ACKNOWLEDMENT

Alhamdulillah Rabbil Alamin, the researcher would like to express her deepest gratitude to the Almighty Allah SWT., who has been giving blessings, mercies and good health all the time of research and writing of this thesis. Also, Shalawat and Salam are delivered to the great prophet Muhammad SAW., who has fought for bringing us from the darkness to the lightness by introducing Islam and teaching the great source of knowledge “the holy Qur’an”.

Immeasurable appreciation and sincere gratitude are extended to the people who in one way or another have contributed in all the time of the research and writing of this thesis, especially for the researcher’s parents **Drs. Laju, M.Si.** and **Dra. Amriani**, for allowing their daughter to realize her own potential by giving an unfailing support and continuous encouragement during the process of the research and writing of this thesis, also to the following persons:

1. Prof. Dr. H. Musafir Pababbari, M.Si as the Rector of Alauddin State Islamic University (UIN) of Makassar for the best administration management.
2. Dr. H. Muhammad Amri, Lc., M.Ag., as the Dean of Tarbiyah and Teaching Science Faculty of Alauddin State Islamic University (UIN) of Makassar for the guidance and support.
3. Dr. Kamsinah, M.Pd.I., and Sitti Nurpahmi, S.Pd., M.Pd., the Head and the Secretary of English Education Department of Tarbiyah and Teaching

Science Faculty of Alauddin State Islamic University (UIN) of Makassar for the guidance and suggestion during the research.

4. The most profound thanks to all lecturers of English Education Department and all staffs of Tarbiyah and Teaching Science Faculty for their help, support, and guidance during all the researcher's time in studying at Alauddin State Islamic University (UIN) of Makassar especially for **Prof. Hamdan, M.A., Ph. D.** and **Siti Nur Pahmi, S.Pd., M.Pd.**, the first and the second consultant for their guidance, supports and suggestions during the research and writing of this thesis.
5. Special Thank to **Mrs. Nurdaely Basir, S.Pd., M. TESOL** for the best guidance and suggestions during the researcher period of study in UIN Alauddin.
6. Big thank to **Prof. Dr. A. Nuzul, SH., M.Hum.**, the vice chairman of STAIN Watampone academic, and **Dr. Muhammad Zuhri, Dj. M.Hum.**, the chief of English Education Department of STAIN Watampone for allowing the researcher did the research in STAIN Watampone in about three months.
7. The great thank to the researcher's beloved siblings **Muhammad As'ad** and **Nurul Cahya Andini** to be always praying for their elder sisters' success.
8. With a special mention to the researcher's best friends **Syafiqa Putri** and **Nasruddin** and also their family **Mr. Muhammad Idris** and **Mrs. Jumasni** for opening their home to be left by the researcher during the research in STAIN Watampone.

9. A very special gratitude goes out to **Mr. Muhammad Ahkam Arifin, S.Pd., MSc. TESOL** for all the source of knowledge that he gave to the researcher during the research and writing of this thesis.
10. Thanks to all of the researcher's friends in English Education Department (2013) especially in PBI 1 and 2, for all their suggestions during the study in UIN Alauddin Makassar and all the suggestion during the research and writing of this thesis.
11. Thank to **Miss. Desi Arisma Pratiwi, S.K.M.** and **Mr. Arifin** for their suggestions during the writing of this thesis.
12. The sincere thanks to the students of TBI 1 and TBI 4 in STAIN Watampone, Kabupaten Bone, who had given their contribution during the research.

This thesis is actually less of everything for being an academic thesis but the great people around the researcher would always giving much support of knowledge, material, and spirit, may those people will never stop to give suggestions, so the researcher can have a good experience of writing thesis then be a professional writer of thesis. Hopefully this thesis can be one of great contributions in the word of education especially at English Education Department of UIN Alauddin Makassar.

Last, willingly the researcher pray may all works of us be blessed by Allah SWT. Aamiin.

ABSTRACT

Name : Nur Padhilah
Reg. Number : 20400113021
Title : **The Causal Factors of Bugis-Bone Accent Interference toward English Conversation**

Accent is related to the way each person produces different sounds that affected by their home's accent and it sometimes causes miss communication of each person in conversation. Bugis-Bone is the accent of people in Kabupaten Bone which is renowned as a strong/heavy accent. The students who are also the Bugis-Bone native speaker sometimes speak another language with an accent of Bugis-Bone. Therefore, this research was purposed to identify the causal factors of the English Students' Accent interfere on the pronunciation from Kabupaten in English conversation.

To meet the objective, the researcher adopted case study design by Cresswell which is one of the qualitative strategies. The data were gathered through qualitative method based on Miles and Huberman's technique of data analysis. The research was undertaken in STAIN Watampone, Kabupaten Bone, from March 2017 to May 2017.

The finding of the research showed that most of the students usually speak English with the Bugis-Bone accent even if it is in classroom conversation. Thus, they sometimes found difficult to pronounce the English words. In addition, the result of literature review showed that Errors which produced by the Bugis English learner in several areas of phonemes occurred because the phoneme which are not in their first language.

Referring on the description above, it informed that the English students have some problems to be solved. Students must be aware of their first language interfere in which the affect to their English pronunciation in English conversation. Also, the teacher have to support the students by attending to their English pronunciation.

CHAPTER I

INTRODUCTION

A. *Background*

Indonesia is known as a multicultural country that has various ethnic groups, with different regional languages and also the different cultural backgrounds. The role of local languages as means of communication in the family and the local community makes the majority of people prefer to communicate using their respective local language. The use of local language that becomes the dominant chosen one to communicate in the region does not make Indonesian so difficult to be learned because this language is the national language. It is different from the use of foreign languages that has an important role but only used in some condition by the people in this country as Siti Nurpahmi (2013: 6) stated that English is used by the teacher in the English class of school or learned to pass an examination in English to enter university.

English is a foreign language that is popularly used in Indonesia and also has a lot of enthusiast because of its position as an international language. The importance of its position in the world makes this language becomes the favorite subject in the school. It is good for the teachers especially in English because knowing the learners have a high motivation and need of mastering English make them easier to perform duties as a teacher. There are four aspects of learning process, those are: students, teacher, learning materials, and learning goal (Chaer and Agustina, 2004: 204). Teachers nowadays which are intelligent, creative, and also dedicated in carrying out their duties have been able to develop teaching

materials that suitable to the needs of learners, and provide an authentic material for reaching the success of the learning process goals. So, If those components of the learning process have been functioned in accordance with the purpose of teaching then the success in learning is able to be achieved. But there are other aspects of learning process that should not be forgotten, those are: the family and the people around the students' environment who will influence the students' habit, e.g. in terms of language.

The students that used to speak their first language (local language) in their daily activities found a difficulty to speak another language, moreover if it is English which they used only when they were in an area that require to use English. They have to adjust their tongue to pronounce the English word one by one and follow the way the English native-speaker pronounces it. The local language influences the way the students speak English, e.g. in the aspect of accent. Accent is concern about the different ways of producing speech (Derwing and Munro, 2009:476). Gary and Robert (2014:2) quoted the statement of Harding (2011) about aspects that form an accent which are from the segmental and supra segmental difference of pronunciation which include variation in vowels and consonant sounds at the segmental level, stress, and intonation at the supra segmental level.

Accent refers to the way in which the speakers producing different sound of speech. Bugis-Bone is known as a one of the regions in the Bugis tribe area that has a strong/heavy accent. Related to that, the researcher interested to research how the students from Bugis-Bone tribe speak English because when the

people from this tribe speak in other language they sometimes use their local accent.

People generally think that speak English with their local language accent isn't a matter but it is different for some English students in Bone. They sometimes felt shy to speak English because people (from other region) frequently laugh their accent. Some of them also have a problem to pronounce the English words. The researcher even found a teacher who stopped her students' conversation in the class because the student was difficult to pronounce some words and made the other one didn't understand what he said. It is also a challenge for English teachers who have students from Bugis-Bone or the teacher that teach in Bone.

A teacher have to prepare an authentic and flexible teaching materials to the needs of students, so the material in the class is undoubtedly convenient to be used outside the classroom. If it is an English teacher who teach an English conversation material, he/she should be able to teach it well, or at least invite an English native speaker to be the students' guide, so the students can be able to speak English in two-way communication. Therefore, one of the ways that need to be done is to know the causal factors of Bugis-Bone accent that affect the way the students from Bugis-Bone tribe speak English. Based on the statement above, the researcher intend to research the Bugis-Bone accent interfere on the pronunciation in English conversation.

