ACKNOWLEDGEMENT

Alhamdulillah Rabbil Alamin, the researcher would like to express her deepest gratitude to the almighty Allah swt., the only provider, the most merciful who gives her guidance, inspiration and good health for all time to conduct the writing of this thesis. Also *Shalawat* and *Salam* are always delivered to the great Prophet Muhammad saw., who has brought us from the darkness to the lightness.

During the writing of the thesis, the researcher received much assistance from a number of people, for their valuable guidance, correction, suggestion, advice and golden support. Without them, the writing of this thesis would never be possibly completed. Especially, for my beloved parents, Muhammad Nasrun and her lovely mother, Normaliah. The researcher would express her deepest thanks to both of them, for their endless love, praying, support and motivation and guidance of some people all the time for the researchers' successfulness.

Therefore, the researcher would like to express her greatest gratitude and appreciation, especially to:

1. **Prof. Dr. Musafir Pababbari, M.Si.** The Rector of State Islamic University Alauddin Makassar.
2. **Dr. H. Muhammad Amri, Lc., M.Ag.** The Dean and all of the staffs of Tarbiyah and Teaching Sciences Faculty of Alauddin State Islamic University of Makassar.

3. **Dr. Kamsinah, M.Pd.I.** and **Sitti Nurpahmi, S.Pd., M. Pd.** The Head and the Secretary of English Education Department, Tarbiyah and Teaching Science Faculty of Alauddin State Islamic University of Makassar.
4. The researchers's consultant, **H. Erwin Hafid, Lc., M. Th.I., M.Ed** and **Dahniar, S.Pd., M.Pd** who have helped, guided, and supported the researcher during the writing of her thesis.
5. All of the lecturers of Tarbiyah and Teaching Sciences Faculty of Alauddin State Islamic University of Makassar for their guidance during her study.
6. All of the staffs of Library of Alauddin State Islamic University of Makassar.
7. The students at the fifth semester of English Education Department of Muhammadiyah University of Makassar who gave their time so willingly to participate in her research.
8. Her beloved family of PBI 1,2 who always be there for her in her ups on downs.
9. All of the people around the researcher's life whom could not mention one by one by the researcher who has given a big inspiration, motivation, spirit and do'a for her.

Makassar, Juni 2016

The researcher,

Miftahul Jannah

ABSTRACT

Thesis Title : The Comparison Between Drafting and Listing Technique in Improving the Students' Writing Descriptive Text at the Fifth Semester of English Education Department of Muhammadiyah University of Makassar.

Researcher : Miftahul Jannah

Reg. No. : 20400112026

Consultant I : H.Erwin Hafid, Lc., M.Th.I., M.Ed

Consultant II : Dahniar, S.Pd., M.Pd.

This research aimed at comparing the students' writing descriptive text by using drafting and listing technique at English Education Department of Muhammadiyah University of Makassar. Hence, the principle problems were divided into three points: 1) How is the students' writing descriptive text by using drafting and listing technique at Muhammadiyah University of Makassar, 2) Is writing descriptive text of drafting significantly different with the listing technique of the students at Muhammadiyah University of Makassar, 3) Which technique of the students have better in writing descriptive text at Muhammadiyah University of Makassar.

The study was a causal comparative. The population of this research was the fifth semester students of English Education Department of Muhammadiyah University of Makassar in the academic year of 2015 – 2016. Since the unit analysis of writing in this study was quite large, the researcher decided to take 15 students to write by using drafting and 15 students write by using listing technique. The total number of sample was 30 students. The researcher used purposive sampling technique to taking sample in this research. The variables of this research were two groups comparison, namely drafting and listing technique as independent variables, and students' writing descriptive text as dependent variable. The groups were compared on the quality of writing which assesses organization, content, grammar, punctuation, spelling, mechanics, style and quality expression.

The data were collected through interview and writing test. The results were analyzed descriptively and inferentially. The result of drafting test was in fair classification with the mean score was 70.8 and listing technique was in good classification with the mean score was 74.13. The result of t-test was -0.17 and t-table was 2.048. The study found and concluded that it was different but not significant of students' writing descriptive text by using drafting and listing technique, but better writing descriptive text is achieved by listing technique. Although the different is quite trivial.

Moreover, this study assumed that strategy and technique in writing had contribution to the three areas of writing: content, paragraph structure and mechanics disregarding some extraneous variables that might contribute to the results. The study suggested that teachers should take the strategy and technique in teaching writing. The students use strategy and technique in writing ability as it can help them to find new ideas to write.

CHAPTER I

INTRODUCTION

This chapter deals with research background, research problems, research objectives, research significances, research scope, and operational definition of terms.

A. Background

English is an international language. Almost all countries have adapted English used as a compulsory subject at schools. The national education has decided that English as a foreign language taught in Indonesia schools. It learned from Elementary level to University level. In English language, there are integrated skills to be mastered such as: speaking, listening, reading, and writing. In this research, the researcher focused on writing.

Writing is one of crucial means of human communication since human cannot live in the world without socializing with others through communication. Writing is used to communicate with others and to express feeling and thought. By writing, we could convey our message to many people without using oral communication. It was the reason why writing was also called as a communication media. According to Byrne (1980:24), writing is a primary means of recording speech, even though it must be acknowledged as a secondary medium of communication. In this case, writing is very important because it could help us to have a good socialization, express our ideas, feeling, and our opinion.

The students had difficulties to write a text and spent a lot of time to write. The students got the problems in organizing their ideas in terms of cohesion, coherence and unity in writing because they did not use the prewriting techniques and the strategy in writing to express their ideas before the real writing take place and did not know what to start and where to start writing.

Based on the preliminary study that researcher did in Muhammadiyah University of Makassar on 16th November 2015 on Monday at 10.00 am. Students at the fifth semester are expected to be able to write well, especially in writing descriptive text. But, there are many reasons why the students consider writing as difficult task to complete. Sometimes, the students fail to find an idea to write and spend too much time to think about it. Because of it, they cannot manage their time. And also find it hard to organize their ideas and paragraph unity. It seems to be common occurrences students cannot relate one paragraph, even a sentence, to another. The other problems appear caused by strategy and technique in teaching writing, because some teachers do not apply suitable technique in teaching writing. In writing class, the teacher only ask students to write after teaching the material for a while, and then ask one or two students to read their writing results as comparison to others. So, it is needed for teachers to apply the techniques in order to improve students' writing ability.

There are some techniques and processes of writing that can be applied to improve students' writing text. The techniques of writing are questioning, listing, clustering, outlining and free-writing. And the process of writing are drafting, revising, and editing. Drafting is composing the first draft of a piece of

writing using the paragraph components. The students should firstly write the possible title of the text and begin the paragraph with the topic sentence and developed by using several notes in the list of ideas (prewriting process) to be the supporting sentences. Writing the final draft is the last process in writing a composition. Fulwiler, Toby (1999) stated that try to make your early drafts as complete as possible at the time that is, give each draft your best shot. Compose in complete sentences, break into paragraphs where necessary, and aim at a satisfying form. At the same time, allow time for second and third drafts. Listing is a discovery strategy in which the students developed an unordered list of ideas and images. Listing can help overcome student's block and lead to the discovery and focusing of a topic. A list could consist of the main topic of regional dialects and then sub lists would be regional dialects to know or have experienced.

In this case, the researcher compared the problem by applying drafting and listing technique before writing a text, which is assumed to be able to improve students' writing, specially writing descriptive text. This kind of strategy helped the students easy to develop their ideas in writing.

By those considerations, the researcher compared the students' writing ability by using drafting and listing technique. The students got the problems in organizing their ideas, they fail to find an idea to write and spend too much time to think about their paragraph, and it made the students spent a lot of time to write. For this reason, the researcher decides to take research on comparing the students' writing descriptive text using drafting and listing technique that provoke them as possible under title "*The Comparison between Drafting and*

Listing Technique in Improving the Students' Writing Descriptive Text at the Fifth Semester of English Education Department of Muhammadiyah University of Makassar."

The researcher expect that this research would be effective to increase students' writing ability in organizing their ideas to arrange paragraph and this technique became an alternative teaching technique and strategy in writing especially for teaching writing descriptive text.

B. Research Problems

The focus of this research was to compare writing ability between drafting and listing technique in writing descriptive text. In order to be able to examine the problem, the researcher formulated the following research questions:

1. How is the students' writing descriptive text by using drafting and listing technique at Muhammadiyah University of Makassar?
2. Is writing descriptive text of drafting significantly different with the listing technique at Muhammadiyah University of Makassar?
3. Which technique do the students have better in writing descriptive text at Muhammadiyah University of Makassar?

C. Research Objectives

This research aims to compare writing descriptive text by using drafting and listing technique of students at the fifth semester of English Education Department of Muhammadiyah University of Makassar. The specific objectives in this research, there were:

1. To identify the students' writing descriptive text by using drafting and listing technique at Muhammadiyah University of Makassar.
2. To compare whether or not the writing descriptive text of drafting significantly different with the listing technique at Muhammadiyah University of Makassar.
3. To identify which technique of the students have better in writing descriptive text.

D. Research Significance

The advantages of this research were divided into two parts, which were provided as follows:

1. Theoretical significance

This research expected to be a good reference in teaching English especially for teaching writing and give contribution to teaching writing descriptive text by using drafting and listing technique. The technique conducted in this research because the students just write the topic of a piece of paper and quickly make a list or make a draft of the word or sentences coming into their mind and of course not spent a lot of time to write a text especially writing descriptive text.

