## PENGESAHAN SKRIPSI

Skripsi berjudul "The Effect of Using The Multimodality Method in Improving The Eight Grade Students' Vocabulary Mastery at MTs Al-Ikhlash Addary DDI Takkalasi", yang disusun oleh Saudara Ashfary Mukrim, NIM: 20400121031, mahasiswa Program Studi Pendidikan Bahasa Inggris Fakultas Tarbiyah dan Keguruan UIN Alauddin Makassar, telah diuji dan dipertahankan dalam sidang munaqasyah yang diselenggarakan pada hari Kamis, tanggal 2 Januari 2025 M. bertepatan dengan tanggal 2 Rajab 1446 H, dinyatakan telah dapat diterima sebagai salah satu syarat untuk memperoleh gelar Sarjana Pendidikan pada Jurusan Pendidikan Bahasa Inggris dengan beberapa perbaikan.

Gowa, 27 Januari 2025

**DEWAN PENGUJI:**  
**Nomor SK 1301 Tahun 2024**

Ketua Sidang : Dr. Sitti Nurpahmi, S.Pd., M.Pd.

Sekretaris Sidang : Dr. Azizul Hakim, M.Pd.I.

Penguji I : Dr. H. Abd. Muis Said, M.Ed., TESOL.

Penguji II : Indah Fadhilah Rahman, S.Pd.I., M.Hum.

Pembimbing I : Nur Aliyah Nur, M.Pd.

Pembimbing II : Multazam Abubakar, M.Hum.

## ACKNOWLEDGMENTS

*Bismillahirrahmanirrahim*

*Alhamdulillah Rabbil Alamin*, First of all, the researcher would like to express his thanks to the presence of Allah *Subhanahu Wa Ta'ala*, the Lord of the universe, who has bestowed grace, favors, and the opportunity given to the researcher so that he can complete this thesis writhing with the title "The Effect of Using the Multimodality Method in Improving the Eight Grade Students' Vocabulary Mastery at Al-Ikhlas Addary DDI Takkalasi" can be completed. *Shalawat and Salam* to our prophet Muhammad *Shalallahu Alaihi Wassalam* who has brought us from the darkness to the lightness.

During the writing of this thesis, the researcher received a lot of advice, guidance, encouragement, and input from various parties. They were the motivators while completing this thesis. The researcher can be successful because of them. Therefore, the researcher expresses his deepest gratitude and deepest thanks for them, they are:

1. The researcher's first love, his beloved late mother. **Hj. Sitti Marsyudiah**, she did not have time to accompany the researcher on his travels during his education. Thank God, now the researcher is at this stage, finishing this simple piece of writing as the last manifestation before his really leaves. So, the researcher dedicates this article to the guardian angel in heaven. May Allah SWT widen the grave and place his mother in the most noble place next to Allah *Subhanahu Wa Ta'ala*.

2. **Mr. H. Akhsan Majid** is someone who endlessly provides love and motivation. Thank you for being patient, fighting, and sending good prayers to the researcher. The researcher dedicates this simple paper and title to you. Always be healthy and live longer so that you are always there in every journey and achievement of the researcher's life.
3. **Prof. Dr. Hamdan Juhannis, M.A., Ph.D.** as the rector of Universitas Islam Negeri Makassar and all his vices.
4. **Dr. H. Andi Achruh, M.Pd.I.** as the Dean of Tarbiyah and Teacher Training Faculty of Alauddin State Islamic University of Makassar, and all his vices.
5. **Dr. Sitti Nurpahmi, S.Pd., M.Pd.,** as the Head of the English Education Department of the Faculty of Tarbiyah and Teacher Training of UIN Alauddin Makassar.
6. **Nur Aliyah Nur, M.Pd.** as the first consultant, and Secretary of the English Education Department of Faculty of Tarbiyah and Teacher Training of UIN Alauddin Makassar.
7. **Multazam Abubakar, M.Hum.** as the second consultant who patiently assisted in completing this thesis.
8. **Dr. H. Abdul Muis Said, M.Ed. TESOL.** as the first examiner and **Indah Fadhilah Rahman, S.Pd.I, M.Hum.** as the second examiner for their corrections and advice so the researcher completed her thesis.
9. Sincerely thanks to all the lecturers, and the staff of the English Education Department for their help, guidance, and assistance during the years of the researcher's study.

10. **H. Abdul Salam, S.Ag.** as Headmaster of MTs DDI Takkalasi, **Juhri Al-Banjai, S.Pd.** is the English teacher who has given permission and is willing to help the researcher during the research process.
11. Special thanks to the **Eighth-Grade students VIII A and VIII B of MTs DDI Takkalasi** as the sample of this research and for their cooperation with the researcher.
12. Special thanks to **G21FFIN**, especially all of my classmates in **PBI B 2021** who could be mentioned individually. Thank you for the togetherness since 2021.
13. All of the members of **New Generation Club (NGC)**.

## ABSTRACT

**Name** : Ashfary Mukrim  
**Reg. Number** : 20400121031  
**Department** : English Education Department  
**Faculty** : Education and Teacher Training Faculty  
**Title** : The Effect of Using the Multimodality Method in Improving Vocabulary Mastery at Al-Ikhlas Addary DDI Takkalasi  
**Consultant I** : Nur Aliyah Nur, M.Pd.  
**Consultant II** : Multazam Abubakar, M.Hum

---

This research aims to determine the effect of using multimodality methods in improving students' vocabulary mastery.

This research uses a quasi-experimental design. This research was conducted at MTs Al-Ikhlas Addary DDI Takkalasi. In this study, the sample was 60 students. There were 30 students in VIII A as the experimental class and 30 students in class VIII B as the control class.

The results showed that class VIII A students at MTs DDI Takkalasi obtained an average pre-test score of 63.13 and a post-test score of 89.43. Based on the results of the independent sample t-test, the significance value (2-tailed) of 0.00 is smaller than 0.05 when it is assumed that the variances are equal. The findings show that the alternative hypothesis means that there is a significant influence of applying the Multimodality Method in increasing students' vocabulary mastery. This research shows that multimodality methods have positive effects on English as a Second Language learners, such as increasing students' self-confidence and enjoyment in the learning process, making it more interesting for them to learn.

Therefore, teachers can benefit from using multimodality methods to engage students in the classroom and teach vocabulary

## **CHAPTER I**

### **INTRODUCTION**

This chapter consists of the background, research question, hypothesis, operational definition of terms and research scope, previous related research findings, research objective and research significance.

#### **A. Background**

English is a compulsory subject in schools taught for eight or nine years from primary school, junior high school, and senior high school until university. Fitriawan et al. (2021), English in secondary education, started in 1968, based on the decree of the Ministry of Education and Culture No.096/1967, recommended teaching English as a compulsory subject in junior and senior high schools. In addition, the decree of the Ministry of National Education No.23/2006, standard competencies to be obtained by students of senior high school who learn English, understand oral, express oral, understand written, and express written.

Vocabulary mastery is a measure of knowledge of understanding vocabulary in language learning as a basic way to master a foreign language that can be used in the four language skills (listening, reading, speaking, and writing). In addition, teachers also have many obstacles that affect students, for example, many students do not understand foreign vocabulary, and teachers master the material well. They do not use the right method as a tool in the interaction and motivation of students in learning. These factors greatly

influence English language teaching. Fitriawan et al. (2021) explained that the obstacles that cause students not to be able to learn a second language well include: 1) memorizing English words, 2) translating English words into Indonesian, and 3) pronouncing English words. Many students cannot express a language without understanding the vocabulary of that language, students will experience difficulty in expressing it.

Language has been discussed in the Qur'an. Allah says in the letter Ibrahim verse 4:

وَمَا أَرْسَلْنَا مِنْ رَسُولٍ إِلَّا بِلِسَانٍ قَوْمِهِ لِيُبَيِّنَ لَهُمْ ۚ فَوُضِعَ لِنَبِيِّهِمْ الْقُرْآنُ لِيُبَيِّنَ لَهُمْ ۚ وَهُوَ الْعَزِيزُ الْحَكِيمُ

Translation:

"We did not send any messenger, but in the language of his people, so that he could explain clearly to them. So, Allah sends whom He wills, and guides whom He wills. And He is God, the Almighty, the All-Wise."

The fourth verse of Surah Ibrahim in the Qur'an states: "And know that We never sent any messenger to mankind, except in the language used by his people." This verse emphasizes that every messenger sent by Allah *Subhanahu Wa Ta'ala* spoke in a language understood by his people so that they could understand Allah's law well. Thus, this verse is directly related to vocabulary material and underlines the importance of effective communication in conveying religious messages.

Based on the results of preliminary research conducted by the researcher at MTs the Al-Ikhlas Addary DDI Takkalasi Islamic Boarding School, the researcher chose students at this school because students still lack vocabulary in participating in the English language learning process, resulting in students being unable to explore their abilities and having low English literacy.

