ABSTRACT

Thesis Title : **Developing English Materials for Students of Management Department: Business Organization & Taxes at STIE YPUP**
Year : **2017**
Researcher : **Nurul Fatih Nasir B**

This research aimed at developing English materials for students of Management Department especially in topics Business Organization and Taxes at STIE YPUP, Makassar. Based on the preliminary study on May 2016 by analyzing the module which used, the researcher found several problems from the module such as the module use general English not specific English, the students of Management Department did not interest to study English and the module use the difficulty vocabulary in each topic. The research design used in this study was Research and Development (R&D). The development model used was ISD model. It consists of needs analysis, instructional design, implementation and evaluation. The procedures included analyzing materials needed by the students of Management Department, design the English materials, developing the English materials through ISD model. The development of English materials for students of Management Department at STIE YPUP includes conceptual map, goals, materials sequence, English material and worksheet, and additional task. The product was tried out to the first semester of students of Management Department at STIE YPUP. Types of data obtained in this study are quantitative and qualitative data. The instruments used in this research were questionnaire and observation sheet for two experts. In this research, two experts were involved in order to validate the product. There were three systematic aspects that they validated of the product: Materials Systematic Organization, Systematic English Teaching and Systematic Content of English. Therefore, the result indicated that based on experts validation were no revision needed which the total average score 3.97. The developed Business Organization and Taxes materials were applicable to be taught at the first semester of students of Management Department as topics in English for them.

CHAPTER I

INTRODUCTION

A. Background

Materials take an important part in teaching and learning process. Good and appropriate materials will give positive influence to the students' learning process. Many researchers offer developed English Materials for teaching. The materials include printed material, audio, visual, multimedia, internet, etc. those activities will give an impact to their and our futures as Allah SWT says in QS. Al-Mujadilah verse 11:

يَرْفَعُ اللَّهُ الَّذِينَ آمَنُوا مِنْكُمْ وَالَّذِينَ أُوتُوا الْعِلْمَ دَرَجَاتٍ ۗ

“... Allah will raise those who have believed among you and those who were given knowledge, by degrees....”

To conduct English learning material means aimed at support the students' competence in English study program, so it should be based on the learners' needs, and they should represent the material in a good way. Unfortunately, most of the lecturers in the university in Indonesia still have a problem related to the availability of conducting English learning materials which are appropriate for the students with vocational major. Materials which are provided by the government and launched by some developers are still using general English. The materials are not using specific English vocabulary, whereas English vocabulary and the materials in every unit which is needed by the students in their future occupation will be different.

The use of inappropriate materials might prevent the students to develop their skills to communicate using English in the target situation of their field of works. If such condition happens, the purposes of the English teaching will not be achieved. Therefore, developing appropriate English learning materials for students of management department is necessary. Appropriate materials can help the students to learn English more easily. It is because they are learning useful materials that are related to their future job; materials that are suitable with their needs.

Based on the reasons above, the researcher decides to overcome those problems and develop the English materials for the English materials and worksheet by using English for Specific Purposes (ESP) and also using Instructional System Design (ISD) Model.

First is ESP. Hutchinson and Water stated that ESP as an approach rather than a product. It means that ESP does not involve a particular kind of language, teaching materials or methodology.¹ In other words, ESP is an approach to language teaching which aimed to meet the needs of particular learners. In contrast, Dudley-Evans and St John give their modification based on their-self-understanding of ESP definition. They make a distinction between absolute characteristic and variable characteristic in ESP.²

Based on the English for Specific Purposes (ESP) tree of language teaching by Hutchinson and water's, ESP has three kinds; English for Science and

² Tony Dudley-Evans and Maggie Jo ST John, *Development in English for Specific Purposes* (Cambridge: Cambridge University Press, 1998), pp.4-5.

Technology (EST), English for Business and Economics (EBE) and English for Social Sciences (ESS). In each kind, there are divided into two kinds; English for Academic Purposes (EAP) and English for Occupational Purposes (EOP). In English for Science and Technology, it consists of English for Medical Studies and English for Technicians. In English for Business and Economics, it consists of English for Economics and English for Secretaries. Meanwhile, in English for Social Sciences, it consists of English for Psychology and English for Teaching.

In addition, English lesson for the students of Management Department in this research named English for Accounting was included in English for Business and Economics. Moreover, with ESP, the goal of the lesson can be clearly for the students without involving a particular kind of language, teaching materials or methodology. This approach is called as an easy-going approach for teaching English especially for the first semester students of Management Department because with this approach, the students' mind did not have to think greatly hard and the lesson will be more specific.

The other way to solve the problem in this research the researcher is using ISD (Instructional System Design) model from Seels and Glasgow (1998) conclude that their model is quite similar to many others, it is based on the assumption that design and development take place in the context of project management.³

In this model, there are organized into three management phases: needs analysis management, instructional design management, and implementation and

³. Seels B and Glasgow Z, *Making Instructional Design Decisions (2nd ed.)* (Upper Saddle River, NJ: Merrill, Prentice-Hall, 1998), pp.177-178.

evaluation management. As a conclusion, this model is used to develop the English materials especially in developing module because with utilizing all three phases in this model and focus to develop the materials lesson such as module whose created and adopted by clients and users.

In this research, the researcher developed a worksheet for students of Management Department. The researcher focuses in topics Business Organization and Taxes. Through this research, the researcher developed a new worksheet which can make the students of Management Department interest to study English. These topics will consist of a literature and a task.

To be much detail, in each topic consist of vocabulary which is relevant with the topics. The important thing that in this worksheet is integrated several English skills into each topic such as speaking, writing, reading and listening.

Refers from the explanation and being aware of the fact above, the researcher would like to take a research about the development of English materials for the first semester students of Management Department at STIE YPUP.

B. Research Problems

Based on the background, the main problems is a good development for Business Organization and Taxes topics based on the students' need and students' context. In order to enable the researcher should elaborate the main problem. There are three research problems should be formulated as follows:

1. What kinds of English materials do the students need in Management Department at STIE YPUP?

2. What is the product of English materials development for students of Management Department in STIE YPUP?
3. How are the experts' validation and students' acceptability for the English language materials in Management Department at STIE YPUP?

C. Research Objectives

This study aims at developing English materials and worksheet for the topics Business Organization and Taxes for students of Management Department. The specific objectives of this research are:

1. To analyze the students need of English materials in Management Department at STIE YPUP.
2. To produce the English materials based on ESP (English for Specific Purposes) approach and ISD (Instructional System Design) model in Management Department at STIE YPUP.
3. To know the experts' validation and students' acceptability for the English language materials in Management Department at STIE YPUP.

D. Research Significance

1. Theoretical Significance

The theoretical significance from this research is expected to give more knowledge about English for students' of Management Department through easily way for the students of Management department especially for Business Organization and Taxes topics.

2. Practical Significance

This research would be beneficial for the students of Management Department, English lecturer and Management Department of STIE YPUP. First, for the students of Management Department; in the future, the result from this research can help the students of Management Department more easily to understand about the materials especially for each topic in the worksheet and implemented into their work, studies, and future. In the future the researcher hopes that the result of this research is the worksheet can be used as a guidebook.

Second, for the lecturer; the product that designed in this research can facilitate the lecturer to more easily teach English for the student of Management Department based on the students' needs. Third, for Management Department of STIE YPUP; hope this product can be used as a worksheet for students' of Management Department in learning and teaching process especially for the first semester students of Management Department.

E. Research Scope

This research is focused on developing English materials which oriented in printed materials such as worksheet. In developing product, there are five models focused on product oriented. The five models reviewed are: the Bergman and Moore model (ID models), the de Hoog de Jong and de Vries model (product-

driven), the Bates model, the Nieveen model, and the Seels and Glasgow model (ISD models).⁴

In this research, the researcher developed a unit for Business Organization and Taxes with integrated English skill used ESP and also use ISD (Instructional System Design) model to develop the English materials for the next printed materials such as worksheet for this research.

In addition, due to the limitation of time and budgeting in finishing this research, the researcher conducted this research only into two phases. They are need analysis, instructional design materials and formative evaluation.

F. Operational Definition of Term

1. Development

Development is a process to make something new or change something that was existed. In this research, development means that make a change in the materials lesson such as printed materials. In addition, if in previous printed materials have problems, through this development, the problems can be solved.

2. English Material

English material consists of two words. First is English and second is material. English is an important language in this world. As we know, English is an international language which is used by people in this world for communication with the other people from the other countries. Not only for

⁴ Gall, M, D., Gall, J. P., & Borg, W. R. *Educational Research an Introduction; Third Edition*. (USA: Pearson Education, 1983), p.772.

communication but also, English is used in educational world such as in textbook for students. While material mean anything, which is used to help to teach language learner.