2. Practical Significance

- a. For students

The researcher expects that all of the students of English Education Department have high motivation and can write well using drafting or listing technique. They expected to increase their ability of their English writing about descriptive text easily and applied in the class.

b. For teacher

The researcher hoped that drafting and listing technique helped teacher to increase their student's achievement in writing. It was also expected to give good contributions for all teachers in teaching writing. The teacher also would be easy to make their students understand the material.

c. For next researcher

The researcher really hopes by this research would be preliminary study or reference before formulating their research. It was also be a guide to arrange paragraph using the technique and strategy in writing.

E. Research Scope

The main focus in this research used the technique and strategy in writing, there were drafting and listing in improving students' writing descriptive text at the fifth semester of English Education Department of Muhammadiyah University of Makassar. Students write descriptive text using drafting or listing technique about person especially about their idol. In drafting strategy, there are two steps; first drafting and final draft writing. Students are asked to write the possible title of the text and begin the paragraph with the topic sentence. Correction spelling, punctuation and capitalization in final drafting. And the students write a descriptive text using listing technique have to make a list and consist with the topic.

F. Operational Definition Of Term

1. Writing

Writing is one of four macro skills which are involved in productive skill, developing and express our idea on a paper. Writing is a kind of activity process that put the ideas, experiences, and feeling into paper in order to make a communication between the writer and the reader.

According to Harmer (2004:31-32), writing is one of four main macro-skills besides reading, speaking, and listening. Furthermore, writing is one of four basic skills which involved in productive (output) skill.

2. Descriptive Text

A descriptive text is a text which says what a person or a thing look like and it is purpose to describe a particular person, place, and things.

According to Wishon George and Burks M. Julia (1980:379) stated that the descriptive text is a description reproduces the way things look, smell, taste, feel, or sound; it may also evoke moods, such as happiness, loneliness, or fear. Furthermore, they state that description of text used to create a visual image of people, places, even of units all time; days, times of day, or seasons.

3. Drafting

Drafting is a procedure in writing. In drafting, it is not the time to worry about spelling, grammar, punctuation, and just write paragraph about the topic.

According to McCrimmon (1984:10), drafting is a second stage in the writing process, drafting is a series of strategies designed to organize and develop sustained a piece of writing.

4. Listing

Listing is one of technique in pre-writing and a way to get ideas quickly with make a list about word or sentences about the topic.

According to Oshima A. & Hogue (2007:16), listing is a pre-writing technique. Listing technique is a way to get ideas in which students write the topic at the top of a piece of paper and they quickly make a list of the words or phrases coming into their mind.

CHAPTER II

REVIEW OF RELATED LITERATURE

This part deals with some previous research findings, some pertinent ideas, theoretical framework and hypothesis.

A. Previous Related Research Findings

A number of researchers had already reported on their research about the technique in writing descriptive text. The researcher took the other research by using game and the other strategy in writing descriptive text. Some of those following findings are:

Miftah, M.Z. (2012) with the title "*Enhancing the Writing Ability of the English Education Study Program Students of STAIN Palangkaraya through Idea Listing Technique*" found that after implementing Idea Listing Technique with the appropriate procedures developed, the students' ability in writing an expository paragraph enhances. My research stand focusing on drafting and listing technique in writing descriptive text and Miftah, M.Z' research issued about enhancing writing ability using listing technique.

Neditahsini (2011) with the title "*Improving Students' Writing Skill of Descriptive Text through Writing Assessment Strategy at Grade VIII 1 of SMPN 23 Siak*". In this research, the researcher takes a conclusion that this strategy probably will work effectively in his classroom as well. It is hoped through applying writing assessment by the Collin writing program strategy; the students writing skill on descriptive text will improve. And the teacher teaching writing strategy is also enriched. The researcher concludes that my research are same

which is improving students' writing descriptive text using the strategy in writing but has different because my research stand focusing on drafting and listing technique in writing descriptive text and Neditahsini' research using writing assessment strategy in improving students' writing descriptive text.

Fikri Fauzi Alawi (2010). *“Improving Students’ Ability in Writing Descriptive Text Using Clustering Technique (A Classroom Action Research with the 8th Grade Students of MTs Darul Ma’arif Cipete-Jakarta”*. In this research, the researcher found that using clustering technique in teaching descriptive writing can improve their writing’s ability. The students’ responses showed that they were interested to learn writing subject, because they felt easier to write using the technique. The researcher concludes that my research are same which is improving students’ writing descriptive text using the technique in writing but has different technique because my research stand focusing on drafting and listing technique in writing descriptive text and Fikri Fauzi Alawi’ research using clustering technique in improving students’ writing descriptive text.

Based on the statements above, it can be concluded that there are some ways to improve students writing ability. Each method or strategy has different characteristics with others. Generally, the result of method has significant effect to improve the students’ writing ability. Therefore, the researcher compare between drafting and listing technique to help the teachers and the students to improve their ability in writing descriptive text. The students can write well if they know and apply the technique in writing, the students can write paragraph

as easily as possible, arrange words into sentences, arrange sentences into paragraph and finally, arrange descriptive text paragraph and did not consume many time, because they know the technique that they will use in writing, arrange and develop the words that was given by teacher.

B. Some Pertinent Ideas

1. Writing

a. Definition of Writing

Writing as one of four language skills is considered as a difficult skill because the students should make some aspects in writing such as content, organization, purpose, vocabulary, punctuation, and spelling in a balance way. According to Oshima A, and A, Hogue (1999) stated that writing is a progressive activity. This means that when someone first writes something down, he has already been thinking about what he is going to say and how is going to say it. Then, after he has finished writing, he reads over what he has written and makes ahanges and correction. Therefore, writing is never a one- step action; it is a process that has several steps.

Writing is the activity or occupation of writing, for example books, stories, or articles. We can take more times to think and choose words in order to express our idea, thought, and feeling. We still can make editing or revision if it is not so clear to express what intends to write. Writing is a progressive activity. This means that when we first write something down, we have already been thinking about what we are going to say and how we are going to say it. The after we

have finished writing, we read over what we have written and make changes and corrections.

Therefore, writing is never a one steps actions; it is a process that has several steps. Writing is a discovery process that involves discovering ideas, how to organize them and what that we want to put over to our order, so a lot of what a students does as a students doesn't actually appear on the page. It is a means of communication. Whenever the students want to write, he has to knowing the audience or reader, it will help in reaching the goal of communicating clearly and effectively.

Communication in writing tends to involve a thinking process because writing requires the process of selecting and organizing ideas into coherent and logical whole, so in this case writing is undeniably based in thought. It means that writing is a way to produce language that comes from our thought. In the writing process, the student tries to developing their ideas and feelings to produce into a good sentence, in order to inform the other.

b. Types of Writing

The type of writing system which exists in the native language an important factor in determining to easy of speech with which students learn to write. There are two types of writing:

1. Practical Writing

This type deals with the fact and functional writing. It is purposed to special goal that we can find it in letters, papers, summaries, outlines, essays, etc.

2. Creative or Imaginary Writing

This type usually exists in literature. Such as novel, romance, poem, short story, science fiction, etc.

c. Purposes of Writing

According to Michael O'Malley and Lorraine Valdez Pierce (1996:137), there are three purposes of writing based on the types of writing in English language learning, those are:

1. Informative

It is represented by “informative writing,” that is purposed to share knowledge or information, give directions, and state ideas to other. Informative writing involves describing events or experiences, analyzing concept, speculating on causes and effect, and developing new ideas that are purposed to inform something may important to the readers.

2. Expressive or Narrative

It is represented by “expressive writing” or “narrative writing is” that is purposed to share a personal or imaginative expression. Commonly it is composed by the students’ story or essay. Expressive or narrative often used to perform a pleasure discovery, story, poems, or short play.

3. Persuasive

It is represented by “persuasive writing” that is purposed to persuade the readers to do something. It effort to influences others and initiate action or change. This type of writing includes evaluation of book, movie, consumer product, or controversial issues.

d. Writing Process

According to Hogue (1996) the process of writing, especially in writing composition (final target of writing) is divided into five steps, namely: (a) prewriting for ideas, (b) outlining, (c) drafting, (d) revising, (e) editing and (f) final draft writing.

The process is explained as follows. The first step of the process of writing is prewriting. Prewriting is aimed at eliciting ideas as many as possible as the raw materials in writing a composition. Hogue (1997:50) explains that prewriting has various techniques that may be selected according to the students' preference. This process is also called brainstorming. Among the techniques are taking notes, free writing, listing and clustering. In this step, as its name, a student collects as many ideas as possible generated from a process of thinking in the form of words, phrases, or sentences. All the ideas supplied by the thinking process will be considered as relevant or irrelevant. For all the relevant ideas, they will be used as the basis of the paragraphs to be composed. The relevant ideas may take several forms, such as collocations or co-texts (synonymy, antonym, hyponymy, super- or subordinates), context (person, time, place and manner), and content (resources).

The second process is called outlining. Hogue (1996: 34) defines outlining as planning for a writing assignment. Furthermore, she states that outlining helps students organizing their ideas and put the ideas into logical order. The model of outlining in writing a composition can be time-order, space-order, and listing-order.

The next processes are drafting, revising, and editing. Drafting is composing the first draft of a piece of writing using the paragraph components. The students should firstly write the possible title of the text and begin the paragraph with the topic sentence. The topic sentence is developed by using several notes in the list of ideas (prewriting process) to be the supporting sentences. Revising and editing, on the other hand, are the process of looking back at the draft composed to check the meaning, the mechanics, relevance of the information, the coherence and cohesiveness, the word choice, the word orders or grammatical and lexical resources. Editing is also effective to introduce connectors for cohesiveness.

Writing the final draft is the last process in writing a composition. After the editing process, the students write the last neat piece of writing that will be free of serious mistakes in terms of meanings and mechanical (spelling, punctuation, and capitalization). Although the process seems to be systematic, some difficulties may hamper in the process.