The Multimodality Method is a teaching method that relies on the use of various types of media and teaching tools to teach and educate students through the VARK (Visual, Auditory, Reading, and Kinesthetic) framework method. According to Ilmi & Dewi (2022), the multimodality method has a positive effect on student's ability to comprehend the material and create an authentic learning environment. Based on these factors, this reason is the main motivation for researching one of the newest methods applied in teaching English, namely the multimodality method. However, in this research, the researcher focuses on Visual and Auditory because, based on the research results of Faishol et al. (2021), using Visual and Auditory media in learning activities can make it easier for students to improve their vocabulary mastery. their learning achievement by stimulating their interest in learning. Visual learning involves a preference for learning through sight. Individuals who have a visual learning style prefer to process information through pictures, graphs, diagrams, and colors. Meanwhile, auditory learning involves a preference for learning through hearing. Individuals who have an auditory learning style prefer to listen to verbal explanations and hear sounds related to learning material.

The researcher opted for a quasi-experimental research design due to the presence of two classes that could serve as the research sample. According to (G. E. Mills & Gay, 2016), Experimental research is the most powerful scientific research method. They allow scientists to follow the scientific method and gain reliable knowledge. This requires a well-designed process with specific steps and properties that ensure accurate and valid conclusions. These properties include controlling the sample size and selection, avoiding bias, and minimizing experimental error. The researcher must understand these requirements to conduct successful experiments.

In connection with the case above, the researcher is interested in examining the effect of using the Multimodality method through a study entitled "The Effect of Using Multimodality Method in Improving the Eight Grade Students' Vocabulary Mastery at MTs Al-Ikhlash Addary DDI Takkalasi"

## **B. Research Question**

Based on the background above, the researcher formulates this research question "To what extent is the effect of using the multimodality method in improving the eight-grade students' vocabulary mastery at MTs Al-Ikhlash Addary DDI Takkalasi?"

## **C. Hypothesis**

1.  $H_1$  (alternative hypothesis): Using multimodality methods has a significant effect in improving vocabulary mastery abilities in the eighth grade at MTs Al-Ikhlash Addary DDI Takkalasi.

2.  $H_0$  (null hypothesis): Using multimodality methods has no significant effect in improving vocabulary mastery abilities in the eighth grade at MTs Al-Ikhlas Addary DDI Takkalasi.

#### **D. Operational Definition of Terms and Research Scope**

##### **1. Operational Definition of Terms**

- a. The Multimodality Method is a teaching method that relies on the use of various types of media and teaching tools to teach and educate students through the VARK (Visual, Auditory, Reading, and Kinesthetic) framework method.
- b. Vocabulary mastery is a measure of knowledge of understanding vocabulary in language learning as a basic way to master a foreign language that can be used in the four language skills (listening, reading, speaking, and writing), however, the researcher only focuses on noun vocabularies.
- c. Visual learning involves a preference for learning through sight. Individuals who have a visual learning style prefer to process information through pictures, graphs, diagrams, and colors.
- d. Auditory learning involves a preference for learning through hearing. Individuals who have an auditory learning style prefer to listen to verbal explanations and hear sounds related to the learning material.

##### **2. Research Scope**

The scope of this research is focused on the effect of using multimodality methods to improve students' vocabulary mastery focusing on nouns. Multimodality methods are divided into four, namely Visual, Auditory, Reading,

and Kinesthetic. However, in this research, the researcher focuses on Visual and Auditory because they are the most effective methods for improving students' vocabulary mastery.

Visual learning involves a preference for learning through sight. Individuals who have a visual learning style prefer to process information through pictures, graphs, diagrams, and colors. Meanwhile, auditory learning involves a preference for learning through hearing. Individuals who have an auditory learning style prefer to listen to verbal explanations and hear sounds related to learning material.

#### **E. Previous Related Research Findings**

Many researchers have reported their research on vocabulary teaching and multimodality Methods. Some of them are mentioned in the report as follows:

The first research was conducted by Ilmi & Dewi (2022), with the title “Integration of multimodality methods in the EFL classroom: students' perceptions”

Technology has greatly influenced education in the twenty-first century. Multimodality method teaching is one of the many classroom methods generated by technology. However, little research has been conducted on creating multimodal pedagogy to help EFL students improve their language skills. Therefore, their study aimed to investigate English secondary school students' perceptions regarding the integration of multimodality methods into English classroom practices. Previous research studies with various designs and paradigms have been conducted to determine how multimodality methods influence EFL classrooms.

The second research came from Yuniasari et al. (2023) with the title "Application of a Multimodal Method Learning Approach for Foreign Language Reading Comprehension Skills: Literature Review." The multimodal method approach in learning language skills is an approach that involves various modes to achieve meaningful language activities. The multimodal method approach has been widely researched in the last five years. Their research aimed to explore the opportunities and challenges in implementing a multimodal learning method approach in foreign language reading comprehension classes. The data used in their research were research articles obtained from the Google Scholar and Research Gate database sites. Their research results show that the application of a multimodal learning method approach has the potential to improve student's reading comprehension abilities from various aspects of speed of analysis, vocabulary recognition, and level of understanding. Positive improvements in students' attitudes and potential also occur by combining this multimodal method approach with other learning methods. Apart from opportunities, there are also several challenges, including time management, constraints, limited facilities, confusion in designing modes, media, and assignments, as well as students' preferences for conventional learning.

The third previous finding came from Marantika et al. (2021) with the title "Multimodal Teaching in EFL Context: A Literature Review" In the 21st century, technological developments have had a lot of influence on the educational process. Technology brings many new approaches into the classroom such as multimodality teaching methods. Their research was intended to review the implementation and

effectiveness of multimodal teaching in the context of English language teaching. Their research results found that the characteristics, benefits, and procedures of multimodality learning methods vary greatly according to the needs and abilities of teachers in designing teaching and learning activities.

The fourth research was conducted by Pan & Zhang (2020) entitled “An Empirical Study of Application of Multimodal Approach to Teaching Reading in EFL in Senior High School,” They wrote that English reading skills are one of the most important skills for secondary school students learning English as a foreign language (EFL). However, reading teaching in ELF is currently still teacher-centered, thereby ignoring students' learning interests and their participation in the teaching process. This research is intended to apply a multimodal approach in teaching reading in EFL in high school and try it out to find out whether multimodal teaching can motivate students' participation in English reading classes improve their reading proficiency, and find out students' attitudes toward the multimodal approach. With middle school students in Anhui China as research subjects, an experimental English reading teaching was conducted. Data collected from reading tests and questionnaires show that implementing a multimodal teaching approach in teaching English reading in secondary schools can motivate students' participation in reading classes and improved their English reading proficiency, and most students took a positive attitude toward multimodal teaching approaches.

The fifth research was conducted by Hijrana (2023) entitled "Teaching Vocabulary through Hangman Game for the Second Grade Students of MTs DDI Lombo'na Majene," This research aims to determine the effectiveness of teaching

vocabulary through the Hangman game for second-grade students of MTs DDI Lombo'na Majene. This research uses a pre-experimental research design, with a one-class pre-test and post-test design. The population of this research was class VIII students at MTs DDI Lombo'na Majene, totaling 40 students in total and 30 students as samples. This researcher used a random sampling method.

From the previous research findings above, the researcher concludes that students need several approaches, methods, or strategies in teaching English to improve their English, especially for vocabulary mastery. The similarities between this research and previous research findings emphasize increasing student vocabulary, student motivation, and student interest in learning English. Meanwhile, the difference between this research and the findings of previous research is that in this research the researcher is interested in studying the effect of using multimodality methods in improving students' vocabulary mastery.

## **F. Research Objective and Research Significances**

### **1. Research Objective**

In connection with the research question above, the objective of this research is to explain the extent of the effect of using the multimodality method in improving eighth-grade students' vocabulary mastery at MTs Al-Ikhlash Addary DDI Takkalasi.

### **2. Research Significances**

#### **a. Theoretical Significance**

Teachers are expected to be able to provide information about vocabulary.

That way, they will understand more about this. In addition, the multimodality method has a very positive influence on students' ability to understand the material and create an authentic learning environment.

**b. Practical Significances**

1) Researcher

Through this research, the researcher hopes to gain new insights and skills from teaching multimodality methods at MTs Al-Ikhlas Addary DDI Takkalasi to eighth-grade students.

2) Students

In this research, it is hoped that students will be interested in learning English after using the multimodality method, especially to improve or enrich their vocabulary.

3) Teacher

The results of this research can be a guide or model for teachers in teaching eighth-grade students at MTs Al-Ikhlas Addary DDI Takkalasi about multimodality methods.

## **CHAPTER II**

### **LITERATURE REVIEW**

This chapter is divided into four main sections they are Multimodality Method, Vocabulary Mastery, and Theoretical framework.

#### **A. Multimodality Method**

##### **1. Definition of Multimodality**

The Multimodality Method is a teaching method that relies on the use of various types of media and teaching tools to teach and educate students through the VARK (Visual, Audio, Reading, and Kinesthetic) framework method. Multimodal was first developed by classical rhetoricians Fleming & Mills (1992)

who realized that when communicating various factors such as voice, tone, facial expressions, and body movements were very relevant to the message to be conveyed.