As a conclusion, English material is information or ideas for use in creating a book or anything which is used to help to teach language learner which consist of used English as a language in the book.

3. Business Organization

Business organization is association who consists of people who have a business. Business organization is a group of people who collaborate to achieve in certain commercial goals. In the other word, business organization is one or more business controlled in common by a person or group of people.

4. Taxes

Taxes are generally an involuntary fee levied on individuals or corporations that is enforced by government entity, whether local, regional or national in order to finance government activities.

CHAPTER II

REVIEW OF RELATED LITERATURE

This part centers around the study of some previous research findings on the related topics to the Business Organization and Taxes materials and the formulation of theoretical framework.

A. Review of Related Research Findings

Various researchers had conducted a research related to English materials about developing materials, exercises and about ESP (English for Specific Purposes). As a references from the previous research, the researcher present in this section. First is Ghozali. Ghozali conducted R&D to create English textbook for vocational high school. The conclusion from his research are designed textbook with using R&D is more effective to increase the students' achievement in learning English and can increasing the quality of teaching English through improving the quality of the textbook.¹

The second is Suyadi. Suyadi had conducted his research at a state university in Jambi Province. The aimed at his research is improving teaching English materials for accounting program which is needed for the student of accounting at university level. He found that the students of accounting program needs a specific material in learning English which has tight relationship with their study program. While English skills are need to be combined with the knowledge target

for accounting. Based on his finding Suyadi used ESP (English for Specific Purposes) to solve his problem in his research.²

In addition, the materials should follow the students' current level of skills to avoid difficulties in adopting and transferring the ideas from the lesson materials from one language to another. The materials which the researcher will develop must match with the students needs. Because of that, the students can be more easily to understand the materials and the students will appreciate their time and they will effort to learn their materials.

The third is Safrizal. From his research, the conclusion is in several universities especially in Accounting Department, English subject in that university is taught as English General Purposes not English Specific Purposes. In addition, he found that teaching materials is designed by some criteria and also based on the students needs and supported by theories in ESP.³

The fourth is Ruth Hillis. In his research, he found that to developing instructional materials, should determine the procedures which will used in our development. The procedures are selecting the theme, setting up criteria to serve as a guide in preparation of new instructional materials and as a basis for evaluation, preparing first drafts of the materials, trying out the materials, and revising the materials for general use.⁴

⁴. Ruth Hillis Seay, *Developing Instructional Materials in the Sloan Experiment, University of Kentucky* (Washington: University of Kentucky, 2000), pp.418.

The fifth is Harsono. The conclusion from his research is developing teaching/learning materials for ESP is more demanded than that for general English because the availability of the ESP learning materials in public is very rare. In developing the ESP learning materials, the researcher can develop the teaching materials by applying the principles and procedures of language teaching materials including formulating the teaching objectives, adapting and or supplementing the existing materials, and or creating our own materials.⁵

Based on some previous finding research, the researcher concludes that to develop the materials and exercises, it must be based on learners needs. Developing printed materials especially through R&D can increase the students' achievements and the qualities in the learning English particularly for printed materials which will use in the school or university.

In other side, developing printed materials with ESP (English for Specific Purposes) and ISD (Instructional System Design) can make the students more prepared to confront the real world occupation. The researcher developed new printed English materials to help the students to increasing their motivation to learn this material. So that, the target of SAP can achieve well.

B. Theoretical Foundation

Theoretical foundation is some theories which supporting this and relevant with our research. There are several theoretical foundations in this research about

⁵. Y.M.Harsono. 'Developing Learning Materials for Specific Purposes'. *Thesis*. Universitas Katolik Atma Jaya. 2007. pp. 178.

developing materials, business organization, taxes, ESP (English for Specific Purposes) and ISD Model.

- a. Developing materials. According to Tomlinson as cited in his second edition book, materials development is both a field of study and a practical undertaking. As a field it studies the principles and procedures of the design, implementation and evaluation of language teaching materials.⁶

In other word, materials development refers to anything which is done by writers, teacher or learners to provide sources of language input and to exploit those sources in ways which maximize the likelihood of intake and to stimulate purposeful output.⁷ Materials developers might write textbooks, tell stories, bring advertisements into the classroom, express an opinion, provide samples of language use or read a poem aloud.

- b. English material is information or ideas for use in creating a book or anything which is used to help to teach language learner which consist of used English as a language in the book.
- c. Business Organization

Business organization is association who consists of people who have a business. Business organization is a group of people who collaborate to achieve in certain commercial goals. In the other word, business

organization is one or more business controlled in common by a person or group of people.

- d. Taxes. Taxes are generally an involuntary fee levied on individuals or corporations that is enforced by government entity, whether local, regional or national in order to finance government activities.
- e. ESP (English for Specific Purposes). Hutchinson and Waters see ESP as an approach rather than a product, by which they mean that ESP does not involve a particular kind of language, teaching materials or methodology.⁸ In other side, Dudley-Evans and St John said that ESP is divided into two absolute and variable characteristic.⁹

Based on absolute characteristic, ESP is defined to meet specific needs of the learner; makes use of the underlying methodology and activities of the discipline it serves; and centered on the language (grammar, lexis, and register), skills, discourse and genres appropriate to these activities.

While based on variable characteristic, ESP may be related to or designed for specific disciplines; may use, in specific teaching situations, a different methodology from that of general English.

ISD Model. ISD model is acronym from instructional system design.

ISD model was presented by Seels and Glasgow. They are compare their model to several others and generic ADDIE framework. Seels and

Glasgow emphasized the steps within each phase in this model may be conducted in a linear fashion, but often are not, although the three phase are generally considered to be self-contained and linear.

C. Theoretical Framework

The problem faced by the students of Management Department in learning English is the difficulties to understand the lesson because the materials using English for general purposes not English for specific purposes.

Because of that, in this research, the researcher try to offer a new way by designing English materials for students of Management Department by creating a new English material and worksheet with ESP and ISD Model to achieve the objective of learning in the SAP.

By designing it, the researcher expects in the learning and teaching process, the students of Management Department can more easily to understand the lesson than before, the teacher has a textbook as a model and the objective of the learning achieved.

The theoretical framework underlying this research is presented in the following diagram:

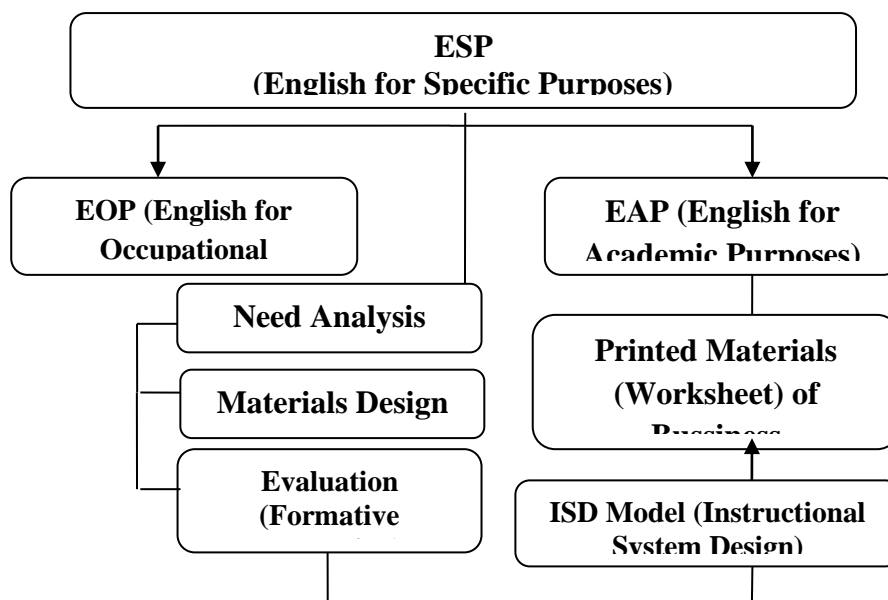

Figure 1. *Theoretical Framework*

In this research the researcher developed English material such as worksheet for students of Management Department in topics Business Organization and Taxes. The researcher used English for specific purposes (ESP) and Instructional System Design (ISD) model in this research. ESP was used as an approach to integrated English for the other lesson in the other major such as in management department. Through ESP, the researcher used three steps. They were need analysis, materials design and formative evaluation. While ISD (Instructional System Design) model was used as an instructional design for design the printed material as worksheet.

First was need analysis. The purpose of need analysis in this research was to find out what the students of Management Department need for the English

materials (worksheet) which would develop by the researcher. Second was materials design. The researcher was designed the English materials for students of Management Department by using ESP (English for Specific Purposes) and ISD (Instructional System Design) model. Third was evaluation. The researcher used formative evaluation to know the development materials who designed by the researcher during ongoing of this research. While ISD (Instructional System Design) model was used as an instructional design for design the worksheet. The result from this research was printed material such as worksheet which consists of 14 units.