B. Problem Statement

Based on the previous background, the problem that need to be answered at this research, as follow: *What are the causal factors of Bugis-Bone Accent Interference on the pronunciation in English Conversation?*

C. Research Objective

Considering the problem statement above, the objective of the research is *to identify the causal factors of Bugis-Bone Accent Interference on the pronunciation in English Conversation?*

D. Research Significance

The research is expected to give benefits, they are:

1. Theoretical Significance

This research is expected to be precious contribution in English learning process at primary school, secondary school and University specially in English conversation.

2. Practical Significance

a. For Teacher

By doing this research, the researcher intend to tell the teachers that they shall be aware of the students' first language interference so they can give the appropriate solutions for the students' English speaking problems in conversation.

b. For Students

By doing this research, the researcher intends to show that it is important to the students to be aware of their students' first language interference so they can avoid interruptions when they are doing an English conversation.

c. For The Next Researcher

This research is expected to be the reference for the next researcher especially the English department student.

E. *Research Focus*

The research was limited to the discussion of the accent interference on the pronunciation. The accent was the Bugis-Bone accent of Bugis tribe in Bone regency. It was analyzed in the situation of conversation which includes classroom conversation and casual conversation.

CHAPTER II

REVIEW OF RELATED LITERATURE

A. *Previous of Related Research Findings*

Keichi Tajima and Robert Port (1996) conducted a research entitled *Effect of Temporal Correction on Intelligibility of Foreign-Accented English* which investigated the effect of temporal properties of speech on the intelligibility of utterances produced by nonnative English speaker. They focused on short English phrases that instrumentally modified by a native Chinese speaker comparing to the way the native English speaker spoke the same phrases. They found that the intelligibility of the unmodified Chinese-accented phrases was poor (39% correct), but then improved significantly (up to 58%). Performance on the native English speaker was high (94%) but then declined significantly (to 83%), after temporal distortion according to the Chinese speaker's timing. They used the stimuli that based on native English listeners' performance in a forced-choice identification test with the four alternative which have four aspects that they analysed, the four aspect consist of: the correct phrases plus three phonetically similar distractor phrases suggested by listening to the Chinese production. Then the result of this study concluded that if explicit training was provided on temporal properties of their speech, the intelligibility of foreign-English speaker may be enhanced.

The research entitled *Difficulties Encountered by The Buginese Learners in Producing English Sounds* by Sitti Nurpahmi (2013). In her research, she found the difference and similarities of both Bugis and English in phoneme

pronunciation that becomes the causal factor of the English learner from Bugis-Bone to pronounce English words by analyzing Bugis phoneme which then compare it to English phoneme.

Another research are from Gary J. Ockey and Robert French in 2014, the study entitled *From One to Multiple Accents on a Test of L2 Listening*. The study was to determine the extent to which accent strength and familiarity affect comprehension and to provide a defensible direction for assessing multidialectal listening comprehension. A strength of accent scale was developed, and one US, four Australian, and four British English speakers of English were, The chosen speakers who determined the accent strength and familiarity affect of the subjects were from the speakers of one US, four Australian and four British, they determined the accent strength and familiarity affect based on a judgment of their strength of accent.

I Wayan Pastika, in her research (2012) about *Pengaruh Bahasa Aing terhadap Bahasa Indonesia dan Bahasa Daerah: Peluang atau Ancaman?* The study was to determine the influences of the foreign languages, which include Arabic, Dutch, English, Sanskrit, Tamil and Chinese which will lose the Indonesia national language. In her research, she found that the Indonesia national language, e.g. spoken and written Indonesian will be massively formed by English element.

The researcher took the previous findings as a reference in taking the research and collecting the data that was recorded by doing an observation and interview. One of the previous researchs which held by Sitti Nurpahmi (2013),

was the main reference in collecting the data, because the researcher researched the causal factors of Bugis-Bone accent on the pronunciation in English conversation, so knowing the differences of the pronunciation of those both language makes the researcher easier to describe the main problem of how this Bugis-Bone language as a mother tongue of the subjects can interfere the way they speak English in the situation of classroom and casual conversation.

B. *Some Pertinent Ideas*

1. Pertinent Ideas

a. General Concept of Accent

1. Definition of accent

Accent mostly defined as same description as dialect. People may think that their dialect is also their accent. These words refer to a certain way of speaking a language, resulting in being used interchangeably. A dialect can be distinguished from another dialect of a given language in lexical and phonological term. Dialect refers to the language varieties of social groups (Muhammad Asdam, 2012: 47). Whereas in Seidlhofer and Dalton (2001: 5) accent is the regional or social varieties which related to the sound level as phonology aspect where then affected to the social group high prestige. Thus, to be described it clearly the researcher take some definitions of some sources:

1. Accent as in Oxford Learner's Pocket Dictionary (2009: 2) is described as an individual way of speech or local/national speaking.

2. According to Derwing and Munro (2009) Accent refers to the people way in which their speech differs from that local variety of English and the impact of that difference on speakers and listeners.
3. Accent is defined to an individual's speech patterns which perceived to be different from the local variety, and how this difference effects the listeners' comprehension in which the accent is familiar with the local variety (Ockey and French: 2014).
4. Another view comes from Harding (2011) in Ockey and French (2014) that indicate accent as the form of segmental and supra-segmental differences in pronunciation, including variation in vowels and consonant sounds at the segmental level, and stress and intonation at the supra-segmental level.

The previous definition must be clearly take us in understanding of what accent is. Some sources, whether it is in book, journal, thesis, etc., written by some linguist and professional researchers may have their own accent based on the findings and its linguistic aspect. Thus, this research may give definition based on the previous definitions that accent refers the sound level. Accent related to the way people speech in which it is different as its level users in social group. Also, accent can be defined as its form in the term of segmental and supra-segmental.

2. Accent and Identity

As human being in which we live with other people around us, we are also as members of social groups. We simultaneously relate in daily conversation to each other. People in a social group use to be connected with each other because

their identity. Then, language becomes an important aspect which significantly affect us to establish our identity.

It becomes the matter of each person about where they belong to show their social life level. The place where people live almost affect many aspects, include accent that Seidlhofer and Dalton (2001: 5) discuss in their book in which needed to be heard good to people so then, people can judge each other as good as their speech.

It is likely that you varied the quality and pitch of your voice, the speed of your speech, and maybe your accent. You may also have been conscious of calling to mind your experience with specific people, our judgment of the way people 'sound' are based on a combination of individual and social criteria.

People reaction to the social meaning then follow the way they speak their native language. Thus, when they learn their own language they do not only attend to the code and its variation; but also to the value judgments about the use of different form. Then, they may even try to present that they are as members that they do not really belong to, but other that felt suit to them.

Regional or social varieties that generally called dialect in which respect to sound level have been termed *accent*. English, in this case, have been an international language that people in countries such America, England, and Australia use the first language. The native speakers of the previous mentioned countries are likely have the same dialect, but different in term of accent.

Almost people in the world are attracted by the position of this English as an international language. Then, the accent variation that even happen among the

English native speaker may took the English learner especially foreign learners' attention that their own strong accent to be a basic matter to how they can adjust it to them. Based on that, the researcher tried to find out the solution by researching the causal factors of foreign learner accent especially Bugis-Bone accent in English conversation especially on the pronunciation. It then expected to become the first category to be attended by the teacher to be aware.

b. Pronunciation

1. Definition of Pronunciation

Pronunciation is the way in which a particular word is spoken as in Oxford Learners' Pocket Dictionary (2009: 352). According to Yates (2002) in Permana (2014) pronunciation refers to the speaker sounds production. Cook in Safa (2004:9) stated that pronunciation deals with a set of habit to produce sound of language. In other view, Jusman (2014:10) defined that pronunciation refers to the ability of producing comprehensible articulation. Based on the previous statements, the definition of the pronunciation is very closely related to a way of producing sound.

Another definition comes from Hornby in Abdul Wahab (2015: 7) that describe pronunciation in three part, they are:

- a) Pronunciation is the way in which a language is spoken.
- b) Pronunciation is a person's way to speak words of language.
- c) Pronunciation is the way a word is pronounced.