Arbaini (2021) According to Kress and Van Leeuwen, multimodal is defined as the use of several semiotic modes at the same time in the design of semiotic products or events, combining these modes in several ways to create semiotic resources that can be used to identify types and levels of interaction. This is

reinforced by research results by Fajri (2018) arguing that multimodality learning methods are a learning process and use various types of sources (Visual, Audio, Reading, and Kinesthetic) to help students learn and understand.

In the technological era of the Twenty-first century, Multimodality methods are important in the field of Education, not only to engage students and motivate them but also to develop new forms of literacy in children. Various studies

support that learning and the use of multimodality methods can be an important element during the learning process. Many studies discussing the application of multimodality learning methods prove that this learning approach can increase student motivation in teaching and learning activities. Salamanti et al. (2023) The application of multimodality methods can increase students' motivation and interest in reading activities, which in turn can improve their skills in understanding texts. Djamdjuri et al. (2021) The multimodality method approach is also considered very interesting, and effective, and can help their foreign language learning skills.

## **2. Multimodality lesson step**

The Multimodal Method has several stages in the learning process. Saputra and Suryadi (2023) This approach was developed by Fleming and Milss (1992), according to this framework there are 4 main learning methods called the VARK framework (Visual, Auditory, Reading, and Kinesthetic). Understanding student learning styles based on VARK Theory has significant implications for teaching and educating students. The VARK theory developed by Fleming and Mills (1992) has classified participants students into four categories based on their preferences for the types of information that are most effective for processing. Fleming and Mills (1992) Visual style (V) is more responsive to images and visualizations, auditory style (A) prefers verbal information, reading/writing style (R) tends to approach written text, and kinesthetic style (K) prefers learning through physical experience.

The explanation for each is as follows:

a. Visual

As mentioned. People learn and memorize better with visuals. Images, infographics, and similar forms of content have a higher chance of being captured better, providing efficiency, and being remembered in the male brain. Fleming and Mills (1992) have shown that students with a preference for a visual learning style tend to experience better success in using pictures and diagrams to understand concepts.

b. Auditory

This is the listening learning version. People prefer to listen to audiobooks, podcasts, and various types of audio recordings, for example, while commuting, and while resting before bed. This is a very productive teaching approach for learning something new and improving skills. According to Nurtasha and Triyani (2021), this learning style emphasizes that students with a preference for an auditory learning style learn more effectively through conversation.

c. Reading

Despite all the modern trends, some people still believe in the old approach to reading and writing. Usually, this approach is focused on reading the material and writing down the most important points. Writing down information helps students remember and learn better. According to Nurtasha and Triyani (2021), students who have a reading learning style show that they tend to be more comfortable with written texts.

d. Kinesthetic

I always say that the best version of learning is by doing. Practice is always better than reading or listening to a lot of theoretical knowledge. When people know something and start practicing it, their efficiency level increases and they tend to acquire knowledge content. According to Othman and Amiruddin (2010), students who have a kinesthetic learning style show that they are more successful when they can learn through physical experience and practice.

An example of applying the multimodality method in visual form, namely when the teacher teaches vocabulary through picture cards that display a picture and English vocabulary so that students can know the form and writing. Meanwhile, the multimodality method is in auditory form, namely when the teacher listens to audio containing how to pronounce English vocabulary and asks students to imitate how to pronounce it.

## **B. Vocabulary Mastery**

### **1. Vocabulary Definition**

There are several definitions put forward by several researchers regarding vocabulary. Naszirah (2018) states that vocabulary is the number of words that form a language. This means that vocabulary is the key to understanding a foreign language. By enriching oneself using vocabulary, a person can express ideas in communication more easily. From this definition, it can be said that vocabulary is the sum of all words or groups of words and their meanings that form a language used by a person, group, or profession. Vocabulary plays an important role in language learning, so it can help language learners to understand and use language.

Mulyana (2017) states the following vocabulary definitions: 1) Language words, 2) Stock of words used by certain groups of people, people, number of jobs or professions, and so on. 3) More specific word groups. characteristics of the artist, art style, architecture or the like, and so on. Another definition is also given by Nasyirah (2018) shows that vocabulary is a list of words and sometimes phrases, usually arranged alphabetically and is not defined as a dictionary, material, or lexicon.

## **2. The Importance of Vocabulary**

Vocabulary is one of the language components that have to be mastered by students of all levels of school in Indonesia in learning a new language. They will have difficulties in using English if they lack vocabulary. As we know language learners want to be successful in studying the language. Furthermore, they must master most vocabularies. If students do not have more vocabulary, they cannot communicate effectively or express their ideas in both oral and written form. Vocabulary is a listing of the words used in some enterprises. Many authors have similar definitions of vocabulary. According to Nilawati (2009), vocabulary is central to language and of critical importance to typical language. Without sufficient vocabulary, people cannot communicate effectively or express their ideas in both oral and written form. Therefore, the students should have to obtain vocabulary mastery.

In addition, Irmawati et al. (2017) state that vocabulary is the total number of words, a list or set of words in a particular language that a person knows or uses. Yasin et al. (2023) argue vocabulary is a list of words with their meanings

especially one that accompanies a textbook in a foreign language.

Kaharuddin (2016) Talking about vocabulary, cannot be separated from four skills: listening, speaking, reading, and writing. Apart from that, to clarify, there are several explanations about the importance of vocabulary related to language skills. Adding further explained that in listening, vocabulary is used to understand someone's conversation or what someone is saying. It is very difficult for us to understand what someone is saying if we only know the sentence construction without knowing the words. He also added that in speaking, vocabulary is used to express our ideas or feelings to other people verbally. The words we have influence how effective communication is.

Furthermore, in reading the researcher explained that reading vocabulary is used to understand reading material. Reading without vocabulary will cause difficulties in understanding a text. The number of words and meanings of words that a person knows will influence their reading activities. It is impossible to understand a passage unless he knows the meaning of the words used in the passage.

Finally, the researcher mentioned that in writing, the researcher used vocabulary to develop his ideas. A researcher chooses words clearly and accurately to express his ideas. Without knowing vocabulary, we cannot develop our writing because of limited mastery of vocabulary.

### **3. Types of Vocabulary**

According to Amirzai (2021), to determine vocabulary, there are kinds of vocabulary that the students should have basic knowledge in mastering vocabulary namely: listening vocabulary, speaking vocabulary, reading vocabulary, and writing vocabulary.

#### **a) Reading Vocabulary**

The learned person's reading vocabulary is all the words he or she can identify when reading. According to (Amirzai, 2021), The relationship between vocabulary knowledge and reading comprehension has been clear that they are directly correlated to each other. As well, vocabulary size and reading comprehension are correlated to each other too. Hence, vocabulary is one of the essential factors that enhances reading comprehension. A literate person's vocabulary is all the words he or she can recognize when reading. This is generally the largest type of vocabulary simply because a reader tends to be exposed to more words by reading than by listening.

#### **b) Listening Vocabulary**

This person's listening vocabulary is all the words he or she can recognize when listening to speech or communication. According to (Amirzai, 2021), listening is another skill among receptive skills, which plays an important role in a language. for learners can obtain outside information and help students speak accurately and adequately with what they take from listening. It can accurately receive and interpret messages in the process of that communication. listening

comprehension is the conscious processing of perceived auditory stimuli. A person's listening vocabulary is all the words he or she can recognize when listening to speech. People may still understand words they are not exposed to before using cues such as tone, gestures, discussion topic, and the social context of the conversation.

#### c) Speaking Vocabulary

A person's speaking vocabulary is all the words he or she uses in communication. (Sari et al., 2021), Speaking is a very popular skill in learning English. However, the lack of a collection of words, shame, and fear of being wrong, sometimes makes people choose to be silent while learning English is in progress. Today, good English skills will open up great opportunities to get good jobs in multinational companies that require good English skills, to complement international relations with English to be able to compete in the era of globalization.

#### d) Writing Vocabulary

Words are used in various forms of writing from essays to Twitter feeds. a writer will have his preference as to which synonyms to use from the entire word list. According to (Lucía et al., 2017), Academic writing tasks pose real difficulties to English language learners at all levels of education and school subjects, especially to those students with limited academic literacy skills in their native languages.