According to Hogue (1996) the process of writing, especially in writing composition (final target of writing) is divided into five steps, namely: (1) prewriting for ideas, (2) outlining, (3) drafting, (4) revising, (5) editing and (6) final draft writing. She explains the process as follow:

1. Prewriting for Ideas

The first step of the process of writing is prewriting. Prewriting is aimed at eliciting ideas as many as possible as the raw materials in writing a composition. Hogue (1997:50) explains that prewriting has various techniques that may be selected according to the students' preference. This process is also called

brainstorming. Among the techniques are taking notes, free writing, listing and clustering. In this step, as its name, a student collects as many ideas as possible generated from a process of thinking in the form of words, phrases, or sentences. All the ideas supplied by the thinking process will be considered as relevant or irrelevant. For all the relevant ideas, they will be used as the basis of the paragraphs to be composed. The relevant ideas may take several forms, such as collocations or co-texts (synonymy, antonym, hyponymy, super- or subordinates), context (person, time, place and manner), and content (resources).

2. Outlining

Hogue (1996:34) defines outlining as planning for a writing assignment. Furthermore, she states that outlining helps students organizing their ideas and put the ideas into logical order. The model of outlining in writing a composition can be time order, space-order, and listing-order.

3. Drafting, Revising and Editing

Drafting is composing the first draft of a piece of writing using the paragraph components. The students should firstly write the possible title of the text and begin the paragraph with the topic sentence. The topic sentence is developed by using several notes in the list of ideas (prewriting process) to be the supporting sentences. Revising and editing, on the other hand, are the process of looking back at the draft composed to check the meaning, the mechanics, relevance of the information, the coherence and cohesiveness, the word choice, the word orders or grammatical and lexical resources. Editing is also effective to introduce connectors for cohesiveness.

e. Component of Writing

There are five significant components of writing according to Heaton in Sugiarto (2012:15) they are content, organization, grammar, vocabulary and mechanic. They are as follows:

1. Grammar

Grammar concerns about the ability to write correct and appropriate sentences. The writer has to give attention for preposition auxiliary such as using of verbs, nouns, adjective, conjunction and articles. It is very important to the writer to clarify the correct usage of point grammar because the reader will be difficult to understand it. It has a great influence. So, we have to reread and review what we have written.

2. Content

The content of writing is about the ability to think creatively and develop thoughts, excluding all irrelevant information. It should be clear to the readers. So, readers can understand what the messages convey and gain information from it. Besides that, the content of writing should be well unity and completeness because the characteristics of good writing are to have unity and completeness.

3. Vocabulary

Vocabulary is an essential part of writing composition. The writers need vocabulary mastery well to express or write their ideas. The effect of using vocabulary in writing must be relevant to the topic to let the readers perceive it. Someone who lacks the vocabulary will be difficult to compose what they are

going to express, but appropriate vocabulary will help writers to compose writing.

4. Mechanic

It is related with the ability to use correctly words to the written language, such as using of capitalization, punctuation, spelling. It is very important to lead the readers to understand or recognize what the written means to express. The use of favorable mechanics in writing will make the readers easy for the group to conveying ideas or messages of writing. The explanation as follows: a) Capitalization, the use of capitalization can clarify the ideas. If the sentences are not capitalized correctly, ambiguous and misunderstanding will appear. It also helps to differentiate from sentences to others. The words which are capitalized at the beginning, such as the name of people, the name of places, organization, first and last word of title, etc. b) Punctuation, punctuation can help the readers to identify the unit of meaning and suggest how the units of it relate to each other. Such as comma, question mark, apostrophe, etc. c) Spelling, using of spelling has three rules; they are suffixed addition, plural formation and the change of certain words.

5. Organization

Organization is the ability to develop ideas and topic which relevant a united form. On the other hand, it concern in ways of researcher to arrange and organize the ideas or messages in writing. There are many ways in the process of organizational writing involves coherence, order of importance, general to specific, specific to general, chronological order and special pattern.

f. The Importance of Writing

There are a lot of reasons why writing is important. Some of them are stated by Heaton in Justang (2014: 17) below:

1. Writing is a tool for discover, we stimulate our thought process by the act writing into information and image we have unconscious mind.
2. Writing generates new ideas by helping us to make connection and relationship.
3. Writing help us to organize our ideas. We can arrange them in coherence form.

Now days, people recognize more and more the importance of writing. In relation to this, Adelstain in Amin (2009: 19) expressed that in all subject in our life or in all professions, the ability to write or express oneself clearly is an essential basic for success. Adelstain in Amin said 'As soon as you move one step up from the bottom, your effectiveness depends on your ability to teach other through the spoken or written language'. The usefulness of writing expressed as follows:

1. Writing is a tool for discovery. We stimulate our thought process by unconscious mind.
2. Writing generates new ideas by helping to make connection and see the relationship with other aspect.
3. Writing help us to absorbs and process information, and;
4. Writing enables us to solve problems into written form we can examine and manipulate them.

Exactly, the students can get many advantages from writing. Writing can improve the mastery of vocabulary, master of mechanics of writing; enlarge knowledge of topic being discussed and improving mastery of English grammar, generating idea, absorb the information based on Adelstein et al in Amin (2009: 20) argue three writing lets the writers express their personalities, allow for conscious development of language and there is a special feeling about seeing our work in print and enormous satisfaction in having written something which we want to say.

Araceli C Hidalgo ET. Al in Nuraida (2003:20) explained that there are some objectives of writing as follows:

1. To help the student with their bulk of reading materials, such as medical journals, articles, case histories.
2. To help the students listen to the lectures and take dawn notes effectively.
3. To help the students listen analyze and interprets appropriately and correctly information presented.
4. To help the students evaluate and from arguments, regarding information presented.
5. To help the students to understand the role of academic world and in the world of science, technology and communication.

Referring of some opinions above, we can concluded that writing as an aspect of English skill can improve our ability such as grammar and mastery of vocabulary. It can satisfy the writer because we can express our idea freely

without pressure and some people tend to write than express orally what they want to say. The most important is writing not only activated our brain but also physical dimension such as eyes and ears are involved in learning process. On the other side, the students are encouraged to read material as many as possible such as books, magazine, and journals to make the writing composition well in order to sharing information with the readers.

The researcher concludes that the importance's of writing are:

1. Through writing we can express our idea, especially the feeling to the others without ashamed because the reader is not in front of the writer to have face to face.
2. People can put their idea, feeling and knowledge into written form more freely.
3. In the classroom, writing can be used as a technique to help the students interesting in the lesson.
4. Writing helps us to discover exactly how we think and what we think freely.
5. Writing in English is mean to fill the gap that exist between the ability to express ideas, feeling, opinions and other in Indonesia and the ability to express the same thing in English.

g. The Form of Writing

Wishon and Burks in Astini (2010) divide forms of writing into four divisions, namely narrative, descriptive, exposition and argumentative.

1. Narrative

Narrative is the form of writing used to relate the story of acts or events. It places occurrences in time and tells what happened according to natural time sequences. Types of narration include short stories, novels and new stories as well as a large part of everyday social interchange in the form of letter and conversation.

2. Descriptive

Description is about sensory experience, how something looks, sounds and tastes. Mostly it is about visual experience, but description also deals with other kinds of perception. It used to create a visual image of people, places, even of units of time days and times of the day or seasons. It may be used also to describe more than the outward appearance of people. It may tell about the traits of character or personality.

3. Exposition

Exposition is used in giving information, making explanations and interpreting meanings. It includes editorials; essay and informative and instructional material. Used in combination with narrative, exposition supports and illustrates. Used apart from the narrative, it stands alone as an essay.

4. Argumentative

The argument is used in persuading and convincing. It is closely related to the exposition and it is often found combined with it. The aim is to make a case or to prove or disprove a statement or proposition. It may present arguments to persuade the reader to accept an idea or a point of view.

2. Concept of Descriptive Text

a. Definition of Descriptive Text

Tompkins in Anderson (2003:40) defines descriptive text as painting pictures with words. By reading a descriptive text, readers feel that they see the description just like they see pictures. Descriptive text has the purpose to describe the object or a person that the student is interested on. Thus, in writing a descriptive text, the students should know well what they want to described.

Anderson (2003:39) stated that descriptive text is different from information reports because they described a specific subject rather than general group. Axelford, B. Rise and Kooper, R Charles (1998:438) states, "To describe, students point out and same or features of their subject for example, identifies, the face, chin, form, type, and eyes of a weasel she once encountered in the woods. Besides that, Corbett, W. (1983:39) adds that descriptive text is one of the expository writing. The description draws a picture; try to convey the sound, taste, and smell of things or object. Meanwhile, Stanley in Anderson (2003:39) asserts that the aims of description are to convey to the reader what something looks like.

Descriptive text is a text which says what a person or a thing is like. The purpose is to describe and reveal a particular person, place, or thing. Furthermore, Johnston, K. and Morrow, K. (1981:35) states that the purpose of descriptive text is to describe objects or persons in which the students are interested. Pardiyono in Abunawas (2010:7) stated that a descriptive text is a text which lists the characteristics of something or someone and descriptive is a

mode of expository writing which is relied upon in other expository modes; we sometimes find difficulty in imagining a purely descriptive essay.

Beside that it also describes about the sense of impression such as the feel, sound taste and smell. Emotion may be described like feeling happiness, fear, loneliness, gloom and joy. Description also helps the readers understand the text through their imagination and visualize a scene or a person, or to understand a sensation or emotion.