2. The significance of Pronunciation

Dalton and Seidlhofer (2001: 3) define pronunciation significant in two sense.

- a) Pronunciation as the production and reception of speech sounds. Thus, it is significant because it is a code of a particular language.
- b) Pronunciation as acts of speaking. Thus, it is used to achieve meaning in contexts of use.

3. Elements of Pronunciation

There are two kinds of speech features Ramelan in Abdul Wahab (2015: 8) that will be explained below:

- a) Segmental features refers to sound units or deals with consonant and vowel.

The principal division of sounds is between consonant and vowel. Consonants are sounds produced with a occlusion in the oral cavity. Vowels, on the other hand, are defined as those sounds produced with oral cavity.

The consonants in English can be grouped as how the sounds are pronounced. There are six groups of the consonant sounds, they are: stops, fricatives, affricatives, nasals, liquids, and glides. In L. Ben Crane, dkk, (1981: 68) they are classified according to the place of articulation:

- 1) The sound is **Bilabial** when the lips are pressed together.
- 2) **Labiodental** is produced, when the lower lip is pressed to the upper teeth.
- 3) **Interdental** is made by situating or placing the tip of tongue between the teeth.

- 4) The tip of tongue touching or near the inner ridge of the gums of the upper front teeth, producing an **alveolar**.
- 5) The body of tongue raised against the hard palate (**palatal**).
- 6) The back part of the tongue (the dorsum) against the soft palate (**velar**).

Another view from Azhar Arsyad (1989: 39-40) that there are seven primary points, which is generally called place, of this articulation: *bilabial*, *labio-dental*, *dental (interdental)*, *alveolar*, *palætal*, *velar*, and *glottal* which is the “h” sound that released using the glottis. Beside the point of articulation, there is a manner of articulation:

- 1) **Stops** are produced by blocking the breath stream, then releasing it abruptly. The stops which evenly divided among three place of articulation are: the bilabial (p) and (b), the alveolar (t) and (d), and the velar (k) and (g)
- 2) **Affricates** are the **complex** sounds that merge a **stop** and a fricative. For example, in “chin” the affricate consist of the alveolar stop (t) closely followed by the alveo-palatal fricative (ʃ)
- 3) **Fricatives** are produced when one of the articulators is brought close to one of the points of articulation which creates the narrow opening. Then, a friction is created when the air stream forced through this opening. Fricative occurs at four points articulation: interdental (θ) and (ð), labio-dental f and v, alveolar s and z, and alveo-palatal š and ž
- 4) **Liquids** are the sound l and r. The word “liquid” is a cover term used to group together two sounds which pattern similarly in many respects.

- 5) **Nasal** is situated when the air escaped through the nose. The nasals at various points of articulation in the oral cavity are: (m) is a bilabial nasal, (n) is an alveolar nasal, and (ŋ) is a velar nasal.
- 6) **Glides** are sound which provide transitions to or from other sounds. They occur through vowels at the end of such word as my, now, and show. My with (a) (y) glide; show with a ŋ glide; y and w glide are sometimes called approximates because of the articulatory action taken in producing them.
- 7) **Sibilants** are the fricatives s, z, ʃ, and ʒ because they are particu;ar;y noisy.

Vowels are voiced continues with no interruption in the flow of air through the oral cavity. The vowels in English are voiced. According to Azhar Arsyad (1989: 77) it can be described in term of three factors: the height of the body, the front-back position of the tongue, the degree of lip-rounding. The vowel sounds have different results as the changing of the mouth shape which is associated with a different configuration of the tongue and lips (L. Ben Crane, dkk., 1981: 64). For example, to say “oo” as in *Zoo*, represented as [u], the position of the tongue is in the back of the mouth and the lips are rounded and pushed forward.

- b) **Supra-segmental** are contrastive elements of speech that is not easily to be analyzed as distinct segment but rather belong to a syllable. It refers to stress and intonation. They relate to aspects of pronunciation that go beyond the production of individual sounds (L. Ben Crane, dkk., 1981: 68).

Stress or generally known as accent, in linguistics and particularly phonology, is relative emphasis given to a certain syllable in a word in a phrase, and sentence. The syllable is the basic unit that contains stress. A **syllable** generally consist of a vowel accompanied by one or more consonants (L. Ben Crane, dkk., 1981: 69). In actual pronunciation one may stress a syllable by giving it a higher pitch. The three level of stress may recognized by the native speakers: primary, secondary, and unstressed which indicated with the following stress marks: Primary /, Secondary \, and unstressed (no mark).

Intonation, the other major of supra-segmental, which is described as a falling pitch over a group of words. It is the combination of musical tones that make up people speech when pronouncing the syllables. In such cases, intonation is one of the elements of stress.

CHAPTER III

RESEARCH METHOD

A. *Research Method*

To achieve this research goals, the researcher adopted case studies which is one of the qualitative strategies. According to Creswell (in Sugiyono 2014: 228) qualitative research is a process for exploring and understanding the meaning of individual or group behavior. Case study is the strategy in which the researcher will explore in depth the event and the activities of one or more individual by collecting detailed information using a variety of data collection procedures (Sugiyono, 2014: 230).

Through the explanation above, the researcher found that *case study design* is suitable to be used in this research, moreover the researcher interested to seek the phenomenon about Bugis-Bone Accent that influence the way the students from Bugis tribe speak English in Conversation. Therefore, the researcher chose *case study design* as research design.

B. *Research Location*

The research conducted in STAIN Watampone. It is located in Bone regency at Watampone which is the city of Bone Regency. It has two departments, Syariah (focus on law major) and Tarbiyah (education).

C. *Research Subject*

The subjects of this research are the 4th semester (TBI¹ and TBI²) of English Department students of STAIN Watampone. The criteria of the subject,

as in: He/she grow up in Bone, must be an English student at university, mostly use Bone language in daily activities. The subjects' data and the subject biography can be seen from the following table:

Table 3.1. Subjects' Data

No.	Name	Class	Academic Year
1.	S ¹	Tadris Bahasa Inggris 4	2016
2.	S ²	Tadris Bahasa Inggris 4	2016
3.	S ³	Tadris Bahasa Inggris 4	2016
4.	S ⁴	Tadris Bahasa Inggris 4	2016
5.	S ⁵	Tadris Bahasa Inggris 4	2016
6.	S ⁶	Tadris Bahasa Inggris 4	2016
7.	S ⁷	Tadris Bahasa Inggris 1	2016

D. Data Collection Procedure

In collecting data, the researcher used triangulation. It is about the combination of two or more technique of data collection in its use. It can be seen clearly by seeing the following figure.

Figure 3.1 Data Collection Procedure

(adapted from Sugiyono, 2015:331)

The researcher integrated observation and interview technique. The steps as follows:

1. Steps before Researching (observation)
 - a. The researcher did the first **observation** before doing the research by watching the appropriate area in Bone for researching, then choosing the subject.
 - b. After the best area and the subject has been founded, the researcher then decided the best time for researching.
2. Steps on the time of Research
 - a. The researcher did the second **observation** by focusing on the activity of the chosen subjects.

The first observation was conducted on January, 2017. It is conducted in order to find the appropriate area in Kabupaten Bone to be the research object. This activity was done in 2 days. There were two appropriate colleges that were selected to be the research object, they were; Sekolah Islam Atirah Bone and STAIN (Sekolah Tinggi Agama Islam) Watampone. But then, the chosen one was STAIN Watampone. STAIN Watampone is located in Kelurahan Watampone, Kecamatan Tanete Riattang, Kabupaten Bone South Sulawesi, Indonesia.

STAIN Watampone was qualified to be the object of the research, the causal factors were; 1. It has an English Education Department, 2. Much of the English students in that college are from Bugis Bone, 3. The students in that college use Bugis-Bone language in their daily activities.

