This research is aimed at developing English materials for students of Management Department especially in topics Business Law and Islamic Economic at STIE YPUP, Makassar. Based on the preliminary study on May 2016 by analyzing the module which used, the researcher found several problems from the module such as the module use general English not specific English, the students of Management Department did not interest to study English and the module use the difficulty vocabulary in each topic. The research design used in this study was Research and Development (R&D). The development model used was Instructional System Design (ISD) model. It consists of needs analysis, instructional design, implementation and evaluation. The procedures included analyzing materials needed by the students of Management Department, design the English materials, developing the English materials through ISD model. The development of English materials for students of Management Department at STIE YPUP includes conceptual map, goals, materials sequence, English material and worksheet, and additional task. The product was tried out to the first semester students of Management Department at STIE YPUP. Types of data obtained in this study are quantitative and qualitative data. The instruments used in this research were questionnaire and observation sheet for two experts. In this research, two experts were involved in order to validate the product. There were three systematic aspects that they validated of the product: Materials Systematic Organization, Systematic English Teaching and Systematic Content of English. Therefore, the result indicated that based on experts judgment as well as try-out design result, the developed Business Law and Islamic Economic materials were applicable to be taught at the first semester students of Management Department as topics in English for them.

## CHAPTER I

### INTRODUCTION

#### A. Background

Materials take an important part in teaching and learning process. Good and appropriate materials will give positive influence to the students' learning process. Many researchers offer developed English Materials for teaching. The materials include printed material, audio, visual, multimedia, internet, etc. those activities will give an impact to their and our futures as Allah SWT says in QS. Al-mujadilah verse 11:

يَرْفَعُ اللَّهُ الَّذِينَ آمَنُوا مِنْكُمْ وَالَّذِينَ أُوتُوا الْعِلْمَ دَرَجَاتٍ ۗ

*“... Allah will raise those who have believed among you and those who were given knowledge, by degrees....”*

To conduct English learning material means aimed at support the students' competence in English study program, so it should be based on the learners' needs, and they should represent the material in a good way. Unfortunately, most of the lecturers in the university in Indonesia still have a problem related to the availability of conducting English learning materials which are appropriate for the students with vocational major. Materials which are provided by the government and launched by some developers are still using general English. The materials are not using specific English vocabulary, whereas English vocabulary and the materials in every unit which is needed by the students in their future occupation will be different.

The use of inappropriate materials might prevent the students to develop their skills to communicate using English in the target situation of their field of works. If such condition happens, the purposes of the English teaching will not be achieved. Therefore, developing appropriate English learning materials for students of management department is necessary. Appropriate materials can help the students to learn English more easily. It is because they are learning useful materials that are related to their future job; materials that are suitable with their needs.

Based on the reasons above, the researcher decides to overcome those problems and develop the materials and exercises for the next module by using English for Specific Purposes (ESP) and also using Instructional System Design (ISD) Model.

هِيَ بِأَتِي وَجَادِهِمُ الْحَسَنَةَ وَالْمَوْعِظَةَ بِالْحِكْمَةِ رَبِّكَ سَبِيلِ إِلَى ادْعُ  
 أَعْلَمُ وَهُوَ سَبِيلِهِ عَن ضَلَّ بِمَن أَعْلَمُ هُوَ رَبِّكَ إِنَّ أَحْسَنُ  
 بِالْمُهْتَدِينَ

*“Invite to the way of your Lord with wisdom and good instruction, and argue with them in a way that is best. Indeed, your Lord is most knowing of who has strayed from His way, and He is most knowing of who is [rightly] guided”.*

First is ESP. Hutchinson and Water stated that ESP as an approach rather than a product. It means that ESP does not involve a particular kind of language,

teaching materials or methodology.<sup>1</sup> In other words, ESP is an approach to language teaching which aimed to meet the needs of particular learners. In contrast, Dudley-Evans and St John give their modification based on their-self-understanding of ESP definition. They make a distinction between absolute characteristic and variable characteristic in ESP.<sup>2</sup>

Based on the English for Specific Purposes (ESP) tree of language teaching by Hutchinson and water's, ESP has three kinds; English for Science and Technology (EST), English for Business and Economics (EBE) and English for Social Sciences (ESS). In each kind, there are divided into two kinds; English for Academic Purposes (EAP) and English for Occupational Purposes (EOP). In English for Science and Technology, it consists of English for Medical Studies and English for Technicians. In English for Business and Economics, it consists of English for Economics and English for Secretaries. Meanwhile, in English for Social Sciences, it consists of English for Psychology and English for Teaching.

In addition, English lesson for the students of management in this research named English for Accounting was included in English for Business and Economics. Moreover, with ESP, the goal of the lesson can be clearly for the students without involving a particular kind of language, teaching materials or methodology. This approach is called as an easy-going approach for teaching English especially for the first semester of management student because with this

approach, the students' mind did not have to think greatly hard and the lesson will be more specific.

The other way to solve the problem in this research the researcher is using ISD (Instructional System Design) model from Seels and Glasgow (1998) conclude that their model is quite similar to many others, it is based on the assumption that design and development take place in the context of project management.<sup>3</sup>

In this model, there are organized into three management phases: needs analysis management, instructional design management, and implementation and evaluation management. As a conclusion, this model is used to develop the English materials especially in developing module because with utilizing all three phases in this model and focus to develop the materials lesson such as module whose created and adopted by clients and users.

In this research, the researcher developed a printed material about English materials for management students. The researcher focuses in topics Business Law and Islamic Economic. Through this research, the researcher developed new printed materials which make the management students interest to study English. These topics will consist of a literature and a task.

To be much detail, in each topic consist of vocabulary which is relevant with the topics. The important thing that in this printed material is integrated several English skills into each topic such as speaking, reading and writing.

Refers from the explanation and being aware of the fact above, the researcher would like to take a research about the development of English materials for the first semester students of management at STIE YPUP.

### **B. Research Problems**

Based on the background, the main problems are the development appropriate and good for Business Law and Islamic Economic materials and exercises that meet the students' need and students' context. In order to enable the researcher should elaborate the main problem. There are three research problems should be formulated as follows:

1. What do the students need in learning English course in management department at STIE YPUP?
2. How is the development of English materials for students of management department in STIE YPUP?
3. How are the experts' validation and students' acceptability for the English language materials in management department at STIE YPUP?

### **C. Research Objectives**

This study aims at developing English materials and also exercises for the topics Business Law and Islamic Economic for students of management. The specific objectives of this research are:

1. To analyze the students need of English materials in management department at STIE YPUP.

2. To produce the English materials based on ESP (English for Specific Purposes) approach and ISD (Instructional System Design) model in management department at STIE YPUP.
3. To know the experts' validation and students' acceptability for the English language materials in management department at STIE YPUP.

#### **D. Research Significance**

##### **1. Theoretical Significance**

The theoretical significance from this research is expected to give more knowledge about English for students' of management through easily way for the students of management especially for Business Law and Islamic Economic topics.

##### **2. Practical Significance**

This research will be beneficial for the students of management, English lecturer and management department of STIE YPUP. First, for the students of management department; in the future, the result from this research can help the students of management more easily to understand about the materials especially for each topic in the module and implemented into their work, studies, and future. In the future the researcher hopes that the result from the module students can use it as a guidebook or students can have skills.