From the definition above, the students can take generally conclusion the descriptive text is a text which would like to describe about something especially the characteristic if it is about the place, person and things.

b. Strategies in Writing of Descriptive Text

Axelford, B. Rise and Kooper, R. Charles (1998:440), regardless of whether a description is to be more or less objective, describing involves three basic strategies are:

1. Naming

To describe, students must notice what their sense tell them. Noticing is only half of describing. However, the other half is finding the language to record the fine discriminations their senses make.

2. Detailing

Although nouns can be quiet specific, detailing is a way of adding more specific to them, thus making description even more particular and precise.

3. Comparing

Whereas, meaning and detailing can of observation, comparing bring the imagination into play. Comparisons make languages even more precise and description more evocative.

In writing descriptive text, as the students we have to know about the strategies in writing descriptive text. There are some strategies in writing descriptive text. They are:

- 1) Trying giving all the details first; the dominant impression then is built from these details.
- 2) Checking your details to be sure than they are consistent with the dominant impression. You might even want to write down the five senses on a scratch piece of paper and check to see that you have covered them all.
- 3) Trying moving your reader through space and time chronologically. For instance, you might want to describe a train ride from start to destination, or a stream from its source to the point at which it joins the river.
- 4) Using then-and-now approach to show decay, change, or improvement. The house where you grew up might now be a rambling shack. The variations on this strategy are endless.
- 5) Selecting an emotion and try to describe it. It might be more difficult to get started, but it can be worthwhile.

c. Generic Structure of Descriptive Text

In getting easy to write a descriptive text so we have to know about the generic structure of descriptive text, so the readers can understand the object that we will describe.

a) Identification

- 1) Identifying the phenomenon to be described.
- 2) Statement that describe the object that we will describe generally.
- 3) The statement must be interesting, so it the readers will be interested to read completely.
- 4) Using the adjective or degree of comparison.

b) Description

- 1) Giving description about the object that we can be described.
- 2) Describing the phenomenon in parts, qualities, or/and characteristics.
- 3) Using good grammatical pattern, such as tenses (present tense/ present perfect tenses), verb (be, have, linking verbs) and using adjectives that is used for describing the condition of object.

d. The Kinds of Descriptive Text

As a concept of writing, Pardiyono (2007:34) identified descriptive text into three kinds, they are describing place, people and thing.

1. Describing Place

Description of place is a text that describes the place looks, such as the condition, the situation etc.

2. Describing People

Description of people is a text that describes the people looks, such as the face, body, behavior etc.

3. Describing Things

Description of thing is a text that describes the thing looks, such as the condition, function etc.

e. **The Language Feature of Descriptive Text**

Descriptive text has language feature as below:

1. Using attributive and identifying process.
2. Using adjective and classifiers in nominal group.
3. Using simple present tense.

f. **Types of Description**

Lannon in Gazali, S. Muh (2005: 8), there are two types of description. He defines each of description as follow:

1. Objective Description

Objective description purely on observable details it records exactly what the student's sees what anyone should see from their vantages points and it serves may useful college writing. Readers of an objective description expect only facts. In the describing a field or a lab experiment, the written would be focus on the fact and not and their feelings.

2. Subjective Description

Strictly speaking, on useful description can be completely subjective. To get picture, the reader need at least some observable details. For the purposes, the

written can define subjective description as that which has objective details by personal impression.

According to Lannon in Gazali, S. Muh (2005:9), that any description has one of three goals:

- a) To provide factual information about something to someone who we assemble, how need to know more about the factual information for the some good reason are called objective description. A strictly objective description has a referential goal. It included facts about the thing itself.
- b) To create a mood or impression in the readers' mind or to share a feeling is called subjective description. It has an expressive goal, and emphasizes the students' impression about the things.

3. Drafting

a. Definition of Drafting

In composition, drafting is a stage of the writing process during which a student organizes information and ideas into sentences and paragraphs. Students approach drafting in various ways. "Some students like to start drafting before they develop a clear plan," notes John Trimbur (2014), "whereas others would not think of drafting without a carefully developed outline".

According to Toby Fulwiler that try to make early drafts as complete as possible at the time that is, give each draft the students best shot. Compose in complete sentences, break into paragraphs where necessary, and aim at a satisfying form. At the same time, allow time for second and third drafts and

maybe more. Though some sort of plan is almost always useful when drafting, resist any temptation at this stage to pin down every detail in its proper place. A huge investment in planning can hamper you during drafting, making it difficult to respond to new ideas and even new directions that may prove fruitful.

According to McCrimmon (1984:10), drafting is a second stage in the writing process, drafting is a series of strategies designed to organize and develop a sustained piece of writing. During drafting, the students put his ideas into complete thoughts, such as sentences and paragraphs. The students organize their ideas in a way that allow their teacher to understand their message. They do this by focusing on which ideas or topics to include in the piece of writing. During drafting, the students will compose an introduction to the piece and develop a conclusion for the material. At the end of this step of the writing process, the author will have completed a “rough draft.”

Drafting stage centers on providing students chances to start writing based on a paragraph outline idea they had made in the previous stage. Drafting is a stage designed to allow the writers to put their ideas on paper without worrying about mechanics or neatness (Roe *et. al.*, 1995:110). This statement is in line with Christenson (2002:41) asserting that drafting is the process of getting ideas on paper. In addition, Brown (2001:347) points out that drafting is viewed as an important and complex set of strategies, the mastery of which takes time, patience and trained instruction.

In this stage, the students were assigned to write rough draft as their first draft. For so doing, the students were assigned to write a title and start writing their first draft individually based on the outline they had made.

There are two kinds of drafting:

1. The First Drafting

Drafting is composing the first draft of a piece of writing using the paragraph components. The students should firstly write the possible title of the text and begin the paragraph with the topic sentence. The topic sentence is developed by using several notes in the list of ideas (prewriting process) to be the supporting sentences.

2. Final Draft Writing

Writing the final draft is the last process in writing a composition. After the editing process, the students write the last neat piece of writing that will be free of serious mistakes in terms of meanings and mechanical (spelling, punctuation).

b. Example of Drafting

The students decide to write an essay about dogs. They could have developed their prewriting notes with information about three topics relating to dogs: Show dogs, working dogs, and dog racing. These are all topics that could stand alone in an essay. During drafting, the students should choose just one of these topics for his piece of writing.

Once the students had chosen a topic, they should identify a purpose for the essay. For instance, if the writing was meant to be informational, they might choose to write about working dogs, his purpose being to impart

information. On the other hand, if they chose to write a persuasive essay, perhaps they would choose to write about dog racing, arguing for or against this controversial topic. After determining a purpose for a piece of writing, it is easy to begin drafting. Any information that is unrelated to the topic and its purpose should be eliminated from the prewriting.

The students begins writing by composing an introduction to the piece. The purpose of the introduction is not only to state the topic of the piece, but it should also draw the teacher as a reader in to the piece of writing. Some of students, the introduction may be one sentence stating the topic. The students will create an introductory paragraph that identifies the topic, sets the purpose for the writing, and suggests how the topic will be developed throughout the piece. The introduction to a piece of writing should be interesting. The tone of the introduction will vary according to the topic. If the students are writing a personal narrative, they might decide to begin with a creative quote about their experience. When writing an informational essay, the tone of the introduction must follow suit. It should be focused and informative.

A solid, interesting introduction sets the stage for the rest of the rough draft. The students should begin drafting the piece by organizing their notes in a sequence that will make sense to the teacher. The focus should be on logical connections between topics. Some of students will compose the body of a piece of writing by including detail sentences related to the topic sentence. And some of them will organize their writing in to paragraphs. Each paragraph should include its own topic sentence. Smooth transitions between paragraphs are

important in creating a cohesive piece of writing, no matter the subject. The students should refer back to his prewriting to keep them on track and ensure that the piece of writing maintains its focus.

The students should complete a rough draft by composing a conclusion. The purpose of a conclusion is to wrap up the piece of writing by connecting all of the related thoughts and ideas. The best conclusions are creative, engaging, and leave few questions unanswered in the mind of the teachers.

4. Listing Technique

a. Definition of Listing Technique

Listing Technique is a fastest way to collect the ideas of their various discussions (Kaner et al., 2007). Through the activity of this technique, students have more time to go into depth on topics of interest. It will draw out a wide range of thoughts on given topic and help students to rapidly identify many aspects the topic even when they are just beginning to think about it. By listing ideas, the students can see the breadth of their thinking. They are likely encouraged to create or discover as many as they can. That is why it is very helpful when they want to generate the ideas for the target topic. Kaner et al. (2007) add that generating ideas through listing is to generate a list of innovative solutions or ideas to a difficult problems or topics. When a problem or topic is more complicated than it generally appeared, using idea listing is an alternative way to solve it. Students can start sorting out the topics, and prioritizing the elements they want to tackle first.

According to Oshima A. & A. Hogue (2007:16), listing is a prewriting technique. It, one of the prewriting techniques, is a way to get ideas in which students write the topic at the top of a piece of paper and they quickly make a list of the words or phrases coming into their mind. Additionally, this technique is a way to narrow general topic to a smaller one by listing every word or phrase coming into their mind (Oshima A. & A. Hogue, 2007:43).

Furthermore, Kaner in Rebori & Havercamp (2007:3) indicates that listing technique is a technique students may use to facilitate discussions for generating innovative ideas for writing. This technique helps them search for a better understanding of a topic by eliciting diverse smaller topics and ideas on the given topic (Rebori & Havercamp, 2007:3). Moreover, idea listing can be useful to help students either generate topics or create main points and key details (Faigley, 2005).

b. Example of Listing Technique

A Person Who Has Made a Difference	
Albert Einstein	Bill Gates
Mother Teresa	Aunt Sarah
Martin Luther King, Jr.	Mr. Jakobsen (high school counselor)
Cesar Chavez	<u>Grandfather</u>

Figure 2.A Example of Listing Technique

Next the students started a new list. He wrote his chosen topic, Grandfather, at the top of new piece of paper and started writing words and phrases that came into mind about his grandfather.