The second observation was conducted on March, 8th – 14th 2017. It was conducted to get the subjects data and information about the language which is commonly used by the subjects in the casual and classroom conversation. To appraise the subjects' language usage and accent usage frequency, the research took *adverb of frequency* as an assessment referent because it is used to express how often people say or do something as in Oxford Grammar (2008) that it is about how frequently something happens. The adverb of frequency data (Keith S. Folse, 2012) can be seen below:

Figure 3.2 Adverb of Frequency

(Adapted from Keith S. Folse, 2012: 151)

To be clearly understand the use of this adverb of frequency, the researcher also took Keith S. Folse (2012) more example, as follow:

Table 3.3 Placement of Adverbs of Frequency in a Sentence

(Adapted from Keith S. Folse, 2012: 151)

Placement of Adverbs of Frequency in a Sentence	
After be: be + frequency	Before other verbs: frequency +Verb
I am always hungry when I first wake up.	I always use a pencil in math class.
Mohamed is usually late to class.	He usually goes to school by bike.
You are often the first arrive at work.	My teacher often arrive early.
I am sometimes shy around new people.	We sometimes play tennis at night.
Carlos is rarely absent from school.	Carlos rarely misses school.
Zake and Ana are seldom on time.	They seldom fail a test.
We are never at school after 5 PM.	I never eat a big breakfast.

The way to select the subjects were by asking the chief of both class TBI.1 and TBI.4 about the students who use to speak English and live in Bone and doing direct observation in the class. Then, in the next days (9th, 10th, 13th, and 14th, March 2017) the researcher continued the second observation in the class by watching the subjects' activities.

- b. After the researcher have got the data from observation activity then, the researcher did the **interview** for getting an information directly form the subjects themselves.

The interview was held on May, 26th 2017 started at 10.20 a.m. and finished at 11.00 a.m. with the six subjects, then continued at 16.34 p.m. until 17.06 p.m. with the rest. The subjects were interviewed by the researcher randomly. There were two sections of this activity. Both activities was conducted in the same day and time but in different way of interview.

The first section was for getting the subjects' short autobiography by asking them to write their autobiography in a paper that the researcher gave directly to them. This session was conducted in order to know the other factors that can influence the way the subjects speak English by knowing the subjects' hobby. The next interview section was QnA (question and answer). This section was conducted in order to know more information about the language which is habitually used by the subjects to speak in casual and classroom conversation.

- c. The researcher analyzed the data from the observation and the interview. (the data analysis will be explained on M)
- d. The researcher concluded the result.

E. Research Instrument

The main instrument of this research was the researcher. The instrument in the qualitative research is *human instrument* because the key for finding the result of the research is the researcher her/himself as Lincoln and Guba (1986) stated in Sugiyono (2014:306) that

“The instrument of choice in naturalistic inquiry is the human. We shall see that other forms of instrumentation may be used in later phases of the inquiry, but the human is the initial and continuing mainstay. But if the human instrument has been used extensively in earlier stages of inquiry, so that an instrument can be constructed that is grounded in the data that the human instrument has product”.

Then Nasution (1988) in Sugiyono (2014:306) stated that there is no choice but the researcher is the instrument because the result cannot be determined surely.

The other instruments were *observartion* and *interview*. *Observation* is the way the researcher collect the data by observing people and place (John W. Creswell, 2012:213). *Interview* is the way the researcher ask one or more subjects with an open-ended question then record their answers (John W. Creswell, 2012:217). The tools that used to support these both activities (observation and interview) are Smartphone’s camera, laptop, notebook, and mini tripod.

F. Data Analysis Technique

1. Data Reduction

The researcher used the data analysis technique of Miles and Huberman in Sugiyono (2015:337-344). The data that the researcher have got from both observation and interview activity will be reduced by using *data reduction technique*. In this technique, the researcher wrapped the data up by deleting the unimportant points.

Figure 3.3 Data Reduction

(Adapted from Sugiyono, 2015:340)

Note: The Capital Letter is The data from the Observation activity and the lowercase is the data from the Interview activity. The symbol @*# is illustrated as an important data.

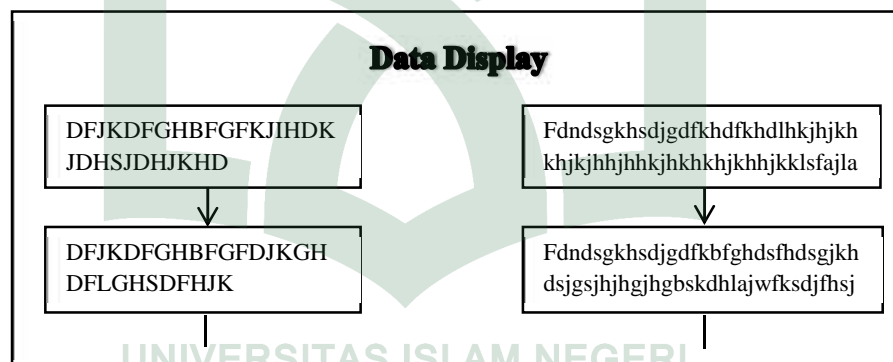

2. Data Display

Then, the result of the data reduction technique was formed by ordering the data by its data collection activity result. The data display model that was applied in this step depend on the need of the research result.

It will be illustrated below:

Figure 3.4 Data Display

(Adapted from Sugiyono, 2015:340)

Note: The Capital Letter is The data from the Observation activity and the lowercase is the data from the Interview activity.

3. Conclusion Drawing/verification

The Researcher then made a conclusion and verified the data. The illustrated picture as follow:

Figure 3.5 Data Conclusion/Verification

(Adapted from Sugiyono, 2015:340)

Conclusion/Verification:

The Influence

- 1. SDFHFDJGHFOGI FDOIDGDGNJGDI**
- 2. Dfdghfdigdfmgsjidfijdfjgdfjgdfgmmgi**

CHAPTER IV

FINDINGS AND DISCUSSION

A. Findings

1. The different phoneme produce between Bugis native speaker and English native speaker in some areas of phoneme.

The first factor that become the causal factor of Bugis-Bone Accent interfere on the pronunciation in English conversation is *the different phoneme produce between Bugis native speaker and English native speaker in some areas of phoneme*. The researcher took sample from Sitti Nurpahmi's research (2013) about the phoneme errors which produced by the learners from Bugis in English to prove the previous statement. The data will be explained below:

- a. Pronouncing /f/ and /v/
 - 1) /pa: er/ for the word father
 - 2) /pe ri/ for the word vary
 - 3) /fe ri/ for the word vary
- b. Pronouncing / / and / /
 - 1) /se k/ for the word thank
 - 2) /si k/ for the word think
 - 3) /si / for the word thing
 - 4) /dis/ for the word this
 - 5) /der/ for the word there
- c. Pronouncing /z/
 - 1) /sebr / for the words zebra

- 2) /si r u/ for zero
- d. Pronouncing / / and /ž/
- 1) /sou/ for the word show
- 2) /ples r / for the words pleasure
- e. Pronouncing /æ/
/pen/ or /fen/ for the word fan.
- f. Pronouncing diphthongs
“Bugis learners always substitute those diphthongs with another. For examples: the word *go* pronounced by /gou/.”

The other previous data about the differences and the similarities between Bugis and English phoneme and the table of phoneme placement, as follow:

Table 4.1.1. Phoneme Placement (Sitti Nurpahmi, 2013)

Language	Bilabial	Labiodental	Interdental	Dentals	Alveolar	Palatals	Velar	Glotal
Buginese	p,b,- m	--	--	t,d,s,z, n,l,r	-,,-,-,- ,-,-	c,nc,j,- ,,y,y	k,g, , w	h?
English	p,b, m	f v	d	-,,-,-,- ,-,-	t,d,s,z, n,l,r	,-,j, ,(ž),y	k,g, ,w	h

Table 4.1.2. The differences and the similarities of Buginese and English phoneme (Sitti Nurpahmi, 2013)