Second, for the lecturer; the product that designed in this research can facilitate the lecturer to more easily teach English for the student of

management based on the students' needs. Third, for Management Department of STIE YPUP; hope this product can be used as a worksheet for students' of management in learning and teaching process especially for the first semester students.

#### **E. Research Scope**

This research is focused on developing English materials which oriented in printed materials. In developing product, there are five models focused on product oriented. The five models reviewed are: the Bergman and Moore model (ID models), the de Hoog de Jong and de Vries model (product-driven), the Bates model, the Nieveen model, and the Seels and Glasgow model (ISD models).<sup>4</sup>

In this research, the researcher developed a unit for Business Law and Islamic Economic with integrated English skill used ESP and also use ISD (Instructional System Design) model to develop the English materials for the next printed materials in this research.

In addition, due to the limitation of time and budgeting in finishing this research, the researcher will conduct this research only into two phases. They are need analysis, instructional design materials and formative evaluation.

## **F. Operational Definition of Term**

### **1. Development**

Development is a process to make something new or change something that was existed. In this research, development means that make a change in the materials lesson such as printed materials. in addition, if in previous printed materials have problems, through this development, the problems can be solved.

### **2. English Material**

English material consists of two words. First is English and second is material. English is an important language in this world. As we know, English is an international language which is used by people in this world for communication with the other people from the other countries. Not only for communication but also, English is used in educational world such as in textbook for students. While material mean anything, which is used to help to teach language learner.

As a conclusion, English material is information or ideas for use in creating a book or anything which is used to help to teach language learner which consist of used English as a language in the book.

### **3. Business Law**

Business Law is a letter written in formal language, usually used when writing from one business organization to another, or for correspondence between such organizations and their customers, and clients. The overall style of letter will depend on the relationship between the businessmen.

There are many reasons to write a Business Law. It could be to request direct information or action from another party, to order supplies from a supplier, to identify a mistake that was committed, to reply directly to a request, to apologize for a wrong or simply to convey goodwill. Even today, the Business Law is still very useful because it produces a permanent record, is confidential, formal and delivers persuasive, well-considered messages.

#### **4. Business Law**

To improve the relation between companies by developing productivity a leader often do the trip out of town or overseas to do business travel or what we called it Business Law. In this case, the leader have to manage everything that related with the trip such as make the travel report after do the business travel and in any case if they have to use the formal English language for any meeting or conference with the client. The good Preparation is needed to develop the relation between companies. The aims and purposes from the trip must be clear so the leader can take some good plans in order to achieve the trip goal.

## CHAPTER II

### REVIEW OF RELATED LITERATURE

This part centers around the study of some previous research findings on the related topics to the Business Law and Islamic Economic materials and the formulation of theoretical framework.

#### **A. Review of Related Research Findings**

Various researchers had conducted a research related to English materials about developing materials, exercises and about ESP (English for Specific Purposes). As a references from the previous research, the researcher present in this section. First is Ghozali. Ghozali conducted R&D to create English textbook for vocational high school. The conclusion from his research are designed textbook with using R&D is more effective to increase the students' achievement in learning English and can increasing the quality of teaching English through improving the quality of the textbook.<sup>5</sup>

The second is Suyadi. Suyadi had conducted his research at a state university in Jambi Province. The aimed at his research is improving teaching English materials for accounting program which is needed for the student of accounting at university level. He found that the students of accounting program needs a specific material in learning English which has tight relationship with their study program. While English skills are need to be

combined with the knowledge target for accounting. Based on his finding Suyadi used ESP (English for Specific Purposes) to solve his problem in his research.<sup>6</sup>

In addition, the materials should follow the students' current level of skills to avoid difficulties in adopting and transferring the ideas from the lesson materials from one language to another. The materials which the researcher will develop must match with the students needs. Because of that, the students can be more easily to understand the materials and the students will appreciate their time and they will effort to learn their materials.

The third is Safrizal. From his research, the conclusion is in several universities especially in Accounting Department, English subject in that university is taught as English General Purposes not English Specific Purposes. In addition, he found that teaching materials is designed by some criteria and also based on the students needs and supported by theories in ESP.<sup>7</sup>

The fourth is Ruth Hillis. In his research, he found that to developing instructional materials, should determine the procedures which will used in our development. The procedures are selecting the theme, setting up criteria to serve as a guide in preparation of new instructional materials and as a basis

for evaluation, preparing first drafts of the materials, trying out the materials, and revising the materials for general use.<sup>8</sup>

The fifth is Harsono. The conclusion from his research is developing teaching/learning materials for ESP is more demanded than that for general English because the availability of the ESP learning materials in public is very rare. In developing the ESP learning materials, the researcher can develop the teaching materials by applying the principles and procedures of language teaching materials including formulating the teaching objectives, adapting and or supplementing the existing materials, and or creating our own materials.<sup>9</sup>

Based on some previous finding research, the researcher concludes that to develop the materials and exercises, it must be based on learners needs. Developing printed materials especially through R&D can increase the students' achievements and the qualities in the learning English particularly for printed materials which will use in the school or university.

In other side, developing printed materials with ESP (English for Specific Purposes) and ISD (Instructional System Design) can make the students more prepared to confront the real world occupation. The researcher developed new printed English materials to help the students to increasing their motivation to learn this material. So that, the target of SAP can achieve well.

## B. Theoretical Foundation

Theoretical foundation is some theories which supporting this and relevant with our research. There are several theoretical foundations in this research about developing materials, business organization, taxes, ESP (English for Specific Purposes) and ISD Model.

- a. Developing materials. According to Tomlinson as cited in his second edition book, materials development is both a field of study and a practical undertaking. As a field it studies the principles and procedures of the design, implementation and evaluation of language teaching materials.<sup>10</sup>

In other word, materials development refers to anything which is done by writers, teacher or learners to provide sources of language input and to exploit those sources in ways which maximize the likelihood of intake and to stimulate purposeful output.<sup>11</sup> Materials developers might write textbooks, tell stories, bring advertisements into the classroom, express an opinion, provide samples of language use or read a poem aloud.

- b. English material is information or ideas for use in creating a book or anything which is used to help to teach language learner which consist of used English as a language in the book.

<sup>11.</sup> Brian Tomlinson, *Materials Development in Language Teaching* (Cambridge: Cambridge University Pss, 1998), pp.2.

- c. Business Law. The Business Law refers to the letter that the businessman uses to exchange information with any business companies, customers, suppliers, bank, employees, and business associations. The Business Law can be written by the employee, the manager, the client, and also the customer. The goal from write Business Law is to sell or purchase, get information, make a request, convey and respond complaint, say thank you, apology, congratulate, etc.
- d. Business Law. Travel is considered to be official when an employee for the purpose of carrying out duties or attending training courses. To improve the relation between companies by developing productivity a leader often do the trip out of town or overseas to do business travel or what we called it Business Law. In this case, the leader has to manage everything that related with the trip. The good Preparation is needed to develop the relation between companies. The aims and purposes from the trip must be clear so the leader can take some good plans in order to achieve the trip goal.
- e. ESP (English for Specific Purposes). Hutchinson and Waters see ESP as an approach rather than a product, by which they mean that ESP does not involve a particular kind of language, teaching materials or

methodology.<sup>12</sup> In other side, Dudley-Evans and St John said that ESP is divided into two absolute and variable characteristic.<sup>13</sup>

Based on absolute characteristic, ESP is defined to meet specific needs of the learner; makes use of the underlying methodology and activities of the discipline it serves; and centered on the language (grammar, lexis, and register), skills, discourse and genres appropriate to these activities.