CHAPTER III

METHOD OF THE RESEARCH

This chapter discusses about research and development method of this study. It includes research method, development model, research subject, types of data, research instrument, data collecting procedure, try-out of product, and data analyzing technique.

A. Research and Development Model

Based on the purpose of this study, the research design was Research and Development (R&D). There were some models which could be applied by the researchers especially for product oriented model such as The Bergman and Moore Model, The de Hoog, de Jong and de Vries Model, The Bates Model, The Nieveen Model and ISD Model. Based on those models stated previously, the researcher adopted ISD model by Seels and Glasgow. In addition, this model similar to ADDIE model as the result, this model was very useful having stages clearly defined which makes implementation and instructions effectively.

The ISD model is acronym of Instructional System Design. This model consists of three phases: needs analysis, instructional design, and implementation and evaluation.

The researcher only used two phases: needs analysis and instructional analysis because the researcher had a limited time and limited budgeting to conducting this research.

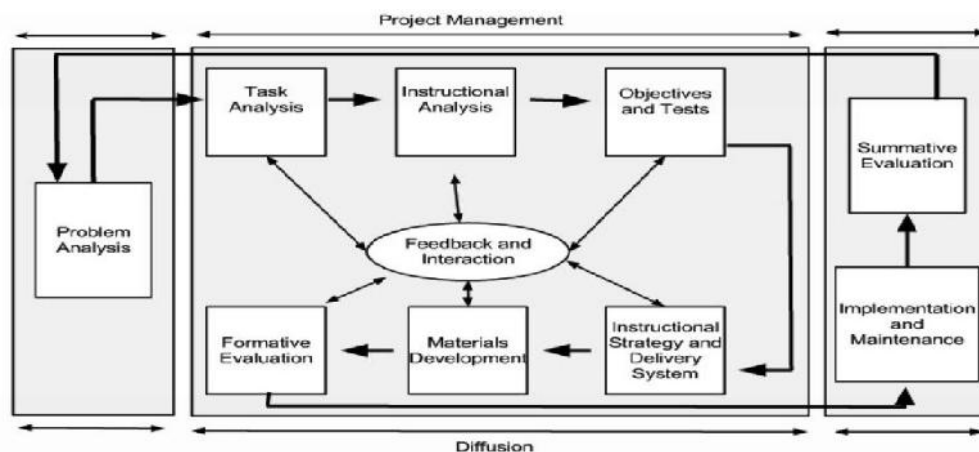

Figure 2.The Seels and Glasgow ISD Model 2: For Practitioners

The first phase was needs analysis. The aim of this phase was to find out the needs assessment (goals), performance analysis (instructional requirements), and context analysis (constraints, resources, and learner characteristic). The second phase was instructional design includes all steps related to design, development, and formative evaluation. The third phase was formative evaluation. This phase was done by the researcher to know the experts' validation and the students' acceptability.

B. Research and Development Procedures

The procedures in developing Business Organization and Taxes based on ISD model which provided 3 phases in terms of need analysis, instructional design and formative evaluation.

1. Need analysis

First phase is need analysis includes all of the decisions associated with conducting need analysis and formulating a management plan. These include *need assessment* (goals), *performance analysis* (instructional

requirements), and *context analysis* (constraints, resources, and learners characteristics).

2. Instructional Design

Second phase is instructional design, indicated by double-ended arrows connecting each of the six steps with a central oval labeled, feedback and interaction. Completion of phase two occurs after satisfactory results are obtained from formative evaluation.

3. Formative Evaluation

Phase three is implementation and evaluation includes preparing training material, creating support structures, doing a formative evaluation by concluding the questionnaire and try-out, and disseminating information about the project.

C. Research Subject

The subject that researcher used in this research was the third semester students of Management Departments at STIE YPUP Makassar. The researcher used two classes in the university. The first class was as a control class and the second class was as an experimental class. Each class consisted of 50 students: 25 male students and 25 female students.

D. Types of Data

The types of data in this research were qualitative and quantitative data. Qualitative data gathered from the experts' judgment and the quantitative data

gathered from the result of questionnaire and from the try-out. The other sources type of data was quantitative data. Quantitative data gathered from the results of questionnaires which were answered by the students of Management Department of STIE YPUP that consisted of 14 topics in Management lesson as need assessment and also from the result of try-out were used by the researcher to find out the effectiveness of printed materials (worksheet).

The result of the preliminary research and try-out were validated by the experts to know the experts' validation and the students' acceptability about the English language materials and worksheet was developed by the researcher.

E. Research Instruments

In this research, the researcher used two kinds of instruments. They were questionnaire and rubric for expert. In addition, the questionnaire used to identify the learners' needs. The questionnaire was given to students of Management Department to conduct need analysis. The question dealt with students of Management Department need points with the need to construct the English materials for students of Management Department and observation sheet were addressed to the expert such the English lecturer at STIE YPUP and the expert judgment.

F. Data Collecting Procedures

The data collection procedures in this research began from the researcher came into to the class and brought questionnaire consisted of several topics related

to Management Department for the research subject or students. The researcher asked the students to answer the questionnaire during 30 minutes. After that, the researcher collected the questionnaire from the student. The results from the students' questionnaire about the topics were the next topics for the next printed materials (worksheet) which were developed by the researcher in this research. After determine several topics, the researcher developed the printed materials through two phases: need analysis and instructional design.

Furthermore, the researcher conducted a pre-validation and past-validation after the researcher conduct the first try-out toward the expert content namely English lecturer in Management Department and instructional design expert namely educational technology lecturer. The last phase was analyzing the data through formative evaluation to determine the experts' validation and the students' acceptability.

G. Try-Out

1. Try-Out Design

The try out design in this research means that the product which was been try-out to the target subjects in the real learning and teaching situation in order to evaluate the quality of the development materials and exercises. Thus, from this try out, the main benefit which the researcher got was the researcher find out how far the materials fulfill for students' needs. Furthermore, in this phase, the researcher worked together with expert to evaluate the result of field try-out.

2. Try-Out Subject

The subject of this research was the new students of Management Departments at STIE YPUP. In other word, the try out subject in this research was the first semester of students of Management Departments at STIE YPUP Makassar at academic year 2016/2017. The researcher used two classes in the university. The first class was as a control class and the second class was as an experiment class. Each class consisted of 50 students: 25 male students and 25 female students. The class was dominated with Flores students.

H. Data Analyzing Technique

In this research, the researcher used mix method. It consists of qualitative analysis and quantitative analysis technique to analyze the data. The data obtained from the students were analyzed qualitative. The data from the students became an attachment and notes for the researcher in developing materials in the form of description of the products, comments, notes and suggestions. Next, the quantitative analyzed data obtained from questionnaire students need analysis and experts observation sheets. The result from the data became an attachment and notes for the researcher in developing materials in the form of description of the products, comments, notes and suggestions.

1. Qualitative Analysis

The data analysis technique in this research followed several steps by Miles and Huberman. They are suggests that in analyzing the data

qualitatively consists of three procedures. First is data reduction. Second is data display. Third is conclusion drawing/verification.¹

The data analysis technique in qualitative by Miles and Huberman was presented in the following diagram:

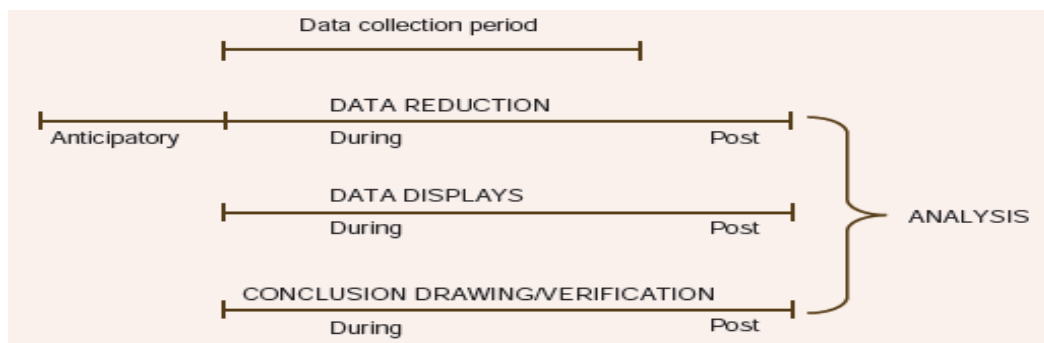

Figure 3. Procedures of Data Analysis Technique in Qualitative by Miles and Huberman

a. Data Reduction

In this phase, the researcher referred to obtain the mass of qualitative data which was obtained through content expert and instructional experts' interview. In other word, this phase replaced all irrelevant information based on experts' judgment.

b. Data Display

This phase contained of the conclusions from the mass of data which draw in the form of tables, charts, networks and other graphical format. This was a continual process, rather than just one to be carried out at the end of the data collection.