Category	The Differences	The Similarities
Consonant	In the labial to velar region English has twenty three (or twenty -one, depending on how affricatives are analyzed) consonant. Buginese has only sixteen	Both English and Buginese have three consonants in labial. (Therefore Buginese Learners don't have any difficulties in producing the phonemes)
	in the post velar regions Buginese has seven	Bugis learners do not find difficulties in

	consonant English only one	producing words consisting of velar consonant because it has similarities with English.
	<p>The phoneme like f, v do not occur in Buginese, and Buginese speaker substitute /p/ respectively for /f/ /v/ or /f/ for those in some are:</p> <p>Interdental Buginese - - English</p>	-
	<p>Interdental phonemes like , d do not occur in Buginese, and Buginese speakers substitute s respectively to / / and /d/ to / / . The English contrast such as thistle- this'll, ether – either, think-sink, bath-bass, breathe-brezze are troublesome.</p>	-
	Buginese Phoneme like /t/, /d/ are dentals in Buginese and they are alveolar in English.	-
	Consonant /z/ does not exist in Buginese and it does in English (so the learners substitute as /s/)	-
	Buginese learners find many difficulties in producing words consisting / / and /ž/ because the consonant does not exist in Buginese and it does in English.	-
	Buginese has no sequences of more than two consonant, whether in close transition or with intervening juncture, so the Bugis native speaker has obvious difficulty with it and supplies intrusive vowels which act as cluster breakers because the English has as many as four consonant in close transition, and as many	-

	as six or seven intervening juncture.	
Vowel	The Buginese learners do not have æ, so it is difficult to pronounce the words containing those vowel, for example /fæn/ and /væn/ always pronounce /pen/ and /pen/ --or /fen/ and /ven/ in some areas.	The simple vowel in Bugis language and English similar. Monophthong English : i:, I, i,e, , , æ, a, , , u,u:, o, o: Buginese : i:, ɪ, i,e, , , a', ,a:, , u,u:, o', o:
	The buginese learner also do not have short vowel Diphthongs Buginese Diphthongs: ai, ei, au, oe,ui,oi,ue,ai, ua, ia, and iu English Diphthongs: ai, ei, oi, i , u , u, au, e	-

The previous data of Sitti Nurpahmi (2013) shows that errors which produced by the Buginese learners in several areas of phonemes occurred because the phonemes which are not in their first language (Bugis language). Based on that, the researcher assumes that another factor which become the interference on the pronunciation in English conversation is the differences of phoneme produce between Bugis and English. The researcher also found some phoneme that is difficult to be pronounced well by the subjects (STAIN English students), as follows:

- a. Pronouncing /z/
Because /br'k z/ substituted by /br'k s/
- b. Pronouncing /æ/
 - 1) Expansion /ik'spæn n/ substituted by /ik'span n/
 - 2) Static /staɪk/ substituted by /statik/

c. Pronouncing /ɔ:/

- 1) For /fɔ:(r)/ substituted by /fɔr/
- 2) Here /hɪə(r)/ substituted by /hi:r/

d. Pronouncing /v/

- 1) Seven /'seɪn/ substituted by /sefn/
- 2) Very /'vɛri/ substituted by /feri/
- 3) Survival /s 'vaɪvəl/ substituted by /s 'faɪfl/

e. Pronouncing / /

So /sə/ substituted by /so/

f. Pronouncing /θ/

- 1) Think /θɪŋ k/ substituted by /tɪŋk/
- 2) Through /θu:/ substituted by /tru:/

g. Pronouncing / /

Thus /ðʌs/ substituted by /dʌs/

2. Bugis-Bone Accents is a strong/heavy accent.

The second category that becomes the causal factor of Bugis-Bone Accent that showed massively interfere the subjects' English pronunciation is because this accent which becomes the dominant chosen language that Bugis-Bone people usually use to communicate with each other is a strong/heavy accent. Indeed, this Bugis-Bone known as a strongest/heaviest accent among other accent in Bugis tribe. It even has many different accent in every area in Kabupaten Bone (Bone regency) that has its own character.

The researcher took an unplanned interview with a person who live in Bone. He is in the 8th semester, he is from Kecamatan Cina, Kabupaten Bone. He said that there are actually so many accents in Bone and they are all has its own character based on the village but the heaviest/strongest accent is from Watampone. He said then the difficult thing is because we are all use to speak Bugis-Bone even if it is in the urban area (Bone City), so people can recognize them just by listening a couple sentences of them. It supports the researcher's assumption that this Bugis-Bone accent is really a strong/heavy accent.

There was one subject who didn't come to the interview because some reasons but the researcher then asked her close friends who are also her classmate IA and Sy.

Extract 9: Asking two friends of an absent subject

R: *sibuk i kah?*

'is she busy?'

IA: *iyya, kapang kak. Lewat chat wa saja kak.*

'perhaps, you can contact her on wa.'

R: *bah, nanti deh.*

'ok, i'll do it later'

Apa aktivitasnya Andil diluar kelas?

'what does she use to do outside the classroom?'

Sy: *kursus kak,*

'she takes an extra course'

R: *satu kursus semuaki kah?*

'do you in a same course?'

Sy: *iyyé' kak, tapi tinggal dua orangka sama Andil yang aktif.*

'yes, but only Andil and me who always go there now.'

R: *oh, sering.i pake bahasa Inggris kah disana?*

'ough, does she use to speak English there?'

IA: *iyyé' kak, terus.. suka i juga dengar lagu bahasa Inggris style British.*

'yes, she does, and.. she also likes to listen a British English song'

R: *o, begitu. dimana i pe' tinggal Andil?*

'ou, where does she lives?'

Sy: *di Andi Pangerang Pettarani kak, asli Bulukumba sebenarnya.*

'at Andi Pangerang Pettarani, she is actually from Bulukumba.'

R: *loh, asli Bulukumba? Jadi baru tinggal disini?*

'does she? So, She just lived here?'

Sy: *lama mi pindah i kak, disini ji juga sekolah dulu.*

'she has been here for long time, she had school here.'

R: *o begitu, tapi.. begitu terusji kah logatnya, maksudku nda biasaji nabawa logatnya dari Bulukumba?*

'ou, but.. does she speak that way [uses Bugis-Bone accent]? I mean, doesn't she sometimes use Bulukumba accent?'

Sy: *nda kak, pake logat Bone ji terus.*

'she doesn't, she keeps using Bugis-Bone accent.'

R: Oke, thank you nah de, maaf nah banyak tanya mka ini.

‘ok, thank you and I’m so sorry for giving you many questions’

In the above extract, IA and Sy actually used Indonesian (although in Bugis-Bone sentence structure) with a Bugis-Bone accent. It showed that this accent could affect the Bugis-Bone native speaker when he/she spoke another language. Also, the subject from Bulukumba, Andi Lara [Andil], who has been moved from Bulukumba to live in Bone for years, used to speak Bugis-Bone in casual conversation. It even affected the way she spoke English (*the data can be in the table 4.2.3.b and 4.2.4.a*)

The researcher also took another interview with a person who was an immigrant in Bone.

Extract 10: Asking a friend who was also the immigrant in Bone.

This conversation happened on March, 10th 2017. The immigrant named [Pk]. She has been stayed in Bone for about a year. She used to speak in Wajo accent before stayed in her husband’s home then uses Bugis-Bone accent there. The researcher [R] felt that Pk keeps using Bugis-Bone accent and though that R needed to ask her directly.

[there was a long conversation in a home at the time and it didn’t have any connection with this topic]

R: ‘*kayak ada yang berubah..*’

It feels like, something has change..

Pk: ‘*oh.. nda sengaja nah, kebiasaan ka dengar logat disini, jadi ikutanmeka*’

oh... I didn’t mean that, I use to hear everybody speak with an accent of Bugis-Bone.

R: *'haha... ka tidak papaji kapang.'*

[laughing] it's OK.

Pk spoke with an accent of Bugis-Bone proved that how strong/heavy this Bugis-Bone accent is, because a person who transmigrates to this area can be affected to use Bugis-Bone accent. It also happens to the English students who are inhabitants in Kabupaten Bone when they spoke English in conversation they frequently used Bone accent. The following table shows the frequency:

Table 4.2.1.a. Casual Conversation – Language Usage Frequency

No.	Name	Language Usage Frequency		Situation

----	----	-------	-------	-----------	---------	---

The result shows that most students in the English classroom conversation usually used Bugis-Bone accent. Then, the main problem is because the natural strong/heavy accent of the English students can cause the interruption in the English conversation. Also, there is a student experienced a situation where he should stopped his conversation with his friend because a person laugh him. Then, the person who laugh him stated that he had a funny accent.

Another student told her complain to the researcher about the difficulties of speaking English as the native English speaker accent. She said then she used to watch English movie but when she tried to speak it people who listened it sometimes didn't attend to what she said but her accent. It proved how this Bugis-Bone accent has an interference in English conversation.

