means the unit of operation. If the readers are from Spanish, they might understand, but again, when you want to read the symbol, it can be various the meaning. One of them is operation **O Palacio**.

In the last part of the symbol in datum 74, He spun to a wall-mounted machine. "That's where my spectrometer came in!" He stroked it gently. "I call her **Nora**"...in the last case, discussing the **Nora** symbol here as a symbol for the name of a device that can transmit electric currents in a tool consisting of a lot of glass, and there are also several other ores such as *Tantalum, Lithium, and Germanium*. For readers, this is again an obstacle to the lack of knowledge about some pure ores that can only be known if we study chemistry and physics.

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

This part consists of two points. There are conclusions and suggestions. In conclusion, the researcher explains the result of the discussion, and then suggestions explain what the researcher suggests to the next researcher who will research imagery.

#### A. Conclusions

Based on the results of the data that has been analyzed, there are four types of imagery based on Kenney's theory, namely literal images, recurring images, figurative images, and symbols. And all kinds of imagery described in Kenney's theory are found in this study.

1. In the imagery that has been studied by the researcher, the researcher concludes that in the writing technique, imagery plays a vital role in a written work, namely as giving aesthetic, ethical, and exciting effects that can make every reader interested in reading it. There are 4 types of this novel, namely, literal imagery, recurrent imagery, figurative images, and symbols. In this novel, literal images are a way to give a clear impression to the readers so that they can more easily understand the meaning and plot of the story that the author of the novel wants to convey, as well as the use of recurrent images that were as a researcher, the researcher, found that the use of recurrent images is as a form of giving suggestive meaning to the plot of the novel so that readers can clearly understand and feel how the

power of the novel told by the author, moves to the following type of imagery. Figurative images here are beneficial in providing an aesthetic effect from writing techniques in terms of word use and meaning in explaining the storyline. The last is the use of symbols in this novel also exciting while replacing words that the author generally uses. In this novel, symbols are symbols. It also serves as a form and a sign to explain something that cannot be said so that readers can better understand both the plot and the story the author wants to convey.

2. The data that has been found based on the types of imagery there are 74 data, the data are 27 are categorized as Literal Images, 14 data including Recurrent Images, 17 data included in Figurative Images, and 17 data included in the Symbol category.
3. Literal images are the dominant image type in novels, and recurrent images are less common image types in novels.

## **B. Suggestions**

1. The researcher hopes that the reader can understand this research and learn well.
2. For further researchers who will research imagery, researchers suggest reading more theories about types of imagery so that additional researchers can understand more and more deeply about imagery.
3. For lecturer and student, this research could be additional information to studying stylistics that focused on imagery, such as types of imagery and the kinds of imagery.

## APPENDIXES

### A. Biography of Andi Weir

Weir was raised in Milpitas, California. His father, John Weir, was a physicist at Sandia National Laboratories, and his mother was an electrical engineer. He was an only child, and his parents divorced when he was eight. Weir grew up reading classic science fiction, such as the works of Arthur C. Clarke and Isaac Asimov. At 15, he began working as a computer programmer for Sandia. After high school, Weir studied computer science at the University of California, San Diego, though Andi Weir did not graduate. He worked as a programmer for several software companies, including AOL, Palm, MobileIron, and Blizzard, where he worked on the video game *Warcraft II: Tides of Darkness*.

In 2015, Weir lived in Mountain View, California, in a rented two-bedroom apartment. Since he has a fear of flying, he never visited the set of the film adaptation of *The Martian* in Budapest, where most of the scenes set on Mars were shot at Korda Studios. In 2015, with the help of therapy and medication, Weir was able to fly to Houston to visit the Johnson Space Center and to San Diego to attend Comic-Con. Weir is married to Ashley Weir, whom he met while he was in Los Angeles to pitch a TV series. They have one son born in 2021.

## BIOGRAPHY

Fathur Rahman was born in Ujung Pandang, South Sulawesi, on Mei 021<sup>th</sup> 1999 as the first child from Burhan and Suraedah. He has two brothers. He started his study at SDN No. 066 Pekkabata and graduated in 2011. In the same year, he continued his junior high school at Mtsn Ujung Baru and graduated in 2014. He continued his next study at SMAN 01 Polewali and graduated in 2017. In the same year, he continued his study at Alauddin State Islamic University of Makassar as English and Literature student then accomplished his study in 2022. He loved sharing everything. If you want to discuss about his research, you may contact his through email. Please contact his email address [Fathur210599@gmail.com](mailto:Fathur210599@gmail.com).