¹ Matthew B. Milles and A. Michael Huberman, *Qualitative Data Analysis Second Edition* (London: SAGE Publications, 1994), p.10-12.

c. Verification and Conclusion Drawing

In this phase, our analysis should allow us begin to develop conclusion regarding our study. These initial conclusions can be verified, that was their validity examined through reference to our existing field notes or further data collection.

2. Quantitative Analysis

In gathering information from students and experts the researcher used the need analysis questionnaires and observation sheets. Types of questions are linguistic needs and learning needs used for assessing whole needs of the target. The categories of question are:

- a. Introduction (personal information and perceptions on the need of speaking course availability).
- b. Linguistic needs (abilities: students' level of proficiency, priorities: language items that considered the most important to learn).
- c. Learning needs (problems: weakness and difficulties in learning), and attitudes: participants' feeling toward elements of programs.
- d. Experts' observation sheets.

The proficiency score, the importance score, the frequency score and the qualitative score of linguistic needs and learning needs are derived by giving each category scores from one to four as indicated below.

Table 1. Categories Scores

Scores	Proficiency level	Importance level	Frequency level	Qualitative level
1	Poor	Not important	Hardly ever	Bad
2	Fair	Less important	seldom	Sufficed
3	Good	Important	Often	Good
4	Excellent	Very important	Always	Good

The researcher used the formula below as the quantitative data technique:

$$\bar{x} = \frac{\sum fx}{\sum f}$$

Explanation:

\bar{x} = Mean Score

$\sum f$ = Frequency

$\sum fx$ = Number of Respondents

The mean score of the respondents' perceptions and expectation toward students' need of English material were then described by the following scale:

1. Refers to 0 – 1.50
2. Refers to 1.15 – 2.50
3. Refers to 2.51 – 3.50

4. Refers to 3.51 – 4.00

To clarify the data presentation, some data were analyzed by using diagrams to see the distribution of the level of the frequency and the important level of using language skill.

The overall data are then analyzed to recognize the needs inventory of the target group in language learning which is then used as the basis for formulating aims and objectives of learning and designing syllabus of English materials for students of Management Departments.

CHAPTER IV
FINDINGS AND DISCUSSIONS

A. The English Materials Needed by The Students of Management Department

1. Description of the Students

The researcher made a research which had been held at STIE YPUP Makassar in M.K 2.2, Management Department. This class consists of 23 females and 13 male students as respondent. The researcher entered to the class to give a questionnaire for the respondents.

2. Description of the Students Need

a. The Data on the Students Need Obtained Through Questionnaire

The researcher gave a questionnaire to respondent in order to know what the students need in English materials for Management Department. The researcher gives a questionnaire to the respondent which consists of 12 questions, where the results further describes the students need for English materials in their department.

The researcher used the formula below to analyze the data from the questionnaire:

$$\bar{x} = \frac{\sum fx}{\sum f}$$

Explanation: \bar{x} = Mean Score

$\sum f$ = Frequency

$\sum fx$ = Number of Respondents

After analyzing the questionnaire, the researcher can inform the result by the table below:

Table 2. The Result of the First Question

Question	Criteria				Average
	1 (Not Interesting)	2 (Less Interesting)	3 (Interesting)	4 (Very Interesting)	
Are you interesting to learn English in Management Department?	1	2	22	11	3.19
0 – 1.50 = Not Interesting		2.51 – 3.50 = Interesting			
1.51 – 2.50 = Less Interesting		3.51 - 4.00 = Very Interesting			

The information about the students' interest to learn English in Management Department was presented in table 2. Table 2, illustrated that the position of the total average score (3.19) refers to the interesting category, it described that most of the students in Management Department were interested in learning English.

The table below shows the result of the second question:

Table 3.The Result of the Second Question

Question	Criteria				Average
	1 (Not Important)	2 (Less Important)	3 (Important)	4 (Very Important)	
In your opinion, is it important to learn English In Management Department?			8	28	3.77
0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

Table 3 describes the students' perception about the importance to learn English in Management Department. From the students' perception, it was found that learning English was very important in Management Department with average score 3.77.

The table below showed the result of the third question:

Table 4.The Result of the Third Question

English Learning Purposes	Criteria				Average
	1 (Not Important)	2 (Less Important)	3 (Important)	4 (Very Important)	
The success of present education		1	23	12	3.30
Job (future career)			9	27	3.37

Personal development			10	20	3.72
Visiting other countries		1	11	23	3.52
Examination		1	16	17	3.27
Pursuing advance study			13	22	3.52
Communication with native English speaker		1	14	20	3.44
Communication with Non-Native English speaker		3	19	12	3.08
0 – 1.50 = not important			2.51 – 3.50 = important		
1.51 – 2.50 = less important			3.51- 4.00 = very important		

Based on the data presented in table 4, it was found that there were three main purposes of the students of Management Department in learning English; they are personal development (3.72), visiting other countries (3.52), and pursuing advance study (3.52). The purposes categorized as very important according to the level of importance score category.

The fourth question was about the students' need of linguistic. The table below shows the result of the fourth question:

Table 5.The Result of the Fourth Question

English Skill Components	Criteria				Average
	1 (Poor)	2 (Fair)	3 (Good)	4 (Excellent)	
Reading	2	12	20	2	2.61

Speaking	6	22	6	1	2
Listening	2	15	14	3	2.38
Writing	1	12	18	3	2.52
0 – 1.50 = poor		2.51 – 3.50 = good			
1.51 – 2.50 = fair		3.51- 4.00 = excellent			

The result in table 5 shows that most of the students thought that, their ability in reading and writing were in the good level which the highest average score are 2.61 and 2.52. Then, their ability in listening and speaking were in the fair level which the lowest average score are 2.38 and 2.

This table below shows the result of the fifth question:

Table 6.The Result of the Fifth Question

English Skill Components	Criteria				Average

0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

Table 6 shows that most of the students thought that the fourth English language skills were important but learning Speaking was the most important skill with the score 3.46.

The table below shows the result from the sixth question:

Table 7. The Result of the Sixth Question

Topics	Criteria				Average
	1 (Not Important)	2 (Less Important)	3 (Important)	4 (Very Important)	
Macro-Micro Economic			14	17	3.16

1.51 – 2.50 = less important	3.51- 4.00 = very important

Table 7 shows that the topics which used as English materials for students of Management Department. The English material topics had average score range from 2.51 to 4.00. The topics could be listed according to the level of importance as follows:

Chart 1. The Most Preferred Way of Learning English

According to the chart all of the topics were important and very important for new English materials and worksheet. The result from the analysis was aimed as a foundation for developing English materials and worksheet for students of Management Department who constructed by the researcher.

The seventh question was about the students' learning need. The table below shows about the result of analysis from the seventh question.

Table 8.1. The Result of the Seventh Question for Speaking skill

English Problems	Criteria				Average
	1 (Hardly Ever)	2 (Seldom)	3 (Often)	4 (Always)	
Do not know what to say	4	10	18	3	2.47
Afraid if the other people listen when she/he speak (shy)	5	14	12	4	2.36
Too much thought but can not speak	1	10	18	3	2.41
Difficulties in pronunciation	1	6	24	5	2.91
Worry too much to do mistakes	2	4	20	8	2.83
0 – 1.50 = hardly ever		2.51 – 3.50 = often			
1.51 – 2.50 = seldom		3.51- 4.00 = always			

The data on table 10 was the result of the problems analysis faced by the students in speaking. All of the learning problems faced by the students in speaking were categorized as “often” because all of the problems were in the average score range from 2.36 to 2.91.

The table below shows the result from the difficulties in listening.

Table 8.2. The Result of the Seventh Question for Listening Skill

English Problems	Criteria				Average
	1 (Hardly Ever)	2 (Seldom)	3 (Often)	4 (Always)	
Difficulty in receive a message from what they listen	1	10	21	3	2.66
Difficulty in understanding a speaker		10	15	10	2.91
Difficulty in distinguish a sound which is similar	3	3	22	7	2.94
The situation and condition which is not right	3	9	17	6	2.66
0 – 1.50 = hardly ever		2.51 – 3.50 = often			
1.51 – 2.50 = seldom		3.51- 4.00 = always			

According to table 8.2 there were four problems faced by the students in Listening. All of the learning problems faced by the students in listening were categorized as “often” with the average score range from 2.66 to 2.4. It means that all of the problems listed above occurred ‘often’ when they learned listening.

Next analysis was from reading skill. The table below shows the result from the difficulties in reading.