While based on variable characteristic, ESP may be related to or designed for specific disciplines; may use, in specific teaching situations, a different methodology from that of general English.

- f. ISD Model. ISD model is acronym from instructional system design. ISD model was presented by Seels and Glasgow. They are compare their model to several others and generic ADDIE framework. Seels and Glasgow emphasized the steps within each phase in this model may be conducted in a linear fashion, but often are not, although the three phase are generally considered to be self-contained and linear.

### C. Theoretical Framework

The problem faced by the students of management in learning English is the difficulties to understand the lesson because the materials using English for general purposes not English for specific purposes.

Because of that, in this research, the researcher try to offer a new way by designing English materials for management students by creating a new English material with ESP and ISD Model to achieve the objective of learning in the SAP.

By designing it, the researcher expects in the learning and teaching process, the management students can more easily to understand the lesson than before, the teacher has a textbook as a model and the objective of the learning achieved.

The theoretical framework underlying this research is presented in the following diagram:

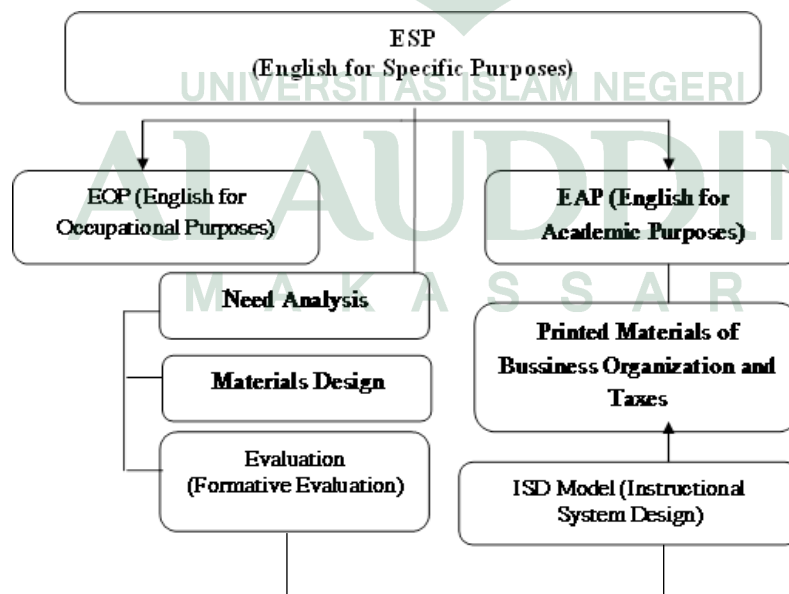

Figure 1. *Theoretical Framework*

In this research, the researcher developed English materials for management students' in topics Business Law and Islamic Economic. The researcher used English for specific purposes (ESP) and Instructional System Design (ISD) model in this research. ESP was used as an approach to integrated English for the other lesson in the other major such as in management major. Through ESP, the researcher used three steps. They were need analysis, materials design and formative evaluation. While ISD (Instructional System Design) model was used as an instructional design for design the printed material.

First was need analysis. The purpose of need analysis in this research was to find out what the management students need for the printed materials which were developed by the researcher. Second was materials design. The researcher was designed the English materials for management students by using ESP (English for Specific Purposes) and ISD (Instructional System Design) model. Third was evaluation. The researcher used formative evaluation to know the development materials who designed by the researcher during ongoing of this research. While ISD (Instructional System Design) model was used as an instructional design for design the printed material.

The result from this research was printed material about English materials which consists of 14 units (materials and task) about English for management students.

## CHAPTER III

### METHOD OF THE RESEARCH

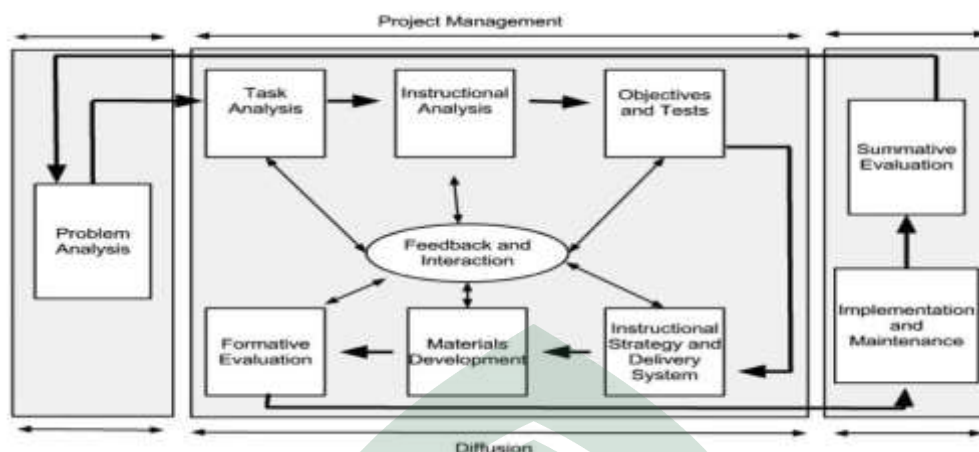

This chapter discusses research and development method of this study. It includes research method, development model, research subject, types of data, research instrument, data collecting procedure, try-out of product, and data analyzing technique.

#### **A. Research and Development Model**

Based on the purpose of this study, the research design was Research and Development (R&D). There were some models which could be applied by the researchers especially for product oriented model such as The Bergman and Moore Model, The de Hoog, de Jong and de Vries Model, The Bates Model, The Nieveen Model and ISD Model. Based on those models stated previously, the researcher adapted ISD model by Seels and Glasgow. In addition, this model similar to ADDIE model as the result, this model was very useful having stages clearly defined which makes implementation and instructions effectively.

The ISD model is acronym of Instructional System Design. This model consists of three phases: needs analysis, instructional design, and implementation and evaluation.

The researcher only used two phases: needs analysis and instructional analysis because the researcher had a limited time and limited budgeting to conducting this research.

**Figure 2.** The Seels and Glasgow ISD Model 2: For Practitioners

The first phase was needs analysis. The aim of this phase was to find out the needs assessment (goals), performance analysis (instructional requirements), and context analysis (constraints, resources, and learner characteristic). The second phase was instructional design includes all steps related to design, development, and formative evaluation. The third phase was formative evaluation. This phase was done by the researcher to know the experts' validation and the students' acceptability.

## B. Research and Development Procedures

The procedures in developing Business Law and Islamic Economic materials based on ISD model which provided 3 phases in terms of need analysis, instructional design and formative evaluation.

### 1. Need analysis

First phase is need analysis includes all of the decisions associated with conducting need analysis and formulating a management plan. These include *need assessment* (goals), *performance analysis* (instructional

requirements), and *context analysis* (constraints, resources, and learners characteristics).