#### **4. Teaching Vocabulary**

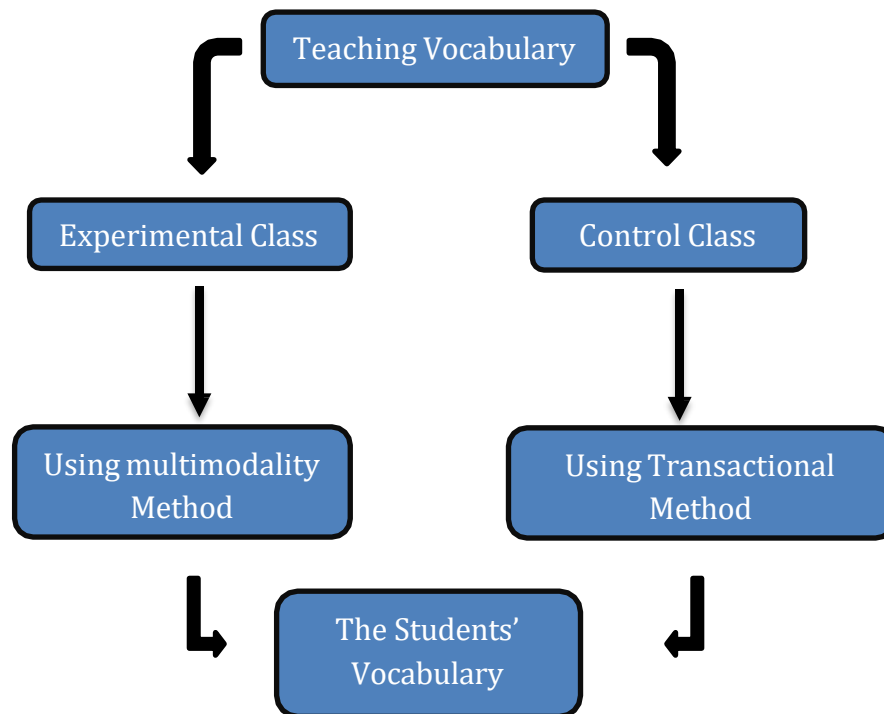

Vocabulary is one basic component of developing English as a foreign language at elementary, intermediate, or advanced levels. It plays an important role in supporting other language skills such as listening, speaking reading, and writing. Coady and Huckin (1997) state, that vocabulary is central to language and of critical importance to the typical language learner.

McCarthy (1990) has a statement about the importance of vocabulary, he states, that no matter how well the students learn grammar, no matter how successfully the sounds of L2 are mastered, without words to express a wider range of meaning, communication in L2 just cannot happen in any meaningful way.

#### **C. Theoretical Framework**

During the process of teaching vocabulary, students must be stimulated and motivated by the use of appropriate methods. The use of multimodality methods in teaching students' vocabulary is useful for motivating and improving students' vocabulary mastery. According to Ilmi and Dewi (2022), from their research results, it can be concluded that the multimodality method has a positive effect on increasing students' vocabulary mastery.

The research framework can be seen in the following form:

*Figure 2. 1 Theoretical Framework*

In this research, two classes, A and B, each comprising 30 students, were examined. They were divided into two groups: the control class and the experimental class. Prior to administering any treatment, both classes undergo a pre-test. Subsequently, the experimental class was taught using the multimodality method, which is a teaching method that relies on the use of various types of media and teaching tools to teach and educate students through the VARK (Visual, Auditory, Reading, and Kinesthetic) framework method (Fleming & Mills, 1992). The control class was taught using the Transactional Learning method, which is a method that comes from the instruction approach. This method emphasizes the teacher's ability to facilitate student discussions in

which students work together to form shared interpretations of texts and gain deeper understanding (Pratama, 2016). Following four sessions, a post-test was administered to both classes. The objective was to determine whether using multimodality methods improves students' vocabulary mastery.

### **CHAPTER III**

#### **RESEARCH METHOD**

This chapter dealt with research type and location, population and sample, data collection procedures, research design, research variables, research instrument, data validation, and data analysis techniques.

#### **A. Research Type and Location**

The type used in this research is quantitative research. According to (G. Mills & Gay, 2019), Quantitative research is an approach to empirical studies to collect, analyze, and display data in numerical rather than narrative form. The location used for this research was at MTs Al-Ikhlas Addary DDI Takkalasi.

#### **B. Population and Sample**

According to G. Mills & Gay (2019), the population is a certain group of things (people, objects, events, etc.) selected by researchers who study research that can be generalized to groups that have at least one population characteristic that distinguishes them from other groups. The population of this research are students of class VIII MTs Al-Ikhlas Addary DDI Takkalasi Islamic Boarding School which is one of the Islamic Boarding Schools located in Barru Regency, South Sulawesi and precisely located on Jl. H.M. Tahir Dani No.21, Takkalasi, Balusu, Barru City, South Sulawesi.

In this research, a sample refers to a subset of a larger group, reflecting the characteristics of the entire population (G. E. Mills & Gay, 2016). Samples allow the researcher to work with a more manageable subgroup of the actual

population. Purposive sampling was the sampling strategy used in this study. Out of a total of sixty participants, the researcher chose two classes, VIII A and VIII B, as samples. The researcher then separated them into two groups: the experimental class and the control class.

### **C. Data Collection Procedures**

#### **1. Pre-test**

During the first meeting, the researcher administered the pre-test to both the experimental and control classes. The pre-test was conducted prior to any treatment being administered. It consisted of multiple-choice questions comprising 30 vocabulary items. The objective of the pre-test was to assess students' foundational vocabulary knowledge before they received any treatment.

Stages in giving pre-test to students :

- a) The researcher instructed students to pay attention.
- b) The researcher provided an explanation of the research's objectives.
- c) The researcher clarified the purpose of the instruments provided to students.
- d) The researcher directed the students to proceed with taking the test.

#### **2. Treatment**

After administering the pre-test, the experimental class received treatment using the Multimodal method, while the control class utilized the transactional method. The researcher conducted the treatment sessions focusing on teaching and learning vocabulary, particularly in the experimental classes. Prior to administering the treatment, the researcher followed a structured approach.

This included warming up the students, explaining the learning procedures, introducing the Multimodal Method and the vocabulary, and providing exercises for the students. The treatment sessions lasted for four sessions, each lasting 60 minutes. During the final treatment session, the researcher prompted students to recall and mention the vocabularies they had learned.

Stages in giving treatment from the first meeting to the fifth meeting are mentioned below :

- a) The teacher shows vocabulary in the form of picture cards
- b) After that, students are asked to read the vocabulary on the picture cards
- c) Then the teacher plays audio to the students regarding the vocabulary on the picture cards.
- d) After that, students are asked to follow the way of speaking in the audio.
- e) Then the teacher explained the vocabulary that had been mentioned and its relationship to the nouns.

### 3. Post-test

At the final meeting, the researcher administered a post-test to the pupils to evaluate their progress and achievements in vocabulary development. The post-test employed a multiple-choice format, comprising 30 vocabulary items. Pupils were instructed to select the best answer for each item within a time frame of 60 minutes. The post-test followed the same format as the pre-test. The investigator may determine whether there were any changes in the vocabulary proficiency of the students following treatment with the multimodality method

by examining the post-test data.

Stages in giving a post-test to students :

- a) The researcher told the students that they would have conducted a test, namely the post-test.
- b) The researcher explained what they had to do in this test.
- c) Students started working on the test individually.

#### **D. Research Design**

In this research, the researcher employed a quantitative research approach to investigate the impact of the multimodality teaching method to improve students' vocabulary mastery. The researcher opted for a quasi-experimental research design due to the presence of two classes that could serve as the research sample.

According to, (G. E. Mills & Gay, 2016) Experimental research is the most powerful way to do scientific research. They allow scientists to follow the scientific method and gain reliable knowledge. This requires a well-designed process with specific steps and properties that ensure accurate and valid conclusions. These properties include controlling the sample size and selection, avoiding bias, and minimizing experimental error. The researcher must understand these requirements to conduct successful experiments.

Instead of sampling from the population, all students were included as the research sample. The research procedure involved administering a pre-test, providing treatment, and then conducting a post-test to assess the effectiveness of the teaching method.

The researcher gave a post-test to the students following four sessions of the multimodality method's implementation in the experimental class. By comparing the results of the pre-test and post-test, the effectiveness of the treatment was assessed. With the purpose of examining the effect of using multimodality method approaches on improving students' vocabulary knowledge, this study employed a quasi-experimental design with a comparison or control group.

The experimental design that the researcher will use in this study is as follows:

*Table 3. 1 The Experimental Design*

Group	Pre-test	Treatment	Post-test
Experimental	O1	X	O2
Class control	O1		O2

Where:

O1: Pre-test

X: Treatment

O2: Post-test

G. Mills & Gay (2019)

There were two classes that participated in this research: the control class and the experimental class. To gather data, the researcher performed a pre-test, tested the treatment, and then tested the results again. The experimental class received multimodality approaches during the treatment phase, while the control class received no treatment at all. The results from the experimental and control groups were then compared by the researcher.

#### **E. Research Variables**

In this research, there are two variables, namely the dependent and independent variables. According to Johnson (2014), a dependent variable is a variable that is influenced or a result of the existence of an independent variable. Independent variables influence and cause changes or emergence of the dependent variable. In this research, the independent variable (X) is the multimodality method, while the dependent variable (Y) is students' vocabulary mastery.

#### **F. Research Instrument**

According to Mills & Gay (2019), research instruments are tools utilized to collect data aimed at addressing research problems or achieving research objectives. The tool utilized in this study is a test, more precisely a vocabulary test. This was a multiple-choice test with thirty vocabulary items that were given to both the experimental and control courses.

### **G. Data Validation**

To find out whether the instrument is valid or not, the author uses a validity test. Test validity refers to the extent to which the test actually measures. In this research, the researcher tested the validity of the test using experts to validate the instrument.