Grandfather	
Uneducated (high school? eighth grade? only	started hospital in town –
farmer	hospital in big area
worked hard	first farmer to terrace his land – now everyone does it
helped his community	improved farming techniques in his area
started community hospital	smart
respected in community	read about new things
went to church every week	terracing helps prevent soil erosion
got up early	listened to experts
worked late	thought things over
was the first person in town to buy a car	made me laugh when i was little
forward-thinking	

Figure 2.B Example of Listing Technique

C. Theoretical Framework

There are many strategies or technique which can be applied by teachers to improve students' ability in writing such as by applying drafting and listing technique in pre- writing activity which will be conducted by the teachers. The

framework of this research will be conceptualized as follows:

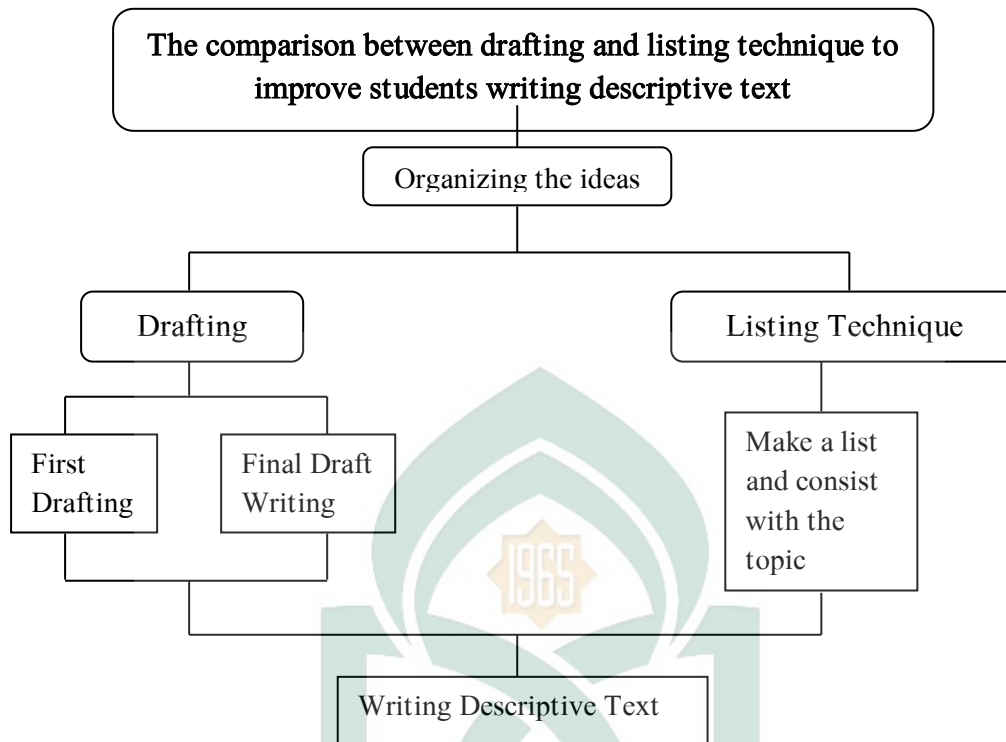

Figure 2.C The conceptual framework of the research

Based on the picture above explained that to improve the students' ability in writing, the teacher should provide an interesting strategy or technique in teaching writing. Next, to solve those problems, the researcher applied a different strategy to both groups; the researcher divided the group into one class. One group applied drafting in writing process and another one applied listing technique in pre- writing activities. In drafting, there are two kinds: the first drafting and final draft writing. And in listing technique, the students make a list about the topic and consist of it to arrange descriptive text.

The researcher has given a test and interview to the students and the finding is analyzing statistically to see whether the students who write by using drafting and listing technique have better result or not.

D. Hypothesis

As it is understood that technique in writing is not the only factor affecting writing ability, the researcher uses two hypotheses:

1. H_0 : There is no any significant difference of writing descriptive text by using drafting and listing technique in writing; and
2. H_1 : There is a significant difference of writing descriptive text by using drafting and listing technique in writing.

CHAPTER III

RESEARCH METHOD

This chapter, the researcher explains about the research method as a scientific way to obtain data with specific function and purpose. It consists of research design, research variables, population and sample, research instrument, data collecting procedure, and data analysis technique.

A. Research Design

This research is intended to give a description about the research which is going to do by the researcher. Narbuko, Cholid dan Abu Ahmadi (2004: 117) define research as the way of understanding something through investigation or effort to find the proofs which has relation with the problem, it is done carefully until the problem solving is found.

This research applied causal-comparative method in collecting the data. Causal-comparative design was intended to determine the cause for preexisting differences in groups of individuals, especially for drafting and listing technique in writing. According Gay (1981) that causal-comparative design involves selecting two (or more) groups differing on some independent variable and comparing them on some dependent variable. The researcher's goal was to determine whether the independent variable affected the outcome, or dependent variable, by comparing two or more groups of individuals. The design of this current study can be seen in the following diagram adapted from Gay (1991: online):

Figure 3.A. A Causal Comparative Design

The diagram above shows the causal-comparative design of this study. E was experimental group and C was control group and denote independent group of drafting and listing technique. Both groups believed to have different technique in organizing their idea in writing descriptive text by X_1 and X_2 as independent variables. Based on their different technique in writing descriptive text, they have given a test of writing as denoted by O and the results compared as the dependent variables.

B. Research Variables

A variable is a measurable characteristic that varies. It may change from group to group, person to person, or even within one person over time. There were six common variable types: dependent variables, independent variables, intervening variables, moderator variables, control variables, and extraneous variables.

In this research, the researcher used 2 variables. There were independent and dependent variables.

1. Independent variables.

The cause variable or the one that identifies forces or conditions that act on something else is the independent variable. The independent variable is "independent of" prior causes that act on it.

The independent variables of this research was drafting and listing technique.

2. Dependent variables

The variable that is the effect or is the result or outcome of another variable is the dependent variable (also referred to as outcome variable or effect variable). The dependent variable "depends on" the cause.

The dependent variable of this research was the students' writing descriptive text.

C. Population and Sample

1. Population

According to Arikunto (2002: 115) population is all subjects in the research. The population of this research is the fifth semester of English Education Department in the academic year of 2015-2016 at Muhammadiyah University of Makassar. The population consists of ten classes and each class consists of 30 students. So, the population was 279 students. The reason why the researcher chosen the fifth semester students because the researcher know that the fifth semester were expected to be able to write well, especially in writing descriptive text. The students be able to convey their ideas into convincing paragraphs by using appropriate and suitable words.

2. Sample

According to Arikunto (2002:115) sample is most of representative of who are researched. The sample was taken purposively. It means that the researcher decided to take PBI C and PBI D because they have studied about the technique and strategy in writing. The researcher was divided into two groups. 15 students from PBI C and 15 students from PBI D. The total number of sample were 30 students.

D. Research Instruments

Instrument is the media used by the researcher to obtain data. Selection of instrument for a particular research purpose involves identification and selection of the most appropriate one from among alternatives (Gay, 1981).

There were two types of instruments employed in this research, there were:

1). Writing test, and; 2). Interview.

1. Writing Test

Another instrument used by the researcher in this research was written test. The tests used to measure the students' writing ability for both drafting and listing technique. The researcher asked to the students to write a descriptive paragraph based on their knowledge about it. The topic given by the researcher in writing test are describing person, especially about their idol. Then the students developed the topic based on their mind and with using drafting and listing technique. The test of writing consists of three paragraphs. The test was limited to 45 minutes.

2. Interview

Interview used to find a rational meaning. Then the observation also used as data source to get information. By conducting interview, any misunderstanding which may exist in interpretation of the question can be clarified immediately. The interview is used widely to supplement and extend our knowledge about individual(s) thoughts, feelings our knowledge about individual(s) thoughts, feelings and behaviors, meanings, interpretations, etc. The aim of this instrument are to get information about the students' respond by using drafting and listing technique and to know which one the technique that the students have better in writing descriptive text.

Based in the aspect of the way in answering the questions that the researcher has given to the students in interview was structured interview. It means that the students' questions have been prepared before by the researcher. Structured interviews were conducted in various modes: face-to-face, by telephone, videophone and the internet. In this case, the researcher used face-to-face mode. This interview consists of 3 questions, and it was related to students' perceptions about the technique and strategies that they used in writing.

E. Data Collection Procedures

In collecting the data from the participants, the researcher did the following activities:

a. Writing Test

The procedures stages in collecting data in this research did the following activities :

1. The first, the researcher explained about descriptive paragraph with using drafting or listing technique in the class. The researcher make understanding more by remaining with the lesson before that have been given before by their teacher.
2. After giving explanation about descriptive paragraph with using the technique and the strategy, the researcher gave the paper that should be preparing before and distributing all of the students.
3. The researcher explained also about the aims of the writing test and what should they do at the paper.
4. The researcher asked the students to write descriptive paragraph with using drafting and listing technique based on the topic that have been given before.
5. The researcher gave the time to the students to do the test and limited to 45 minutes.
6. While the students doing the writing test, the researcher gave an attention to observe the students in writing test.
7. Exactly at the 50 minutes, the researcher asked to stop to write.
8. After that, the researcher gathered the students' paper that they have written.

b. Interview

Before an interview:

1. The researcher verified the tape recorder condition.
2. Asked one question at a time.

3. The researcher appreciated students' responses.
4. The researcher focused in doing the interview.

After an interview:

The researcher made the script from the result of the interview.