There are some procedures on how to gather, organize and information. Based on Avil Beckford (18 September 2016) on how to analyze information.

- a. Decide where you can find the information that you need. The information could be in someone's head, so you may have to interview him/her. Or you may have to develop a survey. If this is the case who would complete it?
- b. Gather the information from the sources that you identified.
- c. Quickly skim and scan the information.
- d. Determine accuracy, relevance and reliability of information. Distinguish between essential and non-essential information.
- e. Differentiate – is there anything unique about the information?
- f. Identify propaganda and bias.
- g. Recognize omissions and faulty logic
- h. Recognize interrelationships and themes.
- i. Connect disparate pieces of information.
- j. Pay attention to the source of the information.

## 2. Instructional Design

Second phase is instructional design, indicated by double-ended arrows connecting each of the six steps with a central oval labeled, feed-back and

interaction. Completion of phase two occurs after satisfactory results are obtained from formative evaluation.

### 3. Formative Evaluation

Phase three is implementation and evaluation includes preparing training material, creating support structures, doing a formative evaluation by concluding the questionnaire and try-out, and disseminating information about the project.

### C. Research Subject

The subject that researcher used in this research was the third semester management students at STIE YPUP Makassar. The researcher used two classes in the university. The first class was as a control class and the second class was as an experiment class. Each class consisted of 50 students: 25 male students and 25 female students.

### D. Types of Data

The types of data in this research were qualitative and quantitative data. Qualitative data gathered from the experts' judgment and the quantitative data gathered from the result of questionnaire and from the try-out. The other sources type of data was quantitative data. Quantitative data gathered from the results of questionnaire which were answered by the management students of STIE YPUP that consisted of fourteen topics in management lesson as need assessment and

also from the result of try-out were used by the researcher to find out the effectiveness of printed materials.

The result of the preliminary research and try-out were validated by the experts to know the experts' validation and the students' acceptability about the English language materials were developed by the researcher.

### **E. Research Instruments**

In this research, the researcher used two kinds of instruments. They were questionnaire and observation sheet. In addition, the questionnaire was used to identify the learners' needs. The questionnaire was given to management student to conduct need analysis. The question dealt with management students need points with the need to construct the English materials for management student and observation sheet were addressed to the expert such the English lecturer at STIE YPUP and the expert judgment.

### **F. Data Collecting Procedures**

The data collection procedures in this research began from the researcher came into to the class and bring questionnaire consisted of several topics related to management department for the research subject or students. The researcher asked the students to answer the questionnaire during 30 minutes. After that, the researcher collected the questionnaire from the student. The results from the students' questionnaire about the topics were the next topics for the next printed materials which were developed by the researcher in this research. After determine

several topics, the researcher developed the printed materials through two phases: need analysis and instructional design.

Furthermore, the researcher conducted a pre-validation and past-validation after the researcher conduct the first try-out toward the expert content namely English lecturer in Management department and instructional design expert namely educational technology lecturer. The last phase was analyzing the data through formative evaluation to determine the experts' validation and the students' acceptability.

## **G. Try-Out**

### **1. Try-Out Design**

The try out design in this research means that the product which was been try-out to the target subjects in the real learning and teaching situation in order to evaluate the quality of the development materials and exercises. Thus, from this try out, the main benefit which the researcher got was the researcher find out how far the materials fulfill for students' needs. Furthermore, in this phase, the researcher worked together with expert to evaluate the result of field try-out.

### **2. Try-Out Subject**

The subject of this research was the new management students at STIE YPUP. In other word, the try out subject in this research was the first semester of management students at STIE YPUP Makassar at academic

year 2016/2017. The researcher used two classes in the university. The first class was as a control class and the second class was as an experiment class. Each class consisted of 50 students: 25 male students and 25 female students. The class was dominated with Flores students.

#### H. Data Analyzing Technique

In this research, the researcher used mix method. It consists of qualitative analysis and quantitative analysis technique to analyze the data. The data obtained from the students were analyzed qualitative. The data from the students became an attachment and notes for the researcher in developing materials in the form of description of the products, comments, notes and suggestions. Next, the quantitative analyzed data obtained from questionnaire students need analysis and experts observation sheets. The result from the data became an attachment and notes for the researcher in developing materials in the form of description of the products, comments, notes and suggestions.

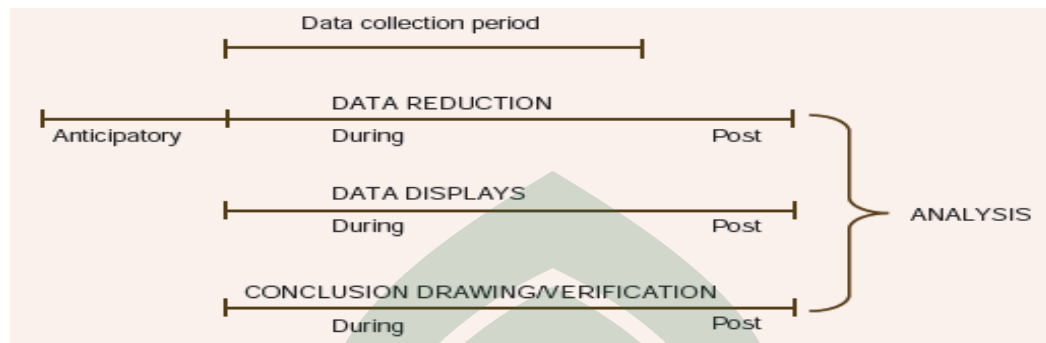

##### 1. Qualitative Analysis

The data analysis technique in this research followed several steps by Miles and Huberman. They are suggests that in analyzing the data qualitatively consists of three procedures. First is data reduction. Second is data display. Third is conclusion drawing/verification.<sup>14</sup>

---

<sup>14</sup> Matthew B. Milles and A. Michael Huberman, *Qualitative Data Analysis Second Edition* (London: SAGE Publications, 1994), p.10-12.

The data analysis technique in qualitative by Miles and Huberman was presented in the following diagram:

**Figure 3.** Procedures of Data Analysis Technique in Qualitative by Miles and Huberman

a. Data Reduction

In this phase, the researcher referred to obtain the mass of qualitative data which was obtained through content expert and instructional experts' interview. In other word, this phase replaced all irrelevant information based on experts' judgment.

b. Data Display

This phase contained of the conclusions from the mass of data which draw in the form of tables, charts, networks and other graphical format. This was a continual process, rather than just one to be carried out at the end of the data collection.

c. Verification and Conclusion Drawing

In this phase, our analysis should allow us begin to develop conclusion regarding our study. These initial conclusions can be

verified, that was their validity examined through reference to our existing field notes or further data collection.

## 2. Quantitative Analysis

In gathering information from students and experts the researcher used the need analysis questionnaires and observation sheets. Types of questions are linguistic needs and learning needs used for assessing whole needs of the target. The categories of question are:

- a. Introduction (personal information and perceptions on the need of speaking course availability).
- b. Linguistic needs (abilities: students' level of proficiency, priorities: language items that considered the most important to learn).
- c. Learning needs (problems: weakness and difficulties in learning), and attitudes: participants' feeling toward elements of programs.
- d. Experts' observation sheets.