### **H. Data Analysis technique**

The purpose of data analysis is to examine the data collected from students to assess the effectiveness of employing multimodality methods on students' vocabulary attainment. This involves measuring students' English vocabulary scores both before and after the application of multimodality method teaching. The data utilized in the analysis comprised the pre-test and post-test scores of Class VIII students at MTs DDI Al-Ikhlas Takkalasi, the subjects of this research. The researcher employed the Independent Sample T-test, a statistical calculation available in SPSS for Windows software, for analyzing Descriptive statistics tests, Data Normality tests, and Data Homogeneity Tests. Furthermore, the Independent Sample T-test was utilized to determine any differences in English vocabulary scores resulting from the use of the multimodality method.

The researcher used pre-test and post-test to gather data, which they then used the method described below to assess :

1. The researcher can determine students' pre-test and post-test scores using this scoring method:

$$X = \frac{\text{Student's correct answer}}{\text{Number of items tested}} \times 100$$

Mills &amp; Gay (2019)

2. To classify the students' scores, there are seven classifications which used as follows :

*Table 3. 2 Classification of Score*

Classification	Score
Excellent	96-100
Very Good	86-95
Good	76-85
Fairly Good	66-75
Fairly	56-65
Poor	36-55
Very Poor	0-35

Mills &amp; Gay (2019)

3. To get the percentage of students, apply the formula below :

$$P = \frac{f}{N} \times 100\%$$

Where:

P: Percentages

F: Frequencies

N: Number of students

G. Mills &amp; Gay (2019)

4. Finally, after obtaining the square deviation of the two groups, the researcher applies the t-count formula. This formula used to analyze if there significant differences between the results of the experimental group that received treatment and the results of the control group that did not receive treatment. This formula showed how effective the treatment is. The researcher used the formula (G. Mills & Gay, 2019) as follows :

$$t = \frac{MX - MY}{\sqrt{\frac{(\sum x^2 + \sum y^2)}{(N_x + N_y - 2)} \left( \frac{1}{N_x} + \frac{1}{N_y} \right)}}$$

Where :

t = t-counted

Mx = mean scores of experimental group

My = mean scores of control group

$\sum x^2$  = the total square of experimental group

$\sum y^2$  = the total square of control group

Nx = total number of students of experimental group

Ny = total number of students of control group

5. If the significant value is less than 0.05 then the hypothesis is accepted or simply it can be said that there is a significant difference. However, if the significance level is more than 0.05 then the hypothesis is rejected or simply it can be said that there is no significant difference.

## CHAPTER IV

### FINDINGS AND DISCUSSION

#### A. Findings

The research findings are based on the results of data analysis. Data analysis is used to collect data. The tests carried out consisted of pre-test and post-test. The pre-test was given to measure students' basic vocabulary knowledge before being given treatment and the post-test was given to determine the increase in students' vocabulary mastery after being given treatment.

##### 1. Scoring Classification of Students Pre-Test

The Classification of Scoring Students Pre-Test is as follows:

*Table 4.1 The Rate Percentage of Students' Scores of Pre-Test*

NO	CLASSIFICATION	SCORE	EXPERIMENTAL CLASS		CONTROL CLASS	
			Frequency	Percentage %	Frequency	Percentage %
1	Excellent	96-100	0	0%	0	0%
2	Very Good	86-95	0	0%	0	0%
3	Good	76-85	6	20%	4	13%
4	Fairly Good	66-75	7	23%	13	43%
5	Fairly	56-65	11	37%	4	13%
6	Poor	36-55	5	17%	8	27%
7	Very Poor	0-35	1	3%	1	3%
TOTAL			30	100%	30	100%

Table 4.1. shows the percentage rate and frequency in the experimental class and control class. This shows that of the 30 students in the experimental class, there were 6 students (20%) classified as good, 7 students (23%) classified as fairly good, 11 students (37%) classified as fairly, and 5 students

(17 %) classified as poor, and 1 student (3%) classified into very poor. Meanwhile, in the control class, it can be seen that out of 30 students, there were 4 students (13%) classified as good, 13 students (43%) classified as fairly good, 4 students (13%) classified as fairly, 8 students (27%) classified into poor, and 1 student (3%) classified into very poor.

## 2. Scoring Classification of Students Post-Test

The Classification Scoring of Students Post-Test is as follows:

*Table 4.2 The Rate Percentage of Students' Score of Post-Test*

NO	CLASSIFICATION	SCORE	EXPERIMENTAL CLASS		CONTROL CLASS	
			frequency	Percentage %	Frequency	Percentage %
1	Excellent	96-100	8	27%	0	0%
2	Very Good	86-95	10	33%	0	0%
3	Good	76-85	12	40%	12	40%
4	Fairly Good	66-75	0	0%	13	43%
5	Fairly	56-65	0	0%	2	7%
6	Poor	36-55	0	0%	3	10%
7	Very Poor	0-35	0	0%	0	0%
TOTAL			30	100%	30	100%

Table 4.2. showed the rate percentage and frequency of the experimental group and control group in the post-test. it showed that in the experimental class there were 8 students (27%) classified as excellent, 10 students (33%) classified as very good, 12 students (40%) classified as good. While in control class there were 12 students (40%) classified as good, 13 students (43%) classified as fairly good, 2 students (7%) classified as fairly, 3 students (10%)

classified as poor. This means that students' vocabulary abilities can be improved using multimodality methods.

### 3. Descriptive Analysis of Pre-test and Post-test

The pre-test and post-test descriptive statistics for the experimental class and the control class were examined by the researcher. The following table shows a descriptive study of the students' listening skills on the pre-test and post-test.

*Table 4.3 The Descriptive Analysis of Pre-test and Post-test of the Two Classes*

<b>Descriptive Statistics</b>					
	N	Minimum	Maximum	Mean	Std. Deviation
PreTest Eksperimen	30	30	83	63.13	12.918
PostTest Eksperimen	30	76	100	89.43	7.855
PreTest Kontrol	30	33	83	62.67	13.897
PostTest Kontrol	30	40	83	70.50	10.894
Valid N (listwise)	30				

According to the table 4.3. the experimental class students had a mean pre-test score 63.13 and standard deviation 12.918, whereas the control class student's had a mean pre-test score 62.67 and standard deviation 13.897 from 30 students. It means that the experimental class mean score ( $63.13 > 62.67$ ) was greater than the control class mean score.

Meanwhile, the average post-test score for experimental class students was 89.43, and standard deviation was 7.855, while the control class mean post-test

was 70.50, and standard deviation was 10.894. It means that the experimental class outperformed the control group in terms of mean score ( $89.43 > 70.50$ ).

#### 4. Normality and Homogeneity Test

SPSS 24 is being used by the researcher. The researcher looked at the homogeneity and normalcy of the data. The homogeneity test was conducted using Levene, while the normality test involved a single sample of Kolmogorov Smirnov. The test results are shown in the following table.

*Table 4.4 The Normality Test*

		Tests of Normality					
		Kolmogorov-Smirnov <sup>a</sup>			Shapiro-Wilk		
	Kelas	Statistic	df	Sig.	Statistic	df	Sig.
Hasil Belajar Siswa	Kelas Kontrol	.173	30	.022	.854	30	.001
	Kelas Eksperiment	.194	30	.006	.877	30	.002

a. Lilliefors Significance Correction

Based on the results of the normality test above, the significance value obtained is greater than 0.05 so ( $0.022 > 0.05$ ) and ( $0.006 > 0.05$ ) it is decided that the residual values are normally distributed.

*Table 4.5 The Homogeneity Test*

		Test of Homogeneity of Variance			
		Levene Statistic	df1	df2	Sig.
Hasil Belajar Siswa	Based on Mean	.599	1	58	.442
	Based on Median	.245	1	58	.623
	Based on the Median and with adjusted df	.245	1	41.593	.623
	Based on trimmed mean	.452	1	58	.504

According to the findings of the previous homogeneity test, it was clear that the significance value exceeded 0.05, which led to the conclusion that the variance of the data was the same.

## 5. Hypothesis Testing

The hypothesis in this study was tested using the Independent Sample T-test. An independent sample t-test will be used to compare two unpaired samples. To determine the statistically significant values in this study, independent sample t-test results from the post-test scores for both classes were employed. The hypothesis was accepted if the significance value was less than 0.05, and it was rejected if it was larger than 0.05.

*Table 4.6 Independent Sample Test*

Group Statistics					
	Kelas	N	Mean	Std. Deviation	Std. Error Mean
HasilBelajar	PostTest Eksperimen	30	89.43	7.855	1.434
	PostTest Kontrol	30	70.50	10.894	1.989

Independent Samples Test										
		Levene's Test for Equality of Variances			t-test for Equality of Means					
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
									Lower	Upper
HasilBelajar	Equal variances assumed	.599	.442	7.721	58	.000	18.933	2.452	14.025	23.842
	Equal variances not assumed			7.721	52.739	.000	18.933	2.452	14.015	23.852

Based on the results of the independent sample t-test, the significance value (2-tailed) of 0.00 is smaller than 0.05 when equal variances are assumed. Thus, the null hypothesis ( $H_0$ ) states that the use of multimodality methods has no significant effect in improving students' vocabulary mastery abilities. On the other hand, the alternative hypothesis ( $H_1$ ), which stated that the use of multimodality methods had a significant effect in improving students' vocabulary mastery abilities, was approved. This means that the research hypothesis has been approved.