F. Data Analysis Technique

The data obtained from the interview and writing test were analyzed and interpreted using descriptive statistics and Statistical Packages for the Social Sciences (SPSS) Version 21. The results were used to answer the research questions as in the following:

1. To answer research question 1 : “How is the students' writing ability by using drafting and listing technique in writing descriptive text?” the researcher used descriptive statistics mean score and standard deviation.
2. To answer research question 2 : “Is writing ability of drafting significantly different with listing technique in writing descriptive text?” the researcher used t-test for paired samples and set the level of significance for the inferential data calculation at α 0.05. The critical t-table for α 0.05 with the degree of freedom $df = 28$ is 2.048.
3. To answer research question 3: “Which one the technique that the students have better in writing descriptive text?” the researcher used qualitative data to understand the meaning what the students as the interviewees say.

4. To know the students' writing score.

The students' test scored by using analytic scale for rating composition tasks

(Brown & Bailey, 1984, pp. 39-41) as below:

Table 3.1 Assessing Writing Form

No	Indicator	Criteria	Score
1	Organization	Appropriate title, effective introductory paragraph, topic is stated, leads to body	20-18
		Adequate title, introduction, and conclusion	17-15
		Mediocre or scant introduction or conclusion	14-12
		Shaky or minimally recognizable introduction	11-6
		Absence of introduction or conclusion	5-1
2	Content	Essay addresses the assigned topic	20-18
		Essay addresses the issues but misses some points	17-15
		Development of ideas not complete or essay is somewhat off the topic	14-12
		Ideas incomplete	11-6
		Essay is completely inadequate and does not reflect college-level work	5-1
3	Grammar	Native-like fluency in English grammar	20-18
		Advanced proficiency in English grammar	17-15
		Ideas are getting through to the reader, but grammar problems are apparent and have a negative effect on communication	14-12
		Numerous serious grammar problems interfere with communication of the students's ideas	11-6
		Severe grammar problems interfere greatly with the message	5-1
4	Punctuation	Correct use of English writing conventions	20-18
		Some problems with writing conventions or punctuation	17-15
		Uses general writing conventions but	14-

		has errors	12
		Serious problems with format of paper	11-6
		Complete disregard for English writing conventions	5-1
5	Style and quality	Precise vocabulary usage	20-18
		Attempts variety	17-15
		Some vocabulary misused	14-12
		Poor expression of ideas	11-6
		Inappropriate use of vocabulary	5-1

Then the score is obtained from formula above converted into the students' score classification.

Table 3.2 Classification of Students Score in Writing Test

Criteria of Mastery	Grade
86-100	Very Good
71-85	Good
56-70	Fair
41-55	Poor
≤ 40	Very Poor

To know the students mean-score and standard deviation after given descriptive text using drafting and listing technique:

Below are the mean-score formula which is adopted from Gay (1981) :

$$X = \frac{\Sigma x}{N}$$

Where: X = Mean score

Σx = The sum of all score

N = The total number of subjects.

The formula used in calculating in standard deviation:

$$SD = \sqrt{\frac{SS}{N}}$$

Where : SD = Standard deviation

SS = The sum of square

N = Total Number of the subjects

5. To know whether the H_0 is accepted or not. To see the result, it was analyzed by using t-formula as follow (Gay, 2000):

$$t = \frac{(x_1 - x_2)}{\sqrt{\left(\frac{SS_1 + SS_2}{n_1 + n_2 - 2}\right)\left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

Where:

t : the value of t-calculated

X_1 : mean of group using drafting

X_2 : mean of group using the listing technique

SS_1 : sum of squares of group using drafting

SS_2 : sum of squares of group using the listing technique

n_1 : number of group using drafting

n_2 : number of group using the listing technique

CHAPTER IV

FINDINGS AND DISCUSSION

This chapter deals with the findings of the research and the discussions of the research findings.

A. Findings

This section is divided into three parts according to the research questions. The data were presented in tables and described in qualitative manners. To answer Research Question 1, the researcher used the findings from descriptive statistics (mean score and standard deviation). To answer Research Question 2, the researcher used inferential statistics (t-test for paired-sample). To answer research question 3, the researcher used qualitative data to understand the meaning what the students as the interviewees say about which technique do the students have better in writing descriptive text, drafting or listing technique.

The findings of this research were taken from the result of the students' writing descriptive text by using drafting and listing technique. The data were collected from 15 students from drafting class and 15 students from listing class by using an interview and writing test. In order to give clear description of the findings, the researcher explains them based on the research questions as follow:

1. **To Identify The Students' Writing Descriptive Text by Using Drafting and Listing Technique**
 - a. Description of the Student's Writing Descriptive by Using Drafting

The researcher taken 2 classes, there were class C and class D. Class C have given to write descriptive text by using drafting and class D writes descriptive text by using listing technique. To be clearer, the researcher provides the table;

Table 4.1 The Classification of Students' Score in Writing Test by using Drafting

No	Classification	Scale	Writing Test by using Drafting	
			F	%
1	Very Good	86-100	3	20
2	Good	71-85	4	26.7
3	Fair	56-70	6	40
4	Poor	41-55	-	-
5	Very Poor	≤ 40	2	13.3
Total			15	100

Table 4.1 above shows that writing test by using drafting there are 3 (20%) students get very good classification, one student get 88 and two students get 86, 4 (26.7%) students get good classification, two students get 84 and also two students get 74, students get fair classification 6 (40%) students, 4 students get 69, one student get 70 and one student get 64 but none students get poor classification. And then, 2 students get ≤ 40 (13.3), one student get 40 and one student get 36.

In this table it can be seen most students 6 (40%) get fair classification.

Table 4.2 shows the mean score of and standard deviation of writing score of those by using drafting. The mean score of the students' writing descriptive text by using drafting is 70,8. It means that the skill of the students in writing descriptive text by using drafting was good classification. The standard deviation is 15,46 means that the deviation of the individuals' mean score to the total mean score was in normal distribution.

Table 4.2 Mean Score and Standard Deviation of Students

	N	Minimum	Maximum	Mean	Standard Deviation
Drafting	15	36	88	70.80	15.46

b. Description of the Students' Writing Descriptive Text by Using Listing Technique

Table 4.3 The Classification of Students' Score in Writing Test by using Listing Technique

No	Classification	Scale	Writing Test by using Listing Technique	
			F	%
1	Very Good	86-100	2	13.3
2	Good	71-85	8	53.4
3	Fair	56-70	5	33.3
4	Poor	41-55	-	-
5	Very Poor	≤ 40	-	-
Total			15	100

Table 4.3 shows that for listing technique there are 2 (13.3%) students get very good classification, one student get 90 and one student get 88, students get good classification 8 (53.3%) students, two students get 82, two students get 80, one student get 77, one student get 75, two students get 72, students get fair classification 5 (33.3%), two students get 65, two students get 62 and one student get 60. But, none students get poor and very poor classification.

In this table it can be seen most students 8 (53.4%) get good classification.

Table 4.4 shows the mean score of and standard deviation of writing score of those by using listing technique. The mean score of the students' writing descriptive text by using listing technique is 74.13. It means that the skill of the students in writing descriptive text by using listing technique is good

classification. The standard deviation is 9.69 means that the deviation of the individuals' mean score to the total mean score was in normal distribution.

Table 4.4 Mean Score and Standard Deviation of Students

	N	Minimum	Maximum	Mean	Standard Deviation
Drafting	15	60	90	74.13	9.69

2. To Compare whether or not the Students' Writing Descriptive Text by Using Drafting and Listing Technique.

Table 4.5 below shows the mean score and standard deviation of both independent sample groups. The mean score of students' writing descriptive text by using drafting is 70.8 and 74.13 by using listing technique. The standard deviations of both sample groups are 15.46 and 9.69.

The mean score of both groups are obviously different but to be able to determine of whether the difference is significant or not, the researcher used the t-test score for independent sample t-test in table 4.6.

Table 4.5 Mean Score and Standard Deviation of Drafting and Listing Technique

	N	Minimum	Maximum	Mean	Standard Deviation
Drafting	15	36	88	70.8	15.46
Listing	15	60	90	74.13	9.69

The significant score between drafting and listing technique can be known by using t-test. The result of t-test can be seen in table 4.6 as follows:

Table 4.6. Distribution the value of t-test and t-table

t-test	t-table
-0.71	2.048

Table above shows the result of t-test. For the level of significance (α) 0.05 and the degree of freedom (df) $(N_1+N_2) - 2 = (15+15) - 2 = 28$, showed that the value of t-test was lower than t-table. Since the t-test is lower than t-table value, the alternative hypothesis stating that “*there is a significant difference of writing descriptive text by using drafting and listing technique*” is rejected and accepted the null hypothesis stating that “*there is no any significant difference of writing descriptive text by using drafting and listing technique*”. It means that H_1 was rejected and H_0 was accepted because the t-test was lower than t-table ($t_{\text{test}} < t_{\text{table}}$) $-0.17 < 2.048$. It was different but not significant of students’ writing descriptive text by using drafting and listing technique in writing descriptive text.

3. To Identify which Technique of the Students Have Better in Writing Descriptive Text

In this section, the researcher described the data by qualitative data to understand the meaning what the students as the interviewees say about which technique the students have better in writing descriptive text, drafting or listing technique. There were 7 students answered drafting and 8 students answered writing descriptive text using listing technique. According to students’ opinion that listing technique can make them easy to develop their idea, they quickly to make a list of the words or phrases coming into their mind. Although the students write descriptive text by using drafting also make them easy to write.. But in drafting, the students have to write the first draft and the final draft writing. So, it can be concluded that better writing descriptive text is achieved by using listing technique. However, the different is quite trivial.