The proficiency score, the importance score, the frequency score and the qualitative score of linguistic needs and learning needs are derived by giving each category scores from one to four as indicated below.

| Scores | Proficiency<br>level | Importance<br>level | Frequency<br>level | Qualitative<br>level |
|--------|----------------------|---------------------|--------------------|----------------------|
| 1      | Poor                 | Not important       | Hardly ever        | Bad                  |
| 2      | Fair                 | Less important      | seldom             | Sufficed             |

|   |           |                |        |      |
|---|-----------|----------------|--------|------|
| 3 | Good      | Important      | Often  | Good |
| 4 | Excellent | Very important | Always | Good |

**Table 1. Categories Scores**

The researcher used the formula below as the quantitative data technique:

$$\bar{x} = \frac{\sum fx}{\sum f}$$

Explanation:

$\bar{x}$  = Mean Score

$\sum f$  = Frequency

$\sum fx$  = Number of Respondents

The mean score of the respondents' perceptions and expectation toward students' need of English material were then described by the following scale:

1. Refers to 0 – 1.50
2. Refers to 1.15 – 2.50
3. Refers to 2.51 – 3.50
4. Refers to 3.51 – 4.00

To clarify the data presentation, some data were analyzed by using diagrams to see the distribution of the level of the frequency and level of importance using language skill.

The overall data are then analyzed to recognize the needs inventory of the target group in language learning which is then used

as the basis for formulating aims and objectives of learning and designing syllabus of English materials for management students.

## CHAPTER IV

### FINDINGS AND DISCUSSION

#### A. The English Materials Needed by The Students of Management Department

##### 1. Description of the Students

The researcher made a research which had been held at STIE YPUP Makassar in M.K 2.2, Management department. This class consists of 23 females and 13 male students as respondent. The researcher entered to the class to give a questionnaire for the respondents.

##### 2. Description of the Students Need

###### a. The Data on the Students Need Obtained Through Questionnaire

The researcher gave a questionnaire to respondent in order to know what the students need in English materials for management department. The researcher gives a questionnaire to the respondent which consists of 12 questions, where the results further describes the students need for English materials in their department.

The researcher used the formula below to analyze the data from the questionnaire:

$$\bar{x} = \frac{\sum fx}{\sum f}$$

Explanation:

$\bar{x}$  = Mean Score

$\sum f$  = Frequency

$\sum fx$  = Number of Respondents

After analyzing the questionnaire, the researcher can inform the result by the table below:

**Table 2. The Result of the First Question**

| Question   | Criteria               |                         |                    |                         | Average |
|--|------------------------|-------------------------|--------------------|-------------------------|---------|
|  | 1<br>(Not Interesting) | 2<br>(Less Interesting) | 3<br>(Interesting) | 4<br>(Very Interesting) |         |
| Are you interesting to learn English in management department? | 1                      | 2                       | 22                 | 11                      | 3,19    |

0 – 1.50 = Not Interesting  
1.51 – 2.50 = Less Interesting  
2.51 – 3.50 = Interesting  
3.51 – 4.00 = Very Interesting

From the table above, we can see “Are you interesting to learn English in management department?”. The position of the average score (3,19) which belongs to important category. It means that most of students from Management major are interested to study English in their major.

The second question was “In your opinion, is it important to learn English in management department?” The table below shows the result of the second question:

**Table 3. The Result of the Second Question**

| Question | Criteria             |                       |                  |                       | Average |
|----------|----------------------|-----------------------|------------------|-----------------------|---------|
|          | 1<br>(not important) | 2<br>(less important) | 3<br>(important) | 4<br>(very important) |         |

|   |   |    |      |
|---|---|----|------|
| In your opinion, is it important to learn English In management department? | 8 | 28 | 3.77 |
|---|---|----|------|

0 – 1.50 = not important  
 1.51 – 2.50 = less important  
 2.51 – 3.50 = important  
 3.51- 4.00 = very important

Based on the data of table above, as many as 9 students answered important and 27 students who answered very important the average score (3.77) which means very important. None of the students answered not important and less important in this question. It means that, for them study English was very important especially for their department. The conclusion from this question was many students especially in management department thought that study English was very important for their department.

The third question was "How important the purpose of English learning below for English courses on Management department?" The table below showed the result of the third question:

**Table 4. The Result of the Third Question**

| English learning purposes        | Criteria             |                       |                  |                       | Average |
|----------------------------------|----------------------|-----------------------|------------------|-----------------------|---------|
|                                  | 1<br>(not important) | 2<br>(less important) | 3<br>(important) | 4<br>(very important) |         |
| The success of present education |                      | 1                     | 23               | 12                    | 3.30    |

|   |   |    |    |      |
|---|---|----|----|------|
| Job (future career)                           |   | 9  | 27 | 3.37 |
| Personal development                          |   | 10 | 20 | 3.72 |
| Visiting other countries                      | 1 | 11 | 23 | 3.52 |
| Examination                                   | 1 | 16 | 17 | 3.27 |
| Pursuing advance study                        |   | 13 | 22 | 3.52 |
| Communication with native English speaker     | 1 | 14 | 20 | 3.44 |
| Communication with Non-Native English speaker | 3 | 19 | 12 | 3.08 |

0 – 1.50 = not important                      2.51 – 3.50 = important  
 1.51 – 2.50 = less important                3.51- 4.00 = very important

Based on the table above, the average scores of all respondents were between 2.51 and 4.00 which mean that *“How important the purpose of English learning below for English courses on Management department?”* was in the important and very important. As many as the success of Communication with Non-Native English speaker the average score 0.69, “personal development” 3.72’, visiting other countries 3.52, pursuing advance study 3.52, communication with native English speaker 3.44, ‘future career 3.37, present education 3.30, examination 3.27 and Communication with Non-Native English speaker 3.08.

The conclusion from this *question* was there were many aims at learning English. The aims can be useful for the students themselves in spite of for the other people in this life.

Next was the fourth question. The fourth question was about the linguistic students' need. The question was "*In relation to your current English skill, what is your level of skill in each of these skills below?*".

This table below shows the result of the fourth question:

**Table 5. The Result of the Fourth Question**

| English Skill Components | Criteria    |             |             |                  | Average |
|--------------------------|-------------|-------------|-------------|------------------|---------|
|                          | 1<br>(poor) | 2<br>(fair) | 3<br>(good) | 4<br>(excellent) |         |
| Reading                  | 2           | 12          | 20          | 2                | 2.61    |
| Speaking                 | 6           | 22          | 6           | 1                | 2       |
| Listening                | 2           | 15          | 14          | 3                | 2.38    |
| Writing                  | 1           | 12          | 18          | 3                | 2.52    |

0 – 1.50 = poor      2.51 – 3.50 = good

1.51 – 2.50 = fair      3.51 – 4.00 = excellent

The result in table 5 shows that most of the respondents think, both skill of the students in reading and writing were in the good level which the highest average score are 2.52 and 2.61. Then, skill in listening and speaking were in the fair level which the lowest average score are 2 and 2.38.

The researcher concluded in terms of speaking, the majority of respondents think that speaking is fairr and reading is good subjects.