3. The Environment

Most subjects have difficult to pronounce the English words. The causal factor is because people who live around them and their family used to speak Bugis-Bone accent to them in their home. The researcher interviewed all students (the chose subjects) to support the statement. The record can be seen below:

Extract 1: Interview with S5

The Researcher (R), S5 (AI)

R: *do you always speak in English even if you are outside the classroom?*

AI: *yes... ee...yes..I usually speak English outside the classroom.*

R: *what are the difficulties of speaking English?*

AI: *[...] Pronunciation and Accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

AI: *I use to speak in Bugis-Bone but in the class I sometimes speak in Indonesian to communicate with my friends. (in the situation of casual conversation)*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

AI: *ee... I use Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

AI: *it's ee [...] Watampone.*

Extract 2: Interview with S4

The Researcher (R), S4 (Y)

R: *do you always speak in English even if you are outside the classroom?*

Y: *sometimes.*

R: *what are the difficulties of speaking English?*

Y: *[...] sometimes difficult to pronounce the words well.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Y: *i use Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Y: *[...] i use Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

Y: *bila.*

Extract 3: Interview with S2

The Researcher (R), S2 (St)

R: *do you always speak in English even if you are outside the classroom?*

St: *sometimes.*

R: *what are the difficulties of speaking English?*

St: *it's ee [...] the Accent.*

R: *do you use to speak in Bugis-Bone language to communicate to your friends or you may use others?*

St: *i use to speak in Bugis-Bone and sometimes Indonesian.*

R: *do you use to speak Bugis-Bone to communicate to your family or you may use others?*

St: *I use to speak in Bugis-Bone with my parents but I sometimes use English to my elder sister because she likes to chat in English.*

R: *what style of Bugis-Bone do you use to speak?*

St: *carawali*

Extract 4: Interview with S3

The Researcher (R), S3 (Sr)

R: *do you always speak in English even if you are outside the classroom?*

Sr: *sometimes, sometimes if I talk to my classmate, but just [...] sometimes.*

R: *what are the difficulties of speaking English?*

Sr: *ee... accent, so difficult [...] especially pronunciation.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Sr: *yes.. of course.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Sr: *i use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

Sr: *eh [...] it's Taba'e. The style in my village is actually different from this village (Watampone).*

Extract 5: Interview with S6

The Researcher (R), S6 (NM)

R: *do you always speak in English even if you are outside the classroom?*

NM: *sometimes.*

R: *what are the difficulties of speaking English?*

NM: *[...]. ee [...] I just..eee accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

NM: *ee... I use Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

NM: *no... I speak Bugis-Bone*

R: *what style of Bugis-Bone do you use to speak?*

NM: *arasoe.. Arasoe has a flat accent*

Extract 6: Interview with S1

The Researcher (R), Riswan (Rs)

R: *do you always speak in English even if you are outside the classroom?*

Rs: *yes... sometimes..*

R: *what are the difficulties of speaking English?*

Rs: *eum...the Accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Rs: *yes... when I talk to my friends I often speak English.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Rs: *no.. because they are not understand English.*

R: *what style of Bugis-Bone do you use to speak?*

Rs: *euh... I don't know exactly, em... it's maybe Lapokko.*

Extract 7: Interview with S9

The Researcher (R), S9 (Sy)

R: *do you always speak in English even if you are outside the classroom?*

Sy: *no... I usually use Bugis-Bone to speak.*

R: *what are the difficulties of speaking English?*

Sy: *pronunciation and accent ... ee... because I use to speak with my own accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Sy: *i use to speak Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Sy: *i only use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

S: *watampone*

Extract 8: Interview with S7

The Researcher (R), S7 (IA)

R: *do you always speak in English even if you are outside the classroom?*

IA: *no... I often use Bugis-Bone.*

R: *what are the difficulties of speaking English?*

IA: *adjusting the Accent and pronounce the words well.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

IA: *i use to speak Bugis-Bone,*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

IA: *i only use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

IA: *Watampone*

Extract 9: Interview with S8

The Researcher (R), S8 (Nh)

R: *do you always speak in English even if you are outside the classroom?*

Nh: [...] *sometimes.*

R: *what are the difficulties of speaking English?*

Nh: *adjusting the Accent and ... pronounce the words well.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Nh: *i use to speak in Bugis-Bone*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Nh: *ee... I use to speak with my sister because she is also an English Education student, so... we try to practice speaking English in almost every day.*

R: *what style of Bugis-Bone do you use to speak?*

Nh: *watampone.*

It is then shows that the environment such as the family, the neighbor, and friends in which live around the subjects affect the way they speak English. Based on that, the researcher assumed that most subjects used English in the classroom conversation but usually spoke English with an accents of Bugis-Bone and most of them used to speak Bugis-Bone in casual conversation. Indeed, the way the subjects speak is built by the natural habit of the way the people who live around them interact as Djamarah (2008: 76) stated that the environment affects the child's language potential. Another point of view goes to Sunarto and Hartono (2008: 76) in Djamarah (2008: 76) that the family greatly affects the language

ability of a child. So, it proved that environment of the subjects is also the factor of how they speak English.

4. Discussion

There are some students who have a good pronunciation of English words and good in using the target English accent, they are: Rs, NM, AI, and St. It is because their habitual activity e.g. hobby of watching English movies or listening to English songs can also affect the way they spoke English, as the statement of Bonnie and John which quoted by Dita Zahrah Kirana (2014: 13), that song can help the students to listen, memorize, integrate, and pronounce language sounds. Dommel and Sacker (1986: 11) in their book, stated that music can give benefits to the foreign learning process. Another statement came from Pondidi (2010) about the habit of watching English movie that shows the significant learning outcomes. So, it is good to the subjects who have that hobbies to improve their English speaking skill especially in adjusting a target English accent.

Also, another students who have problems with speaking English on the pronunciation told that they rarely use it to practice but in their English class. They have so much errors when pronounce some English words that shown in the previous findings, but it sounds good when they pronounce their local language words. It closes to the factor about the phoneme of Bugis native and English native speaker have a different areas of phoneme as Nur Pahmi (2013) stated that errors that sounded when native Bugis speakers pronounce English words because they have different base areas of phoneme than English native speakers.

It is actually normal if a group of people find difficult to adjust another accent because their natural habit of speaking their local language with its local accent, because it is in their culture, as Murray and Christison (2011: 47) said that language cannot be separated from the culture. Also, Lado (1957: 110) stated that culture can be interpreted as a habit or behavior of a society. Another statement of Shaw which quoted in Lukman Hakim (2016: 9) about interaction that make each person in it affects each other by showing their behavior in their presence. It shows how environment affects the way the students speak English. So, the students are actually have a chance to be used to speak English with a proper accent and a good pronunciation if they are in an area but theirs or find a person who is not from their environment to be talk with.

However, this research has reached the main target. It is found by doing the Observation and Interview whether it is an unplanned or planned interview, moreover some previous related research data support the information of both main data collection activities. Thus, this research has stopped and results several points of Bugis-Bone Accent interference on the way the subjects speak English in conversation specially, that was placed by its data collection activity result, as follows:

Figure 4.10. The Results of Data Collection Activity

No.	The Results		
	Observation	Interview	Addition (Literature Review)
1.	Most students used English in the classroom conversation but usually speak English with an accent of Bugis-Bone and most of them used to speak Bugis-Bone in	The students have a strong/heavy local accent (in this case is Bugis-Bone Accent), so they found difficult to adjust another accent then it caused them also found	Errors that produced by the Bugis learners in several areas of phonemes occurred because the phoneme which are not in their first language.

	casual conversation.	problems in pronouncing English words well.	
2	They Spoke English only in an area that require to speak it. (proved by watch the subjects activity directly)	They Spoke English only in an area that require to speak it.	-
3	Most students have difficult to pronounce the English words and adjust the target accent to theirs. The causal factor is because they use to speak their local language and even though they sometimes speak in another language, e.g. they use Indonesian, they still used Bugis-Bone Accent.	-	-

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Referring to the previous chapter, the researcher finally found several points after doing some activities of data collection that become the causal factors of Bugis-Bone Accent interference on the pronunciation in English conversation, as follows:

1. The different phoneme produce between Bugis native speaker and English native speaker in some areas of phoneme that caused the subjects who is the native speaker of Kabupaten Bone sometimes difficult to pronounce English words and adjust the English accent well.
2. Bugis-Bone Accents is a strong/heavy accent.
3. The Environment
 - a. The subjects usually used their mother language (Bugis-Bone) in casual conversation with their family, friends, and people who live around them.
 - b. The subjects used to speak the language with their family, friends, and people who live around them with Bugis-Bone accent.