Table 8.3. The Result of the Seventh Question for Reading Skill

English Problem	Criteria				Average
	1 (Hardly Ever)	2 (Seldom)	3 (Often)	4 (Always)	
Less the vocabulary	2	2	26	5	2.88
Difficulty in understanding the meaning from the text	2	9	18	7	2.83
The text is too long	2	7	17	9	2.86
<p style="text-align: center;">0 – 1.50 = hardly ever 2.51 – 3.50 = often 1.51 – 2.50 = seldom 3.51- 4.00 = always</p>					

From the data presented in the table 8.3 there were three problems faced by the students in reading. All of the learning problems faced by the students in reading were often because all of the problems average score range from 2.83 to 2.88 which mean 'often' occurred when the students reading English.

The last analysis was writing skill. The table below shows the result from the difficulties in writing.

Table 8.4. The Result of the Seventh Question for Writing Skill

English Problem	Criteria				Average
	1 (Hardly Ever)	2 (Seldom)	3 (Often)	4 (Always)	
Writing					
Difficulty to get an idea	1	6	20	8	2.91
Fixated on the using of grammar/structure	1	2	27	6	3.05
Less the vocabulary	2	2	21	9	2.97
0 – 1.50 = hardly ever		2.51 – 3.50 = often			
1.51 – 2.50 = seldom		3.51- 4.00 = always			

The data in table 8.4 was the result of the problems analysis faced by the students in writing. All of the learning problems faced by the students in writing occurred with “often” frequency. All of the problems were in the average score ranging from 2.91 to 3.05.

The eighth was about the students’ learning need of methodology. This table below shows the result of the eighth question:

Table 9. The Result of the Eighth Question for Reading Skill

Learning Methodology on Reading Skills	Criteria				Average
	1 Not Important	2 Less Important	3 Important	4 Very Important	

Read faster (skimming or scanning)	1	8	15	12	3.05
Intensive reading	1		18	16	3.30
0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

Based on the data presented in table 9 there were two techniques that the students of Management Department had to choose they were read faster and intensive reading. Both of the techniques refers to important category with the average scores 3.05 and 3.30.

The table below shows the result of the ninth question.

Table 10. The Result of the Ninth Question for Speaking Skill

Learning Methodology on Speaking Skills	Criteria				Average
	1 Not Important	2 Less Important	3 Important	4 Very Important	
Report Back		3	22	10	3.11

0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

Table 10 shows the result from the students learning methodology on speaking skill. There were three techniques; report back, simulation of conversation, and interview which the average score between 2.51 to 3.50. So, the

students' learning need of methodology in speaking skill was in the "important level".

The table below shows the result from the students' learning need of methodology in listening skill.

Table 11. The Result of the Tenth Question for Listening Skill

Learning Methodology on Listening Skills	Criteria				Average
	1 Not Important	2 Less Important	3 Important	4 Very Important	
Listen and write			12	24	3.66
Watching video		6	20	9	3
Fill in the blank based on audio		2	18	15	3.27
Guess picture		5	17	14	3.25
0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51 - 4.00 = very important			

Referring to table 11, there were four techniques that the students have to choose they were listening and writing (3.66), watching video (3), filling in the blank based on audio (3.27), and guessing picture (3.25). The result of the data analysis indicated that the students preferred learning listening through listening and writing. They were the most appropriate way for the students to learn listening of English and it was in the "very important level".

The table below shows the result from the students learning need of methodology in writing skill.

Table 12. The Result of the Eleventh Question for Writing Skill

Learning Methodology on Writing Skills	Criteria				Average
	1 Not Important	2 Less Important	3 Important	4 Very Important	
Write reports	2	2	15	17	3.30
Developing the main idea	1	3	18	14	3.25
Writing formal and informal letters	1	2	20	12	3.30
Arrange word	1	1	18	15	3.41
0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

According to the data presented in table 12 it was found that all of the learning English methodology on writing were in the “important level” but arrange words achieved the highest average score (3.41)

The last question was about the students learning style. This table below shows the result of the twelfth questions:

Table 13. The Result of the Students Need of Learning Style

Learning Style	Criteria				Average
	1 (Not Important)	2 (Less Important)	3 (Important)	4 (Very Important)	
Games		3	24	8	3.05
Picture		3	8	8	1.83
Movie and Video		6	20	9	3
Talking in Pairs		4	15	17	3.36
Role play		5	25	3	2.66
Self Learning		4	18	14	3.30
Doing Task		3	24	9	3.16
Small Group		4	14	16	1.83
Large Group		1	18	14	3
Speak English with Friends		1	12	22	3.55
0 – 1.50 = not important		2.51 – 3.50 = important			
1.51 – 2.50 = less important		3.51- 4.00 = very important			

From the data above ‘speaking English with friends’ was the most preferred way of learning English chosen by the students. This category achieved the highest average score (3.55) which mean “very important”. The overall data were analyzed to recognize the needs inventory of the target group in language learning.

1) Need inventory

a) Reviewing Needs Inventory from the Linguistic Needs

Identifying linguistic need was carried out by analyzing the students learning ability and learning priorities. The result of the analysis was used for prioritizing the components of integrated skill and selecting appropriate teaching materials which are required to design the English material.

1. Learning Ability

The process of identification was first of all carried out by analyzing the students' learning ability in English material. Learning ability was measured based on the results of analysis of the students' proficiency level in the area of the integrated skill such as speaking, writing, reading, and listening. The result of analysis indicates that the students' proficiency level of all the integrated skill ranges around level "Good and Fair" as indicated in the following average scores achievement.

Table 14. The Result of the Students Learning Ability

No	Skills	Average score	Proficiency Level
1	Reading	2.61	Good
2	Writing	2.52	Good
3	Listening	2.38	Fair
4	Speaking	2	Fair

Even if the students speaking skill average score was felt fair, the lecturers should not give priority to this component due to the students' tendency to have less attention to learn speaking skill in English material. However, speaking may not totally be ignored in the English material. The lecturers should prioritize writing and reading in teaching English material and strengthened out the speaking skill after English material practices in the classroom.

2. Learning Priorities

Determining learning priorities was conducted by analyzing the respondents' perceptions on their leaning problems of the integrated skill such as speaking, reading, writing, and listening. The results of the analysis recognized as follows:

Table 15. The Result of the Students Learning Priorities

No	Skills	Average score	Proficiency Level
1	Speaking	3.47	Important
2	Reading	3.45	Important
3	Listening	3.35	Important
4	Writing	3.30	Important

The findings above illustrate that the material designed need to give four priorities; (1) speaking, (2) reading, (3) listening, and (4) writing.

3. The Need for Learning Integrated Skill

Integrated skills were the items conducting of English materials which have been the priorities to learn with regard to learning the integrated skill, almost all respondent think it was very important to learn English material by enriching the students English comprehension for Management comprehension from topics that related with their vocational with average score between 2.51– 4.00. Fourteen topics were then selected based on the analysis of the respondent perception according to the level of importance as follows:

Table 16. The Result of the Level of Importance of the English Materials Topics and Worksheet

No	Topics	Average score	Importance level
1	Banking	3.75	Very important
2	Budgeting Organization	3.52	Very important
3	Official Travel	3.41	Important
4	Export-Import	3.41	Important
5	Business Law	3.41	Important
6	Business Organization	3.33	Important
7	Business Letter	3.30	Important
8	Taxes	3.25	Important
9	Insurance	3.19	Important
10	Macro-Micro Economic	3.16	Important

11	Advertising	3	Important
12	E-Commerce	2.97	Important
13	Bargaining	2.91	Important
14	Islamic Economic	2.72	Important

Conclusively, all the topics of English material and worksheet as listed above included since they are considered important or very important for the students to be learnt in English course at the Management Department study program.

b) Reviewing Needs Inventory from the Learning Needs

The students learning needs in this study were identified by analyzing the students learning problems and learning attitudes. The students' learning problems were described based on the analysis of the respondents' perceptions on the obstacles to the students learning success to be able to effectively in English comprehension. While to explain the students' attitude, the researcher analyzed the students' learning preferences and learning styles based on the respondents' perceptions since these two factors were believed able to affect the students' attitudes in learning.

1. The Students' Learning Problems

Based on the analysis of the respondents' perceptions on the students' learning problems, it was founded that the students learning difficulties can apparently stem from many causes. These include:

- a. Problems in Speaking such as do not know what to say, afraid if the other people listen when she/he speak, too much thought but cannot speak, the difficulties in pronunciation, and worry too much to do mistakes.
- b. Problems in Listening such as difficulty in receive a message from what they listen, difficulty in understanding a speaker, difficulty in distinguish a sound

which is similar, and the situation and condition which is not right.