Next was the fifth question. The fifth question was “*How important your Reading, Speaking, Listening, and Writing skills to improve your English ability in management department?*” This table below shows the result of the fifth question:

**Table 6. The Result of the Fifth Question**

| English skill components | Criteria             |                       |                  |                       | Average |
|--------------------------|----------------------|-----------------------|------------------|-----------------------|---------|

### 1) Need inventory

#### a) Reviewing Needs Inventory from the Linguistic Needs

Identifying linguistic need was carried out by analyzing the students learning ability and learning priorities. The result of the analysis was used for prioritizing the components of integrated skill and selecting appropriate teaching materials which are required to design the English material.

### 1. Learning Ability

The process of identification was first of all carried out by analyzing the students' learning ability in English material. Learning ability was measured based on the results of analysis of the students' proficiency level in the area of the integrated skill such as speaking, writing, reading, and listening. The result of analysis indicates that the students' proficiency level of all the integrated skill ranges around level "Good and Fair" as indicated in the following average scores achievement.

**Table 14. The Result of the students learning ability**

| NO | Skills    | Average score | Proficiency Level |
|----|-----------|---------------|-------------------|
| 1  | Reading   | 2,61          | Good              |
| 2  | Writing   | 2,52          | Good              |
| 3  | Listening | 2,38          | Fair              |
| 4  | Speaking  | 2             | Fair              |

Even if the students speaking skill average score was felt fair, the lecturers should not give priority to this component due to the students' tendency to have less attention to learn speaking skill in English material. However, speaking may not totally be ignored in the English material. The lecturers should prioritize writing and reading

in teaching English material and strengthened out the speaking skill after English material practices in the classroom.

## 2. Learning Priorities

Determining learning priorities was conducted by analyzing the respondents' perceptions on their learning problems of the integrated skill such as speaking, reading, writing, and listening. The results of the analysis recognized as follows:

**Table 15. The Result of the students learning priorities**

| NO | Skills    | Average score | Proficiency Level |
|----|-----------|---------------|-------------------|
| 1  | Speaking  | 3,47          | Important         |
| 2  | Reading   | 3,45          | Important         |
| 3  | Listening | 3,35          | Important         |
| 4  | Writing   | 3,30          | Important         |

The findings above illustrate that the material designed need to give four priorities; (1) speaking, the second priority (2) writing, (3) reading, (4) listening.

## 3. The Need For Learning Integrated Skill

Integrated skills were the items conducting of English materials which have been the priorities to learn with regard to learning the integrated skill, almost all respondent thinks

it was very important to learn English material by enriching the students English comprehension for management comprehension from topics that related with their vocational with average score between 2.51 and 4.00. We also can continue our magister in abroad, because I myself dreamed to visit many countries, do business with many people and get success.<sup>22</sup>

Different with Mutiarasani and Cici statement, Riska gave more focuses on her Speaking improvement. As stated in her statement.

If I mastered English, someday I could speak with tourist as well as I could also promote my products on the field.<sup>23</sup>

The four skills that integrated with English language competence are very important to be learnt. Students sometimes found difficulties in vocabulary or speaking. Although students found some obstacles

when they learnt it, but they still have one favorite skill as motivation to keep learning English. This is proved by followed statements:

I think it is very important because if you cannot read English correctly, you will get problems in the meaning. Moreover, if you don't master English you will difficult when speak with native speaker. So, all skills are very important, it's all related each other.<sup>24</sup>

In my opinion, it is very important to master all the skills. I love learning English since childhood, even if I have not mastered it well but I try to master it until the completion of my study so that I can be success in the future. The importance of Reading skill, if we read some paragraph in English, the way it was written is different when we read it. When we can read it correctly it will be good, but when we do not know how to read it correctly people will be laughed because the missed-meaning. Speaking skill is also important because some word in Indonesia is different with English, for example the "R" word. That's why learning Speaking skill is important in order to speak like a native speaker. Listening skill is important to be learn too, because we can found some obstacles in what we hear with what we write because of less ability, so I think all skills are very important.<sup>25</sup>

The four skills in English are very important. The skill that I like most is Reading, because I love to read even I have not master English yet.<sup>26</sup>

The obstacle that students got in learning English was lack of vocabularies. That is why with adding vocabularies will help the students to learn English well. This reason approved in followed statement:

---

<sup>24</sup> (Mutiarasani, 2<sup>nd</sup> semester of student of management department of STIE YPUP Makassar, interviewed on June 15<sup>th</sup>, 2017)

<sup>25</sup> (Cici, 2<sup>nd</sup> semester of student of management department of STIE YPUP Makassar, interviewed on June 15<sup>th</sup>, 2017)

<sup>26</sup> (Riska, 2<sup>nd</sup> semester of student of management department of STIE YPUP Makassar, interviewed on June 15<sup>th</sup>, 2017)

I think vocabularies should be served in each topic. It will be better if we required memorizing the vocabulary that related with the lesson to increase the vocabulary.<sup>27</sup>

That is good if there is vocabulary in each topic, it will help us to understand the lesson.<sup>28</sup>

With the help of the vocabularies, it would help us to add more vocabularies comprehension that related with our vocational; management.<sup>29</sup>

<sup>29</sup> (Riska, 2<sup>nd</sup> semester of student of management department of STIE YPUP Makassar, interviewed on June 15<sup>th</sup>, 2017)

The implementation of the overall procedures of English language competence is conducted by an idea of formulating a conceptual framework for English language competence based on syllabus. The conceptual framework illustrates the key elements which underlie the syllabus content.

In order to create learning opportunities based on students need, the syllabus must contain three main pedagogical procedures i.e

a. Providing Language Skill

In this procedure, the researchers prepared the learners with English integrated skill namely; speaking, writing, reading, listening which composed English language ability for later English material and worksheet. Afterwards, a set of activities to make the students able to know and to practice the knowledge (skill getting methodology) must be given such as preparing a topic to be read and then answered associated with the management department, arranging the words to complete sentences for writing drill, providing a dialogue script to practice their speaking within specific language grammar rules in pair, and getting the student watch or listen to the audio for listening comprehensiveness skill. These activities may be viewed as skill getting methodology.

b. Giving Opportunity to Use the Integrated Skill

In this phase, the researcher try to connect between the students needs and their potential functional and social interactional activity. Therefore, functional activity and interactional activity must be given. Functional activity aimed at equipping students with the ability to function the integrated skill in conversation, intensive reading, arrange word, and fill in the blank. On he other hand, the social interaction activity is intended to give the students stimulus for implementing the integrated skill with several methods such as role play and discussion in which the students mus interact each other using a certain situation provided by the researchers. These activities as skill using methodology

c. Reviewing Learning Outcomes

This procedure is aimed at reviewing the students achievement in English language competence by giving tem an interactive mae for each unit e.g. “wordsearch puzzle”. Thorough this game, the students will have opportunities to express their knowledge of language in a particular topic, ability to kow specific vocabulary for management department.

Conclusively, the organizational structures of the syllabus framework have been used to develop English materials and worksheets. The English materials and worksheets are planned by units in which unit represent topics and consists of three

pedagogical procedure. This procedure identified as skill setting, skill using and review.

## 2. Stating Goals

This lesson prepared for the students to be able to mastering the four skills effectively and confidently in apply the English language. This lesson can increase the students ability in Speaking, Writing, Reading, and Listening. After learning this lesson, the students expected to be able:

- a. Practice the conversation effectively with their friend.
- b. Arrange the provided words into the correct sentence.
- c. Understand the passage and answer the question related with the passage.
- d. Fill in the blank test based on the recording audio.