B. Discussions

This section discusses the result of the data analysis. It consists of drafting, listing technique and the comparison between drafting and listing technique. And the analysis was done based on the result of the drafting test and listing test.

Based on the result of drafting test of the students, it was found that level of the students' writing descriptive text about 'their idol' was in fair classification with the mean score was 70.8. Where the percentage can be known that the students' writing test by using drafting there are 3 (20%) students get very good classification, one student get 88 and two students get 86, 4 (26.7%) students get good classification, two students get 84 and also two students get 74, students get fair classification 6 (40%) students, 4 students get 69, one student get 70 and one student get 64 but none students get poor classification. And then, 2 students get ≤ 40 (13.3), one student get 40 and one student get 36. Thus, it could be concluded that the score of the students' writing descriptive text by using drafting at the fifth semester of English Education Department of Muhammadiyah University of Makassar were mostly found in fair classification with the percentage level students' of drafting was 40. In this case it caused can make a draft in writing however content, grammar, and mechanics was adequate.

And then, from the result of the listing test of the students, it was found that the level of the students' writing descriptive text about 'their idol' was in good classification with the mean score was 74.13. Where the percentage can be known that the students' writing test by using listing technique shows that for listing technique there are 2 (13.3%) students get very good classification, one

student get 90 and one student get 88, students get good classification 8 (53.3%) students, two students get 82, two students get 80, one student get 77, one student get 75, two students get 72, students get fair classification 5 (33.3%), two students get 65, two students get 62 and one student get 60. But, none students get poor and very poor classification. Thus, it could be concluded that the score of the students' writing descriptive text by using listing technique at the fifth semester of English Education Department of Muhammadiyah University of Makassar were mostly found in good classification with the percentage level students' of listing technique was 53.4. In this case, it is caused by most of the students using listing technique before they develop their idea in writing descriptive paragraph.

After looking at the result of drafting test of the students and test of listing technique in writing descriptive paragraph, as described in (appendix II) that score of standard deviation of X_1 as a drafting was 15.46 and score of X_2 as a listing technique was 9.69. And then, t_{test} was -0.71 and t_{table} was 2.048 with the degree of freedom was 28. Based on summary analysis above, the writer concludes that the students' writing descriptive text by using drafting and listing technique was different but not significant because the result of mean score of drafting and listing technique and also the result of $t_{\text{test}} - t_{\text{table}} -0.17 < 2.048$.

Based on the result of interview, there were 7 students answered drafting and 8 students answered writing descriptive text using listing technique. According to students' opinion that listing technique made them easy to develop their ideas, they quickly to make a list of the words or phrases coming into their mind

tought it. Drafting also made them easy to write. But in drafting, the students have to write the first draft and the final draft writing. So, it can be concluded that better writing descriptive text is achieved by using listing technique. However, the different is quite trivial.

According to Miftah, M.Z in his research about using listing technique in writing ability found that the students' ability in writing an expository paragraph had increased. The result of the research concluded that using listing technique can improve students' writing ability.

The result of this research was different with the previous research findings about the technique in writing descriptive text which concluded that students' writing descriptive text by using the technique increased and worked effectively. But, the result of this research was no any significant different in writing descriptive text by using drafting and listing technique. The factor which appeared was caused by the find of the research which applied. The previous research findings applied classroom action research which the researcher was focused on improving students' writing ability by using the technique in each cycle conducted, either from first cycle or second cycle. Meanwhile, this research applied causal-comparative method which compared between drafting and listing technique in writing descriptive text. The researcher just refreshed skills of the students about the technique in writing that they had studied before.

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter presents the conclusions as well as few suggestions of this research. Suggestions are taken based on findings and conclusions obtained in this research.

A. Conclusions

The research conclusion was presented according to the data which have been analyzed in the previous chapter. The data analyzed about the comparison between drafting and listing technique at the fifth semester of English Education Department of Muhammadiyah University of Makassar.

1. Based on the result of drafting test of the students, it was found that level of the students' writing descriptive text about 'their idol' was in fair classification with the mean score was 70.8 and the result of the listing test of the students, it was found that the level of the students' writing descriptive text about 'their idol' was in good classification with the mean score was 74.13.
2. After looking at the result of drafting test of the students and test of listing technique in writing descriptive paragraph that score of standard deviation of X_1 as a drafting was 15.46 and score of X_2 as a listing technique was 9.69. And then, t_{test} was -0.71 and t_{table} was 2.048 with the degree of freedom was 28, the writer concludes that the students' writing descriptive text by using drafting and listing technique was different but

not significant because the result of mean score of drafting and listing technique and also the result of $t_{\text{test}} - t_{\text{table}} -0.17 < 2.048$.

3. The result of interview, there were 7 students answered drafting and 8 students answered writing descriptive text using listing technique. So, it can be concluded that better writing descriptive text is achieved by using listing technique. However, the different is quite trivial.

In this research, the researchers have limitations because the researcher just refresh about the technique in writing that the students have studied before from their lecturer and this research only uses the technique in writing, although there are still many techniques and strategies that can be used for the students to improve their skill in writing ability.

B. Suggestions

1. For the teachers

The suitable choice of teaching writing techniques can make the teaching and learning process run well. The students will enjoy their class if the learning process is not boring. If the learning process is enjoyable, the students will understand the material more easily. If the students can develop their idea and apply the techniques before the students write especially writing descriptive paragraph, the purpose of teaching and learning about the techniques in writing ability will be gained. Surely, it is one of the objectives of teachers in teaching writing. Teachers must be clever in choosing the techniques for the teaching and learning process in the classroom that it can specified time to spend.

2. For the students

Both using drafting and listing techniques are not the only problem solving technique used to overcome students' problem in learning writing. Yet, it can be said, that using the techniques in writing is included as one of good strategies to overcome the students' problem in improving the English writing specially writing descriptive text.

3. For the next researcher

It is suggested to apply drafting and listing techniques for writing specially writing descriptive text. The other researcher also should know the technique and strategy in writing that can be used not only to improve students writing skill but also to improve other skills or components in different genres and elements in teaching English.

APPENDIX I
WRITING TEST

Name :

Class :

Instruction!

1. Create your own story to write a descriptive paragraph by using **drafting** about your idol.
2. Write as long as you can, and as best as you can until three paragraphs and I will give you 45 minutes to finish your writing.
3. You can use dictionary if necessary.

WRITING TEST

Name :

Class :

Instruction!

1. Create your own story to write a descriptive paragraph by using **listing technique** about your idol.
2. Write as long as you can, and as best as you can until three paragraphs and I will give you 45 minutes to finish your writing.
3. You can use dictionary if necessary.

APPENDIX II

A. Score of students by using drafting

No	Name	Score
1	Respondent 1	70
2	Respondent 2	69
3	Respondent 3	84
4	Respondent 4	36
5	Respondent 5	74
6	Respondent 6	64
7	Respondent 7	69
8	Respondent 8	88
9	Respondent 9	84
10	Respondent 10	86
11	Respondent 11	40
12	Respondent 12	69
13	Respondent 13	86
14	Respondent 14	74
15	Respondent 15	69

B. Score of students by using listing technique

No	Name	Score
1	Respondent 1	82
2	Respondent 2	62
3	Respondent 3	88
4	Respondent 4	60
5	Respondent 5	77
6	Respondent 6	90
7	Respondent 7	62
8	Respondent 8	65
9	Respondent 9	80
10	Respondent 10	75
11	Respondent 11	72
12	Respondent 12	65
13	Respondent 13	72
14	Respondent 14	80
15	Respondent 15	82

APPENDIX III

A. The Raw Score of the Students' Writing Descriptive Text by using Drafting

No	Name	Drafting	
		Score (X_1)	X_1^2
1	Respondent 1	70	4900
2	Respondent 2	69	4761
3	Respondent 3	84	7056
4	Respondent 4	36	1296
5	Respondent 5	74	5476
6	Respondent 6	64	4096
7	Respondent 7	69	4761
8	Respondent 8	88	7744
9	Respondent 9	84	7056
10	Respondent 10	86	7396
11	Respondent 11	40	1600
12	Respondent 12	69	4761
13	Respondent 13	86	7396
14	Respondent 14	74	5476
15	Respondent 15	69	4761

B. The Raw Score of the Students' Writing Descriptive Text by using Listing Technique

No	Name	Listing Technique	
		Score (X_2)	X_2^2
1	Respondent 1	82	6724
2	Respondent 2	62	3844
3	Respondent 3	88	7744
4	Respondent 4	60	3600
5	Respondent 5	77	5929
6	Respondent 6	90	8100
7	Respondent 7	62	3844