Based on the information above, the results show that the different produce in some areas of phoneme between Bugis native speaker and English native speaker are the causal factors which interfere the students' English pronunciation in conversation, the subjects' environment, and the subjects' natural habit of speaking their first language in casual conversation.

B. Suggestion

Based on the conclusion above, the researcher proposes some advices to the teachers and the students which are the Bugis native speaker, especially to the students who live in the Bugis-Bone area that has a strong/heavy accent, as follows:

a. To the teachers

1. The teacher shall be aware of the students' first language accent interference when they teach English conversation.
2. The teacher must support the students by attending to the way they pronounce the English word.

b. To the students

1. The students shall be aware of their first language accent interference when they teach English conversation.
2. To be able to speak the target English accent with a good pronunciation in conversation, build the area where people can speak English in casual conversation, then find someone who is able to adjust English accent or join in a professional English meeting club.
3. Don't give up to learn speaking English just because the mother language accent is difficult to be substituted by the English accent target in the conversation because the important thing of conversation is actually about the understanding of a topic that discussed between two persons in conversation whether it is in face to face conversation or not but still the need to be able to speak English cannot be forgotten.

4. A basic problem like the different phoneme produce between Bugis native speaker and English native speaker is not a big deal for being good in pronouncing English words, because some people have found the ways to solve the problem, so the students shall do the same.

The Record of the First Section Interview
(The Subjects' Biography)

Held on May, 26th 2017 started at 10.20 a.m. and finished at 11.00 a.m. with a six subjects

Then continued at 16.34 p.m. until 17.06 p.m. with the three subjects

The researcher (R), The Subject (S)

1. R: *What is your name?*

S: *I'm Riswan.*

R: *Where was you born?*

S: *I was born at Lompoko, Kecamatan Barebbo.*

R: *Where did you grow up?*

S: *I grew up in Lampoko.*

R: *Do you like watching an English movie? What style?*

S: *Yes, British Movie*

R: *What are your favorite English style song?*

S: *I like both of American and British.*

2. R: *What is your name?*

S: *Azwar Idrus*

R: *Where was you born?*

S: *Itterung*

R: *Where did you grow up?*

S: *Itterung*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like watching an American Movie.*

R: *What are your favorite English style song?*

S: *The British style.*

3. R: *What is your name?*

S: *My name is Siti Ardiah.*

R: *Where was you born?*

S: *I was born on April, 20th 1997 in Carawali.*

R: *Where did you grow up?*

S: *Carawali*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like watching an American Movie.*

R: *What are your favorite English style song?*

S: *The American style.*

4. R: *What is your name?*

S: *It's Suriadi*

R: *Where was you born?*

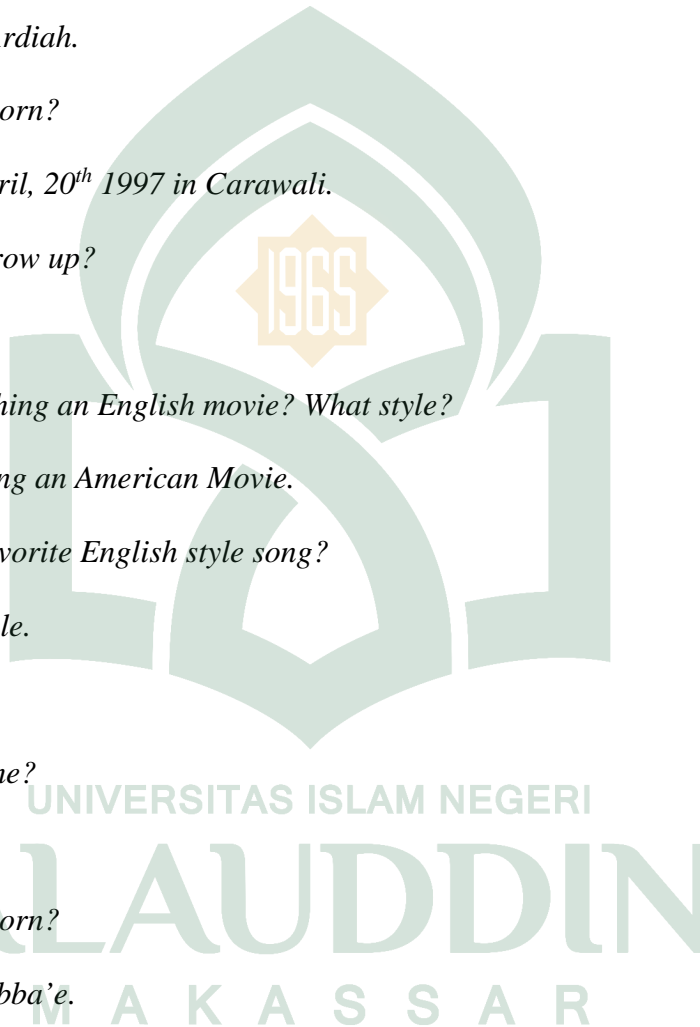

S: *I was born on Tabba'e.*

R: *Where did you grow up?*

S: *I grew up in Tabba'e.*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like watching an American Movie.*

R: *What are your favorite English style song?*

S: *I like the American style.*

5. R: *What is your name?*

S: *My name is Yuliana*

R: *Where was you born?*

S: *I was born on Bila*

R: *Where did you grow up?*

S: *Bila*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like the American style.*

R: *What are your favorite English style song?*

S: *The American style song.*

6. R: *What is your name?*

S: *It's Nur Muhammad Maulana Haznur*

R: *Where was you born?*

S: *Arasoe*

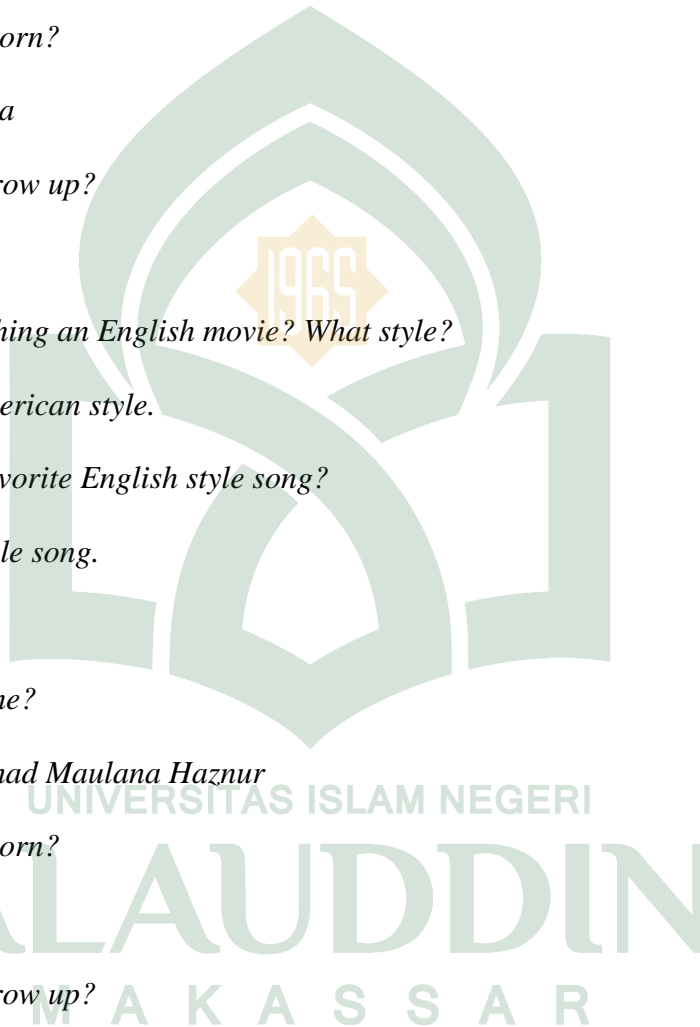

R: *Where did you grow up?*

S: *Arasoe*

R: *Do you like watching an English movie? What style?*

S: *I like the American style.*

R: *What are your favorite English style song?*

S: *The British style.*

7. R: *What is your name?*

S: *Ita Afrianty*

R: *Where was you born?*

S: *I was born on April, 26th 1997 in Watampone.*

R: *Where did you grow up?*

S: *When I was in Elementary School I stayed in Awampone, then after I graduated, I moved to Watampone until know.*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like watching an American Movie.*