## 3. Material Sequence

In the topics that the researcher develops, the material sequence consists of four skills. They are speaking, writing, reading, and listening. As a learning method, the researcher used one kind of a learning method in each skill. In speaking material, the researcher use conversation between two speakers, aimed to develop the students speaking ability by practicing the conversation effectively with their friends. In writing material, the researcher use arrange word to increase the students writing ability by arranging the provided words into the correct sentence. In reading material, the researcher use passage which is consists of vocabulary and comprehension to increase the students reading ability by understanding

the passage and answer the question related with the passage. While in the listening skill the researcher use fill in the blank style to increase the students listening ability by filling in the blank test based on the recording audio.

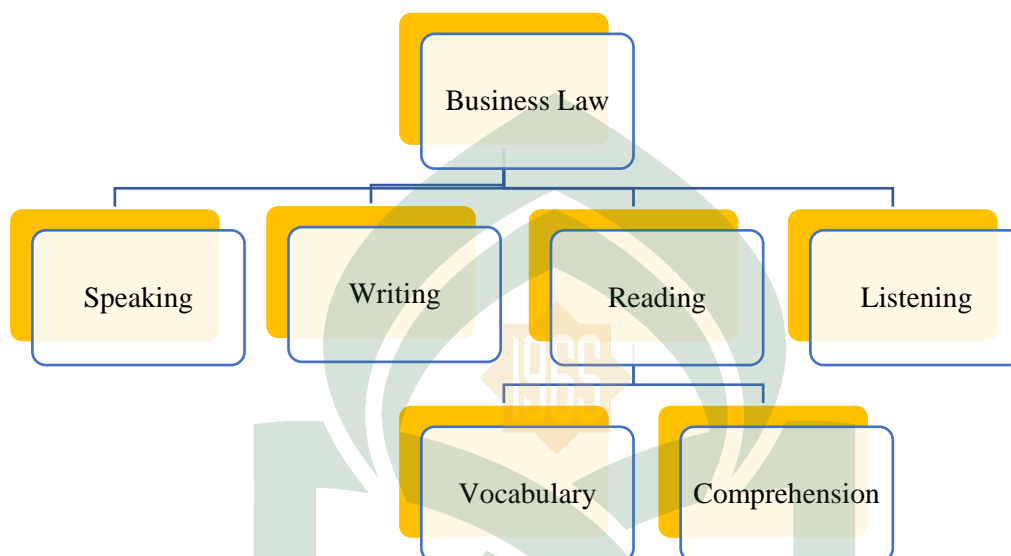

The learning method which is used by the researcher aimed to enhance the students skills in English (speaking, writing, reading, and listening).

### Business Law

Business law deals with the creation of new businesses and the issues that arise as existing businesses interact with the public, other companies, and the government. This area of the law draws on a variety of legal disciplines, including tax law, intellectual property, real estate, sales, employment law, bankruptcy, and others. Business law attorneys specialize in transactional work, meaning they do not represent clients in court. In fact, business lawyers are often hired for the purpose of avoiding future litigation.

To understand the role of business law within the legal system, it helps to view businesses as entities separate from their owners and employees. Just like individuals living together in society, business entities are subject to legal rules designed to give every participant in the marketplace a fair opportunity to succeed.

An enforceable system of business laws also benefits the economy as a whole and provides for more efficient transactions. For example, a supplier who sells goods on credit can be confident that the buyer will held to the agreed payment terms. As long as the contract is drafted and executed in accordance with the Uniform

Commercial Code (UCC) adopted in that jurisdiction, the supplier knows ahead of time it will be able to enforce the contract against the buyer if necessary.

Business law encompasses all of the laws that dictate how to form and run a \_\_\_\_\_. this includes all of the laws that govern how to start,\_\_\_\_\_, manage, and close or sell any type of business.

Business laws established the rules that all businesses should follow. a savvy business person will be generally familiar with business laws and know when to seek the advice of a licensed attorney. Business law includes state and\_\_\_\_\_ laws, as well as administrative regulations. let's take a look at some of the areas included under the umbrella of business law.

Much of business law addresses the different types of business\_\_\_\_\_ there are laws regarding how to properly form and run each type. This includes laws about entities such as corporations, partnerships, and limited liability companies. For example, let's say I decide to start my own pet grooming business. I need to decide what type of business I want to be. will this be a partnership? will it be a sole proprietorship? what papers do I need to file in order to start this business? These questions fall under the laws that govern business\_\_\_\_\_ which are state laws. The type of entity I pick will also affect how I pay my federal\_\_\_\_\_ taxes. These of course are federal laws.

### What Is Islamic Economics?

Islamic economics (Arabic: الاقتصاد الإسلامي) is a term used to refer to Islamic commercial jurisprudence or fiqh al-mu'āmalāt (Arabic) and also to an ideology of economics based on the teachings of Islam that takes a middle ground between the systems of Marxism and capitalism.

According to the Pew Research Center's Forum on Religion & Public Life in 2010, the world's Muslim population is expected to increase from 1.6 billion in 2012 (23.4 percent of the global population) to 2.2 billion by 2030 (26.4 percent).

The study projected that the Muslim population globally would grow at about twice the rate of the non-Muslim population over the next decades. Sixty percent of Muslims live in Asia, 20 percent in the Middle East and North Africa, 15 percent in sub-Saharan Africa, 2.4 percent in Europe and 0.3 percent

in the Americas. It clearly indicates that the Muslim population is an important part of the world economy.

A large population from a marketing perspective has a big market potential. The Muslim population tends to be an exclusive segmented market for certain industries.

Currently, some segmented markets have emerged based on the religious aspect or social and ethical values. In the financial sector, for example, there are the Ethical Fund, the Credit Suisse Christian Fund, Islamic finance and others.

Today, the Islamic economy has captured substantial interest in the market, particularly after its sub-sector, Islamic banking and finance, showed a significant increase worldwide. Moreover, the industry has expanded globally to countries with smaller Muslim populations, such as the UK, Germany and the US.

The question is what is 'Islamic economy' refers to. One thing to note is that the Islamic economy is not just another name for Islamic finance. From a commercial perspective, it naturally encompasses all the sectors driven by the Muslim population's adherence to some form of faith-based activity that has a market impact.

So, Islamic economy refers to economic activities driven by the Islamic lifestyle, consumer behaviour, business practices in accordance with sharia principles and one that has market value (see Thomson Reuters' Report, 2013).

In 2013, Thomson Reuters issued a special report on the state of the global Islamic economy. The report used 'Islamic economy' as a term representing economic sectors driven by the Islamic lifestyle in accordance with sharia principles. This article is intended to review the report on the global Islamic economy and its potential.

Thomson Reuters (2013) in its special edition classified Islamic economy into several sectors, namely finance and banking, food, family-friendly travel, fashion and clothing, cosmetics and personal care, pharmaceuticals and media and recreation.