## **B. Discussion**

This section contains a discussion of the research findings in the previous section. This also provides an increase in students' vocabulary mastery abilities using the Multimodality Method in the eighth grade of MTs DDI Takkalasi.

### **1. The Students' Vocabulary Mastery Before Treatment**

At the first meeting before giving treatment to students, the researcher gave pre-test questions. This test consists of thirty multiple-choice numbers. After students collected the pre-test, the researcher calculated the correct answers. The researcher gave 1 point for each correct answer and deducted points for incorrect answers. After the researchers collected data, the pre-test results showed that of the thirty experimental class students at MTs DDI Takkalasi, there were 6 (20%) classified as good, and 7 (23%) classified as quite good. Most of the students got low scores in their work. pre-test especially in the sufficient classification. This means that students' ability to master vocabulary is still low.

## **2. The Students' Vocabulary Mastery After Treatment**

After the researcher implemented the multimodality method in the classroom during visual and auditory sessions for students, the researcher discovered that the use of multimodality methods in learning vocabulary can make students motivated to learn the vocabulary provided. Apart from that, it is easier for students to remember vocabulary because in learning vocabulary they use picture cards and listen to audio so that students can remember the form and writing. This is evidence that the multimodality method can help students learn vocabulary.

The results above show how good the multimodality method is in teaching vocabulary. Moreover, according to the results of related research that the researchers have mentioned. according to Faishol et al. (2021), the use of multimodality methods in learning activities can make it easier for students to improve their vocabulary mastery. learning achievement by stimulating interest in learning. Therefore, it is thought that teachers can benefit from using multimodality methods to engage students in class and teach vocabulary.

At the last meeting, the researcher gave a post-test. This test consists of thirty numbers for multiple-choice questions. After the researchers collected data, the post-test results showed that of the thirty students in the experimental class at MTs DDI Takkalasi. There are 8 (27%) classified as excellent, 10 (33%) classified as very good, and 12 (40%) classified as good. Most students got high scores in the post-test, especially in good classification.

After the researcher analyzed the data, the average pre-test score was 63.13 and the post-test score was 89.43. It can be seen that the students' post-test scores are higher than the pre-test scores. It can be concluded that the use of the multimodality method can improve students' vocabulary mastery abilities in class 8 MTs DDI Takkalasi.

Based on the results of the independent sample t-test, the results were obtained a significant value (2-tailed) of 0.00 is less than 0.05 when equal variances are assumed. The findings show that the alternative hypothesis which means there is a significant influence of applying the multimodality method in increasing vocabulary mastery is accepted. In applying the multimodality method, data was collected through tests and showed that students' vocabulary mastery abilities had increased significantly. Based on the research results, it can be concluded that the use of the multimodality method is effective in improving the vocabulary mastery of grade 8 students at MTs DDI Takkalasi.

Ilmi & Dewi (2022), with the title "Integration of multimodality methods in the EFL classroom: students' perceptions" Technology has greatly influenced education in the twenty-first century. Multimodality method teaching is one of the many classroom methods generated by technology. However, little research has been conducted on creating multimodal pedagogy to help EFL students improve their language skills. Therefore, their study aimed to investigate English secondary school students' perceptions regarding the integration of multimodality methods into English classroom practices. Previous research

studies with various designs and paradigms have been conducted to determine how multimodality methods influence EFL classrooms.

Yuniasari et al. (2023) conducted research with the title "Application of a Multimodal Method Learning Approach for Foreign Language Reading Comprehension Skills: Literature Review." The multimodal method approach in learning language skills is an approach that involves various modes to achieve meaningful language activities. The multimodal method approach has been widely researched in the last five years. Their research aimed to explore the opportunities and challenges in implementing a multimodal learning method approach in foreign language reading comprehension classes. The data used in their research were research articles obtained from the Google Scholar and Research Gate database sites. Their research results show that the application of a multimodal learning method approach has the potential to improve student's reading comprehension abilities from various aspects of speed of analysis, vocabulary recognition, and level of understanding. Positive improvements in students' attitudes and potential also occur by combining this multimodal method approach with other learning methods. Apart from opportunities, there are also several challenges, including time management, constraints, limited facilities, confusion in designing modes, media, and assignments, as well as students' preferences for conventional learning.

Marantika et al. (2021) conducted research with the title "Multimodal Teaching in EFL Context: A Literature Review" In the 21st century, technological developments have had a lot of influence on the educational process. Technology brings many new approaches into the classroom such as multimodality teaching methods. Their research was intended to review the implementation and effectiveness of multimodal teaching in the context of English language teaching. Their research results found that the characteristics, benefits, and procedures of multimodality learning methods vary greatly according to the needs and abilities of teachers in designing teaching and learning activities.

Pan & Zhang (2020) conducted research entitled "An Empirical Study of Application of Multimodal Approach to Teaching Reading in EFL in Senior High School," They wrote that English reading skills are one of the most important skills for secondary school students learning English as a foreign language (EFL). However, reading teaching in ELF is currently still teacher-centered, thereby ignoring students' learning interests and their participation in the teaching process. This research is intended to apply a multimodal approach in teaching reading in EFL in high school and try it out to find out whether multimodal teaching can motivate students' participation in English reading classes improve their reading proficiency, and find out students' attitudes toward the multimodal approach. With middle school students in Anhui China as research subjects, an experimental English reading teaching was conducted. Data collected from reading tests and questionnaires show that implementing a

multimodal teaching approach in teaching English reading in secondary schools can motivate students' participation in reading. classes and improved their English reading proficiency, and most students took a positive attitude toward multimodal teaching approaches.

Based on the findings of this study, it was determined that after receiving treatment in the experimental class using the multimodality method to improve vocabulary mastery, the students' scores were much higher. Students' vocabulary mastery abilities increase when multimodality methods are used in class. This proves that the experimental class received effective learning by using the multimodality method as a teaching tool.

## CHAPTER V

### CONCLUSION AND SUGGESTION

There are two sections to this chapter. The first section covers the conclusion and the second section includes suggestions.

#### **A. Conclusion**

The researcher concluded that using the multimodality method to teach vocabulary mastery to eighth-grade students at MTs DDI Takkalasi is useful based on the findings and discussions from the previous chapter. The average of the results before and after the experimental class test is used as evidence. The students' average pre-test score was 63.13, and the students' average post-test score was 89.43. The result is that the null hypothesis ( $H_0$ ) is refuted and the alternative hypothesis ( $H_1$ ) is accepted. This research proves that using multimodality methods in the classroom helps students improve their vocabulary skills. This shows that the use of the multimodality method to teach eighth-grade students at MTs DDI Takkalasi is a successful and enjoyable method in improving their vocabulary mastery. This research reveals that the multimodality method provides benefits for EFL learners, such as increasing students' self-confidence, enjoying the learning process, making the learning process more enjoyable, and increasing students' interest in learning.

#### **B. Suggestions**

Based on the conclusions above, the researcher provides several suggestions as follows:

1. The researcher believes that teachers will become more creative and able to design strategies or methods to prevent students from becoming disinterested in class. Teachers should use multimodality methods in the classroom because it has an extraordinary perspective on teaching English in the classroom. As one of the most widely used methods, the use of Multimodality methods in EFL classrooms has improved students' English skills and especially vocabulary understanding by opening up a new world of more interesting and productive learning environments.
2. Students should practice their vocabulary mastery at home. They can do this using multimodality methods, which will also help them expand their vocabulary automatically.
3. The researcher advises students to participate more actively in class and dare to answer the teacher's questions.
4. The researcher believes that individuals interested in conducting similar research can use this research as a guide. To get more references, other researchers have to read more articles and journals.

## APPENDIX 1

### RENCANA PELAKSANAAN PENGAJARAN (RPP)

**Sekolah** : MTs AI-IKHLAS ADDARY DDI TAKKALASI

**Mata Pelajaran** : Bahasa Inggris

**Kelas/Semester** : VIII A dan VIII B

**Materi pokok** : Vocabulary (Noun)

**Alokasi Waktu** : 4X60 menit

#### A. KOMPETENSI INTI

KI 1 : Menghargai dan menghayati ajaran agama yang dianutnya.

KI 2 : Menghargai dan menghayati perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong, santun, percaya diri dalam berinteraksi secara efektif dengan lingkungan social dan alam dalam jangkauan pergaulan dan keberadaannya.

KI 3 : Memahami pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahunya tentang ilmu pengetahuan, teknologi, seni budaya terkait fenomena dan kejadian tampak mata.

KI 4 : Mencoba, mengolah, dan menyaji dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak (menulis, membaca menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang/ teori.

## **B. KOMPETENSI DASAR**

KD 3.4: Mengidentifikasi fungsi social, struktur teks, dan unsur kebahasaan

teks interaksi transaksional lisan dan tulis yang melibatkan tindakan memberi dan meminta informasi terkait nama dan jumlah binatang, benda, dan bangunan public yang dekat dengan kehidupan peserta didik sehari-hari sesuai dengan konteks penggunaannya. (Perhatikan unsur kebahasaan dan kosa kata terkait article a dan the, plural dan singular).