13	Respondent 13	72	5184
14	Respondent 14	80	6400
15	Respondent 15	82	6724

APPENDIX IV

Standard Deviation of Drafting and Listing Technique

A. Drafting

$$SD = \sqrt{\frac{SS}{N-1}}$$

$$\text{Where: } SS_1 = \frac{\sum X_1^2 - (\sum X_1)^2}{n}$$

$$SS_1 = 78.536 - \frac{(1.062)^2}{15}$$

$$= 78,536 - \frac{1.127.844}{15}$$

$$= 78.536 - 75.189,6$$

$$SS_1 = 3.346,4$$

$$SD = \sqrt{\frac{SS}{N-1}}$$

$$= \sqrt{\frac{3.346,4}{15-1}}$$

$$= \sqrt{\frac{3.346,4}{14}}$$

$$= \sqrt{239,028}$$

$$SD = 15,46$$

B. Listing Technique

$$SD = \sqrt{\frac{SS}{N-1}}$$

$$\text{Where: } SS_2 = \sum X_2^2 - \frac{(\sum X_2)^2}{n}$$

$$SS_2 = 83.752 - \frac{(1.112)^2}{15}$$

$$= 83.752 - \frac{1.236.544}{15}$$

$$= 83.752 - 82.436,2$$

$$SS_2 = 1315,8$$

$$SD = \sqrt{\frac{SS}{N-1}}$$

$$= \sqrt{\frac{1315,8}{15-1}}$$

$$= \sqrt{\frac{1315,8}{14}}$$

$$= \sqrt{93,985}$$

$$SD = 9,69$$

APPENDIX V

The Result of t_{test} and t_{table}

$$t = \frac{(x_1 - x_2)}{\sqrt{\left(\frac{SS_1 + SS_2}{n_1 + n_2 - 2}\right)\left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

$$t = \frac{(70,8 - 74,13)}{\sqrt{\left(\frac{3.346,4 + 1.315,8}{15 + 15 - 2}\right)\left(\frac{1}{15} + \frac{1}{15}\right)}}$$

$$t = \frac{(-3,33)}{\sqrt{\left(\frac{4.462,2}{28}\right)\left(\frac{2}{15}\right)}}$$

$$t = \frac{-3,33}{\sqrt{(166,50)(0,13)}}$$

$$t = \frac{-3,33}{\sqrt{(21,64)}}$$

$$= \frac{-3,33}{4,65}$$

$$t_{\text{test}} = -0,71$$

$$t_{\text{test}} = -0,71$$

$$\alpha = 0,05$$

$$df = (n_1 + n_2) - 2$$

$$= (15 + 15) - 2$$

$$= 28$$

$$t_{\text{table}} = 2,048$$

APPENDIX VI

The Result of Interview

The questions of the researcher to all of the students about “which technique of the students have better in writing descriptive text”

- a. Reacarcher : halo... dek, e... kan kita taumi drafting sama listing di dalam menulis, mana menurutta yang lebih mudah drafting atau listing di dalam menulis.

Respondent 1 : kalo saya lebih pilih listing kak.

Researcher : oh... lebih kita pilih listing. Kenapa?

Respondent 1 : e... karena menurutku kalo listing saya bisa melist-list dulu semua apa-apa yang mau saya tuangkan dalam tulisan terus, maksudnya saya bikin perpoin-poin dulu, dari poin-poin itu kemudian saya poin-poin kan lagi apa-apa yang bakalan saya bahas dari poin-poin tersebut menjadi sebuah paragraf.

- b. Researcher : dek, kan di dalam menulis ada beberapa tehniknya menulis, ada drafting ada listing tehnik, nah menurutta mana yang lebih mudah drafting atau listing dalam menulis?

Respondent 2 : terima kasih. Menurut saya lebih listing.

Researcher : kenapa dek, apa alasan kita bilang kalo lebih mudah listing?

Respondent : karena menurut saya, e... kalo saya ingin mengerjakan sesuatu, kemudian em... kita melist-list duluan, otomatis em... untuk mencapai apa yang kita inginkan itu dengan melihat list-list yang sudah kita tulis itu, em... apa e... lebih mudah membuat kita menulis suatu paragraf.

- c. Researcher : oh iya, dek di dalam menulis kan ada drafting sama listing, mana lebih kita pilih drafting atau listing di dalam menulis. Utarakan alasan kenapa ki pilih?

Respondent 3 : kalo saya pribadi drafting lebih mudah, karena kalo listing itu, e... hanya semacam list saja keyword saja, sementara kalo di

drafting langsung bisa dikembangkan. Jadi, ide yang sudah ada itu tidak e... tidak macet ki, kan kalo di listing itu keyword nya nanti mauki menulis, langsung ih apa mau saya tulis ini, ada keywordnya tapi saya lupami apa mau saya kembangkan ini, sedangkan kalo drafting kan langsung bisa saya kembangkan langsung jadi paragrafnya.

- d. Researcher : dek, kan ditaumi listing sama drafting, kalo menuliski sebuah paragraf mana lebih kita pilih, draftign atau listing?

Respondent 4 : kalo saya lebih pilih drafting.

Researcher : apa alasanta lebih pilihki drafting?

Respondent 4 : karena kan disitu langsung muncul ide, jadi saya tulis jadi nanti kalo seumpama sudah selesai itu, baru saya review ulang lagi.

- e. Reseracher : dek, e... mana lebih kita pilih menggunakan drafting ka atau listing ka di dalam menulis dek? Sekalian kita kasi alasan ta kenapaki pilih itu antara itu berdua, drafting atau listing?

Respondent 5 : kalo saya lebih pilihki drafting kak. Kenapa saya pilih itu karena kan e... ide saya itu muncul tiba-tiba ki memang, jadi misalkan kalo listing lagi itu agak sulit ki.

- f. Researcher : dek, mana lebih kita pilih dalam menulis menggunakan drafting atau listing? Baru kenapa bisa kita pilih itu, kemukakan alasanta

Respondent 6 : kalo saya lebih pilihki menggukan listing karena kita punya list yang akan kita tulis kedepannya sebagai patokan kita di dalam menulis sebuah paragraf.

- g. Researcher : dek, mana lebih kita pilih menggunakan listing atau menggunakan drafting di dalam menulis? Sekalian kita berikan juga alasanta kenapa bisa pilih salah satu diantaranya?

Respondent 7 : oh iye. Kalo saya lebih memilih listing karena kenapa, karena kalo kita menggunakan listing itu lebih terkonsep sebelum menulis kemudian itu, e... kita bisa e... menulis dengan lebih mudah.

- h. Researcher : dek, kan ada drafting sama listing yang biasa digunakan kalo menulis orang, nah mana kita lebih pilih pake drafting atau listing ka di dalam menulis?

Responden 8 : kalo saya kak lebih pilih pake drafting kak karena kenapa, drafting lebih memudahkan kita untuk menulis suatu karangan e... atau suatu paragraf.

- i. Researcher : di dalam menulis kan dek ada drafting sama listing, a... mana lebih kita sering pake atau lebih mudah ki pake pake drafting atau listing dalam menulis?

Responden 9 : saya lebih memilih listing kak.

Researcher : o... listing. Kenapa dek?

Responden 9 : iye. Em... karena em... sebelum membuat suatu kalimat maka poin-poin nya dulu harus ditentukan sehingga untuk mengembangkan kalimat tersebut dengan lebih mudah ki kak.

- j. Researcher : dek, mana lebih kita pilih dek drafting atau listing di dalam menulis. Kenapa?

Responden 10 : kalo saya kak lebih memilih listing karena em... dimana listing itu hanya em... kita pertama menulis garis-garis besarnya, nah... itu e... mempermudah saya e... apa...e... memulai menulis karangan saya.

- k. Researcher : dek, mana lebih mudah menurut ta pake drafting atau listing di dalam menulis? Kenapa dek, maksudnya alasan ta.

Responden 11 : e... kalo saya kak e... lebih memilih drafting, kenapa karena e... pertama pernahmi juga dipelajari dan kedua lebih mudah dan memang kak lebih mudahki memang.

- l. Researcher : dek kan kita taumi toh listing sama drafting di dalam menulis, nah mana lebih mudah menurut ta, terus kasi alasanta nah?

Responden 12 : iya. Kalo saya lebih memilih drafting karena saya orangnya lebih suka ki memang e... langsung menuliskan apa yang ada langsung e... ide-ide di otak saya, tidak perlu lagi me list-list terlebih dahulu jadi nanti setelah saya tulis acak-acakan baru disusun kembali.

m. Researcher : mana lebih mudah dek menurut ta pake drafting atau listing di dalam menulis. Kenapa?

Responden 13 : kalo menurut saya e... yang lebih mudah itu kalo mau menulis sesuatu itu harus dimulai dari listing terlebih dahulu, karena e... apabila kalo drafting terlebih dahulu, bisa saja ada em... sesuatu yang dilupakan, jadi kalo misalnya kita membuat em... listing terlebih dahulu, e... step by stepnya itu lebih jelas, e... setelah ditulis listingnya, baru e... menjabarkan hasil yang telah di list kan terlebih dahulu.

n. Researcher : dek, mana lebih mudah menurutta kalo menulis pake drafting atau listing. Utarakan juga alasan ta.

Responden 14 : oh... drafting dengan listing. Drafting itu lebih mudah karena kalo menggunakan drafting berarti kita em... lebih dapat atau lebih mudah mengembangkan ide-ide terus kalo misalnya listing, e... memang bisa mengembangkan ide, cuman terbataski dibanding sama drafting.

o. Researcher : kan ditaumi dek drafting sama listing dalam menulis, mana lebih mudah menurutta pake listing ka atau drafing ka. Alasan ta?

Responden 15 : menurutku lebih gampang listing, karena e... dengan listing kayak poin-poin ki toh jadi lebih mudah ki untuk ditulis begitu em... jadi paragraf karena poin-poin nya ji saja.

3. You can use dictionary if necessary.

1. -

Mr. Mom

My hero is my mom because my mom helps me with many things. I don't know how to do. During the day my mom cleans the house, gets the groceries & she cooks for us. Then in the ^{afternoon} ~~evening~~ she works in the garden until 03:00 pm.

Salah tp maksiatnya dimungut
My mom makes sacrifices not seeing us all day. She doesn't complain because she does it for me & family. She is brave & she is the best mom. She tries to be the best mom she can be. My mom helps other people like my brother, sister & me. I really like when my mom teaches me how to cook something.

tp dimungut
I trust my mom with my secrets & she will never tell ^{to} (someone) because she is my mom. My mom helps me with ^{to solve my} problems. For instance, if my brother & I are in a fight, she helps us through the problem & she ^{solves} tells us why we are fighting. I picked my mom as my idol because she helps me a lot. & even though she works a lot & she will always be my hero.