- c. Problems in Reading such as less the vocabulary, difficulty in understanding the meaning from the text, and the text is too long.
- d. Problems in Writing such as difficulty to get an idea, fixated on the using of grammar/structure, and less the vocabulary.

2. The Students' Learning Attitudes

It has already been stated that learning attitudes are analyzed to discover what the students like to learn. For the reason, the focus of this discussion deals with identification of the learning preferences and styles in learning English materials in Management Department based on the respondents' perceptions.

3. The Students' Learning Preferences

The students' learning preferences in English course were specially focused on describing the students' preferences in learning speaking, reading, listening and writing. From the analysis results of the respondents, it was found out that the students prefer to learning speaking by techniques report back, simulation, and interview. The students prefer to learn reading by read faster and intensive reading. Then, the students prefer

to learning listening by listen and write, watching video, fill in the blank based on audio, and guess picture. The last, the students prefer to learning writing by write reports, developing the main idea, formal and informal letters, and last making up arrange word or paragraph.

4. The Students' Learning Styles

The results of the data analysis associated with the students' learning styles indicate that the students at the management department study program can mostly be categorized as communicative and concrete students:

- a. Learning English by doing task
- b. Learning English by talking in pairs
- c. Learning English by self learning
- d. Learning English by picture
- e. Learning English by large group
- f. Learning English by small group
- g. Learning English by movies and videos

Detailed information of the students learning need can see in the following table:

b. The Data Obtained Through Interview Guide

There are five components of the questions used as interview guide: (1). Are you interesting to learn English in Management Department? : a. not interested, b. less interested, c. interested, d. very interested, (2). In your opinion how important learning English in Management Department? : a. not important, b. less important, c. important, d. very important, (3). In your opinion, what is your goal to learning English: a. For the success of my education, b. To get a job, c. To visit other countries, d. For continuing study, (4). How important your Reading, Speaking, Listening, and Writing skills to improve your English ability in Management Department?. (5). Do you think the vocabulary should be given in each topics?.

The interesting in learning English is very important because it could increase the students' motivation when they learnt. An example of why learning English is interested because it is challenging to be learnt. This reason is supported by some followed statements:

As followed from Mutiarasani statement:

I choose very interested because in my opinion, first I like to learn English although I have not mastered it. Second, because English is related to my major; Management.¹

The second came from Cici by supporting Mutiarasani statement:

I am interested because at the end of my study I will enter the business world so I must master English in order to go abroad so that I could interact with new people.²

Additional statement which interested in learning English is very important because it is very important to learn English. As followed from Riska's statement:

I believe with learning English, it will help me a lot for my future job.³

The importance level of learning English is variated. In management department for example, most of the student see English is very important because it could help the students whether to increase their knowledge or implement it for their future job. All of these reasons were proved in followed statement:

^{1.} (Mutiarasani, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

^{2.} (Cici, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

^{3.} (Riska, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

As followed in Mutiarasani statement:

It is very important to learn English because there will be some materials or objects that contained English in Management Department whether in learning program or job environment.⁴

Supporting Mutiarasani statement, Cici stated that:

Learning English is very important because we need to learn and understand it for operate some programs that using English which related for my future job.⁵

The last statement came from Riska, she stated that:

We should master English if we want to work in Management major, especially in marketing Management.⁶

To be much concerned why learning English is important, it will guide to several aims for future planning. English could be used as the media to communicate or it could be a reason to get a job easily. These aims are proved by followed statements:

Mutiarasani wants to learn English so that she can get a job someday, as proved in her statement:

By mastering English, it would be easier to get a job.⁷

Addition for Mutiarasani statement, Cici thought that mastering English could also help her to achieve her dream which she want to go abroad. As stated in her statement:

⁴. (Mutiarasani, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

⁵. (Cici, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

⁶. (Riska, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

⁷. (Mutiarasani, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

Get success in education is good for now, we can get some achievement. If I and my friends keep improving to master English, it will be easier to get a job someday, moreover in accounting. We also can continue our magister in abroad, because I myself dreamed to visit many countries, do business with many people and get success.⁸

Different with Mutiarasani and Cici statement, Riska gave more focuses on her Speaking improvement. As stated in her statement:

If I mastered English, someday I could speak with tourist as well as I could also promote my products on the field.⁹

The four skills that integrated with English language competence are very important to be learnt. Students sometimes found difficulties in vocabulary or speaking. Although students found some obstacles when they learnt it, but they still have one favorite skill as motivation to keep learning English. This is proved by followed statements:

I think it is very important because if you cannot read English correctly, you will get problems in the meaning. Moreover, if you don't master English you will difficult when speak with native speaker. So, all skills are very important, it's all related each other.¹⁰

In my opinion, it is very important to master all the skills. I love learning English since childhood, even if I have not mastered it well but I try to master it until the completion of my study so that I can be success in the future. The importance of Reading skill, if we read some paragraph in English, the way it was written is different when we read it. When we can read it correctly it will be good, but when we do not know how to read it correctly people will be laughed because the missed-meaning. Speaking skill is also important because some word in Indonesia is different with English, for example the "R" word. That's why learning Speaking

⁸. (Cici, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

⁹. (Riska, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

¹⁰. (Mutiarasani, 2nd semester of student of Management Department of STIE YPUP Makassar, interviewed on June 15th, 2017)

skill is important in order to speak like a native speaker. Listening skill is important to be learn too, because we can found some obstacles in what we hear with what we write because of less ability, so I think all skills are very important.¹¹

The four skills in English are very important. The skill that I like most is Reading, because I love to read even I have not master English yet.¹²

The obstacle that students got in learning English was lack of vocabularies. That is why with adding vocabularies will help the students to learn English well. This reason approved in followed statement:

I think vocabularies should be served in each topic. It will be better if we required memorizing the vocabulary that related with the lesson to increase the vocabulary.¹³

That is good if there is vocabulary in each topic, it will help us to understand the lesson.¹⁴

With the help of the vocabularies, it would help us to add more vocabularies comprehension that related with our vocational; Management.¹⁵

framework for English language competence based on syllabus. The conceptual framework illustrates the key elements which underline the syllabus content.

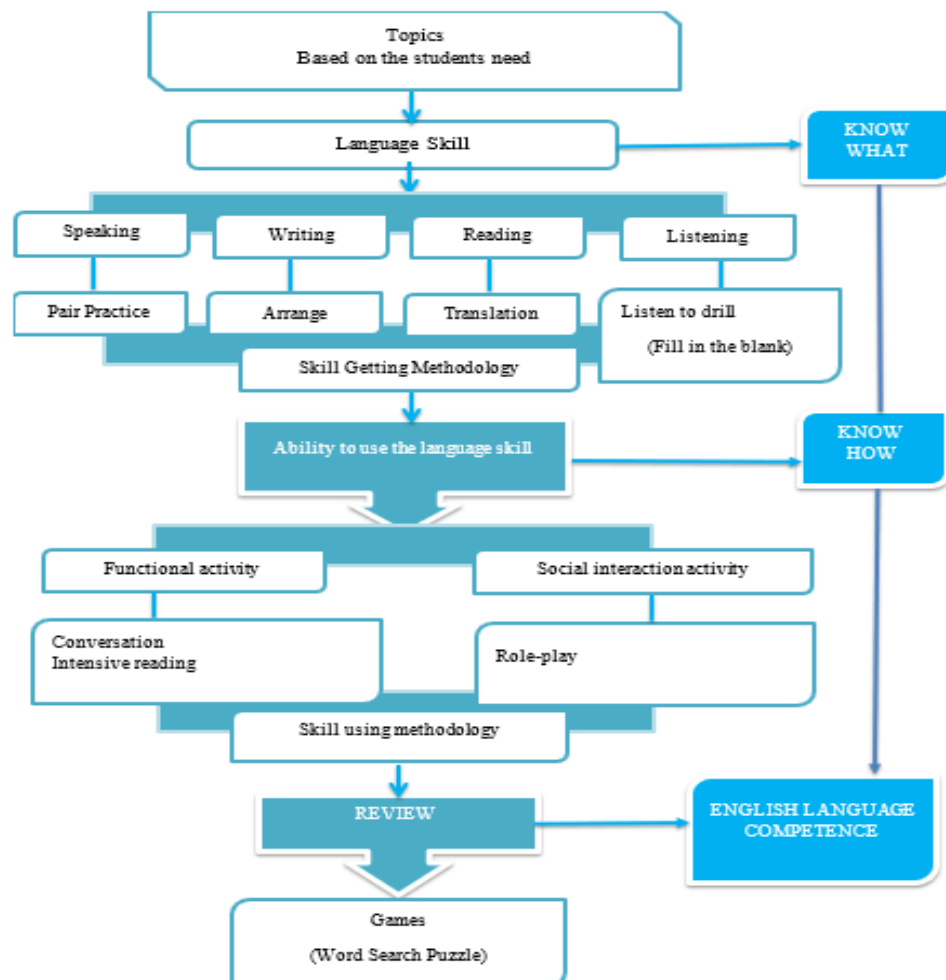

Figure 4. *A Framework for English Language Competence based Syllabus*

In order to create learning opportunities based on students need, the syllabus must be contains of three main pedagogical procedures i.e:

a. Providing Language Skill

In this procedure, the researchers prepared the learners with English integrated skill namely; speaking, reading, listening, and

writing which composed English language ability for later English material and worksheet. Afterwards, a set of activities to make the students able to know and to practice the knowledge (skill getting methodology) must be given such as preparing a topic to be read and then answered associated with the management department, arranging the words to complete sentences for writing drill, providing a dialogue script to practice their speaking within specific language grammar rules in pair, and getting the student watch or listening to the audio for listening comprehensiveness skill. These activities may be viewed as skill getting methodology.

b. Giving Opportunity to Use the Integrated Skill

In this phase, the researcher tried to connecting between the students' needs and their potential functional and social interactional activity. Therefore the functional activity and interactional activity must be given. Functional activity aimed at equipping students with the ability to function the integrated skill in conversation, intensive reading, arrange word, and fill in the blank.