## Listening

**Listen to the recording carefully and fill the blank of the text below based on the recording!**

Islamic finance works differently to conventional \_\_\_\_\_, and is regarded as ethical by those who use it. But how is it different and why is it considered ethical? Unlike conventional \_\_\_\_\_, Islamic banks operate without interest, or Riba, which is forbidden in Islam. Instead, Islamic banks' activities are based on \_\_\_\_\_. They don't use risky, speculative practices but generate returns from relatively low risk physical assets, such as property and metals. Using the principles of partnership and risk / reward sharing, relationships are built on trust, openness and \_\_\_\_\_. Customers know that their money will never be invested in \_\_\_\_\_ that are prohibited under Sharia, such as tobacco, alcohol, pornography, gambling or arms. And at all times, Islamic banks consider how they must behave, so that they act in the best interests of their customers, and society as whole. Everything they do is routinely monitored by an external, independent panel of qualified Sharia scholars and an internal Sharia Compliance \_\_\_\_\_. So Islamic banks offer a different way of doing banking, one that is relevant to anyone who is looking for an ethical alternative, not just Muslims. At Al Rayan Bank we call this “\_\_\_\_\_ you can believe in”.

## **5. Additional Task**

In additional task, the researchers provided word search puzzle as a review for the students comprehension. Word search puzzle is a word game that consists of the letters of words placed horizontally, vertically and diagonally, both forward, back to front and also lots of overlaps between words. The words in word puzzle consists of noun, adjective, verb, noun phrase and acronym, so the students will need a keen eye to spot the words and solve the puzzle.

#### A. Conclusions

1. The English materials needed by the students of management department at STIE YPUP consist of four components such as (1) Financial: Banking, Budgeting Organization, Taxes, and Insurance; (2) Businesses: Business Organization, Business Law, Business Letter and Official Travel; (3) Trading: Export-Import, Bargaining, Advertising, E-Commerce, and Macro-Micro Economic; (4) Islamic Economic.
2. The development of English materials for students of management department at STIE YPUP includes conceptual map, goals, materials sequence, English materials and worksheet, and additional task.
3. The expert validation for the development of product such as English materials and worksheet have been very well designed due to the following reasons.

#### B. Suggestions

Based on the conclusions above, the researcher would like to give suggestions as follows:

1. It is suggested to the English lecturer to use a worksheet which appropriate with the learners' need in their department. Not only that, but also the English lecturer should be known what the learners' need for their department in English lesson. In addition, the product of this research can

be used as primary references in teaching and learning English for students of management department.

2. It is suggested to the students of management department to use the product of this research as a primary worksheet for English lesson in their department.
3. It is suggested to the next or further researcher to conduct a research by using research and development method. While for development model, the next or further researcher can use ISD (Instructional System Design) model if the next or further researcher want to develop printed materials such textbooks, module, worksheet, etc. ESP (English for Specific Purposes) can be used as an approach to develop a product because it can make a product suites with the English lesson.

**THE STUDENTS INTERVIEW TRANSCRIPT**

**TRANSKRIP INTERVIEW SISWA**

NAMA : MUTIARASANI

UMUR : 21

**Sangat Tertarik**

Alasannya saya pilih sangat tertarik kenapa karena menurut saya, pertama itu bahasa Inggris memang saya suka walaupun saya tidak tau yang kedua memang bahasa Inggris ini berhubungan sama manajemen kan.

**Penting**

Alasannya Bahasa Inggris itu akan ada di manajemen baik itu dalam lingkungan pekerjaan nanti atau mungkin sementara dalam studi pasti ada Bahasa Inggris.

Tujuan : untuk mendapatkan pekerjaan

Alasannya : pasti dalam pekerjaan

Menurut saya sangat penting yaa karena pertama kalau tidak bisa baca Bahasa Inggris otomatis tidak pintar Bahasa Inggris juga apalagi kalau tidak bisa mendengar orang mengucapkan Bahasa Inggris itu juga sangat penting itu berhubungan semua itu berkaitan semua dengan Bahasa Inggris.

**Penambahan kosa-kata**

Menurut saya harus alasannya karena dari diri saya sendiri kurang kosa-kata. Menurut saya setiap pembelajaran itu harusnya diharuskan menghafal kosa-kata yang berhubungan dengan pelajaran untuk memperbanyak kosa-kata.

NAMA : CICI

UMUR : 22

Sangat tertarik

Alasannya karena pada saat misalnya nanti selesai pendidikan terus masuk dalam dunia bisnis harus menguasai Bahasa Inggris bisa go internasional supaya bisa berinteraksi dengan orang-orang di luar negeri.

Sangat penting

Alasannya karena dimana-mana yang dibutuhkan itu selalu yang paling utama Bahasa Inggris yang pertama supaya orang bisa lebih berkomunikasi cepat mengerti karena kebanyakan program-program menggunakan Bahasa Inggris.

Kalau menurut saya, diantara pilihan itu saya memilih semuanya.

Alasannya kesuksesan untuk pendidikan sekarang juga bagus pendidikan sekarang bisa berprestasi dan teman-teman yang lain kalau menguasai Bahasa Inggris terus lebih mudah mendapatkan pekerjaan apalagi di bagian utamanya di bagian akunting walaupun kita lihat dari bagian jurusan manajemen kita menggunakan Bahasa Inggris apalagi punya cita-cita mengunjungi negara lain untuk berbisnis menjadi saat sukses di negara lain kalau bisa melanjutkan pendidikan S2 itu di luar negeri menggunakan Bahasa Inggris.

Kalau saya menurut saya sangat penting kemampuan untuk membaca, berbicara, mendengar dan menulis karena memang dari kecil saya suka Bahasa Inggris walaupun sekarang saya tidak terlalu menguasainya tapi saya berusaha untuk menguasainya sampai penyelesaian pendidikan agar kedepannya bisa lebih sukses lagi. Pentingnya skill membaca, jadi kalau kita membaca Bahasa Inggris kalau kita tau itu banyanya seperti apa kan tulisannya dengan cara bacanya kalau kita baca dengan benar kan bagus karena kalau di salah di baca na ketawaiki orang bilang tidak sesuai. Skill berbicara juga kalau Bahasa Inggris tidak terlalu kentara “R” nya kalau orang Indonesia itu terlalu kentara “R” nya berbicara. Jadi berbicara sangat penting supaya bisa berbicara ala orang barat. Skill mendengar menurut saya juga sangat penting walaupun kita biasa mendengar tapi kita menulis tidak sesuai dengan yang di dengar karena kurang mampu, jadi menurut saya sangat penting itu.

NAMA : RISKHA

Tertarik

Alasannya karena masa sekarang ini bahasa Inggris sangat penting digunakan dalam kehidupan sehari-hari. Contohnya dalam pekerjaan, mengetahui bahasa Inggris itu sangat membantu pekerjaan di bidang manajemen.

Penting Sekali Belajar Bahasa Inggris

Alasannya pekerjaan di bidang manajemen itu mesti menguasai bahasa Inggris, terlebih bila berada di bidang manajemen pemasaran.

Tujuan: Berbicara dengan Turis/Bule, Mempromosikan produk sesuai bidang pekerjaan

Keempat skill dalam bahasa Inggris sangat penting. Skill yang disukai READING.

Kesulitan dalam kosakata, terlebih saat mengucapkan. Dengan adanya bantuan kosakata, membantu menambah jumlah pemahaman kosakata yang berkaitan dengan kejuruan.