R: *What are your favorite English style song?*

S: *The British style.*

8. R: *What is your name?*

S: *My full name is Andi Nurhikmah but you can call me Hikmah.*

R: *Where was you born?*

S: *I was born on June, 4th 1997 in Bone.*

R: *Where did you grow up?*

S: *Bone (Husjed)*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like to watch an American Movie.*

R: *What are your favorite English style song?*

S: *The American style.*

9. R: *What is your name?*

S: *It's Syamsuriah*

R: *Where was you born?*

S: *I was born on June, 27th 1997 in Watampone*

R: *Where did you grow up?*

S: *Awampone*

R: *Do you like watching an English movie? What style?*

S: *Yes, I like watching an American Movie.*

R: *What are your favorite English style song?*

S: *The American style.*

The Record of the Second Section Interview
(The Subject Habit of Using language in Conversation)

Held on May, 26th 2017 started at 10.20 a.m. and finished at 11.00 a.m. with a six subjects

Then continued at 16.34 p.m. until 17.06 p.m. with the three subjects

Extract 1: Interview with Azwar Idrus

The Researcher (R), Azwar Idrus (AI)

R: *do you always speak in English even if you are outside the classroom?*

AI: *yes... ee...yes..I usually speak English outside the classroom.*

R: *what are the difficulties of speaking English?*

AI: *[...] Pronunciation and Accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

AI: *i use to speak in Bugis-Bone but in the class I sometimes speak in Indonesian to communicate with my friends. (in the situation of casual conversation)*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

AI: *ee... I use Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

AI: *it's ee [...] Watampone.*

Extract 2: Interview with Yuliana

The Researcher (R), Yuliana (Y)

R: *do you always speak in English even if you are outside the classroom?*

Y: *sometimes.*

R: *what are the difficulties of speaking English?*

Y: *[...] sometimes difficult to pronounce the words well.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Y: *i use Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Y: *[...] i use Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

Y: *bila.*

Extract 3: Interview with St. Ardiah

The Researcher (R), St. Ardiyah (St)

R: *do you always speak in English even if you are outside the classroom?*

St: *sometimes.*

R: *what are the difficulties of speaking English?*

St: *it's ee [...] the Accent.*

R: *do you use to speak in Bugis-Bone language to communicate to your friends or you may use others?*

St: *i use to speak in Bugis-Bone and sometimes Indonesian.*

R: *do you use to speak Bugis-Bone to communicate to your family or you may use others?*

St: *I use to speak in Bugis-Bone with my parents but I sometimes use English to my elder sister because she likes to chat in English.*

R: *what style of Bugis-Bone do you use to speak?*

St: *carawali*

Extract 4: Interview with Suriadi

The Researcher (R), Azwar Idrus (Sr)

R: *do you always speak in English even if you are outside the classroom?*

Sr: *sometimes, sometimes if I talk to my classmate, but just [...] sometimes.*

R: *what are the difficulties of speaking English?*

Sr: *ee... accent, so difficult [...] especially pronunciation.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Sr: *yes.. of course.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Sr: *i use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

Sr: *eh [...] it's Taba'e. The style in my village is actually different from this village (Watamponne).*

Extract 5: Interview with Nur Muhammad Maulana

The Researcher (R), Nur Muhammad Maulana (NM)

R: *do you always speak in English even if you are outside the classroom?*

NM: *sometimes.*

R: *what are the difficulties of speaking English?*

NM: *[...]. ee [...] I just..eee accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

NM: *ee... I use Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

NM: *no... I speak Bugis-Bone*

R: *what style of Bugis-Bone do you use to speak?*

NM: *arasoe.. Arasoe has a flat accent*

Extract 6: Interview with Riswan

The Researcher (R), Riswan (Rs)

R: *do you always speak in English even if you are outside the classroom?*

Rs: *yes... sometimes..*

R: *what are the difficulties of speaking English?*

Rs: *eum...the Accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Rs: *yes... when I talk to my friends I often speak English.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Rs: *no.. because they are not understand English.*

R: *what style of Bugis-Bone do you use to speak?*

Rs: *euh... I don't know exactly, em... it's maybe Lapokko.*

Extract 7: Interview with Syamsuriah

The Researcher (R), Syamsuriah (Sy)

R: *do you always speak in English even if you are outside the classroom?*

Sy: *no... I usually use Bugis-Bone to speak.*

R: *what are the difficulties of speaking English?*

Sy: *pronunciation and accent ... ee... because I use to speak with my own accent.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

Sy: *i use to speak Bugis-Bone.*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

Sy: *i only use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

S: *watampone*

Extract 8: Interview with Ita Afrianti

The Researcher (R), Ita Afrianti (IA)

R: *do you always speak in English even if you are outside the classroom?*

IA: *no... I often use Bugis-Bone.*

R: *what are the difficulties of speaking English?*

IA: *adjusting the Accent and pronounce the words well.*

R: *do you use to speak in Bugis-Bone to communicate to your friends or you may use others?*

IA: *i use to speak Bugis-Bone,*

R: *do you use to speak in Bugis-Bone to communicate to your family or you may use others?*

IA: *i only use to speak in Bugis-Bone.*

R: *what style of Bugis-Bone do you use to speak?*

IA: *Watampone*

Extract 9: Interview with Nurhikmah

The Researcher (R), Nurhikmah (Nh)

R: *do you always speak in English even if you are outside the classroom?*

Nh: [...] sometimes.

R: what are the difficulties of speaking English?

Nh: adjusting the Accent and ... pronounce the words well.

R: do you use to speak in Bugis-Bone to communicate to your friends or you may use others?

Nh: i use to speak in Bugis-Bone

R: do you use to speak in Bugis-Bone to communicate to your family or you may use others?

Nh: ee... I use to speak with my sister because she is also an English Education student, so... we try to practice speaking English in almost every day.

R: what style of Bugis-Bone do you use to speak?

Nh: watampone.

The Record of the Unplanned Interview

There was one subject who didn't come to the interview because some reasons but the researcher then asked her close friends who are also her classmate IA and Sy. The real natural conversation, occurred on May, 26th 2017 in Watampone Kabupaten Bone.

Extract 9: Asking two friends of an absent subject

R: *sibuk i kah?*

'is she busy?'

IA: *iyya, kapang kak. Lewat chat wa saja kak.*

'perhaps, you can contact her on wa.'

R: *bah, nanti deh.*

'ok, i'll do it later'

Apa aktivitasnya Andil diluar kelas?

'what does she use to do outside the classroom?'

Sy: *kursus kak,*

'she takes an extra course'

R: *satu kursusuan semuaki kah?*

'do you in a same course?'

Sy: *iyyé' kak, tapi tinggal dua orangka sama Andil yang aktif.*

'yes, but only Andil and me who always go there now.'

R: *oh, sering.i pake bahasa Inggris kah disana?*

'ough, does she use to speak English there?'

IA: *iyyé' kak, terus.. suka i juga dengar lagu bahasa Inggris style British.*

'yes, she does, and.. she also likes to listen a British English song'

R: *o, begitu. dimana i pe' tinggal Andil?*

'ou, where does she lives?'

Sy: *di Andi Pangerang Pettarani kak, asli Bulukumba sebenarnya.*

'at Andi Pangerang Pettarani, she is actually from Bulukumba.'

R: *loh, asli Bulukumba? Jadi baru tinggal disini?*

'does she? So, She just lived here?'

Sy: *lama mi pindah i kak, disini ji juga sekolah dulu.*

'she has been here for long time, she had school here.'

R: *o begitu, tapi.. begitu terusji kah logatnya, maksudku nda biasaji nabawa logatnya dari Bulukumba?*

'ou, but.. does she speak that way [uses Bugis-Bone accent]? I mean, doesn't she sometimes use Bulukumba accent?'

Sy: *nda kak, pake logat Bone ji terus.*

'she doesn't, she keeps using Bugis-Bone accent.'

R: Oke, thank you nah de, maaf nah banyak tanya mka ini.

'ok, thank you and I'm so sorry for giving you many questions'