On the other hand, the social interaction activity is intended to give the students stimulus for implementing the integrated skill with several methods such as role play and discussion in which the students must interact each other using a certain situation

provided by the researchers. These activities functions as skill using methodology.

c. **Reviewing Learning Outcomes**

This procedure is aimed at reviewing the students' achievement in English language competence by giving tem an interactive for each unit e.g. "word search puzzle". Through this game, the students will have opportunities to express their knowledge of language in a particular topic, ability to know specific vocabulary for management department.

Conclusively, the organizational structures of the syllabus framework have been used to develop English materials and worksheets. The English materials and worksheets are planned by units in which unit represent topics and consist of three pedagogical procedures. This procedure identified as skill setting, skill using and review.

2. Stating Goals

This lesson prepared for the students to be able to mastering the four skills effectively and confidently in apply the English language. This lesson can increase the students' ability in Speaking, Reading, Listening and Writing. After learning this lesson, the students expected to be able:

- a. Practice the conversation effectively with their friend.

- b. Understand the passage and answer the question related with the passage.
- c. Fill in the blank test based on the recording audio.
- d. Arrange the provided words into the correct sentence.

3. Material Sequence

In the topics that the researcher develops, the material sequence consists of four skills. They are speaking, reading, listening, and writing. As a learning method, the researcher used one kind of a learning method in each skill. In speaking material, the researcher use conversation between two speakers, aimed to develop the students speaking ability by practicing the conversation effectively with their friends. In reading material, the researcher use passage which is consists of vocabulary and comprehension to increase the students reading ability by understanding the passage and answer the question related with the passage.

While in the listening skill the researcher use fill in the blank style to increase the students listening ability by filling in the blank test based on the recording audio. In writing material, the researcher use arrange word to increase the students' writing ability by arranging the provided words into the correct sentence.

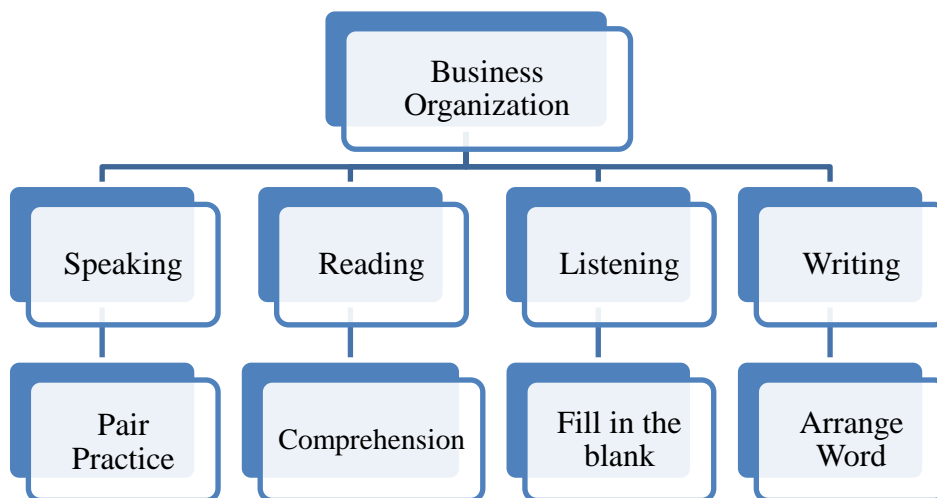

The learning method which is used by the researcher aimed to enhance the students' skills in English (speaking, reading, listening and writing).

4. English Materials and Worksheets

This part consists of two product design which was designed by the researcher. First is Business Organization. Second is Taxes.

Speaking

Role Play

In this section, the lecturer divided the students into two groups. The woman group act as a presenter and the man group act like a Mark.

Business Angel

Presenter : Welcome to this week's program. With me, he is Mark Fletcher, a business angel. Mark, can you explain what a business angel is.

Mark : Yes, well it sounds like someone who is altruistic, but in fact a business angel expects to make a good return on their money. We usually invest in start-up and small business looking to expand. When, the company does well we expect our capital back with a substantial return. Sometimes, we group together to make a syndicated deal.

Presenter : How do you decide who to invest in?

Mark : I go very much by gut feeling .Of course I need to see business plans, but if I think the company is producing something that there's a market for, and if I think the owners have the drive and ambition to do well, then I'll put my money on.

Presenter : The last, you invested your money, is that it or do you have any further involvement in the company?

Mark : I'm very much a hands-on investor. Before I became a business angel I ran several successful business which I then sold on, so I've got plenty of experience and I like to help companies develop and expand. Sometimes I'll expect to become a director of the company. Other times I concentrate on giving financial advice. The great advantage is that I can see what is happening to my money.

Presenter : Thank you very much, Mark. Now if anyone is interested in contacting a business angel, you can find out more on our website. (Fade out).

READING

A. Read the Passage Carefully

Types of Business Organization

It is important that the business owner seriously consider the different forms of business organization—types such as sole proprietorship, partnership, and corporation. Which organizational form is most appropriate can be influenced by tax issues, legal issues, financial concerns, and personal concerns. For the purpose of this overview, basic information is presented to establish a general impression of business organization.

Sole Proprietorship

A Sole Proprietorship consists of one individual doing business. Sole Proprietorships are the most numerous form of business organization in the United States, however they account for little in the way of aggregate business receipts.

Partnership

A Partnership consists of two or more individuals in business together. Partnerships may be as small as mom and pop type operations, or as large as some of the big legal or accounting firms that may have dozens of partners. There are different types of partnerships—general partnership, limited partnership, and limited liability partnership—the basic differences stemming around the degree of personal liability and management control.

Corporation

Corporations are probably the dominant form of business organization in the United States. Although fewer in number, corporations account for the lion's share of aggregate business receipts in the U.S. economy. A corporation is a legal entity doing business, and is distinct from the individuals within the entity. Public corporations are owned by shareholders who elect a board of directors to oversee primary responsibilities. Along with standard, for-profit corporations, there are charitable, not-for-profit corporations.

Reading

A. Read the following passage

TAXATION

Taxation is a system of raising money to **finance government**. All governments **require** payments of taxes from people. Governments use tax **revenues** to pay government employees, soldiers, and police, to build infrastructure, provide public facilities, to operate schools and hospitals, to provide medical care to the poor, and for hundreds of the purposes. Without taxes to fund its activities, government could not exist.

Taxation functions **primarily** to raise revenue to finance government **expenditure**, but taxes can also have other purposes. Indirect tax duties, for example, can be designed to **discourage** people from smoking, drinking alcohol, and so on.

There are various ways of avoiding tax on profits done by companies. Firstly, making a tax loss is done by bringing forward capital expenditure so that at the end of the year all the profits have been used up. Secondly, tax **havens**, that is, countries where multinational companies often set up their head offices because taxes there are low. Thirdly, money laundry, i.e. criminal organizations pass money through a series of companies in very complicated transactions in order to disguise its origin from tax inspectors and the police.

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

1. The English materials needed by the students of Management Department at STIE YPUP consists of four components such as (1) Financial: Banking, Budgeting Organization, Taxes, and Insurance; (2) Businesses: Business Organization, Business Law, Business Letter and Official Travel; (3) Trading: Export-Import, Bargaining, Advertising, E-Commerce, and Macro-Micro Economic; (4) Islamic Economic.
2. The development of English materials for students of Management Department at STIE YPUP includes conceptual map, goals, materials sequence, English materials and worksheet, and additional task.
3. The expert validation for the development of product such as English materials and worksheet have been very well designed due to the following reasons.