KD 4.4 : Menyusun teks interaksi transaksional lisan dan tulis sangat pendek dan sederhana yang melibatkan tindakan memberi dan meminta informasi terkait nama binatang, benda dan bangunan public yang dekat dengan kehidupan peserta didik sehari – hari dengan memperhatikan fungsi social, struktur teks, dan unsur kebahasaan yang benar dan sesuai konteks.

## **C. TUJUAN PEMBELAJARAN**

Setelah mengikuti serangkaian kegiatan pembelajaran, peserta didik mampu:

1. Peserta didik mampu memahami kosakata yang ada dalam nama nama dan jumlah benda.
2. Mengidentifikasi fungsi sosial, struktur teks dan unsur kebahasaan pada jenis teks prosedur lisan dan tulisan
3. Melalui pendekatan saintifik dengan menggunakan teks interaksi transaksional, peserta didik dapat membandingkan fungsi sosial, struktur, teks serta unsur-unsur kebahasaan beberapa teks prosedur lisan dan keterampilan menulis dalam menangkap makna terkait fungsi sosial, struktur teks dan unsur-unsur kebahasaan dengan penuh rasa ingin tahu,

displin, percaya diri selama proses pembelajaran serta mampu berkomunikasi dan berkomunikasi dengan baik dalam kelompok.

#### **D. MATERI PEMBELAJARAN**

##### 1. Struktur Sosial dari ungkapan:

- a Meminta perhatian
- b mengecek pemahaman
- c menghargai kinerja yang baik
- d meminta serta mengungkapkan pendapat

Mengidentifikasi dan menyebutkan berbagai benda, binatang, dan bangunan umum di lingkungan sekitar

##### 2. Struktur Teks dari percakapan yang menggunakan ungkapan meminta perhatian, mengecek pemahaman, menghargai kinerja yang baik, meminta serta mengungkapkan pendapat, yaitu:

- a Opening
- b Content/sustining
- c Unsur kebahasaan
- d Countable noun

##### 3. Countable noun

adalah benda yang dapat dihitung. Berikut penyebutan kata benda singular dan plural dapat dihitung:

A book

A chicken

A plate

A glass

A marker

A duck

An chir

An egg

Two books

The adalah sebuah artikel yang digunakan untuk noun yang mengacu pada satu spesifik noun saja.

Example :

The book

The buss

The bag

#### 4. Uncountable noun

Uncountable noun adalah benda yang tidak dapat dihitung. Kata benda yang tidak dapat dihitung/uncountable noun tidak menggunakan artikel a/an dan tidak memiliki bentuk jamak/plural. Meskipun demikian, kita bisa menghitung satuannya. Penyebutannya dapat menggunakan: amount, much, little.

Example:

I have the amount of money.

There are so much water in my house.

I have little money.

#### 5. Penggunaan kata petunjuk this, that, these, those

This, that, these dan those adalah demonstrative determiners yang berfungsi sebagai kata petunjuk. Demonstrative determiner berfungsi untuk menunjukkan jumlah dan dimana objek (kata benda) yang sedang dibicarakan berada terkait dengan seberapa jauh objek tersebut dari pembicara.

- a This digunakan untuk kata benda tunggal yang berada dekat dengan pembicara Example:

This is my marker.

This is olive oil.

- b That digunakan untuk kata benda tunggal yang berada jauh dari pembicara. Example:

That is a key chain.

- c These digunakan untuk objek banyak yang berada dekat dengan pembicara. Example:

These are bags.

- d Those yang digunakan untuk objek banyak yang berada jauh dari pembicara. Example:

Those are crog shoes.

#### **E. METODE PEMBELAJARAN.**

Metode : Metode Multimodalitas

## F. MEDIA PEMBELAJARAN.

### 1. Media

- a Kartu Bergambar

### 2. Alat/Bahan

- a Spidol
- b Papan tulis
- c Kertas
- d Speaker

## G. SUMBER BELAJAR.

- a Kamus bahasa inggris
- b Internet

## H. KEGIATAN PEMBELAJARAN.

### 1. Pertemuan pertama

Kegiatan Pembelajaran	Langkah- langkah	Alokasi Waktu
Pendahuluan	<ul style="list-style-type: none"> <li>• Tegur sapa</li> <li>• Memperkenalkan diri</li> <li>• Mengecek kehadiran siswa</li> <li>• Menyampaikan tujuan pembelajaran</li> </ul>	10 Menit
Inti	<ul style="list-style-type: none"> <li>• Pengajar menjelaskan tentang materi yang akan diajarkan pada beberapa pertemuan berikutnya</li> </ul>	45 edit

	<ul style="list-style-type: none"> <li>• Pengajar mengajarkan kosa kata noun menggunakan metode multimodalitas di kelas.</li> <li>• Pengajar memperlihatkan kosa kata dalam bentuk kartu bergambar.</li> <li>• Pengajar meminta siswa untuk membaca kosa kata yang ada pada kartu bergambar.</li> <li>• Memperdengarkan sebuah audio kepada siswa mengenai kosa kata yang ada dalam kartu bergambar.</li> <li>• Meminta kepada siswa untuk mengikuti cara bicara yang ada dalam audio tersebut.</li> <li>• Kemudian Guru meminta kepada siswa untuk mempraktekan kosa kata yang telah di sebut.</li> </ul>	
<b>Penutup</b>	<ul style="list-style-type: none"> <li>• Pengajar bertanya kepada siswa mengenai kesulitan dalam belajar vocabulary.</li> <li>• Menjawab pertanyaan siswa sekaligus memberikan sedikit motivasi kepada siswa.</li> <li>• Sebelum menutup pelajaran, pengajar terlebih dahulu menyampaikan materi selanjutnya.</li> </ul>	<b>5 menit</b>

## 2. Pertemuan kedua

<b>Kegiatan Pembelajaran</b>	<b>Langkah –langkah</b>	<b>Alokasi Waktu</b>
Pendahuluan	<ul style="list-style-type: none"> <li>• Tegur sapa</li> <li>• Mengecek kehadiran siswa.</li> <li>• Mereview materi sebelumnya</li> </ul>	<b>10 menit</b>
<b>Inti</b>	<ul style="list-style-type: none"> <li>• Pengajar mengingatkan kembali materi sebelumnya kepada siswa.</li> <li>• Pengajar mengajarkan kosa kata noun baru menggunakan metode multimodalitas di kelas.</li> <li>• Pengajar memperlihatkan kosa kata dalam bentuk kartu bergambar.</li> <li>• Pengajar meminta siswa untuk membaca kosa kata yang ada pada kartu bergambar.</li> <li>• Memperdengarkan sebuah audio kepada siswa mengenai kosa kata yang ada dalam kartu bergambar.</li> <li>• Meminta kepada siswa untuk mengikuti cara bicara yang ada dalam audio tersebut.</li> <li>• Kemudian guru meminta kepada siswa untuk mempraktekan kosa kata yang telah disebut.</li> </ul>	<b>45 menit</b>
<b>Penutup</b>	<ul style="list-style-type: none"> <li>• Siswa membaca dan mengartikan kata yang ditebak secara benar.</li> <li>• Menanyakan kesulitan yang dilakukan selama proses pembelajaran.</li> <li>• Menyampaikan materi yang akan di bahas pada pertemuan berikutnya.</li> </ul>	<b>5 menit</b>

### 3. Pertemuan ketiga

Kegiatan pembelajaran	Langkah –langkah	Alokasi waktu
<b>Pendahuluan</b>	<ul style="list-style-type: none"> <li>• Tegur sapa</li> <li>• Mengecek kehadiran siswa</li> <li>• Review materi sebelumnya</li> <li>• Menyampaikan materi yang akan dipelajari yaitu mengevaluasi kosa kata yang sudah dipelajari.</li> </ul>	<b>10 menit</b>
<b>Inti</b>	<ul style="list-style-type: none"> <li>• Pengajar mengulang kembali kosa kata noun menggunakan metode multimodalitas di kelas.</li> <li>• Pengajar memperlihatkan kosa kata dalam bentuk kartu bergambar.</li> <li>• Pengajar meminta siswa untuk membaca kosa kata yang ada pada kartu bergambar.</li> <li>• Memperdengarkan sebuah audio kepada siswa mengenai kosa kata yang ada dalam kartu bergambar.</li> <li>• Meminta kepada siswa untuk mengikuti cara bicara yang ada dalam audio tersebut.</li> <li>• Kemudian guru meminta kepada siswa untuk mempraktekan kosa kata yang telah disebut.</li> </ul>	<b>45 menit</b>
<b>Penutup</b>	<ul style="list-style-type: none"> <li>• Siswa membaca dan mengartikan kata yang ditebak secara benar.</li> <li>• Menanyakan kesulitan yang dilakukan selama proses pembelajaran.</li> <li>• Menyampaikan materi yang akan di bahas pada pertemuan berikutnya.</li> </ul>	<b>5 menit</b>