B. Suggestions

Based on the conclusions above, the researcher would like to give suggestions as follows:

1. It is suggested to the English lecturer to use a worksheet which appropriate with the learners' need in their department. Not only that, but also the English lecturer should be known what the learners' need for their department in English lesson. In addition, the product of this research can

be used as primary references in teaching and learning English for students of Management Department.

2. It is suggested to the students of Management Department to use the product of this research as a primary worksheet for English lesson in their department.
3. It is suggested to the next or further researcher to conduct a research by using research and development method. While for development model, the next or further researcher can use ISD (Instructional System Design) model if the next or further researcher want to develop printed materials such textbooks, module, worksheet, etc. ESP (English for Specific Purposes) can be used as an approach to develop a product because it can make a product suites with the English lesson. In addition, the researcher hopes for the further researcher to implementation this product because the researcher had a limited time in this research.

THE STUDENTS INTERVIEW TRANSCRIPT

TRANSKRIP INTERVIEW SISWA

NAMA : MUTIARASANI

UMUR : 21

Sangat Tertarik

Alasannya saya pilih sangat tertarik kenapa karena menurut saya, pertama itu bahasa Inggris memang saya suka walaupun saya tidak tau yang kedua memang bahasa Inggris ini berhubungan sama manajemen.

Penting

Alasannya Bahasa Inggris itu akan ada di manajemen baik itu dalam lingkungan pekerjaan nanti atau mungkin sementara dalam studi pasti ada Bahasa Inggris.

Tujuan : untuk mendapatkan pekerjaan

Alasannya : pasti dalam pekerjaan

Menurut saya sangat penting ya karena pertama kalau tidak bisa baca Bahasa Inggris otomatis tidak pintar Bahasa Inggris juga apalagi kalau tidak bisa mendengar orang mengucapkan Bahasa Inggris itu juga sangat penting itu berhubungan semua itu berkaitan semua dengan Bahasa Inggris.

Penambahan kosa-kata

Menurut saya harus alasannya karena dari diri saya sendiri kurang kosa-kata. Menurut saya setiap pembelajaran itu harusnya diharuskan menghafal kosa-kata yang berhubungan dengan pelajaran untuk memperbanyak kosa-kata.

NAMA : CICI

UMUR : 22

Sangat tertarik

Alasannya karena pada saat misalnya nanti selesai pendidikan terus masuk dalam dunia bisnis harus menguasai Bahasa Inggris bisa go internasional supaya bisa berinteraksi dengan orang-orang di luar negeri.

Sangat penting

Alasannya karena dimana-mana yang dibutuhkan itu selalu yang paling utama Bahasa Inggris yang pertama supaya orang bisa lebih berkomunikasi cepat mengerti karena kebanyakan program-program menggunakan Bahasa Inggris.

Kalau menurut saya, diantara pilihan itu saya memilih semuanya.

Alasannya kesuksesan untuk pendidikan sekarang juga bagus pendidikan sekarang bisa berprestasi dan teman-teman yang lain kalau menguasai Bahasa Inggris terus lebih mudah mendapatkan pekerjaan apalagi di bagian utamanya di bagian akunting walaupun kita lihat dari bagian jurusan manajemen kita menggunakan Bahasa Inggris apalagi punya cita-cita mengunjungi negara lain untuk berbisnis menjadi saat sukses di negara lain kalau bisa melanjutkan pendidikan S2 itu di luar negeri menggunakan Bahasa Inggris.

Kalau saya menurut saya sangat penting kemampuan untuk membaca, berbicara, mendengar dan menulis karena memang dari kecil saya suka Bahasa Inggris walaupun sekarang saya tidak terlalu menguasainya tapi saya berusaha untuk menguasainya sampai penyelesaian pendidikan agar kedepannya bisa lebih sukses lagi. Pentingnya skill membaca, jadi kalau kita membaca Bahasa Inggris kalau kita tau itu banyanya seperti apa kan tulisannya dengan cara bacanya kalau kita baca dengan benar kan bagus karena kalau di salah di baca na ketawaiki orang bilang tidak sesuai. Skill berbicara juga kalau Bahasa Inggris tidak terlalu kentara "R" nya kalau orang Indonesia itu terlalu kentara "R" nya berbicara. Jadi berbicara sangat penting supaya bisa berbicara ala orang barat. Skill mendengar menurut saya juga sangat penting walaupun kita biasa mendengar tapi kita menulis tidak sesuai dengan yang di dengar karena kurang mampu, jadi menurut saya sangat penting itu.

NAMA : RISKHA

UMUR : 20

Tertarik

Alasannya karena masa sekarang ini bahasa Inggris sangat penting digunakan dalam kehidupan sehari-hari. Contohnya dalam pekerjaan, mengetahui bahasa Inggris itu sangat membantu pekerjaan di bidang manajemen.

Penting Sekali Belajar Bahasa Inggris

Alasannya pekerjaan di bidang manajemen itu mesti menguasai bahasa Inggris, terlebih bila berada di bidang manajemen pemasaran.

Tujuan: Berbicara dengan Turis/Bule, Mempromosikan produk sesuai bidang pekerjaan

Keempat skill dalam bahasa Inggris sangat penting. Skill yang disukai READING.

Kesulitan dalam kosakata, terlebih saat mengucapkan. Dengan adanya bantuan kosakata, membantu menambah jumlah pemahaman kosakata yang berkaitan dengan kejuruan.

Speaking

Role Play

In this section, the lecturer divided the students into two groups. The woman group act as a presenter and the man group act like a Mark.

Business Angel

Presenter : Welcome to this week's program. With me, he is Mark Fletcher, a business angel. Mark, can you explain what a business angel is.

Mark : Yes, well it sounds like someone who is altruistic, but in fact a business angel expects to make a good return on their money. We usually invest in start-up and small business looking to expand. When, the company does well we expect our capital back with a substantial return. Sometimes, we group together to make a syndicated deal.

Presenter : How do you decide who to invest in?

Mark : I go very much by gut feeling .Of course I need to see business plans, but if I think the company is producing something that there's a market for, and if I think the owners have the drive and ambition to do well, then I'll put my money on.

Presenter : The last, you invested your money, is that it or do you have any further involvement in the company?

Mark : I'm very much a hands-on investor. Before I became a business angel I ran several successful business which I then sold on, so I've got plenty of experience and I like to help companies develop and expand. Sometimes I'll expect to become a director of the company. Other times I concentrate on giving financial advice. The great advantage is that I can see what is happening to my money.

Presenter : Thank you very much, Mark. Now if anyone is interested in contacting a business angel, you can find out more on our website. (Fade out).

READING

A. Read the Passage Carefully

Types of Business Organization

It is important that the business owner seriously consider the different forms of business organization—types such as sole proprietorship, partnership, and corporation. Which organizational form is most appropriate can be influenced by tax issues, legal issues, financial concerns, and personal concerns. For the purpose of this overview, basic information is presented to establish a general impression of business organization.

Sole Proprietorship

A Sole Proprietorship consists of one individual doing business. Sole Proprietorships are the most numerous form of business organization in the United States, however they account for little in the way of aggregate business receipts.

Partnership

A Partnership consists of two or more individuals in business together. Partnerships may be as small as mom and pop type operations, or as large as some of the big legal or accounting firms that may have dozens of partners. There are different types of partnerships—general partnership, limited partnership, and limited liability partnership—the basic differences stemming around the degree of personal liability and management control.

Corporation

Corporations are probably the dominant form of business organization in the United States. Although fewer in number, corporations account for the lion's share of aggregate business receipts in the U.S. economy. A corporation is a legal entity doing business, and is distinct from the individuals within the entity. Public corporations are owned by shareholders who elect a board of directors to oversee

primary responsibilities. Along with standard, for-profit corporations, there are charitable, not-for-profit corporations.

Reading

A. Read the following passage

TAXATION

Taxation is a system of raising money to **finance government**. All governments **require** payments of taxes from people. Governments use tax **revenues** to pay government employees, soldiers, and police, to build infrastructure, provide public facilities, to operate schools and hospitals, to provide medical care to the poor, and for hundreds of the purposes. Without taxes to fund its activities, government could not exist.

Taxation functions **primarily** to raise revenue to finance government **expenditure**, but taxes can also have other purposes. Indirect tax duties, for example, can be designed to **discourage** people from smoking, drinking alcohol, and so on.

There are various ways of avoiding tax on profits done by companies. Firstly, making a tax loss is done by bringing forward capital expenditure so that at the end of the year all the profits have been used up. Secondly, tax **havens**, that is, countries where multinational companies often set up their head offices because taxes there are low. Thirdly, money laundry, i.e. criminal organizations pass money through a series of companies in very complicated transactions in order to disguise its origin from tax inspectors and the police.