#### 4. Pertemuan keempat

Kegiatan pembelajaran	Langkah –langkah	Alokasi waktu
<b>Pendahuluan</b>	<ul style="list-style-type: none"> <li>• Salam dan tegur sapa</li> <li>• Mengecek kehadiran siswa</li> <li>• Mereview materi sebelumnya</li> <li>• Menyampaikan materi yang akan dipelajari yaitu mengevaluasi kosa kata yang sudah dipelajari.</li> </ul>	<b>10 menit</b>
<b>Inti</b>	<ul style="list-style-type: none"> <li>• Pengajar mengulang kembali kosa kata noun menggunakan metode multimodalitas di kelas.</li> <li>• Pengajar memperlihatkan kosa kata dalam bentuk kartu bergambar.</li> <li>• Pengajar meminta siswa untuk membaca kosa kata yang ada pada kartu bergambar.</li> <li>• Memperdengarkan sebuah audio kepada siswa mengenai kosa kata yang ada dalam kartu bergambar.</li> <li>• Meminta kepada siswa untuk mengikuti cara bicara yang ada dalam audio tersebut.</li> <li>• Kemudian guru meminta kepada siswa untuk memprakterkan kosa kata yang telah disebut.</li> </ul>	<b>45 menit</b>
<b>Penutup</b>	<ul style="list-style-type: none"> <li>• Siswa membaca dan mengartikan kata yang ditebak secara benar.</li> <li>• Menanyakan kesulitan yang dilakukan sela ma proses pembelajaran.</li> <li>• Menutup pembelajaran sekaligus membuat kesimpulan.</li> </ul>	<b>5 menit</b>

Samata, 23 Maret 2024

Researcher,

A handwritten signature in black ink, consisting of a large, stylized 'A' followed by a series of loops and a final flourish.

**Ashfary mukrim**

**NIM: 20400121031**

**APPENDIX 2**  
(List of Vocabulary)

<b>Vocabulary</b>	<b>Meaning</b>
Ant	Semut
Bat	Kelelawar
Bird	Burung
Cat	Kucing
Camel	Unta
Chicken	Ayam
Crocodile	Buaya
Deer	Rusa
Dog	Anjing
Duck	Bebek
Eagle	Elang
Elephant	Gajah
Fish	Ikan
Fly	Lalat
Fox	Rubah
Window	Jendela
Door	Pintu
Plate	Piring
Car	Mobil
Bottle	Botol
Table	Meja
Chair	Kursi
Teacher	Guru

Student	Siswa
Book	Buku
Company	Perusahaan
Spidol	Marker
Whiteboard	Papan Tulis
Ball	Bola
Police	Polisi
Movie	Film
Magazine	Majalah
Egg	Telur
Sister	Kakak perempuan
Brother	Kakak laki-laki
Mother	Ibu
Father	Bapak
Cousen	Sepupu
Flower	Bunga
Hospital	Rumah Sakit
School	Sekolah
Restaurant	Restoran
Mosque	Masjid
Library	Perpustakaan
Bank	Bank
Market	Pasar
Motorcycle	Sepeda motor
Kitchen	Dapur
Cinema	Bioskop

Newspaper	Koran
Book store	Toko Buku
Room	Kamar

**Name :**

**Class :**

**Choose the correct meaning of the underlined word below by crossing a,b,c, or d!**

1. Ani watches the movie every Saturday.

- a. film
- b. foto
- c. radio
- d. buku

2. We must call the \_\_\_\_\_ to catch the robber.

- a. hospital
- b. post office
- c. police
- d. ambulance

3. Nita needs a plate to eat fried rice.

- a. mangkok
- b. piring
- c. cangkir
- d. gelas

4. My father is reading \_\_\_\_\_ in the office now.

- a. A newspaper
  - b. A television
  - c. A speaker
  - d. A radio
5. Ana gives me a flower
- a. bola
  - b. bunga
  - c. sepatu
  - d. tas
6. My grandmother always tell me to wash my \_\_\_\_\_ before eating something.
- a. teeth
  - b. face
  - c. feet
  - d. hands
7. I bring four books from the library.
- a. spidol
  - b. pensil
  - c. buku
  - d. penghapus
8. \_\_\_\_\_ is a spicy food from Indonesia.

- a. cake
- b. rendang
- c. pudding
- d. chocolate

9. Please close the door!

- a. pintu
- b. meja
- c. kursi
- d. jendela

10. We cancel having dinner at the restaurant because all \_\_\_\_\_ are booked.

- a. tables
- b. rooms
- c. chairs
- d. foods

11. The library is the place for students to study.

- a. mesjid
- b. sekolah
- c. perpustakaan
- d. pasar

12. We need \_\_\_\_\_ to bring our school books.

- a. uniform
- b. bag
- c. pencil case
- d. wallet

13. I buy a novel in the bookstore.

- a. stadion
- b. toko buku
- c. toko roti
- d. restoran

14. Before entering someone's house, we must \_\_\_\_\_ on the door.

- a. cry
- b. scream
- c. hit
- d. knock

15. The students answer the teacher's questions.

- a. siswa
- b. petani
- c. polisi
- d. pilot

16. Will you go with me to the \_\_\_\_\_ to watch a movie?

- a. stadium
- b. cinema
- c. hospital
- d. theater

17. I read the newspaper in the morning.

- a. koran
- b. komik
- c. novel
- d. buku

18. \_\_\_\_\_ is the place for students to study.

- a. library
- b. classroom
- c. teacher's office
- d. school canteen

19. I have to eat the fish.

- a. telur
- b. ikan
- c. kue
- d. sirup

20. We buy a book in a \_\_\_\_\_.

- a. supermarket
- b. fruitstall
- c. bookstore
- d. music studio

21. The students listen to the teacher's explanation.

- a. guru
- b. polisi
- c. dokter
- d. pilot

22. \_\_\_\_\_ is the place for students to study.

- a. library
- b. classroom
- c. teacher's office
- d. school canteen

23. Ani has a cat.

- a. kucing
- b. ayam
- c. itik
- d. angsa

24. How many \_\_\_\_\_ are in this class?

- a. cow
- b. carrot
- c. glass
- d. students

25. I am forbidden to feed the crocodile in a zoo

- a. kaca
- b. sendok
- c. buaya
- d. cangkir

26. She is a beautiful \_\_\_\_

- a.man
- b.woman
- c.flower
- d.table

27. A school is a place for students to study.

- a. tas
- b. sekolah
- c. sepatu
- d. gelas

28. They write books on the \_\_\_\_

- a. table
- b. chair
- c. cupboard
- d. bathroom

29. I and my friends are waiting for each other in a restaurant.

- a. rumah sakit
- b. sekolah
- c. terminal
- d. restoran

30. He will study in this \_\_\_\_ on Monday morning.

- a. mosque
- b. market
- c. sea
- d. school

**Answer Key**

1. A	6. D	11. C
2. C	7. C	12. B
3. D	8. B	13. B
4. A	9. A	14. D
5. B	10. A	15. A
16. B	21. A	26. B
17. A	22. B	27. B
18. B	23. A	28. A
19. B	24. D	29. D
20. C	25. C	30. D

**APPENDIX 4**

(Instrument post-test)

**Name :****Class :****Choose the correct meaning of the underlined word below by crossing a,b, c, or d!**

1. I wash motorcycle every Sunday.  
a. Sepeda motor      b. mobil  
c. truk                  d. sepeda
2. We must call the \_\_\_\_\_ to catch the robber.  
a. Hospital              b. Post office  
c. Police                 d. Ambulance
3. I meet tania last Sunday in her room.  
a. Kamar                b. Dapur  
c. Ruang tamu         d. lapangan
4. My father is reading \_\_\_\_\_ in the office now.  
a. A newspaper        b. A television  
c. A speaker            d. A radio
5. They cook the dinner together in the kitchen.  
a. Dapur      b. Lapangan  
c. Kamar     d. Ruang tamu
6. My grandmother always tell me to wash my \_\_\_\_\_ before eating something.  
a. Teeth      b. Face  
c. Feet        d. Hands
7. I go to the hospital at 9 a.m.  
a. sekolah    b. kursi  
c. meja        d. rumah sakit
8. \_\_\_\_\_ is a spicy food from Indonesia.  
a. Cake        b. Rendang

- c. Pudding d. Chocolate
9. My Parents read one magazine a month.
- a. buku b. novel  
c. komik d. majalah
10. We cancel having dinner at the restaurant because all \_\_\_\_\_ are booked.
- a. Tables b. Rooms  
c. Chairs d. Foods
11. Rifki and Riski always eat chicken.
- a. kebun b. Bebek  
c. Sungai d. Ayam
12. We need \_\_\_\_\_ to bring our school books.
- a. Uniform b. Bag  
c. Pencil case d. Wallet
13. My sister sends me a box of fish.
- a. Ibu b. Ayah  
c. Saudara Perempuan d. Adik laki-laki
14. My father always go to the newspaper every morning.
- a. bapak b. buku  
c. novel d. koran
15. Before entering someone's house, we must \_\_\_\_\_ on the door.
- a. Cry b. Scream  
c. Hit d. Knock
